

Chapter 130: My Genes Evolve Infinitely

FLOATING CITY, EVOLUTION CUBE VIBRATION

laugh! !

The door of the sky elevator opened, and Lu Yuan and Amy and his party got out of the elevator first.

is Xu Qi and others.

After everyone got out of the elevator, Lu Yuan looked at Xu Qi and the others and smiled:

‘The transaction has been completed. Next, we are going to the core area. As for you, please feel free.’

After Lu Yuan paused, he continued to speak: ‘By the way, we will return here later, and then leave the floating city. If you want to go out with us at that time, just wait here in advance.’

Hearing what Lu Yuan said, Xu Qi and others couldn’t help but laugh when they looked at each other.

Beman smiled and said:

‘Mr. Lei, you joked. With our strength, we can stay in the floating city until the end of the ruins. We will not go down.’

‘Yes, Mr. Lei, for us, this is already the best resource point.’

Hearing this, Lu Yuan was also surprised.

What they said was true, he thought too much, and thought everyone would go to other floating cities.

This floating city alone is enough for them to explore.

Lu Yuan thought about it, and said:

‘In this case, after we get down, I will bring the controller of the air elevator, so that no other team will come up. You can search for resources here with peace of mind.’

Xu Qi and others were taken aback when they heard Lu Yuan’s words, and then they showed a pleasant smile.

‘Thank you Mr. Lei! If Mr. Lei comes to our elven green jade planet in the future, he must come to us. I will treat Mr. Lei well.’

Beman put an armrest on his chest, bowed slightly to Lu Yuan, and gave an elf’s universal gratitude.

‘Mr. Lei is righteous, thank you Mr. Lei. Our Tianfu consortium also owes Mr. Lei a favor.’

Xu Qi and others are also grateful.

After all, if Lu Yuan puts down the aerial elevator and another team comes up, it is to grab resources from them.

If you encounter a strong team led by a leader-level boss, then they are simply a turtle in the urn, and there is no place to run.

Lu Yuan obviously took this into consideration.

Because of this, everyone is moved.

Lu Yuan smiled, it was just easy for him.

Since the entry fee is paid, it is regarded as after-sales service.

‘That’s it, you guys come on.’

Lu Yuan took Amy and the others away, and walked out of the square.

Looking at Lu Yuan, Amy’s big purple eyes kept blinking.

Lu Yuan was taken aback, looking at Amy speechlessly:

‘Why look at me like this?’

Amy thought for a while, smiled and said: ‘Although Lei Feng, you are a ignorant guy, you didn’t expect to be a good person.’

Lu Yuan: ‘???’

He said he was innocent.

Where is he missing? !

He is still a virgin, right?

If he really didn’t know what to do, he would already be a girl killer.

After all, after he became a genetic warrior, he didn’t know how many girls had contacted him.

When they heard Amy’s words, Lin Xixi was taken aback, and then looked at Lu Yuan vigilantly.

‘I don’t know where to check?’

Zhu Yu’s eyes flashed with gossip, he looked at Lu Yuan and then at Amy.

Lin Xixi frowned and looked at Lu Yuan coldly: ‘Mr. Lei, what did you do to our lady?!’

‘???’

Lu Yuan felt that he was more wronged than Dou E:

‘I didn’t do anything! If you don’t believe me, ask Amy!’

Lu Yuan looked at Amy, but found Amy’s pretty face flushed, and kept looking around:

‘Ah...yes! How could Lei Feng do to this lady?! If he dares to do anything, this lady will kill him!’

While talking, Amy squeezed her little hand tightly and twisted it into a ball.

Lu Yuan: ‘.....‘

Are you blushing? !

Then Lu Yuan suddenly thought of what happened in the kilometer-high building before.

pill...

He feels his head is huge.

Then Lu Yuan felt the cold gaze coming from the side.

Lin Xixi stood silently in front of Amy, like an old hen protecting her calf:

‘Mr. Lei, I will report to Director Wang on this matter!’

Lu Yuan feels so tired:

‘...After I go out, I will tell her myself.’

Lu Yuan wanted Lin Xixi to explain to Amy that she wouldn’t get pregnant if she held a hand.

But after thinking about it, Amy is here now, with her shy look.

If Lu Yuan dared to say this in front of so many people now, Amy was afraid that he was not going to kill him.

Lu Yuan finally chose to persuade him.

When you see Wang Lingling, talk to Wang Lingling alone.

There is no mechanical guard in the square where the aerial elevator stops.

But when they came to the edge of the square, Lu Yuan and his party saw a lot of mechanical guards appearing on the street.

The mechanical bodies of these mechanical guards look much more refined and taller than those on the ground city.

are basically mechanical guards over two meters high, and they are probably much stronger than mechanical guards on the ground.

However, for Lu Yuan and Amy, even the leader-level mechanical guards are not opponents, let alone these ?

They rolled down the street leading to the core area of the floating city.

The area of the floating city is not small, it looks like a radius of 50 kilometers.

In the most central core area, there is a huge tall building with a height of about three kilometers.

There are four thousand-meter-high buildings scattered in the four directions, southeast, northwest of the core high-rise building.

As for the five-hundred-meter-level tall buildings, the number is even greater.

Others, all are 100-meter-high buildings.

The tall buildings below 100 meters can only be seen outside the core area of Floating City.

Even outside the core area, there are a large number of 100-meter-high buildings, and the density is much larger than that of the steel city on the ground.

Just like this, the resources will be abundant.

For Lu Yuan and the others, the place to go is naturally the core area.

They pushed all the way, and it took only an hour to reach the core area full of 100-meter-high buildings.

A team of mechanical guards is patrolling the street full of 100-meter-high buildings.

This team has twelve mechanical guards, the leader of which is a mechanical leader who is more than three meters high. In addition to the captain, the other players are also

mechanical guards close to three meters in height. Unlike the captain, he is the leader of the consummation level.

And the configuration of these mechanical guards is more comprehensive.

The mechanical guard as a meat shield has a powerful crystal shield. The mechanical guard of the assault system holds a battle axe or epee, and the mechanical guard of a distant attack holds a psionic cannon.

Lu Yuan looked at these mechanical guards, a little surprised:

‘Is this the mechanical guard in the core area? A full-level boss, and eleven low-level bosses. With this configuration, the teams that follow us, I am afraid that few can beat it, right?’

Amy proudly said with her hands on her hips:

‘How can they compare with us? Come on soon!’

She pushed Lu Yuan.

‘I know, I know.’

Lu Yuan rushed up with the epee in his hand.

The mechanical guard found Lu Yuan, his eyes turned red, and attacked Lu Yuan.

As Amy said, for other teams, it can be said that they are nightmare mechanical guards. For Lu Yuan and Amy, these are food gifts.

Besides, it’s still a hearty dish.

killed this team of mechanical guards, and only obtained 240 optimized spiritual power gene liquids.

In addition, there are boss-level genetic weapons, and various boss-level powerful high-energy bombs.

After conversion, the income is about 600,000 first-order spirit crystals.

And all the streets here are mechanical guards of this configuration.

Not only that, plus 100-meter-high buildings, 500-meter-high buildings, and even 1,000-meter-high buildings.

It can be imagined how abundant the resources here will be.

Lu Yuan has expectations in his eyes:

‘continue.’

Amy, Lin Xixi and others also showed bright and excited smiles.

.....

The core area of the floating city.

in the square of a kilometer-high building.

Boom! !

Boom! !

The roar sounded, and soon stopped again.

Lu Yuan holds the Iron Guardian’s epee, and in front of him is the mechanical leader whose head was smashed.

The body of the mechanical leader is still ** with Tianluo Wisteria.

In the square, in addition to the mechanical leader, there are more than one hundred mechanical guards, ten of which are at the complete boss level, and the rest are low-level boss level.

Don’t look at the number compared to the square in the steel city, but in terms of strength, it far exceeds the mechanical guards of the steel city square.

After all, that’s more than a hundred bosses!

Even Lu Yuan had a tingling scalp when he faced the more than one hundred bosses at first.

If he is set on fire, he is easily injured directly.

Too much.

Fortunately, Lu Yuan's speed is still faster than these bosses.

In addition, Amy was on the side to assist in the control, and Lin Xixi and the others provided support. Although the process was a bit tortuous, they eventually destroyed all these mechanical guards.

At this moment, there is already a ball of light floating out of the mechanical boss.

One blue light group, four cyan light groups and eight green light groups.

The cyan boss-level items and the green elite-level items, Lu Yuan didn't want to look at them, he picked up the blue boss-level items directly.

Then, Lu Yuan's eyes lit up and a smile appeared.

Mechanical Guardian's Battlegear (First Tier 100%): Leader-level weapons.

Mainly increase strength, secondly increase defense, weakly increase agility.

is much stronger than the boss-level mechanical fanatic armor that Lu Yuan is now wearing.

Amy came over curiously:

'What is it?'

Lu Yuan showed her the light group, Amy curled her mouth and threw it to Lu Yuan.

After Lu Yuan was replaced, his strength once again improved a lot.

Then, several people entered the kilometer high building to collect resources.

.....

Compared with the entire floating city, the core area of Floating City is quite small, only about three kilometers in radius.

The core area is centered on the three-kilometer-high building in the center, and the area where the four-kilometer-high buildings are located in the southeast, northwest and northwest is divided into four blocks.

With the cleaning speed of Luyuan's team, a block can be cleaned in four hours.

Nine hours later, Lu Yuan and his team have cleared the eastern and northern districts.

The West Side is being cleaned up at the moment.

On the street, Lu Yuan casually killed the last mechanical leader captain with a single blow. Suddenly, his body halted, and a look of surprise flashed in his eyes.

Around his gene chain, the evolution cube surrounding the gene chain selection suddenly vibrated slightly.

Lu Yuan looked at the shaking Evolution Cube in surprise.

Up to now, Evolution Cube has shaken twice.

Once encountered the terrifying mirage in the misty forest, and once encountered the Soul Eater as an S-class alien in the real world.

This is the third vibration.

What is it because of this time?

Lu Yuan had a trace of doubt in his heart.

Lu Yuan walked forward two steps and found that the vibration was a little stronger.

He raised his eyebrows, squinted his eyes, and walked in the direction where the vibration became stronger.

Amy, who was counting the harvest, was a little puzzled when Lu Yuan suddenly walked forward.

'Lei Feng? What's wrong with you?'

Lu Yuan came back to his senses, smiled and said:

‘Nothing, I just feel that there is something in this direction.’

‘Something?’

Amy has doubts in her big purple eyes.

‘I just feel it, do you want to go over and take a look?’

Lu Yuan smiled.

Amy thought for a while, then nodded: ‘Let’s go and see.’

Lu Yuan walked in front, changing direction from time to time, feeling the vibration of the Evolution Cube, looking for a location.

In Amy’s eyes, Lu Yuan was just walking with him, looking purposeless.

She frowned slightly, but didn’t say anything, just curiously followed Lu Yuan.

Just then, Lu Yuan noticed that the direction of the vibration was coming from an alley.

He walked towards the alley.

Amy followed.

After walking into the alley, he walked about fifty meters inside.

At this time, Amy and Lu Yuan had a meal at the same time.

‘Um?’

The two looked at the ground deep in the alley.

In an inconspicuous corner of the ground, a gray-white metal fragment fell on the ground.

This metal fragment looks like ordinary metal, but it exudes a strange and profound aura.

Lu Yuan and Amy both stared.

‘This is.....‘

The two walked quickly over.

Lu Yuan picked up the metal fragments and observed the metal fragments with Amy.

They found that this seemingly ordinary metal fragment had a trace of strange lines~www.mtlnovel.com~ Amy’s eyes widened: ‘This is the core fragment of AI?! We searched for so long and found two I couldn’t find the area, I didn’t expect to find it here?!‘

As soon as they entered the core area, Lu Yuan and Amy had already consciously searched for the core fragments.

After all, this is the key to their ability to enter the second order in the El Mechanical Ruins.

If there were no core fragments of AI, they would be at a great disadvantage when competing with other strong players.

But they searched for the eastern and northern regions, but they couldn’t find a piece of El core fragment.

I didn’t expect to find it in such an inconspicuous alley.

Amy frowned slightly: ‘Listening to Lingling, Ayer core fragments may appear anywhere in the core area, and I didn’t expect even such remote places.‘

Then she thought of something, looking at Lu Yuan, her eyes were full of surprise:

‘Lei Feng, how did you know that there is a core fragment of El?’

Lu Yuan was also shocked at this moment.

After finding the core fragment of AI, the Evolution Cube in his body calmed down and stopped shaking.

Obviously, the previous shock of the Evolution Cube was due to this El core fragment.

But what is going on with this evolution cube?

Why do they vibrate when encountering AI core fragments?

His head is full of question marks.
