

Chapter 125: My Genes Evolve Infinitely

SPECIAL KILL METHOD

Hearing this, the originally greedy genetic warrior looked at them coldly, his eyes full of anger.

‘Who do you say is waste?!’

‘Speak straight if you want to die! I will send you away from the ruins now!’

‘...’

The two sides stared at each other, not giving way to each other.

However, at this time, the green light ball and cyan light ball on the square had been picked up by several girls.

All the rest are white light balls.

Compared with the green light group and the cyan light group, the white light group has little attraction to them.

There is no need to risk this thing.

The genetic warriors who originally wanted to go on for a fight turned back their gazes.

The condensed atmosphere on both sides dissipated.

It didn't take long for Amy to open her eyes, with a ruddy face on her pretty face, she jumped up from the ground with a smile.

‘Recovered! How? Lei Feng! Was this lady very good before? This lady killed half of the mechanical guards alone.’

Lu Yuan nodded seriously, ‘Amy is the best!’

‘Huh~ of course.’

Amy raised her head triumphantly.

Soon, Lin Xixi and the others also recovered.

Several people opened their eyes and stood up.

Lu Yuan saw that everyone had recovered, so he smiled and said:

‘Since everything has recovered, let’s start dealing with the mechanical boss.’

Amy looked at the five-meter-high mechanical leader and the four mechanical giant dogs, thought about it, and said:

‘Lei Feng, do you want people below the boss level to withdraw from the battlefield?’

Lu Yuan thought for a while and nodded: ‘Well, let them withdraw from the battlefield. Below the boss level, there is indeed no way to break the defense of this mechanical leader.’

So, except for Lin Xixi, Zhu Yu and a brown-haired girl named Mary, everyone else stayed away.

Lin Xixi is a warrior who uses a longbow, Zhu Yu is a warrior of the assault system who uses a long sword, and there is another one named Mary, who is an elemental warrior.

Lu Yuan glanced at Zhu Yu, and thought for a while: ‘Wait, you pay attention to hide behind me, don’t be touched, your small body may be touched by the mechanical leader and disappear.’

Zhu Yu’s eyes widened, and weakly raised his small hand: ‘Then, then, can I go to the spectator group?’

Lu Yuan’s face turned dark.

Good fellow, it’s the first time he has seen such a cowardly boss warrior.

Amy is also akimbo: ‘No way!’

‘Oh...’

The five people walked towards the gate, and all the genetic warriors on the tall buildings were shocked when they saw this.

They looked at the five members of Lu Yuan with a hint of excitement in their eyes.

‘here we go!’

‘With their strength, they should be able to deal with this mechanical leader, right?’

‘This is not necessarily true. Have you forgotten that someone challenged the mechanical leader before? Several boss-level fighters did not even break the defense.’

‘Whether it’s done or not, let’s watch it first.’

Everyone nodded.

Lu Yuan and several people came to a position about a hundred meters away from the mechanical leader and stopped.

Lu Yuan clenched the epee in his hand and looked at the mechanical leader:

‘Amy, can you control that mechanical leader?’

Amy raised her eyebrows and hummed softly:

‘Of course you can! You underestimate this lady again!’

Lu Yuan nodded: ‘Since you can control it, let’s deal with the four mechanical dogs first.’

Amy raised her little hand: ‘I can still control two dogs.’

Lu Yuan glanced at Amy in surprise.

Control one boss and two bosses at the same time.

This control ability is too great.

He gave Amy a thumbs up.

The corners of Amy’s mouth raised, her small face full of triumph.

‘That’s easy. Kill the robot dog first, then the robot leader. Amy, go on.’

Amy nodded, a solemn look appeared on Qiao’s face.

Her little hand opened, and her spiritual power surged, and a series of Tianluo Wisteria shot out, shooting towards the mechanical leader and mechanical giant dog in the distance. There were dozens of Tianluo Wisteria, densely packed.

When Tianluo Wisteria approached the mechanical leader and the mechanical giant dog, their eyes turned red and the alarm sounded.

The mechanical head received the steel giant sword with its lower back behind, and roared and swung the giant sword. With a black light on the giant sword, it slashed towards Tianluo Wisteria.

嗤！

The sword light flashed, the giant sword could not cut the Tianluo Wisteria, but the violent power swept the Tianluo Wisteria aside.

The four giant mechanical dogs also roared and avoided.

However, Tianluo Wisteria’s speed was very fast, a giant mechanical dog was entangled by Tianluo Wisteria and retreated, and the speed stagnated.

In the next moment, Tianluo wisteria wrapped around its body and tied it into a zongzi.

Amy in the distance was dissatisfied, she frowned:

‘The power of this mechanical leader is a little bit big. I want to tie him a little bit harder, Lei Feng, you can help me drag him, just drag him, I can tie him!’

Lu Yuan smiled: ‘Okay.’

His soles stepped on the ground, and his body instantly turned into streamer, rushing towards the mechanical leader and the remaining three giant mechanical dogs.

A blue electric current flickered all over the mechanical leader, and a white crystal shield appeared on his body.

He swung the epee in his hand, constantly resisting the Tianluo Wisteria, and at the same time rushed towards Amy's direction.

is not only the mechanical leader, but also the remaining three giant mechanical dogs, swiftly avoiding Tianluo Wisteria while rushing towards Amy.

However, because Tianluo Wisteria is too dense, their approaching speed is very slow.

All the genetic warriors on the high building saw this scene, their eyes widened, and they were a little shocked.

A Kaman warrior exclaimed: 'Even the mechanical leader couldn't cut the wisteria?! What kind of combat technique is the wisteria? So tough!'

'It's true, it's the leader-level combat power, but the combat skills are still used, and even the wisteria can't be cut?'

'Look at the giant mechanical dog that was tied up. It can't even move now! It has been bombarding the wisteria on its body with energy bombs, but it has no effect. This is terrible!'

The eyes of many genetic warriors looking at Amy were full of fear and shock.

On the square, Lu Yuan quickly rushed to the front of the mechanical leader.

The mechanical leader's crimson mechanical eyes noticed that Lu Yuan's whole body current became stronger a little bit. A violent black light emerged from the epee in his hand. He clenched the epee with both hands and slashed towards Lu Yuan.

The body of the mechanical leader is more than five meters high, which is twice as high as Lu Yuan. The epee is also more than four meters long, and it looks like a giant sword is attacking a baby.

Lu Yuan clenched the epee tightly, feeling the sharp sword wind, and narrowed his eyes slightly.

Hei Gang Jin ran at its full strength, and Lu Yuan burst out with the strongest strength, raising his sword to meet the mechanical leader's epee.

The two heavy swords collided, and the large and the small figures collided together.

锵!

A fierce roar sounded, and the bodies of Lu Yuan and the mechanical leader stepped back at the same time.

‘hiss...‘

Upstairs, a group of genetic warriors took a breath.

‘Even evenly divided! This human being is indeed a leader-level combat power!’

Beman said with shock in his eyes.

Although I had guessed before that Lu Yuan’s strength might have reached the leader level.

But after all, they haven’t really fought against the leader level, and they are still a little bit suspicious in their hearts.

Now, all doubts are gone.

can equal the power of the leader-level, this powerful sword cut, what is it not the leader-level?

Everyone’s eyes flashed at this moment, watching Lu Yuanyuan.

Several human genetic warriors kept looking at the warriors of the same race and asked:

‘Who is this boy?! Does anyone know him?’

‘Yes, since we are human beings, and the strength is so strong, wouldn’t it be unknown, right?’

‘No matter who it is! Remember what he looks like, and report to an adult after going out. Be sure to contact him, and best let him join us!’

A human warrior flashed his eyes, each with his own thoughts.

The genetic warriors of other races also remember Lu Yuan and Amy thoroughly at this moment.

They wrote down their appearances and prepared to go out and notify others when that time comes.

Especially races that are hostile to humans, such as kobolds, have cold eyes. Looking at Lu Yuan and Amy, their eyes are full of jealousy.

At this moment, all the genetic warriors' faces condensed, and their eyes widened again, with surprise flashing in their eyes.

In the square below, because the mechanical leader paused for a moment, it has been like a poisonous snake lurking, and the ready-to-go Tianluo Wisteria burst forth for the first time, and more than 20 Tianluo Wisteria instantly wrapped around the mechanical leader's crystal shield. Above.

Almost instantly, the entire crystal shield was wrapped in it, and the tall mechanical leader followed in the footsteps of the giant mechanical dog and was tied into a dumpling.

‘Tethered!’

Seeing this scene, the genetic warriors who were watching the show exclaimed.

They stared at the purple vine, with curiosity in their eyes.

‘The next step is to see if the mechanical leader can tear the Tianluo wisteria.’

‘I don't think it's possible! The mechanical leader just used combat skills and failed to cut the Tianluo Wisteria, not to mention that he is now ** and unable to attack.’

Under the gaze of everyone, Tianluo Wisteria vibrates constantly, but no matter how it vibrates, the Wisteria can still be firmly tied to the body of the mechanical leader, binding him in place.

‘Can even the mechanical leader be trapped? It's terrible!’

Seeing this scene, everyone seems to have seen the defeat of the mechanical leader.

The mechanical leader was trapped, and three mechanical giant dogs remained.

They had already rushed to Lu Yuan's body, opened their mouths, and rushed towards Lu Yuan.

Lu Yuan faced the three giant mechanical dogs, his expression unchanged.

He swung the epee in his hand.

锵锵锵!

Three giant mechanical dogs were knocked out.

Two of the giant mechanical dogs were ** by the long-awaited Tianluo Wisteria as soon as they landed. The remaining two giant mechanical dogs slid on the ground for several meters, and there were more sword marks on their bodies.

One-on-three, attacked Landing Yuan, and the three giant mechanical dogs were still injured by the counterattack.

After all, it's just a boss.

Lu Yuan turned into streamer and rushed to the remaining two giant mechanical dogs.

The two giant mechanical dogs opened their mouths, and there was energy in their mouths.

Boom!

Two huge energies ejected towards Lu Yuan.

Lu Yuan did not hide, holding the epee and smashing two energy bombs.

He rushed to the front of a giant mechanical dog, and slashed the head of the giant mechanical dog with the heavy sword in his hand.

A crystal shield similar to the mechanical leader appeared on the body of the mechanical giant dog.

Boom!

The heavy sword slashed on the shield, and the shield suddenly appeared cracks, which burst open in an instant.

Then the heavy sword continued to slash at the body of the giant mechanical dog.

The giant mechanical dog flew out by a huge bombardment and fell heavily.

The giant mechanical dog that landed struggled to stand up. At this moment, a white arrow and an ice gun shot from a distance, and landed on the giant mechanical dog's head, which had been cracked.

Boom!

The roar sounded, and the head of the giant mechanical dog was frozen first, and then shattered by a white arrow.

The giant mechanical dog that had lost its head suddenly stopped moving.

is Lin Xixi and Mary in the distance.

At this moment, the remaining mechanical giant dog has rushed in front of Lu Yuan, opened its claws like a dagger, and struck Lu Yuan's neck.

锵!

The claws seemed to touch steel, sparks flew everywhere, and stopped abruptly.

Lu Yuan grabbed the robotic dog leg of the giant mechanical dog with his arm force, and pushed the giant mechanical dog to the ground.

Boom!

After licked, Lu Yuan was still not satisfied, and continued to smash it on the ground.

Boom boom boom!

The giant mechanical dog roared and wanted to struggle, but its claws scratched on Lu Yuan's body. Lu Yuan didn't respond at all, and the energy ejected on Lu Yuan's body unharmed.

After several consecutive smashes, the mechanical giant dog's body malfunctioned, the electric sparks kept flashing, and its movements became lighter and lighter.

Gradually, it stopped completely.

Everyone on the tall building saw Lu Yuan's violent actions, and their mouths twitched.

Especially the genetic warrior who wanted to grab something from Lu Yuan before, now his scalp is tingling.

asked myself, they still don't have the strength of the giant mechanical dog and the powerful mechanical body.

If you change it to them, I'm afraid it won't be smashed a few times, and it will be completely cold, right?

After killing the two giant mechanical dogs, Lu Yuan looked at Amy.

Amy nodded, and released another giant mechanical dog.

As soon as this giant mechanical dog saw the outside world, a sword light flashed, and then accompanied by white arrow light and ice spear, it said goodbye to the world.

The same goes for the last mechanical giant dog. U U Reading www.uukanshu.com

When the last mechanical giant dog died, only the largest mechanical leader was left.

Everyone is staring at the mechanical leader at this moment.

Amy grinned and said: 'I will loose the Tianluo Wisteria on its head, Lei Feng, you will cut it with his head!'

Lu Yuan's eyes lit up and he grinned: 'No problem.'

Soon, Amy removed the Tianluo Wisteria from the head of the mechanical leader, revealing the huge head of the mechanical leader.

The red eyes of the mechanical leader flickered, struggling, but still unable to break free.

Lu Yuan grinned and walked to the head of the mechanical leader, raised the heavy sword and chopped it down.

Boom! !

The epee collided with the crystal shield and made a roar.

The crystal shield of the mechanical leader is much stronger than the mechanical giant dog.

Lu Yuan's full slash once again only caused the crystal shield to shake.

But Lu Yuan didn't care, anyway, the mechanical leader could only stare at him.

Lu Yuan smiled and continued to chop on the crystal shield.

Boom boom boom!

There was a continuous roar.

A group of genetic warriors on the high platform watched as the mechanical leader was ** by Tianluo Wisteria. Lu Yuan cut the crystal shield again and again in the same place, and his brains were full of question marks.

special, can you kill the mechanical leader like this? !

You are like this, let others play a fart? ? ?
