

# Chapter 134: My Genes Evolve Infinitely

## ANOMALY OF EL'S CORE FRAGMENT

Lu Yuan checked the time, and it was almost the time agreed with Amy.

He walked out of the room and went downstairs.

Downstairs, Lin Xixi and the others are sitting together to rest and chat.

Seeing Lu Yuan walking down, Lin Xixi stood up, looking at Lu Yuan with some expectation:

‘Mr. Lei, how about you coming down?’

Lu Yuan smiled: ‘I have broken through, where is Amy?’

‘The lady hasn’t come out yet.’

‘Then wait for a while.’

‘Um.’

Lin Xixi nodded, and sat down again. Lu Yuan also sat down next to Lin Xixi.

As soon as sat down, Zhu Yu next to him looked a little curiously at Lu Yuan:

‘By the way, Mr. Lei, what on earth did you do to the young lady in the past? Make the young lady so shy?’

Her eyes are full of gossip.

Not only Zhu Yu, but a few others are also listening.

Lu Yuan’s face turned dark, and he was a little dazed.

He glared at Zhu Yu:

‘You are the most persuaded when fighting, why are you the most active gossip?’

Zhu Yu shrank her neck and stuck out her tongue embarrassedly.

Lin Xixi beside also looked at Zhu Yu speechlessly.

‘Miss, don’t join in!’

‘Oh.....’

Seeing that their deputy captain said so, everyone looked helpless and had to give up.

At this moment, Lu Yuan and the others looked at the sound of footsteps from the upper floor.

Soon, Amy jumped downstairs, her delicate little face was full of smiles, and she seemed very happy.

Seeing that Lu Yuan was already downstairs, she ran over and smiled:

‘How is it? Did you break through?’

Lu Yuan smiled and nodded: ‘Well, it broke through.’

‘This lady has also broken through! Hurry, let’s go and clean up the six mechanical leaders!’

Seeing that Amy couldn’t wait, Lu Yuan smiled and nodded: ‘Then go.’

Everyone left the building and walked towards the door of the three-kilometer- high building on the side.

At the gate of the 3,000-meter-high building, the six mechanical leaders are still standing there, as long as no one wants to enter the door, they will always guard the door.

came not far from the gate, Amy smiled and said:

‘Lei Feng, don’t do it! Just let me come alone!’

Lu Yuan was taken aback, then glanced at the confident Amy:

‘Are you sure you can?’

‘Of course! My lady is very strong now!’

Lu Yuan smiled:

‘okay then.’

Lu Yuan stood in the back, watching Amy come forward alone.

At a position fifty meters away from the gate, Amy’s Wisdom Stick waved. Spiritual power surges.

A series of Tianluo Wisteria shot out from the ground where Amy was standing, and shot towards the mechanical leader.

Tianluo Wisteria is densely packed, there are hundreds of ways, a little more than doubled before Amy’s breakthrough.

Moreover, Luo Ziteng still has golden lines on this day, which looks a little more noble and gorgeous.

Amy in the Tianluo wisteria is like a beautiful fairy from the vine.

However, the mechanical leader does not matter whether Amy is a fairy or not, when Tianluo Wisteria approaches, all the mechanical leaders are immediately activated.

Their eyes turned red, and the current swelled, they all turned their weapons, and attacked Amy.

The psionic cannon roared, the battle axe swung, and two of the mechanical leaders charged towards Amy.

However, the speed of Tianluo Wisteria was much faster than before. Almost instantly, he came to the six mechanical leaders.

咻咻咻 all at once \*\* the six mechanical leaders.

All the psychic attacks were stopped by Tianluo Wisteria. Tianluo Wisteria didn't even damage it at all, and was not even swept away by the attack.

Luo Ziteng's defensive ability and power have been greatly improved on this day.

After the six mechanical leaders were tied up, Amy snorted and all the Tianluo Wisteria shrank and twisted at the same time.

Click, click...

The mechanical leader in the distance was stirred by the terrifying force erupted by Tianluo Wisteria, whether it was a crystal shield or a mechanical body, it was completely shattered like fragile glass.

Looking at the broken body of the mechanical leader, Lu Yuan couldn't help but be slightly surprised.

I have to say that Amy's strength is indeed powerful. If it weren't for the mechanical life to restrain her emerald sickle from being highly poisonous, her destructive power would only be stronger.

'Yeah!'

killed six mechanical bosses, Amy cheered.

She ran up to Lu Yuan with her hands on her waist, with a proud look on her face:

'How about? Is this lady strong?'

Lu Yuan gave a thumbs up: 'As expected of Amy, it is strong.'

'Hee hee~ I feel strong too.'

'Go and see what's dropped.'

After knowing that he was still poor, Lu Yuan wanted to get more treasures and resources quickly.

'Oh oh.'

Amy also remembered, there are still fallen things that have not been picked up.

A group of people walked over together.

Six mechanical leaders, each of which dropped six leader-level light groups, three to five boss-level light groups, and a large number of elite-level light groups.

Lu Yuan and Amy looked at the leader-level light group. Soon, Lu Yuan's eyes lit up and they found something he could use.

Mechanical Guardian Crest (First Tier 100%): Leader-level genetic weapons.

This is a genetic weapon of the heraldic type. It mainly enhances defense ability, and secondly enhances strength and agility. It can also activate a crystal shield, which is almost equivalent to the peak defense ability of a Tier 1 leader.

Heraldry type arms, Lu Yuan had only obtained one Moonstone before.

But it was destroyed when Xue Wang attacked him with the soul of the black shadow last time.

I didn't expect to get another coat of arms now.

It is a pity that now Lu Yuan has broken through to the battle division level, and has evolved so many extraordinary genes in succession, and his strength has increased too much.

Tier 1 weaponry, even at the leader level, had a very small improvement to Lu Yuan.

But I can only say that talking is better than nothing.

Amy watched all the light groups once, and said helplessly:

'There is nothing good. Let's get half of it.'

Lu Yuan nodded.

He was assigned three chief-level genetic weapons.

are a large mechanical shield, a coat of arms and a long sword.

He used the coat of arms. As for the mechanical giant shield and long sword, Lu Yuan planned to sell it at that time.

Boss-level items and elite-level items, the two were also divided together.

After dividing the things, Lu Yuan and Amy opened the door and walked in.

There are more rooms in a three-kilometer-high building than Lu Yuan had imagined.

There are twelve.

Lin Xixi and his party were waiting below, and Lu Yuan and Amy rushed upstairs excitedly.

Just when he came to the first door, Lu Yuan found that the ascending Evolution Cube was shaking again.

A hint of surprise flashed in his eyes.

Is there a core fragment of AI in it?

Lu Yuan opened the door and found an empty room inside.

In the center of the room, there are three EI core fragments.

Seeing these three fragments, Amy's eyes widened slightly, and she was taken aback:

'I searched four areas before finding two, but I didn't expect that there would be three fragments here. If I had come here before, it wouldn't be so troublesome.'

Lu Yuan looked at Amy and smiled:

'What are you thinking about? If we don't have the two EI core fragments before, we can't break through to the second order, how do you deal with the six mechanical bosses.'

Amy shook her body when she heard the words, her eyes widened, as if she had found a blind spot.

'Yes!'

Lu Yuan looked at Amy and smiled:

‘How about? Xixi and the others are going to break through? Give it to them?’

Amy opened the mouth and said, ‘Xixi has reached Consummation. No one else has yet. Just one.’

Amy picked up an El core fragment.

She looked at the other two, and said, ‘What about the rest?’

There is a tangled color on her little face:

‘This thing can’t bring out the ruins, but it feels wasteful to stay here.’

Lu Yuan smiled and said, ‘It’s better for me to hold it.’

There is no better way, Amy nodded.

She smiled and said: ‘I will take the fragments to Xixi, you will wait for me.’

Lu Yuan nodded.

Amy walked out the door of the room soon.

Lu Yuan looked at the two metal fragments in his hand.

He suddenly had a whim: Saying that his current core fragment of Al has been swallowed by the Evolution Cube, can he absorb another one?

Lu Yuan was a little curious. With a movement of his mind, all of the two El core fragments in his hand turned into streamers and entered Lu Yuan’s body.

The next moment, two El core fragments were also absorbed by the Evolution Cube.

Lu Yuan: ‘???’

His eyes widened and his face was stunned.

He only wanted to absorb one, but he did not expect to absorb both? !

And, this is not the point.

Lu Yuan discovered that after he had absorbed the two El core fragments, his connection with El Mechanical Ruins seemed to deepen.

If it was said that when he had absorbed one before, Lu Yuan felt that he had been accepted by El Mechanical Ruins.

So now that he has absorbed three fragments, Lu Yuan feels that El Mechanical Ruins even feels so close to him?

Get close?

What the hell?

Lu Yuan's eyes were shocked.

Can this change?

What if you continue to absorb more El core fragments?

Will there be more changes?

Lu Yuan's heartbeat accelerated slightly, a little curious and expectant.

At this time, Amy's voice came from outside the door:

'Lei Feng! Why are you still inside, come out!'

Lu Yuan returned to his senses and saw that Amy was already waiting for him outside.

He answered: 'I'm here.'

Lu Yuan left the room and continued to explore upstairs with Amy.

In the second room, Lu Yuan and Amy found a batch of psychic-enhancing gene liquids, with a total of 5,000, which is more than double the number of kilometer-high buildings.

Lu Yuan is divided into 2500 pieces, a total of 25 million first-order spirit crystals, it can be regarded as a wave of blood back to himself.

The third room is empty.

The fourth room was full of bombs. Lu Yuan was blown up as soon as he opened the door. However, with his current defensive capabilities, the bomb did not even make Lu Yuan take a step back. It felt a little bigger for Lu Yuan. A little wind.

In the fifth room, there were six mechanical leaders, and Amy volunteered to break it up.

Lu Yuan has obtained two boss-level genetic weapons and a boss-level extraordinary gene, as well as a batch of boss-level and elite-level items, which is quite good.

Especially the boss-level transcendent gene.

Combat skills·Steel body.

This is a guardian gene. According to Amy's understanding, it should be able to sell about 40,000 Tier 4 spirit crystals.

Lu Yuan is a little happy.

In the sixth room, there are 5000 bottles of enhanced spiritual power gene liquid.

Luyuan is divided into 2500 branches, and there are already 5000 branches in total.

If you count, there are almost 50 million first-order spiritual crystals, which is 50,000 fourth-order spiritual crystals.

is a big gain.

Lu Yuan has only one idea now: 'More!'

In the sixth room, there are three El core fragments.

Seeing these three El core fragments, Amy's small face, which was full of smiles because of the good harvest, suddenly stepped down.

‘Why is El Core Fragment again ? It’s useless!’

Lu Yuan smiled and picked it up: ‘Give it to me.’

Amy naturally doesn’t care.

Then Lu Yuan absorbed the three El core fragments again.

After the three El core fragments were swallowed by the Evolution Cube, Lu Yuan felt even stronger.

If he felt that El Mechanical Ruins was a little close to him before, then now, he feels that El Mechanical Ruins regard him as his own person ?

Although he doesn’t know why he feels this way, he has such a feeling through the connection between the Evolution Cube and El Mechanical Ruins.

Lu Yuan is even more looking forward to what will happen if he continues to devour the core fragments of El.

In the seventh room, there are two boss-level extraordinary genes directly in it.

Combat Skills·Psionic Ray, Combat Skills·Mechanical Wave Fist

Lu Yuan and Amy split one each.

Lu Yuan took mechanical wave fist.

This is a power attack type combat technique, which should be regarded as a good transcendent gene for genetic warriors who use boxing techniques.

But this is not a special type of transcendent gene, Lu Yuan will not consider burning, it can be sold out at that time.

The eighth room is another trap.

As soon as Lu Yuan and Amy entered, flames spurted out of them.

Fortunately, Lu Yuan’s defense is strong enough, and this flame can’t hurt him.

And Amy is protected by Tianluo wisteria, and she is unscathed.

The ninth room contains two mechanical puppets.

The combat power of the mechanical puppet is the second-tier leader's perfection level~www.mtlnovel.com~ The strength is extremely powerful.

One is a strong attack system with a battle axe, and the other is a range attack system with a psionic cannon.

Lu Yuan took the long attack system, while Amy took the strong attack system.

After all, Lu Yuan lacks long-range attacks, and Amy sometimes needs a meat shield that can block her enemies.

Tier 2 boss-level combat power is a very powerful boost for Lu Yuan, and naturally the same is true for Amy.

In the tenth room, Lu Yuan was pleasantly surprised that this time there were a total of 10,000 bottles of genetic liquid for strengthening spiritual power.

Lu Yuan was so touched that he almost cried.

Is this special...

Is this a three-kilometer tall building?

Always drop God!

Invincible!

So Lu Yuan received another 5,000 bottles of genetic liquid for strengthening spiritual power, which would add up to 10,000 bottles.

Forget it, he is getting closer and closer to the spiritual resources needed to refine his 'White Jade Spirit Body' extraordinary gene to perfection.

It's gratifying and congratulating, gratifying and congratulating.

The eleventh room, this is an empty room.

The twelfth room is the last room.

Lu Yuan opened the door of the room, and Amy, who was behind Lu Yuan, peeked in.

When they saw the things in the room, both Lu Yuan and Amy were taken aback, their eyes widened, with expressions of surprise.
