

Chapter 14: My Genes Evolve Infinitely

2 BAD NEWS, EXPERIMENT

Lu Yuan was hiding in the corner, looking at the two black-patterned graystone beetles in the distance, his eyes flashing.

There is no chance of winning in a head-on confrontation, so it can only be outsmarted.

He looked at the surrounding environment, thinking about countermeasures.

Not long after, Lu Yuan looked up at the dim sky, then at the top of the Gobi, and then at the surrounding environment, slightly narrowing his eyes.

He had a bold idea.

He came to the front of the stone wall, put away the black light alloy sword in his hand, used his hands and feet together, and crawled towards the top of the stone wall.

The stone wall is steep, and if Lu Yuan was still an ordinary person, it would be impossible to climb up.

But Lu Yuan is a genetic warrior after all. He is much better than ordinary people in every aspect of his body. He has strong hands and feet, coordinated muscles throughout his body, and agile body. In a short time, he climbed up to the Gobi which was thirty to forty meters long.

As soon as his head was exposed on the stone wall, he felt the screaming wind covering his face. The squally wind mixed with yellow sand made Lu Yuan's face hurt. After all, Lu Yuan's face was not thick enough.

The huge power made Lu Yuan's head straight back.

caught off guard, his hands broke away from the stone wall, and his body fell backward.

Lu Yuan felt a somewhat empty arm, his pupils contracted violently, and his heart almost stopped.

The Gobi, thirty or forty meters high, even if he is now, he will definitely be dead.

At an urgent juncture, a black light alloy sword appeared in Lu Yuan's hand. With force from his waist, the alloy sword pierced the stone wall.

嗤!

The alloy sword submerged in the stone wall, Lu Yuan's right hand supported the alloy sword, which stabilized his figure.

Lu Yuan took a few breaths, his eyes still tingled with palpitations.

‘Fuck, I scared my baby to death! I thought it was going to be gone.’

After slowly coming over, Lu Yuan supported his body, and with all his strength, he climbed onto the Gobi.

The sand in this area was originally very big, especially now it is still tens of meters high in the air, it is so sour and refreshing.

If you are not careful, people may be blown away.

The alloy sword in Lu Yuan's hand stabbed to the ground, and his feet were firmly stabilized.

Even so, Lu Yuan did not dare to open his eyes, his face stabbed with yellow sand.

Fortunately, Lu Yuan had already prepared.

The corners of his mouth raised, a smile appeared, and a goggles appeared in his hand.

This is the tool I bought when I was watching newbie posts.

After all, the initial urban environment in the place of origin is very harsh. Stormwind and Sandstone City are full of gusts. If they appear in these two cities, then goggles are necessary.

After all, everyone is just awakened trainee genetic warrior, not to the point where there is no problem with sulfuric acid in their eyes.

Lu Yuan put on his goggles, and sighed that he had foresight and was well prepared.

deserves to be me!

After putting on the goggles, Lu Yuan could open his eyes.

He looked at the surrounding environment.

Because the wind here is too strong, no graystone beetles will come to such a place.

For the Greystone Beetle, where to eat is not to eat, do you have to come to this ghost place to suffer?

Lu Yuan's gaze swept across, an empty space, with irregular bumps on the ground above, and traces of being blown by the strong wind everywhere.

Lu Yuan walked a distance ahead and came to the top of the U-shaped Gobi in a dead end.

After came to the top of the dead end, Lu Yuan slightly probed and looked down.

From top to bottom, you can see the two black gray stone beetles below the edge of the land.

Because the distance is too far, the black-patterned greystone beetle has become about the size of Luyuan's thumb, and the same is true for the wooden treasure chest.

When Luyuan observed two black graystone beetles from the Gobi, the two black graystone beetles did not move at all, and they were still enjoying the delicacy of the rocks.

Obviously, even an elite-level black-patterned graystone beetle, its perception range cannot reach the position of Luyuan.

This relieved Lu Yuan.

In this case, his next plan becomes much simpler.

'Let me see if it is the same as I thought.'

Lu Yuan raised the corners of his mouth, showing a slight smile.

He came to the side of a stone pillar with a thickness of almost one person, stretched out his hand to grab the protruding position of the stone pillar, and easily broke off a stone.

Then Lu Yuan squeezed hard, and without much effort, the stone turned into fine sand.

Lu Yuan raised his eyebrows and blew a whistle.

Weathered.

Under such squalls, even hard rocks cannot withstand the forces of nature.

Water can wear rocks, let alone strong winds?

Lu Yuan's plan was perfected again.

'Try the reaction of these two guys.'

Lu Yuan glanced at the two black-patterned graystone beetles below, raised his eyebrows, and there was a slight dignity in his eyes.

The next moment, he found a stone that hadn't been weathered, the stone was about the size of a basketball.

Luyuan came to the top of the Gobi some distance from the black-patterned greystone beetle, and then took a deep breath, and with force with his right hand, he violently threw the stone to the ground almost two hundred meters away from the black-patterned greystone beetle.

boom!

The stone fell on the ground with a loud noise.

The sound was too loud, and the two black-patterned graystone beetles in the distance raised their heads at the same time and looked in the direction of the sound.

They looked at each other and their tentacles vibrated.

After a short period of time, the black-patterned graystone beetle on the right rushed in the direction of the sound.

And the other black-patterned greystone beetle remained motionless and remained in place.

Lu Yuan above the Gobi couldn't help frowning slightly when he saw this scene.

There are two bad news.

The first bad news is that such a movement can only lead away a black-patterned greystone beetle. He couldn't get close to the wooden treasure chest even if he only kept a black-patterned greystone beetle.

The second bad news is that this black-patterned greystone beetle runs too fast, right? !

Lu Yuan compares, this guy's speed is 40-50% faster than the ordinary graystone beetle.

At this speed, if Lu Yuan is discovered, he can close his eyes and wait for death. The gods can't save him.

also grew up eating rocks, so why is the difference so big?

Lu Yuan couldn't figure it out.

Lu Yuan still has a way to solve the second problem, but the first problem is still a bit difficult for Lu Yuan.

While Lu Yuan was thinking, the black-patterned greystone beetle that ran out had already reached the area where the stone fell.

After seeing the gravel on the ground, the black graystone beetle squeaked. It looked up and looked around, its tentacles trembling, observing the surroundings.

After a while, the black streak graystone beetle did not find the enemy, and there was a big doubt in its small eyes.

After squeaking a few times again, the black-patterned greystone beetle trot back all the way.

After the black-patterned greystone beetle returned, Lu Yuan looked at the two black-patterned greystone beetles that started to eat again, thought about it, and smiled.

'Let's start the second test.'

This time, Lu Yuan found two basketball-sized stones.

He held the stone with both hands and threw the stone in the left and right directions of the two passages respectively.

咚咚!

Two loud noises sounded again.

The black-patterned graystone beetles that had just started to eat raised their heads again, and they screamed maniacally. UU reading www.uukanshu.com was interrupted twice in a row, they were obviously not very happy.

Their sharp claws slid on the ground, making marks on the hard ground.

The two black graystone beetles looked at each other again, their tentacles trembling.

Then this time the black graystone beetle on the left rushed out, and the black graystone beetle on the right remained.

Not long after, the black-patterned graystone beetle that rushed out came to the first landing spot.

Like the black-patterned greystone beetle before, it first looked at the surroundings. After it found no enemy, it screamed a few times, and then ran to the second place and looked again. No enemy was found in the place, and the black-patterned greystone beetle screamed manic.

Squeak!

When screaming, its claws ran across the rubble that fell on the ground, and its sharp mouthparts bit the rubble, and the bite creaked.

After it finished eating the gravel, it trot back with satisfaction.

Lu Yuan raised his eyebrows and started the third experiment.

This time, Lu Yuan directly found three rocks and threw them in three directions.

咚咚咚!

The dull sound came again.

The two black-patterned graystone beetles who were planning to have a beautiful meal raised their heads for the first time.

This time, the two black graystone beetles did not communicate, they screamed and rushed in the direction of the sound.

Lu Yuan's eyes lit up and a smile appeared.

The first problem is solved.

As for the second question, that is the speed of the black gray stone beetle.

How did he quickly open the wooden treasure chest after diverting the black graystone beetle, and then escape?

For this question, Lu Yuan has already planned.
