

Chapter 138: My Genes Evolve Infinitely

AMBUSH, KING HOARFROST

Enter Black Bear One.

Lu Yuan and Amy are sharing the harvest in the cabin.

‘This leader-level transcendent gene seems to be good, it’s bound by the magneto, do you want Lei Feng?’

‘Me? I don’t use this.’

‘Then I will take it.’

Amy put it away.

‘There are second-tier boss-level mechanical puppets again. There are four this time. I’ll take two psionic gun mechanical leaders.’

‘Then I want two others.’

‘There are also these boss-level genetic weapons, um... a total of twelve pieces, let’s have six pieces each.’

‘Okay, there is nothing suitable for me, Amy, please choose first.’

‘There is nothing suitable for me, just pick it up.’

‘Then I want higher value.’

‘Wow! Too much...Forget it, Miss Ben has no shortage of spirit crystals anyway.’

‘And these genetic fluids for strengthening spiritual power are also divided.’

It took half an hour for Lu Yuan and Amy to fully distribute the harvest.

Lu Yuan got 12,000 bottles just for strengthening the spiritual power gene liquid.

In addition to what Lu Yuan had obtained before, there are now 22,000 bottles of Lu Yuan's Enhanced Spiritual Power Gene Liquid.

Equivalent to 220 million first-order spirit crystals!

More than 200 million!

Lu Yuan was so moved and cried.

In addition to these genetic fluids for strengthening spiritual power, there are six boss-level genetic weapons, seventeen boss-level genetic weapons, and even more elite level ones.

In addition, there are a number of various items such as mechanical puppets, psionic bombs, and charms.

After this wave alone, the spirit crystals that Lu Yuan had harvested were probably around three or four billion first-order spirit crystals.

This is just a floating city, and there will be many floating cities next!

...

Five days later, it has been ten and a half days since El Mechanical Relic was opened.

There is only one and a half days left until the ruins are closed.

In the past five days, Lu Yuan and Amy rode the Black Bear One to collect resources in various floating cities.

Every time they arrived in a floating city, they would scrape four thousand-meter-high buildings and a three-thousand-meter-high building, and then to see if there were any core fragments of AI, they left without stopping.

In five days, there were as many as seven floating cities that were scrapped by the two of them alone.

There are 110,000 bottles of the enhanced spiritual power gene liquid obtained alone.

This is equivalent to 1.1 million fourth-order spirit crystals!

This is just the genetic liquid for strengthening spiritual power, and other treasures such as leader-level genetic weapons will naturally not be small.

It can be said that the harvest is full.

It is a pity that as time goes by, more and more floating cities have been attacked. In the first three days, Lu Yuan and Amy had already wiped out five floating cities.

But in the last two days, only two were taken away.

Although they had encountered other floating city Luyuan, there were people on it.

Lu Yuan didn't plan to clash with other genetic warriors, but left directly, looking for a new floating city.

On the Black Bear One, Lu Yuan and Amy sat in their seats, and Amy looked bored.

'There have been people in several floating cities recently. Should we go down and kill them and just grab their belongings? Anyway, none of them have been out of the land of origin. As long as they die, their gains will definitely fall from.'

Lu Yuan glanced at Amy and said with a smile:

'The people who can go to the floating city are definitely geniuses of some big powers. Amy, you all have escaped crystals. I am afraid they have. I am afraid that they have a lot of various cards. Although the two of us are not weak, we may not be able to compete with them. Keep them before using the escape crystal.'

Hearing what Lu Yuan said, Amy thought for a while and nodded:

'Yes, people like this must have many ways to escape. Then what should we do?'

Lu Yuan thought for a while: 'We are now on our way to the central area. We should be close to the Central Floating City. Then we will see if we can go directly to the Central Floating City. If possible, we will go in and secretly get inside. Everything is taken away. If this is the case, I am afraid that no one will gain more from the Ayre Machinery Ruins this time.'

Hearing this, Amy's eyes lit up and nodded again and again:

‘Yeah! Let’s do this! Huh? There is another floating city ahead!’

Lu Yuan glanced at the floating city in front of him and raised his eyebrows:

‘Let’s see if anyone is here.’

Lu Yuan controlled the Black Bear One and flew towards the floating city.

Passing through the aircraft defense line in the air outside the floating city, the Black Bear One entered the floating city.

After that, Lu Yuan controlled the Black Bear 1 and flew directly towards the core area.

Moving at three times the speed of sound, the Black Bear One entered the core area in less than a minute.

Looking at the mechanical guards patrolling the streets, both Lu Yuan and Amy’s eyes lit up and smiled.

‘It’s a floating city that hasn’t been developed yet! We are lucky.’

Lu Yuan laughed.

‘Quickly! Chong Chong Chong! Go to the kilometer high building first!’

Amy jumped and said.

Hei Xiong No. 1 passed a stream of light in the air, and soon came to a thousand-meter-high building.

Lu Yuan and Amy got off Black Bear One, and then Lu Yuan ordered the mechanical guards to self-destruct.

Then he and Amy walked towards the gate of the kilometer tall building.

Just when the two approached the gate of a kilometer tall building.

On the edge of the gate, there was a distortion of space, and a powerful wave of spiritual power spread out.

Feeling that powerful spiritual power fluctuation, UU reading www.uukanshu.com Lu Yuan's pupils slightly shrank.

His body disappeared in place, blocking Amy's body.

Amy also inspired Tianluo Wisteria for the first time and blocked her and Lu Yuan.

As soon as the two of them moved, a series of terrifying attacks blasted out of the distorted space and landed on the Tianluo Wisteria.

boom!

Tianluo Wisteria broke under the terrifying attack, and the remaining attack blasted towards Lu Yuan.

Lu Yuan narrowed his eyes slightly, and the white jade spirit body exploded with all his strength, and a white light flashed above his body.

Lu Yuan squeezed the Mechanical Guardian's epee tightly, and a sharp white light emerged from the epee, cutting out towards the attack approaching Lu Yuan.

boom! !

The fierce white sword light collided with various attacks, and all the attacks broke apart in the first time.

'what!?'

'This is impossible!'

A series of exclamations sounded.

In that twisted space, nine Kamans walked out.

The nine people stared at Lu Yuan at the moment, with a look of fear in their eyes.

After seeing Lu Yuan's appearance clearly, the faces of five of the Kamans changed slightly.

A tall Kaman holding a black long knife exclaimed:

‘Human, it turned out to be you?!’

Lu Yuan was taken aback, glanced at the Kaman who was talking, and then slightly widened his eyes:

‘What kind of stream were you the last time? I didn’t expect you to be here?’

Hearing this, the face of the knife-wielding Kaman went black:

‘Liu Yu! I am one of the four cornerstones under the seat of His Highness Yang Qian,
Liu Yu!’
