

# Chapter 146: My Genes Evolve Infinitely

## MURDEROUS, 10,000-METER-HIGH BUILDING

Somewhere in the steel city.

Button looked at the image in the communication crystal.

After seeing Black Bear One pass through the shield and enter the central floating city, his pupils shrank and his face was full of shock and anger.

He squeezed the communication crystal tightly, his face cold and grim.

‘Beast! They actually entered the Central Floating City! There is a shield outside, how did they do it?! Damn! Damn!’

With a wave of the battle axe in his hand, the \*\* axe was cut down, and a crack of ten meters long was cut out from the tall metal building on the side.

The thought that the central high tower still had four hours to open, and during these four hours, the three of Lu Yuan had already begun to collect resources in the central floating city, and he felt unstoppable anger in his heart.

At this moment, the communication crystal flashed white light.

‘Um?’

Button connected, and Bai Lin’s handsome face appeared in the communication crystal.

Patton saw Bai Lin, a mocking smile appeared on his face:

‘Hey hey, isn’t this the noble Master Bailin? How could you contact me, an ugly green demon?’

Bai Lin’s face was cold, and he said:

‘Barton, needless to say these are useless. You should have received the news. The Night King followed the aircraft into the central floating city.’

The mocking smile on Barton's face froze, slowly disappearing:

'So what? What do you want to say?'

Bai Lin said lightly:

'You should also know that with the strength of the Night King, she can explore most of the outer towers in four hours, and only the leftovers will be left to us at that time.'

'Humph'

An ugly look appeared on Barton's face: 'You contacted me specifically to remind me of this? I'm not stupid, you don't need to remind me specifically!'

Bai Lin said lightly:

'I contacted you to cooperate.'

'cooperate?'

Barton was taken aback, and there was a trace of amazement in his cold and tyrannical eyes.

He stared at Bai Lin with wide eyes, as if he heard some funny joke:

'Hahahaha! The noble Master Bailin is going to cooperate with me as a green demon?! Are you kidding? Well, I admit that you are a good joke.'

Facing Barton's sarcasm, Bai Lin didn't have the slightest fluctuation on his face.

He spoke lightly:

'I'm not kidding.'

The wild laugh on Barton's face slowly receded.

His face became serious, he looked at Bai Lin, the two sides looked at each other, and the atmosphere fell silent.

After a while, Patton slowly said:

‘How to cooperate?’

‘When the central tower is opened, we will join hands to find the Night King and the two humans after we are on the central floating city.’

Button frowned:

‘Then what?’

Bai Lin said indifferently: ‘Kill them.’

Button sneered:

‘Bai Lin, are you stupid? You don’t think they haven’t escaped from the crystal, do you?’

Bai Lin looked at Button and said lightly:

‘I have a way to deal with this. The question now is how to ensure the kill, otherwise they can escape.’

Hearing what Bai Lin said, Patton frowned and looked at Bai Lin:

‘Do you have a treasure that interferes with detachment? Good luck.’

You know, escape crystals are precious, but treasures that can interfere with escape are several times more precious than escape treasures.

Bai Lin did not answer, but just looked at Button:

‘You just need to tell me if you want to cooperate.’

Button smiled:

‘What if they ran away in a flying machine when we went up?’

Bai Lin fell silent and said:

‘If they are not found, the cooperation will be void.’

Button grinned:

‘If that’s the case, it’s a pleasant cooperation.’

A hint of coldness flashed in Bai Lin’s eyes:

‘Happy cooperation.’

In the central tower, there is a huge square in front of a 10,000-meter-high building, and a street 100 meters wide outside the square.

Hei Xiong 1 slowly landed from the air to the street, and finally stopped at a height of 20 meters in the air.

The hatch opened, Lu Yuan, Amy and Ye Ye jumped out of it and landed on the ground.

After the three of them landed, they looked at the square.

There are hundreds of mechanical guards on the square.

Ordinary mechanical guards are three meters high with a dark black metal shell, and the leader of the mechanical guards is four meters high.

There are also two five-meter-high mechanical guards.

At the gate, there is a ten-meter-high mechanical guard and four five-meter-high mechanical giant dogs.

A hint of surprise flashed in Amy’s eyes:

‘Even the ordinary patrol members are at the second-tier boss level, the captain is at the second-tier boss level, and there are two intermediate lord mechanical guard leaders. The gatekeeper turned out to be the pinnacle lord? There are also four high lord level mechanical giant dogs. This mechanical guard configuration is too strong, right? The gatekeepers of those 500-meter-high buildings only have two second-tier bosses.’

Ye Ye Qiao’s face was indifferent, and she said:

‘This is the tallest building in the periphery. Only geniuses above the King level can enter.’

Lu Yuan smiled and said:

‘Then we are going to give it a try.’

‘Speaking of this big liar! When will you return my genetic weapon to me?’

Amy’s eyes widened, looking at the battle armor on Lu Yuan’s body and the staff in her hand.

These are her genetic weapons!

Lu Yuan also discovered that he was still wearing Amy’s genetic weapons.

He coughed and said:

‘I’m a little used to using it before, and I feel pretty good. I’ll give it back to you now.’

Lu Yuan forced the gene-armed phantom from the gene chain, turned it into a light group, and handed it to Amy.

After Amy absorbed it, the silver armor and staff appeared.

The genetic weapon blessing on the genetic chain will automatically adjust the size of the genetic warrior according to the size of the genetic warrior.

They are very comfortable and fit.

Wearing it on Lu Yuan is no different from wearing it on Amy.

Amy put on her genetic weapon again, waved her staff, her mouth raised, and a smile appeared.

Lu Yuan also put on his own genetic weapon at this moment.

Black and gold battle armor, and black and gold heavy sword.

This is also the second-tier lord-level genetic weapon, dropped from the previous lord’s aircraft.

ss7 type battle armor second order 60 and s7 type mechanical epee second order 80

The two lord-level genetic weapons brought extremely terrifying power.

The strength of all aspects around Lu Yuan more than doubled directly under the arms of these two powerful lords.

In addition to the flying star crest he obtained before, he now has fully blessed three second-tier lord-level granting weapons.

In fact, he still has several genetic weapons suitable for his use.

It is a pity that his current physical strength and genetic chain strength are not enough to bless more.

But even if there are only three, not all geniuses can have it.

After all, there are not many fierce beasts of the second-tier lord in the outside world, and the lord-level genetic weapons are even less.

That is to say, there are so many lord-level mechanical guards in the El Mechanical Ruins.

This is also the reason why all first-tier genetic warriors will enter the El Mechanical Ruins.

The resources are too abundant.

After blessing with genetic weapons, Lu Yuan smiled:

‘I’m going up first, first clear the mechanical guards on the square.’

Amy and Ye Ye both nodded.

Lu Yuan rushed directly into the square, and all the mechanical guards who were patrolling at the moment turned their heads to look at Lu Yuan.

Spiritual energy surged, and all the mechanical guards defined Lu Yuan as an enemy, and were about to launch an attack on Lu Yuan.

At this moment, the light in Lu Yuan’s eyes flashed, and the mechanical control came into operation.

Without Amy's genetic weapons, his mental power has become much weaker, and the Intermediate Lord Guarding Lu Yuan can no longer control it.

But apart from the two intermediate lords, half of the other mechanical guards were controlled by Lu Yuan.

Hundreds of mechanical guards turned and attacked their companions.

The mechanical guard that was attacked was a little dazed, but instinctively launched a counterattack.

For a time, only two intermediate lords remained.

The two intermediate lords are mechanical lords of the assault system.

One is holding a huge battle axe, and the other is holding a black iron rod.

The eyes of the two mechanical lord flashed with red light, and they rushed towards Lu Yuan.

At this moment, a black sword light flashed by, and Ye Ye appeared behind the two Mechanical Lords.

The heads of the two mechanical lords fell down at the same time,

Their bodies ran a few steps ahead before landing heavily.

Lu Yuan and Amy who had originally planned to attack were both stunned.

Ye Ye's face was cold, and when Lu Yuan and Amy were staring at her, she tilted her head, a look of doubt flashed in her eyes:

‘What's wrong?’

The corners of Lu Yuan's mouth twitched: ‘It's okay.’

Amy walked over in silence, with an envy look in her eyes, looking at Ye Ye:

‘Is this the power of the king class? Very powerful.’

Lu Yuan was also very envious.

He wants to reach the gene of the king level, I am afraid that he has to be upgraded by another level.

However, if he had obtained the resources of the Central Floating City, Lu Yuan felt that it would not be difficult for him to refine his three lord-level genes to completion.

Maybe there will be resources to evolve all the genes at that time, and then refine the third-order gene chain to completion?

Lu Yuan was full of expectations.

Soon, all the mechanical guards almost died in cannibalism.

The remaining Lu Yuan used mechanical control to make them self-destruct.

It only took less than a minute for the three of them to clear such a huge square.

It can be said that the speed is extremely fast.

After that, Lu Yuan looked at the mechanical guard of the pinnacle lord and the four mechanical giant dogs of the high lord in the center, with shining eyes.

‘Yeye, give you the pinnacle lord? Amy and I will deal with the four high lord first?’

Every night nodded:

‘Um.’

Amy is also a little eager to try.

If you don't have this set of lord-level weapons, with the strength of Lu Yuan and Amy, you can only fight against low-level lords, but now with this set of lord-level weapons, their strength is not even against high-level lords. Will feel flustered.

Amy took the lead, and hundreds of Celestial Wisteria shots shot out, spreading to the four giant mechanical dogs.

Four mechanical giant dogs and a mechanical guard were alarmed.

Their eyes flashed red, and they roared towards Amy.

As mechanical beings, their speed is not a strong point. Even if they are mechanical giant dogs, their speed is relatively fast, and they are still not as good as the current Lu Yuan.

As for the mechanical guards, the speed is even slower.

When they rushed towards Amy, Lu Yuan directly used mechanical control to interfere with a giant mechanical dog.

Let him treat another giant mechanical dog as an intruder.

Suddenly the two giant mechanical dogs fought.

The remaining two giant mechanical dogs were trapped by the extremely fast Tianluo Wisteria.

The two giant mechanical dogs continued to struggle, and eventually even the mouths that could fire psionic bombs were trapped.

And the black sword light flashed in front of the mechanical guard of the lord pinnacle.

The crystal shield on the mechanical guard vibrated for an instant, roared loudly, and his body took a few steps back.

Ye Ye appeared in front of the mechanical guard with a black sword in his hand.

‘Intruder! Clear!’

The mechanical guard roared and rushed towards Ye Ye, with the epee in his hand carrying a strong sword light, slashing towards Ye Ye.

Ye Ye was expressionless, his body turned into an afterimage, easily avoiding the attack, and the black sword light fell on the crystal shield of the mechanical guard from time to time.

Ye Ye brought the mechanical guard to the side while fighting.

And Lu Yuan had already arrived in front of the bound mechanical giant dog, and the heavy sword kept cutting down.

Before long, he killed two giant mechanical dogs that could not fight back.

The remaining giant mechanical dogs that were attacking each other were already a little damaged. They were \*\* by Tianluo Wisteria, and soon they were chopped off by Lu Yuan.

After Lu Yuan and Amy killed the four giant mechanical dogs, Ye Ye also walked over.

Behind her, the mechanical guard fell to the ground, with hideous sword marks on her body.

Amy's eyes are shining and her face is full of smiles:

‘It's so easy.’

Lu Yuan smiled and looked at Yeye:

‘It's still because Ye Ye blocked the mechanical guards of the lord's peak. Otherwise, the two of us alone may not be able to beat these mechanical guards~[www.mtlnovel.com](http://www.mtlnovel.com)~Lu Yuan still has a certain understanding of his own strength. of.

Fighting alone, he and Amy, the two mechanical lords who fought a peak, would definitely not win.

After all, Amy is only a Tier 2 primary cultivation base, and because Lu Yuan hasn't fully tempered his three genes, he hasn't even reached the primary level. Even if he wears a lord-level genetic weapon, he wants to defeat the lord of the second-tier pinnacle. Difficult.

Soon, light groups appeared on all the mechanical guards.

The three of Lu Yuan picked up the things.

Everything is placed here in Lu Yuan and will be distributed in time.

After all, Amy and Yeye are not yet familiar with each other, only Lu Yuan and the two are familiar with each other. Putting them here with Lu Yuan makes them both at ease.

Although I picked up everything, this is not the time to distribute the light group. After all, there is still this 10,000-meter-high building that has not been explored.

‘go in.’

Lu Yuan smiled, with a hint of excitement in his eyes, first opened the door and walked in.

Amy was also looking forward to excitement, and trot to keep up with Lu Yuan.

Even Yeye, a look of expectation appeared on that indifferent little face, and he followed Amy.

Ten thousand meters high building, this is the height that the steel city on the ground absolutely does not have.

The treasures inside must be amazing.

The internal structure of a tall building is no different from other areas.

It’s just that as the stairs went all the way up, Lu Yuan looked up even very hard to see the end.

‘How many rooms are there?’

Amy also raised her head and asked curiously.

Ye Ye faintly spoke:

‘nine.’

‘so little?’

Amy’s eyes widened, a little dissatisfied.

Lu Yuan also frowned, ‘Let’s go up and take a look, maybe things are precious?’

Amy nodded helplessly.
