

Chapter 120: My Genes Evolve Infinitely

RICH HARVEST

‘I don’t believe you can break my defense now!’

Ning Na saw the smile on Lu Yuan’s face, panicked, and pretended to be calm on the surface.

Lu Yuan showed a kind smile, bathed in the energy bomb, and stretched out his hand to flick the amethyst shield.

‘So this thing is so defensive? Let me try to see the effect.’

‘what do you want to do?’

Ningna panicked even more.

Lu Yuan didn’t answer, but drew his foot heavily on the amethyst shield.

Boom!!

The amethyst shield was not broken, but Ningna flew directly.

Ningna’s eyes widened and his face was stunned. Together with the amethyst shield, he turned into a 1.5-meter ball and flew towards the mechanical guard who was constantly shooting.

Boom!!

The Amethyst Shield hit two mechanical guards heavily, and the two mechanical guards were knocked upside down by the powerful force and flew out and landed on the square more than ten meters away.

The terrifying force destroyed their mechanical bodies, and two mechanical guards lay on the ground with electric sparks flickering on their bodies.

The other mechanical guards immediately switched their attacks, venting all their firepower on the purple ball that attacked them.

Boom boom boom! !

The energy bomb landed on the amethyst shield, making a roar, and the aftermath raged, but it could not break the amethyst shield.

Inside the shield, Ning Na recovered, his face turned greener with anger.

‘Damn human! You dare to insult me so much!’

was kicked as a ball!

Ningna has never been treated like this since childhood.

He is also a true genius among the green demons, and he is usually respected and admired.

How can you be so embarrassed like now ?

Just when Ning Na was full of anger, Lu Yuan had already rushed in front of him and smiled kindly at Ning Na.

In Ning Na’s horrified eyes, Lu Yuan raised his foot again and kicked.

Boom! !

The purple ball flew out again, crashing several mechanical guards.

Ningna had just landed from the sky, and then Lu Yuan had appeared in front of him again, and continued to let him take off.

Boom!

Boom!

Boom! !

In the air, a purple energy ball kept flying, crashing each mechanical guard.

Inside the amethyst shield, Ning Na looked unlovable.

He can't even get angry anymore.

What's the use of ?

Inside the amethyst shield, he couldn't even attack this ** human being.

If the Amethyst Shield was cancelled, he would be killed by this ** human in an instant.

This is the place of chance in the relics of Aier's machinery, only once in 50 years of origin!

If you can, Ning Na doesn't want to die, but wants to get more resources.

He kept comforting himself, and swallowed his breath.

As long as this ** human being can't break the defense of the Amethyst Shield, he will still have a chance!

trust yourself!

There is hope!

Soon, Lu Yuan used the amethyst ball to kick all the mechanical guards to a blast.

On the square and on the street, there are lying scrapped mechanical guards, and there are light groups floating in the air.

Lu Yuan didn't care about the harvest on the ground, but looked up at the mechanical warrior at the gate of the 100-meter-high building.

From the very beginning, Lu Yuan was wary of the mechanical warrior, but during the battle, the mechanical warrior stared at Lu Yuan firmly and did not launch any attacks.

Lu Yuan guessed that the program of this mechanical warrior was to guard the gate and not let anyone in.

Unless someone wants to enter the door, I'm afraid he won't attack anyone.

The tall mechanical warrior looked very oppressive, and Lu Yuan was also a bit unsure of his strength.

But, he has a good way to test the strength of this mechanical warrior.

Lu Yuan looked down at Ning Na who was unlovable.

Ningna noticed Lu Yuan's gaze and looked up at him.

Then, he seemed to understand something, turned his head to look at the mechanical warrior at the gate, his face changed, and he quickly said:

'Human! What do you want to do?!'

Lu Yuan grinned: 'I want to do what you guessed in your heart.'

Ningna's face changed drastically:

'Wait! Don't mess around! I warn you, don't mess around! You're messing around! I'm really angry! I'm really angry! Did you hear that! Did you hear that!'

Lu Yuan has no rationale for Ning Na, the past is just a kick.

Boom! !

The amethyst ball turned into a streamer, and flew towards the mechanical warrior with great vigor.

Ningna's face in the sky turned black.

'Damn human! You devil!!!'

He stared at the mechanical warrior raising his battle axe with wide eyes, a flash of horror flashed in his eyes.

praying that the strength of this mechanical warrior has not reached the second level.

There was a purple electric current flowing at the joints of the mechanical warrior's body, and a terrifying force burst out, and the battle axe slashed towards the amethyst ball.

Boom! !

The amethyst ball was instantly knocked off and hit the ground, smashing cracks in the metal ground.

After landing, the amethyst ball bounced again, and then hit the far wall hard.

After , he landed on the wall and bounced on the ground a few times before he stopped.

Inside the shield, Ning Na glanced at the amethyst shield with a slight crack, and then at the mechanical warrior who had not been chased out at the gate, both rejoicing and horrified.

Fortunately, this mechanical warrior has not yet reached the second-order strength.

The shocking thing is that this mechanical warrior already has the ability to break the shield!

As long as you keep attacking, you will always break the shield.

If the shield breaks, he will undoubtedly die.

At this time, Lu Yuan came over.

Ningna became nervous all at once, his eyes flushed red, and he roared:

‘Human! What else do you want to do?!’

What he fears most now is that this ** human continues to kick him as a ball to that mechanical warrior.

Then he will be played to death sooner or later.

Lu Yuan glanced at the nervous Ning Na and smiled slightly:

‘Don’t worry, I can’t kill this mechanical warrior if I kick you over, so I won’t kick you.’

Ningna breathed a sigh of relief, then sneered:

‘If you are willing to let me go, we should be able to defeat this mechanical warrior together. Then I can not have the treasure inside, but you have to let me go!’

Lu Yuan glanced at Ning Na weirdly, and smiled:

‘What are you thinking? Look down on me like that? This mechanical warrior can’t stop me.’

As soon as the sole of his foot stepped on the ground, a cobweb-like crack appeared on the ground, and his body disappeared in place, instantly appearing in front of the mechanical warrior.

The eyes of the mechanical warrior were red, and the mechanical sound rang:

‘Drop! Confirm the target! The target is extremely dangerous! Eliminate immediately!’

Zi! !

There was a sound of electric current, and blue electric currents flashed on the giant body of the mechanical warrior, which was more than three meters high, and the electric current entangled the tomahawk of the mechanical warrior.

The horrible aura surged, causing the hair on the back of Ningna in the distance to explode.

The previous attack of the mechanical warrior didn’t use all his strength? !

He watched the battle, with a hint of joy in his heart.

If this ** human dies, he can run away.

However, Ning Na opened his eyes wide in the next second.

The epee in Lu Yuan's hand collided with the battle axe.

Amidst the cries of gold and iron, the mechanical warrior actually took a step back.

But Lu Yuan did not take a step back.

'How can this be?!'

Ningna growled in disbelief.

'The power displayed by this mechanical warrior is already the peak level of the first-order boss, even close to the lord level, right?! How could it not be this human opponent?!'

In the distance, after Lu Yuan repulsed the mechanical warrior, he twisted his waist and swung his sword horizontally again.

The mechanical warrior battle axe moves to the next gear.

锵!!

The huge body of the mechanical warrior flew out towards the side.

After flying a few meters, the mechanical warrior staggered to the ground.

And Lu Yuan was already approaching again at this moment, and the heavy sword slashed with endless swords, slashing towards the mechanical warrior again and again.

The mechanical warrior was suppressed in an instant, losing streak and retreating.

In the distance, Ning Na looked at this scene with a doubtful expression on his face.

He didn't expect Lu Yuan to be so powerful.

But soon, Ningna recovered.

His eyes lit up, revealing a hint of excitement.

Now this ** human being is still entangled with the mechanical warrior, he can take advantage of this time to escape!

swallowed his breath, finally waiting for the only chance!

Ningna was full of excitement.

He strode hard and ran towards the street.

However, he had just run more than ten meters, and an afterimage appeared in front of him.

Before Ningna could see clearly, he flew out with an amethyst shield.

In the distance, the mechanical warrior's battle axe entwined with Thunder cut down.

Boom! !

Ningna flew upside down again and hit one wall.

He was a little horrified to find that there were several more cracks on the amethyst shield.

And Lu Yuan's indifferent voice rang in his ear:

'I wanted to wait to deal with you later, since you want to run away, it's better to deal with you now.'

The next moment, Ning Na found that he was flying again.

The direction of flying is of course the direction of the mechanical warrior.

Ningna looked horrified as the mechanical warrior slashed on the amethyst shield again.

Boom! !

The amethyst shield shattered, and the battle axe fell on Ning Na's body, cutting him off.

The blood was floating in the air.

Lu Yuan glanced at the corpse that had fallen in the distance, then turned to look at the mechanical warrior rushing towards him.

He showed a slight smile: 'It's almost over.'

This mechanical warrior was a bit resistant, and he smashed Lu Yuan several times.

However, even if it is a mechanical body, there are limits.

Lu Yuan once again greeted the mechanical warrior.

Boom boom boom! !

Two figures, one large and one small, collided, and the roar continued.

After more than a dozen rounds, Lu Yuan fell on the mechanical warrior's waist with another sword.

Click!

A fierce crack finally opened at the waist of the mechanical warrior, and blue-violet electric sparks flickered.

The body of the mechanical warrior gave a stop.

Lu Yuan took the opportunity to cut again and again, continuously cutting at the cracks in the mechanical warrior's body.

Boom boom boom! !

The gap in the mechanical warrior continued to expand, and eventually fell heavily to the ground, with a series of electric sparks emerging from his body.

His mechanical eyes that were flashing red light became dim, and the roaring mechanical sound also stopped.

Lu Yuan looked at the fallen mechanical warrior and exhaled slightly.

The strength of this mechanical warrior is stronger than that of the Earth Fire Armored Dragon he encountered during Lu Yuan's test.

If it were Lu Yuan at that time, he would still find it a bit difficult to deal with, but unfortunately he is no longer what he used to be, and his current strength is much stronger than before.

Light groups appeared on the mechanical warrior.

Two cyan and one green.

Not only that, there is a rough stone.

Lu Yuan's eyes lit up and a smile appeared.

This is the third first-order rough he has obtained.

One step closer to the goal of breaking through.

Lu Yuan put the rough stone away first, and then looked at the other light clusters.

Two cyan light groups, one inside is a set of steel armor.

Mechanical Fanatic Battlegear (First Tier 100%): Boss-level battlegear, which mainly improves strength, secondly improves physical fitness, and slightly improves agility.

This is a first-tier 100% tempered boss-level battle armor, which is much better than the battle armor on his body.

The armor on his body is still a set of 100% refined armor.

Lu Yuan quickly blessed this suit.

After changing into the Mechanical Fanatic Battlegear, Lu Yuan found that his strength had improved a bit.

As for the other light group, it turned out to be an extraordinary gene at the boss level.

Combat Skill: Thunder Slash

Lu Yuan recalled the thunder light attached to the mechanical warrior's battle axe.

This is obviously a powerful attack type combat technique, very powerful, and can be accompanied by the power of thunder.

Lu Yuan intends to keep it for now. At that time, whether it is for his own use, or take it back to school to sell the credits, or even use it for auction to exchange for Lingjing.

But what Lu Yuan actually wanted more were those rarer and more extraordinary genes.

For example, space-based, time-based, and so on.

If there is nothing else, it is not impossible to use it.

As for the green light group, there are ten optimized spiritual power gene fluids.

This is an advanced version of the spiritual power gene liquid.

Lu Yuan drank one, and found that the spiritual power inside was more convenient to absorb, and the amount was ten times that of ordinary spiritual power gene liquid.

can be said to be equivalent to 1000 first-order spiritual crystals.

Ten branches are equivalent to 10,000 first-order spiritual crystals, which can be said to be quite rich spiritual resources.

After finishing all the items dropped by the mechanical warrior, Lu Yuan went to pick up the items dropped by the genetic warrior.

Those genetic warriors are not weak and have gained a lot.

Together, there are close to one thousand spiritual power gene fluids, which is equivalent to one hundred thousand first-order spiritual crystals, and it is a generous income.

Lu Yuan happily put everything away by himself.

As long as these spiritual power gene fluids are absorbed.

His seed of nature gene is closer to Consummation.

Then, Lu Yuan entered the 100-meter-high building.

There is still a staircase going up in the 100-meter-high building.

Lu Yuan glanced at the top, as if there was only one room on the upper floor.

He went up the stairs ~www.mtlnovel.com~ and soon came to the door of the room.

opened the door of the room and Lu Yuan walked in.

In the center of the room, Lu Yuan saw rows of densely packed potions, all of which emitted a faint green light.

His eyes lit up and he walked over.

After checked, Lu Yuan showed ecstasy.

As expected, all are optimized spiritual power gene fluid!

He counted, there are a total of five hundred bottles!

If converted into spirit crystals, it is equivalent to a full 500,000 first- order spirit crystals!

This is a great harvest!

Even Lu Yuan was extremely excited.

With so many spirit crystals, his seed of nature gene must be completed soon.

Moreover, he can even recharge the spirit crystal and evolve the next gene!

Without a word, he put away all the optimized spiritual power gene liquid.

After that, Lu Yuan went out and walked a bit upstairs until he reached the top of the building. Lu Yuan didn't find any other rooms, so he had to go downstairs.

However, Lu Yuan was already very satisfied.

Just a one-hundred-meter-high building has the harvest of 500,000 first-order spirit crystals.

There are many hundred-meter-high buildings in the entire mechanical city.

There are even taller buildings 500 meters or even kilometers taller. What good things must there be?

let alone a floating city!

Lu Yuan was full of expectations.
