

Chapter 126: My Genes Evolve Infinitely

LEADER-LEVEL EPEE, ENTRY FEE

boom!

Boom!

Boom! !

There was a constant roar from the square, and the mechanical leader's crystal shield was very strong.

Under Lu Yuan's full attack, he blocked nearly a hundred times before being broken.

Lost the defense of the crystal shield, Lu Yuan's epee slashed on the head of the mechanical leader every time.

After more than ten attacks, the head of the mechanical leader shattered, and his red eyes dimmed.

Mechanical leader, death.

All the genetic warriors on the high building were silent as they watched the easy killing process.

After was silent, someone whispered:

'Is this too outrageous?!'

'Yes, at this point, the two of them are invincible together. The human teenager first went up to block the leader's attack. The human girl took the opportunity to restrain the leader, and then the stakes were driven.'

'Yes, if that human teenager can stop the lord's attack, and that human girl can keep the lord from being attacked, wouldn't it be difficult for the lord to escape their kills?!'

Everyone looked at each other, and they all felt chills in their hearts.

The performance of these two people is too ridiculous.

'Something went out!'

I don't know who said something, everyone looked at the body of the mechanical leader.

On the corpse, more than a dozen light ** appeared.

There are seven green light groups, three cyan light groups, and one light group flashing beautiful and deep blue.

Everyone was breathing fast, staring at the blue light group.

Someone even had a rolling throat and couldn't help swallowing.

'Boss-level items!'

The eyes of most genetic warriors are extremely greedy.

Even some mechanical warriors who hadn't shown greed before, stared straight at the blue light ball at this moment, and their breathing became heavy.

This is a boss-level item!

If it is genetically armed.

As long as a first-order fighter, even an elite fighter, as long as he blesses this leader-level weapon, he can be compared with a boss-level fighter.

If the boss-level fighters bless the boss-level weapons, they can even play a few tricks with the boss-level fighters.

Such precious genetic weapons, who doesn't want it?

If it is not a genetic weapon, but an extraordinary gene, it will be even more precious.

Leader-level transcendent gene, that can create a true leader-level warrior!

As long as you have this talent, you can burn this gene!

Even if you can't use it and sell it, you can get millions of first-order spirit crystals!

Millions of first-order spirit crystals!

With so many resources, general genetic warriors can break through from Tier 1 fighters to Tier 3 warlords or even Tier 4 warlords without worrying about resource issues.

One-stop service, proper.

One can imagine how precious this is.

Only very few people can face the boss-level treasures and calm down.

After the atmosphere fell silent, a Kaman with blood streaks in his eyes roared.

‘They must have consumed a lot of spiritual power to kill the mechanical leader! Go! Go grab the leader-level item!’

He rushed down first.

After the Kaman charged up, half of the genetic warriors present rushed down.

The powerful temptation brought by the leader-level items made them extremely greedy, lost their reason, and completely forgot the powerful strength of Lu Yuan and Amy.

I just thought that if you can grab this boss-level item, you can fly into the sky and become a real powerhouse!

There are some genetic warriors left. Although some are a little moved, they are still sane.

They glanced at Lu Yuan and Amy in the distance, and suppressed their greed.

There is also a small group of genetic warriors looking at the blue light group enviously, but they have no idea of rushing down.

Elf boy Beman looked at the genetic warriors who rushed down, his mouth raised, showing a sardonic smile:

‘It’s so naive...’

Mei Li beside also smiled and nodded:

‘They don’t want to think about that mechanical leader, they dare not even face it, how could they be the two human opponents who can kill the mechanical leader.’

The human man who spoke before took a deep breath, suppressed his desire, shook his head and smiled:

‘Too much profit temptation can make people lose their minds.’

Lu Yuan and Amy saw the death of the mechanical leader, and smiles appeared on their faces.

was about to pick up something, they saw a group of genetic warriors rushing down.

Lu Yuan's face was taken aback, and Amy's purple Kazilan eyes flashed with anger.

'A group of robbers! You are looking for death!'

Amy's hands shot out a series of Tianluo wisteria, turning into a large purple net covering all genetic warriors.

And Lu Yuan directly bent over and picked up all the light ** first.

Even if they robbed them, Lu Yuan would kill them and explode things.

But Lu Yuan didn't want them to get it.

After putting away all the light balls, Lu Yuan coldly looked at the genetic warrior rushing over from Tianluo Wisteria, with a sneer on his face.

He swung the epee in his hand, the sword light flashed across the air, and his figure flashed, instantly killing each genetic warrior, and the blood stained the ground.

There were more than two hundred genetic warriors who rushed down this time.

But facing the angry Lu Yuan and Amy, they were killed almost in a short moment.

Looking at the corpses all over the floor, the genetic warrior who was still eager to move seemed to be calmed down by a basin of cold water.

Seeing that no one was coming down, Amy snorted and put away the Tianluo Wisteria.

She ran up to Lu Yuan with expectation in her eyes:

'Lei Feng, look at what that boss-level item is!'

You must know that the lower the level, the more rare the items with higher quality.

If it is Tier 3 or even Tier 4, then there will be more boss-level fierce beasts, and there will be more boss-level items.

But the number of first-tier boss-level beasts is extremely rare, and boss-level items are naturally more precious.

After all, things are rare and expensive.

Even as Fuloli, Amy is very interested in boss-level items.

‘I will disappoint you this time.’

Lu Yuan raised his brows, with a smile in his eyes, and took out the blue light ball.

Inside the light group, a huge black metal epee floats.

This shape is exactly the epee in the hands of the mechanical leader before.

Chief-level genetically armed epee!

Mechanical Guardian (First Tier 100%): Leader-level weapons.

mainly improves strength and defense, secondly improves agility, and slightly improves spirit and perception.

The most important thing is that this mechanical guardian epee comes with a special ability. After inputting spiritual power, it can enter the overload mode for three minutes, and each attack will increase its power by about 50%.

You must know that Lu Yuan’s current strength coupled with Hei Gangjin, his attack power is also very strong in the leader level, and it is not weaker than the strong offensive fighters.

Increase by 50%, how strong is that?

is almost unimaginable.

Amy saw that it was an epee, and her face fell all of a sudden, and her mouth appeared:

‘Huh! Why isn’t it a staff or something?’

Lu Yuan smashed the light ball with a smile, and the mechanical guards turned into a stream of light, which merged into Lu Yuan’s body.

The dark red blade phantom that originally circled the landing edge gene chain was squeezed out, and the mechanical guardian replaced the dark red blade phantom.

Suddenly, Lu Yuan felt a powerful force melt into his body, and his flesh and blood bones were greatly strengthened almost in a short period of time.

Strength and defense have increased by nearly 50%, and agility is also increased by nearly 50% because Lu Yuan’s speed itself is not strong.

The only thing with less improvement is that Lu Yuan’s originally stronger mental power and perception ability have only improved by less than 10%.

Hmm... The reckless man is properly armed.

A surprise appeared in Lu Yuan's eyes.

Is this the power of the leader-level armament?

With his current leader-level combat power, he can improve so much.

Of course, this was also because the dark red blade used by Lu Yuan before was relatively weak, otherwise the improvement would not be so great.

Lu Yuan put the Dark Red Blade away and planned to collect it. After all, this was the weapon he had used himself.

Then he took out several boss-level and elite-level light balls.

'There are more of these.'

The leader-level light regiment has an armored armor, but the armor Lu Yuan currently uses is the leader-level armor, so there is no need to change it.

Lu Yuan can't use the others.

As for the elite class light group, all are some optimized spiritual power gene liquid.

Lu Yuan smiled and said:

'I took the leader-level epee, and these are yours.'

Amy nodded: 'Yeah.'

The two are regarded as a cooperative relationship. If they have their own needs, they naturally take it by themselves, and the rest will be compensated for each other.

To be honest, the mechanical guardian epee Lu Yuan took was several times more expensive than all these things combined.

But Amy didn't say much, she was Fuloli herself, and she didn't lack this.

The only thing she wants is a boss-level weapon that suits her.

Even if the Abigail family is a big family, it is not easy to find a complete set of first-tier boss-level weapons that suits you.

Amy took the things and put them away.

Then she looked at the tall buildings with a look of expectation in her eyes.

‘There must be something good in it.’

Lu Yuan also showed expectation: ‘Don’t you know if you go in and take a look?’

‘Um.’

Lu Yuan and Amy led Lin Xixi and others in and pushed open the door, and walked in.

Inside the gate is the hall of a 100-meter-high building.

Different from the general 100-meter-high building, there are two doors on both sides of the hall and one door on the inside.

Lu Yuan looked at the three doors and said:

‘The doors on the left and right should go to the 100-meter-high building on the side, and the door on the inside should lead to the 500-meter-high building.’

Amy nodded and looked at Lu Yuan: ‘Well, where shall we go first?’

Lu Yuan thought for a while, and was about to speak when suddenly a voice came from outside the door:

‘A few friends, can you wait for a while?’

Lu Yuan raised his eyebrows slightly, turned his head and looked in the direction of the door.

Amy and Lin Xixi also looked over.

Amy’s little face is still wary, for fear that someone will ** her baby.

Outside, there are dozens of genetic warriors of various races.

Headed by is a burly young human man, beside him, there is a handsome elven boy.

Lu Yuan glanced across the crowd and said:

‘What’s the matter with you?’

The burly young human man with a smile on his face, said:

‘Good for you two, let me introduce myself. I am Xu Qi from the Tianfu Consortium. This is the case. The two plan to go to Floating City after collecting the treasures in this tall building?’

Tianfu Consortium?

Lu Yuan thought of Liu Xi who had met in Shayan City before, and he nodded: ‘Yes.’

‘Well... can we go up with you then? The floating city is very large. Your manpower should not be enough to explore the entire area. We only need to explore the marginal area. It will not hinder you.’

Hearing this, Lu Yuan raised his eyebrows slightly.

Amy turned her head to look at Lu Yuan and blinked: ‘Lei Feng, what do you think?’

Lu Yuan glanced over a group of genetic warriors, thought about it, and then smiled:

‘You can go up with us, but each person pays 1,000 psychic power gene liquid, which is an entry fee.’

‘1000 psychic gene fluid for one person?’

The burly man and others were all taken aback, showing a hint of hesitation.

1,000 psychic gene fluids are equivalent to one hundred thousand first-order spiritual crystals!

This is just one person!

Even though I have been here for four days, the team present must have gained a lot, and these spiritual power gene fluids can still be obtained.

But it was enough to make them hurt.

The burly man smiled bitterly:

‘This friend, 1,000 psychic gene fluids, isn’t it a bit too much?’

A Barrow man behind the burly man called:

‘Yeah, this is too much, a little bit less, human beings, how about paying 500 for each of us?’

Lu Yuan smiled and said:

‘A lot? The mechanical guards outside are all cleaned by our team. Without us, you wouldn’t even have the chance to get started. What’s more, if you want to go to the floating city, you need to take an aerial elevator. The only controller is in a kilometer high building. Inside, it will be in our hands at that time. You want to go up, and the entry fee is not too much, right?’

‘this.....’

Everyone hesitated.

Lu Yuan smiled: ‘The resources in the floating city are much more than those in the ground city. It is only 1,000 spiritual power gene liquid. Don’t you have the confidence to earn it back? If it weren’t for our lack of manpower, I wouldn’t let you in.’

Lu Yuan is telling the truth, a floating city is too big.

Lu Yuan, Amy, and Lin Xixi together, there are no twenty people.

If you want to completely scrape a floating city, then you don’t need to go to other places, just stay here for the remaining eight days.

Lu Yuan’s idea is to hunt down the leader of the floating city first, scrape the core area clean, and then go to other core areas of the floating city.

Finally, they have to go to the central area.

I really can’t waste too much time in a floating city.

It’s better to give the opportunity to others, charge some entry fee, and still have a wave of income.

Everyone was silent.

They also knew that Floating City was a big cake, and the reason why Lu Yuan and the others would let them in was also because of their lack of manpower.

Such an opportunity ~www.mtlnovel.com~ If it is placed on other teams with a large number of people, it will not be their turn at all.

After being silent, the elf boy Beman smiled and said:

‘1000 spiritual power gene fluid per person, deal! Take us up then.’

Lu Yuan glanced at the elf boy and smiled:

‘No problem, it’s done.’

Seeing that Beman had agreed, Xu Qi also nodded:

‘We can too.’

Seeing that Xu Qi and Beman both agreed, the others also agreed.

Lu Yuan smiled: ‘Then you have to wait outside now, we have to search this high-rise area first.’

Xu Qi smiled and nodded: ‘We can understand, we will wait outside.’

Lu Yuan looked at Lin Xixi: ‘Xixi, you can take other people to guard here, just go up with Amy and I.’

Lin Xixi was taken aback, glanced at Amy, and Amy nodded: ‘Listen to Lei Feng.’

Then, Amy looked at Xu Qi and others, her big eyes turned slightly, and she grinned:

‘I will add a door for you!’

said, one by one Tianluo wisteria spread, blocking the gate, leaving only a few gaps.

Xu Qi and Beman outside the door looked at Tianluo Ziteng, their eyes jumped.

Not to mention that they didn’t have the intention to go in, even if they did, it would be impossible to break the door woven by Tianluo Wisteria.
