

Chapter 149: My Genes Evolve Infinitely

KILL BUTTON

Black Bear One stopped at a height of 20 meters on the street, the hatch opened, and the three of Lu Yuan jumped down.

Lu Yuan controlled the Black Bear One to go to the sky to prevent it from being destroyed by two king-level geniuses.

This is his future means of transportation and the house in the field. If it is destroyed, he will have no place to cry.

In the past few days, they have also explored a lot of tall buildings, but they only obtained such a flying machine. One can imagine how lucky he and Amy were at that time.

Amy blinked her big eyes, looked at the mechanical guard in front, and then at Lu Yuan and Yeye.

‘What shall we do next?’

Ye Ye said indifferently: ‘Now Patton and Bai Lin are acting alone, unable to confirm their location, but someone should have notified them.’

Lu Yuan thought for a while: ‘Then they should come over. Let’s clean up the mechanical guards first. Let’s fight as usual. Just wait for someone to come and clean them up.’

Amy and Ye Ye both nodded.

With the various treasures they obtained from these eight million-meter-high buildings, it is not difficult to deal with two king-level geniuses, not to mention that there is also a king-level genius among them, Ye Ye.

The three began to clean up the mechanical guards, and the roar continued.

With the strength of three people, it took less than a minute to clean up the mechanical guards.

They did not deliberately keep their hands, so as not to let people see that something is wrong.

Soon, even the gatekeeper was killed.

Various light groups floated on the bodies of mechanical guards all over the ground.

The three of Lu Yuan began to pick up the light group, moving leisurely.

At this moment, two figures fell from the tall building on the side.

When Patton hit the ground, it was as if a meteorite hit the ground, smashing a deep hole in the ground.

When Bai Lin landed, he was as light as a fluffy cat, and looked very elegant.

After the two landed, six more genetic warriors of various races landed.

These genetic warriors are all lord-level auras.

In addition to them, there are also a lot of leader-level geniuses on the roofs of the surrounding tall buildings.

Everyone is watching the three of Lu Yuan at the moment.

The headed Patton looked at the three of them, with a smirk on his face.

‘Night King, we meet again.’

Bai Lin’s face was cold, he raised his head and glanced at Black Bear One in the air, then looked at Lu Yuan and Amy, and said lightly:

‘It was you two who cleared Yang Qian and Ji Gong before, right?’

Lu Yuan raised his eyebrows and smiled:

‘Yes, what do you want?’

With an indifferent color in Bai Lin’s eyes, the corners of his mouth raised slightly:

‘What do you want? Of course you want to.’

A black cube appeared in his hand.

Lu Yuan felt familiar when he saw the cube.

The next moment, Bai Lin’s spiritual power was injected into the cube, and there was a faint blue light flowing on the cube, and a humming sound rang.

A light blue light curtain spread out, covering an area of ten kilometers.

The three of Lu Yuan looked at the light blue light curtain, their expressions changed slightly.

Seeing the slight changes in Lu Yuan's trio's complexion, Bai Lin showed a faint smile:

‘Fortunately, I got a jammer that can interfere with the detachment crystal. I thought it was not useful, but I didn’t expect it to be used on you.’

Barton looked savage and laughed wildly:

‘How? I didn’t expect it! Hahaha, today, all your gains will belong to us.’

Lu Yuan and Yeye and Amy looked at each other, and the three of them looked a little weird.

The next moment, Lu Yuan also took out the same cube.

He showed a slight smile:

‘Coincidentally, we just got this thing.’

Spiritual power poured in, and another light blue light curtain emerged, covering the previous light blue light curtain.

Two light curtains cover the entire area.

Seeing this scene, Button and Bai Lin’s pupils shrank, revealing a hint of consternation.

When the two were shocked, a series of tall figures suddenly appeared in front of the three of Lu Yuan.

All are ten-meter-high mechanical guards.

There are a full fifty, and all the mechanical guards at this moment exudes the aura of the second-order peak lord level.

The breath of fifty pinnacle lords surged, causing Barton and Bai Lin’s face to change drastically, while the other lords and leader-level genetic warriors opened their eyes widening, and their eyes were about to come out.

More than fifty second-tier peak lords, is this a bit too exaggerated? !

Is this a fart? !

At the moment when all the pinnacle lords appeared, Bai Lin made a decisive decision, and the whole person turned into a cloud of white mist, floating towards the distance.

But Patton also had an ugly face, his whole body strength exploded, his stubby legs kicked on the ground, and his whole person was like a meteorite, rushing to the distance amidst the roar.

The three of Lu Yuan had already expected this scene, Lu Yuan's eyes flashed, and all the machine lord attacked.

At the same time, Ye Ye rushed out of six shadow clones.

Among them, Ye Ye and the two shadows broke up and rushed towards Patton, and the remaining shadow clones rushed towards the white mist with Amy.

Now that you have used jammers, don't let them go.

After all, every lord probably has a lot of gains.

Those who can come here are all geniuses. Everyone originally thought that surrounded by the two king-levels of Patton and Bailin, as well as six lords and a large number of leader-levels, no matter what, they had no reason to lose.

This is a double or even triple the difference in combat power.

In the worst and worst case, it was nothing more than to let the three of Lu Yuan escape.

But everyone never expected that these three people would directly come up with fifty lord-level mechanical warriors, and they would still be the pinnacle lord.

Can this be fun?

Everyone's reaction was not slow, and at the moment when these fifty lord levels appeared, they had already ran far away.

The distance of ten kilometers is not too far away for them. If it is a genetic warrior who is biased towards speed, at the second-tier lord level, the speed can even reach 100 meters per second, and it only takes more than one minute to rush out.

At their speed, they can run out.

However, seeing everyone running away, Lu Yuan smiled and took out a mechanical instrument again.

It is a silver-white pyramid-shaped instrument.

After Lu Yuan injected spiritual power, Zizi's electromagnetic sound flowed.

The electromagnetic waves spread out towards the distance with the three people at Luyuan as the center, and finally formed a pyramid electromagnetic shield with a bottom side of about two kilometers.

Seeing a shield in front of them blocking their way, everyone's expression changed.

The third stage of Bap's electromagnetic shield generator: Lord-level mechanical magical creature.

This generator can create a powerful electromagnetic shield, the size can be adjusted with the user, and the defense ability is extremely strong.

Can easily defend against the attacks of second-order genetic warriors.

Not only is it defending against attacks from the outside world, it can't be broken even inside.

Unless it is Lu Yuan withdrawing the spiritual power supply, turn off the generator.

Obviously, Lu Yuan would not do this.

No one thought that there would be such a generator.

Button's speed is very fast, and he has rushed to the side of the electromagnetic shield in a short time.

With an axe in his backhand, he forced the four night shadow clones back, and then a sharp light flashed in his eyes, a blood flame burned all over his body, and he slashed towards the electromagnetic shield.

boom! !

Under the roar, the white light sputtered with a dark blue arc, and a hole of tens of centimeters appeared.

Before Barton had time to show a smile on his face, the electromagnetic flow, the opening closed again.

The smile on Patton's face froze.

'How can it be!'

Lu Yuan's face in the distance was calm, continuously inputting spiritual power, maintaining the operation of the electromagnetic shield, and at the same time starting to control all the mechanical lord attacks.

Facing the powerful mechanical warrior of the second-order peak lord level, even the genius of the lord level can't bear it.

After all, these lord-level geniuses just broke through to the second order, and they are still some distance away from the second-order peak.

Being able to persist under the strong attack of the second-order peak lord is already very powerful.

You know, even Lu Yuan, all of them are lord genes, and they have blessed three lord-level weapons, and they have to retreat steadily under the attack of the second-tier peak lord.

What's more, how can other people have so many lord-level weapons? Maybe there is even one lord gene?

Lu Yuan ordered six mechanical lords to deal with six lord-level geniuses of various races.

Four lords were separated to deal with Patton, four lords to deal with Bai Lin, and the remaining thirty-six mechanical lords were all geniuses of various races at the level of hunting leaders and bosses.

Even the lord-level genius can hardly resist the offensive of the mechanical lord, let alone the boss-level and boss-level?

A Kaman guardian leader was stared at by a mechanical lord, and the mechanical lord appeared in front of him with heavy steps, and the epee in his hand was cut down with the power of thunder.

The sword is heavy and extremely fast.

The leader of the Kaman Guardian System couldn't avoid it. He roared, his face was stubborn, and golden lights flashed all over his body, condensed into a light shield in front of him, and at the same time the huge shield was lifted up to defend with all his strength.

However, the lightning sword crushed the shield as soon as it hit the golden shield, and then smashed the huge shield with one sword, cutting the leader of the Kaman Guardian into two by the way.

The difference between the second-order peak lord and the second-order low-level leader is too big.

The screams sounded almost everywhere, accompanied by strong spiritual fluctuations and roars.

Regardless of the large number of leader-level and boss-level geniuses here, this is the genius selected from all the first-order genetic warriors of more than a dozen races in Baiyunzhou!

These leader-level and boss-level are placed outside, all of which are rare geniuses, at least they can enter the level of the Red Maple Empire genius camp.

However, under the hunting of the mechanical lord, there was no resistance. Even if he exhausted his methods, it was only to last longer.

If there is no interference domain, they can use the escape crystal to leave.

It is a pity that not only the jammer used by them, but also Lu Yuan also used the jammer. Everyone can't use the escape crystal now, and they can't even leave.

On the other side, Patton was fighting Ye Ye and Ye Ye's two shadow clones.

Patton is extremely strong, and the genes burned overnight are extremely strange, and just as soon as the battle, Patton was suppressed by the night.

But Patton's defensive ability is not weak, and he can barely support it.

As he resisted Ye Ye's attack while trying to find a way to break the electromagnetic shield, heavy footsteps sounded, and terrifying spiritual power fluctuations came from a distance.

Barton looked up and saw four second-tier peak lord level mechanical warriors rushing over.

His face suddenly changed from green to blue, and the corners of his mouth twitched.

'Damn! Where did you get so many treasures?! Are the treasures in the central floating city so rich?! How many tall buildings have you explored?!'

Ye Ye looked cold, did not speak, just kept attacking.

Under Yeye's attack, Patton could barely support, but after the four mechanical lords joined, just a moment, Patton was bombarded by a beam of huge psionic energy.

boom! !

His body flew out, hit the wall of a tall building hard, knocked the wall out of a deep hole, and fell from the height.

During the fall, he barely turned over, stepped on the wall with his feet, and instantly disappeared in place, and a dark sword light slashed from where he was before.

Button has appeared on the roof of another tall building.

Although there were no scars on his battle armor, blood had already spilled out of his body, and his face was grim and he kept breathing.

‘Damn it!’

Patton turned his head and looked at the electromagnetic shield on one side, a madness appeared in his eyes.

He took out the charms and psychic bombs one by one, and threw them to the electromagnetic shield.

Boom boom boom!!!

There was a roar, and the electromagnetic shield trembled and became dim.

Lu Yuan in the distance felt the instability of the electromagnetic shield, and his brow wrinkled slightly~www.mtlnovel.com~ He took out a silver-white pyramid instrument again, and continued to inject spiritual power.

Hum

The second electromagnetic shield rose.

Barton, who had seen the electromagnetic shield about to break, looked stiff when he saw this.

‘Your mother...’

One is not enough, do you use two?!

Can’t you afford it?!

Barton’s face was gloomy, and he had already planned to consume all the highly lethal items discovered from the mechanical ruins this time.

However, his plan had not been fully implemented yet, Ye Ye frowned slightly, and then reluctantly took out a blue-violet charm.

Magnetic Confinement Charm Level 3 100%: Lord Level Charm

She was infused with spiritual power, and the blue-violet curse turned into a ball of electromagnetic power, which instantly traversed the space, confining Patton in place.

A flash of horror flashed in the eyes of the imprisoned Button. Before he had time to react, he was bombarded by a psionic cannon fired by the mechanical lord in the distance, and dark green blood was sprayed in the air.

While flying in the sky, a series of dark sword lights flashed by, and Patton, who could not be defended, was instantly killed.

After his death, a large pile of objects fell out, piled up to more than 30 meters high, almost forming a hill.

All of this is what Barton has gained in Ayr's Mechanical Relics this time.

Looking at the hill every night, her eyebrows wrinkled slightly, and she spoke softly:

'Waste.'

The previous spell is one of her gains this time.

That is the spell of the third-order peak lord level!

Even in this harvest, it is one of the most precious items.

She didn't plan to use it at all, but if she didn't use it, there might be a little risk.

In desperation, Ye Ye can only use it.

After using one, she only had fifteen left.

Too wasteful.
