

# Chapter 145: My Genes Evolve Infinitely

## SON OF THE WORLD, THRONE OF STEEL

In the air, four extremely powerful spiritual energy rays shot towards Black Bear One.

The terrifying spiritual power fluctuations shocked all the geniuses below to stare, staring at the direction of the sky in shock.

‘Four pinnacle lords!’

Everyone stared at the Black Bear No. 1 to see if they could stop the simultaneous attacks of these four pinnacle lord-level aircraft.

At this moment, a few afterimages crossed the chaotic sky.

Those are a few intermediate lord aircrafts.

These mid-level lord aircraft fired at the psionic cannon of the pinnacle lord.

boom! !

The psionic cannons collided with each other, and the circular air waves spread in all directions, spreading hundreds of meters away.

The powerful air current vibrated, causing all the nearby aircraft in the melee to be blown out.

The power of the pinnacle lord’s psionic cannon is naturally far superior to that of the mid-level lord’s psionic cannon, and only for a moment when the pinnacle lord’s psionic cannon disperses the mid-level lord’s psionic cannon.

The remaining psionic cannon continued to shoot towards the black bear one.

However, several intermediate lord aircraft were placed on the trajectory of the psionic cannon.

The psionic cannon slammed into the psychic shield of the mid-level lord aircraft, and the roar sounded again.

Cracks appeared on the psychic shield, and then it shattered.

The psionic cannon finally blasted on the body of the intermediate lord, blasting them to pieces.

While the mid-level lord aircraft resisted the attack of the pinnacle lord aircraft, the black bear one had already rushed out two kilometers, leaving the pinnacle lord aircraft behind.

At this moment, the sirens on Black Bear One kept sounding again.

In the air around Black Bear One, a large number of red dots appeared.

There are more than ten!

These red dots are all Lord-class aircraft.

Among them are three red dots that are as dazzling as the previous Pinnacle Lord aircraft.

Lu Yuan's face was condensed, his spiritual power was running at full capacity, and the mechanical control broke out.

All aircraft below the lower lord level flew in the direction of the three pinnacle lords.

Lu Yuan used the interference ability to make aircraft below the lower lord level treat the pinnacle lord as an enemy.

Lu Yuan controlled six intermediate lords and rushed towards three high-level lords.

While all the aircraft were grouped together, the Black Bear One moved on.

The roar continued in the air.

Looking up from below, the geniuses of various races can see that the densely packed aircraft defense line that resembles a swarm of locusts starts from the moment the Black Bear 1 enters, and the aircraft in that area have been in chaos.

All kinds of psionic cannons flew, roaring through the world, and the dazzling aura flashed stroboscopically.

The geniuses of the various races below can only vaguely see that the black diamond-shaped aircraft is slowly and firmly deepening into the defense line.

There was only a short distance left from the central floating city.

Almost everyone held their breath and stared at the diamond-shaped aircraft, trying to see if they could cross the last short distance and enter the central floating city they dreamed of.

.....

In the air, on the Black Bear One.

Ye Ye and Amy both had serious faces at the moment.

In front of them, the terrifying battles displayed in the external image projected by the Black Bear One made their faces tense.

Amy looked at Lu Yuan from time to time. Seeing Lu Yuan's face serious, she continued to look forward.

Ye Ye was more calm than Amy, just silently watching the melee ahead.

The Black Bear One is only the last three kilometers away from the Central Floating City.

For such a short distance, it would not even take a second if the speed limit of Black Bear One broke out.

Even if it explodes at five times the speed of sound, it only takes two seconds.

Amy and Yeye can even see the huge tall buildings in the floating city, and the huge steel throne in the deepest part of the floating city.

It is a pity that there are densely packed, tens of thousands of aircraft.

At this moment, unprecedented ear-piercing screams sounded.

Between the Black Bear One and the Central Floating City, there were nearly a hundred red dots in the last three kilometers of defense.

Among them, there are ten peak lords, and there are even two aircraft of the level of perfect lords.

Seeing this scene, Amy and Ye Ye's pupils contracted violently, and they clenched their hands involuntarily.

Lu Yuan also narrowed his eyes.

He could already feel that the aircraft in this area began to condense the fluctuations of spiritual power.

He showed a crazy smile:

'Amy, Ye Ye, get ready, I'm going to rush!'

There was a mysterious light burst in his dark eyes, and violent spiritual power fluctuated.

Lu Yuan squeezed almost every bit of his potential, using mechanical control with all his strength.

boom!!!

The riot began.

Under the interference of the land edge, the low-level lord aircraft and the aircraft below the lord all rushed to the high-level lord's aircraft, and the entire sky fell into chaos.

Hei Xiong No. 1 turned into a streamer and rushed to the central floating city in an instant.

At this moment, the central floating city suddenly hummed.

Afterwards, a faint blue light mask suddenly appeared outside the central floating city.

This mask is extremely huge, covering the entire central floating city.

And their Black Bear Number One is now rushing towards the light mask given to You Blue.

If you hit the mask, you will stop even if you don't get hurt.

Seeing this scene, Ye Ye and Amy's eyes widened, and a flash of horror flashed in their eyes.

'Lu Yuan!'

Amy exclaimed.

Ye Ye also turned to look at Lu Yuan.

After seeing Lu Yuan's Shen Ning face, Ye Ye's eyes flashed, and she didn't speak.

At the same time, in the steel city.

Everyone also saw that when the diamond-shaped aircraft approached the central floating city for the last two kilometers, a huge mask suddenly appeared on the floating city.

The moment they saw the mask, everyone's eyes widened, and a stunned color flashed in their eyes.

'Shield?!'

Afterwards, most of them laughed wildly.

'Hahahaha!! Hahahahaha!! I didn't expect it! I didn't expect it!'

'Hahahaha! No one has ever entered the Central Floating City from the air. No one knows that there will be a shield above the Central Floating City at this time!'

'Hahahaha!! Wonderful! Now let's see how the Night King and the two humans survive!'

'Deep into the line of defense where Lord-class aircrafts are piled up, and the way is blocked by the shield. How can they survive?!'

While everyone was laughing, Lu Yuan's face was cold and cold on Black Bear One.

Continue to control the low-level and intermediate-level lords to rush to the peak and even complete the lords, resisting the psionic cannons they fired.

Under the psychic energy fluctuations, the Black Bear One hit the aircraft with the shield in front of them, and slammed into the light shield.

Amy and Yeye constricted their pupils.

Amy closed her eyes quickly, not daring to look more.

And Ye Ye's face also showed a touch of shock.

At this moment, there were strange waves circulating in Lu Yuan's body, and then the Black Bear One hit the blue light mask, as if hitting the water, directly integrated into the light mask, and passed through the light mask.

Behind Black Bear One, a high-level lord aircraft wanted to hunt down Black Bear One, and hit the dark blue light shield heavily, and it exploded directly.

Black Bear One, floating in the air of the central floating city unharmed.

On the outer sky defense line, all the aircraft continued to return to their original positions as if nothing had happened.

The fierce battle seemed to have never happened.

.....

Below the central floating city.

The laughter of the genius warriors of the races who were laughing abruptly stopped.

At this moment, everyone was wide-eyed and looked at the aircraft passing through the shield in disbelief.

The atmosphere suddenly became very silent.

After a moment of silence, a strong Kaman yelled:

'It's impossible!! That mask obviously blocks the aircraft that is also a ruined mechanical life, but why doesn't it block the aliens and the night king?!'

‘This is unreasonable! How could it be possible?! Is the shield on the floating city in the center not displayed properly?!’

The other genetic warriors are also dull and unscientific.

No matter what they thought, they couldn’t imagine why the shield of the central floating city blocked the aircraft, but didn’t stop the three people who had become outsiders.

‘...If this is the case...Did the Night King and the two humans enter the central floating city four hours before the opening of the central tower?’

An elf girl muttered to herself.

The other people’s voices stagnated, and they all became quiet.

Everyone looked at each other, not knowing what to say for a while.

.....

The central floating city, in the air.

On Black Bear One, the atmosphere is also very quiet.

Amy, who had closed her eyes, suddenly heard the roar around her calm down and seemed to become quiet.

She opened her eyes surreptitiously and looked around.

When she saw the surrounding tall buildings, the shield behind her, and the large number of aircraft outside the shield, Amy was stunned.

She blinked her big purple eyes, a little confused:

‘Why did we get in?’

Lu Yuan smiled: ‘We passed through the shield, of course we came in.’

Amy was taken aback, her eyes widened, and she couldn’t believe it:

‘We didn’t hit the shield?!’

She looked at the faint blue shield that still existed behind her, with a skeptical expression on her face.

How can this be ? !

Ye Ye has been keeping her eyes open since before, watching the spacecraft pass through the shield.

But at the moment she is also a little confused.

Ye Ye turned her head to look at Lu Yuan, with curiosity in her eyes:

‘Why did you pass through ?‘

Lu Yuan smiled: ‘I have an extraordinary talent.’

To be honest, before Lu Yuan came in, he was panicked when he saw a shield appearing here.

He thought he had to step back.

As a result, he didn’t expect that the feeling that he could go through the shield came to his mind.

This was not Lu Yuan’s illusion, but what El Mechanical Ruins told him.

During this period of time, Lu Yuan explored so many floating cities, and naturally obtained El core fragments.

After absorbing these core fragments of El, Lu Yuan didn’t feel any change except that he felt closer to El Mechanical Ruins.

Originally, Lu Yuan thought that after he and El Mechanical Ruins became closer, he could control all the mechanical guards and the like.

As a result, he still had to work \*\* his own to use mechanical control combat skills.

Unexpectedly, when I saw the shield just now, the Evolution Cube that had absorbed dozens of El core fragments suddenly shook. Lu Yuan knew instinctively in his mind

that he could drive the Black Bear One through here. Shield, enter the central floating city.

Because he is the existence recognized by the AI Mechanical Relics.

To put it in another way, is it the chosen person ?

Or is it the son of the world or something ?

No matter what the title, Lu Yuan finally came in.

As for this matter, Lu Yuan is naturally not good and Ye Ye and Amy said.

It seems that someone who can absorb so many core fragments of El has never heard of it.

If there is no Evolution Cube, Luyuan would not be able to absorb it.

Amy's mouth twitched when he heard Lu Yuan's words.

She remembered that Lu Yuan seemed to have been talented for a long time.

For example, the core fragment of El can be found. When they explored the floating city before, no matter how secret the core fragment of El was hidden in the corner, he found it.

She was numb before.

Another example is the ability to control mechanical life.

Various magical operations.

Now this guy can pass through the shield of the central floating city again ?

Why is she not so talented ?

Amy's head is full of question marks.

Naturally, Ye Ye is not as simple as Amy. He really thinks that Lu Yuan is talented.

She looked at Lu Yuan with deep eyes, and didn't ask much, just nodded and said calmly:

'We are now in the Central Floating City, four hours before the opening of the Central Tower. There is not much time, where shall we go next? You are talented, you decide.'

Amy also looked at Lu Yuan and said with a grin:

'Yeah, you are so talented, you have the final say.'

Luyuan is full of black lines.

Why do you feel that Ye Ye feels a bit awkward to say that he is talented?

He controls the Black Bear One to rise ~www.mtlnovel.com~ and you can see a large number of tall buildings on the floating city.

The lowest buildings here are 500 meters high, and there are thousands of meters high buildings everywhere. The higher you go to the core area, the higher the height.

In the central area, there are a large number of tall buildings over 10,000 meters, and in the core area, there is a huge steel throne standing.

Lu Yuan looked at the Iron Throne, his eyes flashed, and he said:

'Yeye, can we go there?'

Ye Ye shook her head slightly:

'I can't go. The lowest level of mechanical guards in the edge area of the central floating city is the second-order elite level, and the highest is the second-order lord level. When you reach the inner circle, there will be a third-order mechanical guard. There are third-tier kings.'

'Tier 3 King?!'

Lu Yuan's eyes widened slightly, a little shocked:

'Then who can go to that steel throne to get treasures?'

Amy rolled her eyes: ‘From the opening of the El Mechanical Ruins until now, no one has ever been to the central area.’

‘There has never been a person?’

Lu Yuan was stunned.

Amy nodded: ‘There is no one. Even if it is a person who inherits the king-level genes, when he absorbs the core fragments of El, when he first enters the second tier, his strength will not exceed the second-tier peak lord. Even the inner circle It is very difficult to survive. Even those who inherit the royal gene, I am afraid it will be difficult to enter the throne area.’

Lu Yuan: ‘...’

Tier 3 king, who can stand it?

Even if he was the second-tier pinnacle lord, Lu Yuan was not an opponent now.

Lu Yuan thought for a while: ‘Then let’s explore the tall buildings in the outer circle first. See if we can come across something we can use to deal with the two kings.’

Yeye and Amy nodded.

Lu Yuan controlled the Black Bear One and disappeared in place.
