

Chapter 118: My Genes Evolve Infinitely

0 METERS HIGH BUILDING

During the process of going downstairs, Lu Yuan encountered two more rooms, but the rooms had already been opened, which was obviously opened by the Kaman before.

There is nothing in it.

Soon, Lu Yuan came to the first floor.

The lobby on the first floor was a bit dim, and there was the gate not far away. Lu Yuan walked out and came to the road.

The road is almost thirty meters wide.

A team of six mechanical guards was patrolling not far away. After seeing Lu Yuan, their mechanical eyes flashed red.

‘Di! Di! Found a life form! Confirmed as an enemy! Perform cleaning procedures!’

The guns in the hands of the six mechanical guards were raised, energy gathered, and blue energy projectiles shot towards the landing edge.

The speed of the energy bomb is very fast, and the power fluctuation is not weak.

However, there is no threat to Lu Yuan.

He didn’t even evade, letting the energy bomb fall on him.

Boom boom boom!

The roar sounded, and the aftermath of the explosion of the energy bomb dispersed.

Lu Yuan rushed out of the blue energy explosion. The dark red blade in his hand swung across the body of the six mechanical guards and directly chopped them into several pieces.

The broken body of the mechanical guard had electric currents rushing around, making a sizzling noise.

Six white light clusters appeared in the sky.

Lu Yuan walked over and picked up all the light groups.

He discovered that all the light clusters were actually spiritual power gene fluids.

Lu Yuan's eyes lit up.

real or fake ?

Does every mechanical guard drop out spiritual power gene fluid ?

It is indeed a relic world that can make the entire Baiyunzhou first-order genetic warrior crazy. This resource is also too rich!

Maybe he can not only refine the 'seed of nature' to perfection, but also charge a wave, and directly evolve the light of red copper after the breakthrough.

Even he can be bolder to assume, maybe he has the spiritual power to evolve the seed of nature to the lord level, and then evolve the newly recorded genes again ?

Lu Yuan moved towards Mei Shi in his heart, and began to move in Amy's direction.

Along the way, Lu Yuan encountered many mechanical guards on the street.

The power of the energy guns of these mechanical guards is about the same as the full blow of the first-order intermediate elite fighters, and there is no weaker one.

may be very dangerous for an average genetic warrior, but for Lu Yuan, he can't even break the defense.

Lu Yuan faced the energy bomb and went straight up to chop off all the mechanical guards.

Just as Lu Yuan had guessed, every mechanical guard would drop a spiritual power gene fluid.

In just a short time, Lu Yuan harvested hundreds of spiritual power gene fluids, which he absorbed all, and continued to improve his tempering degree.

In addition to the mechanical guards, Lu Yuan also encountered many genetic warriors of other races.

Elves, cats, kobolds, humans, etc., there are quite a few.

There will be battles every some distance.

Some are fighting between genetic warriors and mechanical guards, and some are fighting between genetic warriors.

Lu Yuan also successfully killed many genetic warriors and obtained several spiritual power genetic fluids.

Lu Yuan is not surprised at all that there will be so many genetic warriors here.

After all, the entire Baiyunzhou contains more than a dozen races, and each of these races has a large number of genetic warriors.

Although not all first-tier fighters will enter the El Mechanical Ruins.

But the vast majority of genetic warriors know that their strength is weak, and they will come in to win.

Anyway, after death, at most, he cannot enter the land of origin for a period of time.

The practice speed will slow down a bit.

This loss is acceptable to the vast majority of Tier 1 fighters.

On the other hand, if your luck is against the sky and you get treasures here, you can fly into the sky.

Therefore, I am afraid that the vast majority of Tier 1 fighters will enter the El Mechanical Ruins.

There are hundreds of millions of first-order fighters.

Of course, the ordinary patrolling mechanical guards here have the combat effectiveness of the first-tier intermediate elite level.

I am afraid there are only a few first-order fighters that can survive.

With the initial chaos, the remaining genetic warriors all have a few brushes.

either found a companion and acted together, or he was a real genius strong.

.....

More than an hour later, the sound of fighting around Lu Yuan was much less than when it was at the beginning.

The vast majority of genetic warriors who planned to come in to try their luck have already left.

was either cleared by the mechanical guards, or encountered the strong and was hunted and looted.

Lu Yuan also hunted down almost a hundred genetic warriors of various races.

Of course, if the opponent is human, as long as the opponent does not attack Lu Yuan, Lu Yuan will not attack.

After all, it is destined to meet the same clan here.

It's a pity that most of the humans who met along the way saw Lu Yuan, and most of them would still take the initiative to attack, and Lu Yuan sent them out casually.

On the street, Lu Yuan ran forward all the way.

When he ran to a corner area, he suddenly stopped.

He raised his head and looked not far away. Among the steel buildings about 30 to 40 meters high, there was a black and white tall building standing above a hundred meters high.

Lu Yuan's eyes lit up, revealing a look of interest.

In the AI Machinery Ruins, the taller and larger the steel building is, the more precious the treasures that may exist in it.

This one-hundred-meter-high building is already the tallest building Lu Yuan has encountered nearby.

Lu Yuan intends to go in and take a look.

Just when Lu Yuan was about to move, the shadow of a tall building on the edge of Lu Yuan fluctuated, and an elf girl in black leather armor rushed out of the shadow.

She holds two daggers in her hands, with a sharp killing intent in her eyes.

The dagger pierced the back of the neck that was not covered by Lu Yuan's armor.

As the dagger approached the back of the neck, a hint of surprise flashed in the eyes of the elf girl.

It's done!

Her first-order combat skills are at the boss level and are extremely destructive. The genetic warrior who was assassinated by her is simply hard to defend!

On the way, with her stealth combat skills and powerful attacks, she hunted down many genetic warriors.

Ding!

At this moment, the dagger fell on the back of Lu Yuan's neck, making a crisp sound.

The feeling of piercing the indestructible steel made the elf girl's smile stiffen and her pupils shrank sharply.

What kind of defense is this? !

Her scalp was numb, and she almost didn't even think about it. Her slender waist was folded back in an exaggerated range, and her body didn't need to stop as if she jumped back.

However, just less than one meter away from her, a dark red sword light flashed by. The consciousness of the elf girl plunged into darkness.

Lu Yuan was holding the Dark Red Blade. He turned around at this moment, looking at the corpse on the ground, with a hint of surprise in his eyes.

The strength of this elf girl is a bit strong.

Lu Yuan's current perception ability is actually not weak anymore.

but still did not find this invisible elf girl.

Lu Yuan didn't perceive the danger until she showed her figure and started to assassinate.

Moreover, her combat skills are still quite powerful, stabbing him in his neck can make him feel pain.

This elven girl may have burned the boss-level gene.

The corpse of the elven ** the ground turned into white light and dissipated, leaving a pile of aura gene fluid on the ground.

Lu Yuan's eyes lit up, revealing a hint of surprise.

He picked up the thing, 78 in total.

In addition to these aura gene fluids, Lu Yuan also obtained one other item.

That is a red hexagonal metal column.

The message appeared in Lu Yuan's mind.

X211 flame grenade: The explosive power is equivalent to a full blow of the second-tier low-level boss.

Lu Yuan looked at the grenade, his pupils contracted slightly.

is actually equivalent to a blow to the second-tier low-level boss?

If he is blown up frontally, even with his current defensive ability, he will be injured.

The harvest of this elven girl is really good.

Sure enough, her strength is quite strong.

Unfortunately, she was unlucky and met Lu Yuan.

Lu Yuan smiled and collected all the fallen items, and continued to move towards the one-hundred-meter-high building, absorbing all the spiritual power gene liquid along the way.

.....

The one-hundred-meter-high building is surrounded by low steel buildings, and in front is a small square with a radius of more than two hundred meters.

There is a team of mechanical guards patrolling near the square, there are as many as ten teams.

Every mechanical guard seems to have more sophisticated weapons than the mechanical guards patrolling the streets.

At the entrance of the tall building, there was a mechanical warrior standing more than three meters high with a giant steel axe on his back.

This steel warrior just stood there, giving people a strong sense of oppression.

There is the only street outside this square, and three teams on one side of the street are watching each other vigilantly.

In their distance, there were corpses of various races.

It is natural that these people cannot be the only ones who discovered this 100-meter-high building, but the others have already died in their hands.

The three teams are six kobolds, five Kamans, and seven green demon men with two bends. They are only about 1.5 meters tall and have green skin and red eyes.

Kobolds, Kamans and Green Devils face each other in a triangle, and the atmosphere is calm.

They looked at each other with vigilance and cold killing intent in their eyes.

After the atmosphere fell silent, the huge kobold who was more than two meters tall and holding a black iron rod showed a smirk:

‘There is not much difference between our strengths, confrontation here can not solve any problems, it is just a waste of time. Every minute and every second in the ruins is very precious, you don’t want to spend it here, right?’

The Kaman headed by is a warrior armed with a giant axe. He looked at the kobold coldly:

‘What do you want to say?’

The kobold smiled and said, ‘I mean, let’s work together to kill all these mechanical guards, and after we conquer this tall building, we will use our own abilities to fight for the loot. What do you think?’

The green demon headed by is holding a faint green staff, and there is a green mist flowing around.

He looked at the kobold and then at the Kaman, some shrill voices sounded:

‘Who knows if you will stumble in secret?’

The Kaman also looked at the kobold and the green demon with a little distrust.

After all, this is the remains of Aier’s machinery. There may be a lot of good things in the 100-meter-high building. They are all different races and don’t even know each other. How can they easily believe the words of a stranger.

These three teams have shown great strength before, and they are full of jealousy in each other’s hearts.

‘My name is Yuwu, and I am the third son of the chieftain of the Ironfang tribe. In the name of the Ironfang tribe, I promise that before we conquer this tall building, our kobolds will never do anything wrong with our allies.’

Yuwu grinned and said with a grin:

‘We don’t have much time, don’t forget, this area is not only us people, no one can guarantee that there will be no other strong people coming. Every second we waste here, the greater the change. When the time comes, The treasure inside may not necessarily belong to us! Are you just waiting like this?’

Hearing Yuwu’s words, both the Kaman and the Green Demon’s eyes flickered.

This is what they worry about.

There are too many genetic warriors who have come to El Mechanical Ruins.

Although a large number of weak guys were eliminated at the beginning, there are certainly not a few strong ones left.

Even, there may be a stronger existence than them.

If someone else is looking at this tall building, they will have to face more opponents.

The atmosphere fell silent, and the leader of the Kaman took the lead and said:

‘Then cooperate! My name is Bam!’

The red eyes of the leader of the green demon flashed with light, showing a wretched smile:

‘My name is Ning Na, I have a good cooperation.’

Yu Wu breathed a sigh of relief, and a smile appeared on his face.

‘Very good! The mechanical warrior guarding the goal looks very strong, but with the strength of our three teams, it should not be difficult to break this tall building.’

‘It’s not too late, then do it!’

Bam said eagerly.

Ningna nodded, just when he was about to speak, everyone’s face changed slightly and they turned to look at the street behind him.

In the distance of the street, a human man in black armor ran over all the way.

Seeing this human man, all three teams were taken aback.

Yu Wu showed a smirk:

‘Human? Still alone? Do you dare to come over?’

Bamu held the battle axe in his hand:

‘Kill him, then act quickly, lest more people come over.’

Ningna smiled, and a green light appeared on the staff in UU reading www.uukanshu.com.

The next moment, a green arrow shot towards the human being in the distance.

.....

Luyuan approached the 100-meter-high building along the street, and found that the closer to the 100-meter-high building, the fewer the surrounding streets.

As if all the branch streets were converging towards the main street, soon there was only one avenue left.

Lu Yuan trot all the way along the avenue, and saw a dozen genetic warriors gathered at the end of the avenue.

These genetic warriors split into three parties and looked at each other.

Lu Yuan raised his eyebrows, did not stop, and continued to approach them.

Judging from his feelings, these three teams don't seem to threaten him much.

He plans to finish all three teams after he passes, and then go to the tall building.

Just a few steps after Lu Yuan ran, a green arrow shot towards Lu Yuan.

It was the green demon who launched the attack.

Lu Yuan was taken aback.

He hasn't attacked yet, these people actually hit him first.

Lu Yuan raised the corners of his mouth, showing a slight smile.

not bad.

He clenched the dark red blade, his feet exploded.

Boom!

A cobweb-like crack appeared on the ground, Lu Yuan's speed skyrocketed, and his figure flickered, avoiding the green arrows, and rushing towards the three teams.
