

# Chapter 139: My Genes Evolve Infinitely

## CLEAN UP, 3 KINGS PAY ATTENTION

‘Yes, King Hoarfrost! He is one of the three king-level geniuses who entered the ruins this time! If you really clear us out, he will definitely trouble you!’

Ji Gong glanced at the shield that was about to shatter, and quickly explained.

Lu Yuan raised his eyebrows.

King-level genius?

This reminds Lu Yuan of Ye Ye.

This guy should also be a king-level gene, right?

‘Lei Feng? What shall we do?’

Amy heard that there was a king-level genius, she frowned, turned to look at Lu Yuan, with a questioning look on her face.

Lu Yuan smiled:

‘Hit them first before talking.’

Hearing what Lu Yuan said, Amy’s eyes lit up and a happy smile appeared. She patted Lu Yuan on the shoulder:

‘Same as Miss Ben thought! What if the other party is a king-level gene? Miss Ben is not afraid of him anyway!’

Ji Gong and Yang Qian were relieved when they saw that Lu Yuan was originally in deep thought, thinking that Lu Yuan would let them go.

Hearing that Lu Yuan was still attacking them, both of them stared at them, looking at Lu Yuan in disbelief.

Yangqian said coldly:

‘Human, how dare you?! Don’t you plan to go to the Central Floating City? We will send the message to King Hoarfrost!’

Lu Yuan smiled and ordered the mechanical leader to start the next wave of attacks.

Suddenly, a roar sounded.

The crystal shield that had been cracked burst instantly.

Yang Qian and Ji Gong’s face changed drastically.

The two looked at each other, and two mechanical leaders appeared beside each other.

‘Go up! Block them!’

Ji Gong ordered.

The two of them are naturally unwilling to be swept out like this.

In the entire Aier machinery ruins, the central floating city is the biggest piece of cake!

If it is cleared out now, they will not be able to share one of them.

That would be a shame.

As long as there is hope, they want to blog again.

Until now, Ji Gong and Yang Qian no longer expect to defeat Lu Yuan and Amy, their goal is to run out.

As long as the mechanical leader puppets block the two of them and the other twelve mechanical leaders for a while, they will hope to run away!

Although these four valuable mechanical leader puppets will be lost, it is worth it for the treasures of the central floating city.

They had also explored the floating city before, and naturally they also had the harvest of the mechanical leader puppet.

Lu Yuan couldn’t help but stunned when he saw that the other party had taken out the mechanical leader puppet, and then he smiled.

took out the mechanical leader puppet in front of him, is this serious?

A faint light appeared in Lu Yuan's eyes. Under the surging of spiritual power, the machine controlled operation.

The next moment, the four mechanical leader puppets who originally obeyed the order and planned to resist Lu Yuan and the others halted, turned their heads and aimed the spearhead at Ji Gong and Yang Qian.

The epee in the hands of a mechanical leader holding an epee headed by , carrying a faint blue sword light, slashed towards the nearest to him.

Yangqian was planning to evacuate at full speed, but suddenly felt the sword glow of incomparable spiritual power, his pupils shrank, his body suddenly turned around, and his horizontal sword resisted.

锵!!

The powerful force made Yang Qian back a few steps.

When he saw that the attacker turned out to be his mechanical leader puppet, his eyes widened, and his eyes were full of horror.

‘What!?! How could it be possible! Even the second-tier perfect mechanical leader can control it?!’

Like Yang Qian, Ji Gong, who had originally planned to retreat, was forced to retreat at this moment, and he was shocked at this moment.

The four cornerstones that moved up and the three subordinates brought by Ji Gong, under the first wave of attacks, it was already difficult to resist the powerful spiritual attack, and they were directly torn into pieces.

Sixteen mechanical leaders surrounded Yangqian and Ji Gong, while Lu Yuan and Amy stood in the distance watching them quietly.

Yangqian and Yoshimiya glanced over the sixteen mechanical leaders, their faces were extremely ugly when they thought that four of them were their opponents.

The two looked at each other, and then a black cylinder appeared in his hands.

Spiritual power was injected into it, and he threw the cylinder in the direction of Lu Yuan and Amy.

However, before the cylinder was close to Lu Yuan and Amy, it was blocked by a mechanical leader holding a huge shield.

The cylinder fell on the crystal shield of the giant shield mechanical leader, and then a blue light burst.

Boom!!!

The roar sounded, and the powerful spiritual power fluctuations spread along with the frost.

A touch of hoarfrost appeared on the bodies of all the mechanical leaders.

Lu Yuan and Amy also frowned slightly, feeling a little bit cold.

This thing, Lu Yuan knew that the S22 Frost Grenade was also a second-tier leader-level power, and it also had a frost effect after it exploded.

is the product of the tall buildings in the center of the floating city.

This frost grenade is not weak, but all mechanical bosses have crystal shields.

The explosion just made them back a few steps, and it was the frost on it that slowed their movements a bit.

In the center of the encircling circle of the mechanical leader, which is also the core area of the grenade explosion, a crystal shield once again appeared around Yang Qian and Ji Gong.

At the end of the explosion, they took advantage of the slow motion of the mechanical leader and rushed out of the encirclement.

The speed of the two is not slow, after rushing out of the encirclement, a touch of joy appeared on their faces.

At this moment, a white jade light appeared in front of them, accompanied by fierce sword light and spreading Tianluo Wisteria.

The terrifying sword light and the twisted Tianluo Wisteria changed their faces suddenly.

A look of hideous color appeared on Yang Qian's face, greeted with a white sword light.

锵!!

Under the sound of gold and iron, Yang Qian's face changed, and his body took two steps back.

There was an ugly look on his face.

'How can it be?!'

Under the head-on collision, he was even worse than this human being?!

Lu Yuan also frowned slightly at this moment.

The three Lord-level genes he burned were not consummated. With the full burst of Hei Gangjin, he was only slightly stronger than the opponent.

As a lord level, this guy named Yangqian is really strong.

However, for Lu Yuan, it would be nice to be able to stop the movement.

At this moment, heat is coming out of the bodies of a group of mechanical leaders, the frost is evaporated, their bodies regained their flexibility, and they all attacked Ji Gong, who was also entangled by Tianluo wisteria.

is only one-on-one, they can accept it.

But now it has become sixteen mechanical bosses plus eighteen pairs of Lu Yuan and Amy.

Ji Gong and Yang Qian were hit by the attack in just one round, and they flew upside down at the same time, still spouting blood from their mouths.

‘Cough...‘

Yangqian hit the wall of the tall building hard, coughing again and again.

Seeing a group of mechanical leaders approaching again, his expression changed.

The next moment, he took out several second-tier leader-level grenades and threw them out, throwing them at a group of mechanical leaders.

Boom boom boom! !

Under the roar of , he turned and ran.

Seeing this in Ji Gong, not far away, he also took out some grenades and charms, threw them out, and turned around and ran.

While turning around and running away, the two took out the speed potion and drank it, and then took out the speed-increasing charms and used them. Various speed-increasing methods were used by them without money.

The speed of the two suddenly increased by a big margin.

Just when the two of them thought they had hope to escape, an electromagnetic hissing sounded.

Within a one-kilometer radius, surrounded by electromagnetic shields, the smiles that had just appeared on the faces of Ji Gong and Yang Qian, who had used various speed-increasing methods, froze, and suddenly failed to stop the car and ran into the car. On the electromagnetic shield.

Boom! ! !

The two of them flew back directly, spouting a mouthful of blood, and their breath became a lot weaker.

Lu Yuan held a gray-white cube in his hand, and there were faint blue rays of light flowing on it.

He looked at Ji Gong and Yang Qian, who fell on the ground, with a smile on his mouth:

‘Don’t we have explored more floating cities than you? With these items, do you think you can run away?’

After hearing Lu Yuan’s words, Ji Gong and Yang Qian’s faces became even more ugly.

They looked at Lu Yuan deeply, and the next moment, Qian Qiang said indifferently:

‘We have loaded this time. Next time in Baiyunzhou, I hope you don’t meet us.’

Lu Yuan smiled slightly when he heard the words, ‘It’s okay if I meet.’

Ji Gong sneered and didn’t speak much.

The bodies of the two of them were wrapped in a burst of white light, and when the white light disappeared, their bodies disappeared.

Lu Yuan understood that they had used the detachment crystal.

I can’t keep them even if I want to stay.

Amy stood beside Lu Yuan, looking at the place where they disappeared, with a look of disappointment:

‘It’s a pity, if they can kill them, they should also have a lot of treasures.’

Lu Yuan smiled: ‘No hurry, there is still no search in the central floating city.’

Amy suddenly thought of something when he heard what Lu Yuan said, and said:

‘By the way, what about the Hoarfrost King? If the opponent is the burned king gene, we are not opponents!’

Lu Yuan thought about it, then smiled:

‘Don’t be afraid, let’s take a look at the Central Floating City first. If we can go in, we will go directly in, and then we will get the treasure and leave. Who cares about King Hoarfrost and King Blackfrost?’

‘Then what if we can’t get the treasure?’

‘We still have Black Bear One. At the speed of Black Bear One, King White Frost can’t catch up with us. In addition, Black Bear One has the same defense and attack capabilities as Tier 2 Senior Lords, so self-protection is still okay. of.’

Lu Yuan thought for a while, then replied.

‘It seems to be too!’

Hearing what Lu Yuan said, Amy thought for a while and smiled.

Actually, Lu Yuan still had one other way he didn’t talk to Amy.

That is shaking people.

Based on Lu Yuan’s understanding of Ye Ye, she should have inherited a king-level gene.

Maybe she is also one of the three great geniuses.

If Ye Ye is asked to help, you shouldn’t have to worry about the King of White Frost.

The only problem is that although Lu Yuan and Ye Ye are currently in a good relationship, they are only good.

Whether Ye Ye will help him deal with geniuses of the same level as hers is not certain.

Maybe Yeye and the Hoarfrost King are also friends themselves?

This is not impossible.

So Lu Yuan planned to go to the Central Floating City first.

‘Well, let’s explore the high-rise buildings of this floating city first, and then continue to fly in the direction of the central floating city.’

Lu Yuan smiled and said.

‘Um!’

Amy’s eyes lit up, looking forward to it.

Every time I explore the floating city, it is a happy thing for Amy.

.....

The core area of El Mechanical Ruins.

The core area is different from the peripheral area.

All the mechanical guards in the core area are Tier 2 and their strength is much stronger than that of the periphery.

The area of this area is not too large. As long as you stand on the edge of the core area, you can see the central floating city on the horizon that looks like a continent in the sky.

At this moment, on a street somewhere in the core area.

A look similar to a human being, but with ice crystals dotted on his forehead and on both sides of his cheeks. The boy with white hair looked at the white light in the communication crystal.

‘Has it been cleaned out?’

A cold voice sounded, and the boy’s expression was cold.

‘In that black flying machine, are genetic warriors? Two humans? Interesting... But since I have cleaned up my subordinates, don’t blame me for being polite.’

Beside the boy, a boy who is also Hoarfrost like him said:

‘Master, do you want me to kill those two humans?’

Baishuang Wang shook his head slightly:

‘The opponent has flying spirits and can expel mechanical life. It is not easy to kill them.’

‘Then what shall we do?’

Baishuang King looked at the huge floating city on the horizon, and said lightly: ‘Wait, they will always come in front of us.’

At this moment, a team of Tier 2 mechanical guards spotted a group of people and rushed over.

However, before these mechanical guards approached, wisps of white mist swirled over their bodies.

All the mechanical guards froze in place, freezing into ice almost instantly.

The White Frost King and his party didn't even look at the mechanical guards, turned into afterimages, and continued to penetrate extremely fast.

.....

And in the other direction of the core area of El Mechanical Ruins.

On the roof of a kilometer-high building, a small green demon wearing a heavy black armor and holding a huge scarlet battle axe looked at the communication crystal and grinned:

'Hehehe~ The strange black flying machine that has been going viral recently is actually controlled by a human genetic warrior? It's interesting? Those two guys should have explored several floating cities, right? They have to find a chance to grab all their treasures. come over.'

beside the green demon, a green demon in leather armor smiled and said:

'Boss, the two lord-level subordinates of that guy Bai Lin were cleaned up by those two humans. This time we have more lord powers than them. It is a great thing for us~www.mtlnovel .com~hehehe~ In the entire ruins, there will be no more than 30 lord-level geniuses who have broken through to the second-order battle division. There are only eight under Bai Lin, and now there are two less. Hehehe~~Wonderful! Those two humans are a bit interesting. If they are willing to give us the baby, I don't have to clean them up.'

'Boss, you are so kind!'

'Hey hey~~ That must be, but labor and capital are kind Barton.'

The corners of his mouth raised, and a tyrannical look flashed in his eyes.

.....

and in the other direction of the core area.

A white-haired cat girl flickered and came to the rooftop of a kilometer-high building.

On the rooftop, two cat girls are using various instruments to barbecue.

sat on the side every night, quietly watching the golden barbecue, with a look of greedy.

At that moment, the white-haired cat girl came to Ye Ye.

She whispered: 'His Royal Highness, there is news that the aircraft that has been making a lot of noise recently was driven by two human fighters. They also cleaned out Bai Lin's two lord-level subordinates. This is information, please. You have a look.'

Hearing this, some reluctantly looked away from the barbecue.

After seeing the phantom of the Inland Edge of the Communication Crystal, he was stunned every night, and the dark vertical pupils were slightly widened, and the original dazed expression showed a touch of surprise:

'Lu Yuan?'
