

Chapter 151: My Genes Evolve Infinitely

RECOGNITION OF EL MECHANICAL RUINS

In front of a two-kilometer-high building in the central floating city, Huo Tianhua and several human chief-level geniuses watched the news on the communication crystal at the moment, dumbfounded.

After being silent, a black-haired teenager cried out in disbelief:

‘My mother! What kind of monsters are those two humans!?! They actually killed the king?!’

Because the higher the genetic quality, the greater the improvement of oneself, the king-level genes can be much stronger than the lord-level genes.

Lord-level geniuses can actually kill king-level geniuses, which looks like a fantasy.

But the night king and two lords of their clan geniuses did it.

‘Although there is a Night King, the opponent has two king-levels together. Either the two lords of the same race have terrifying combat power, or they have obtained very powerful treasures. No matter which kind, they are now in the center. Floating City, I am afraid that their group can already walk sideways.’

Huo Tianhua’s eyes flickered, his eyes still filled with shock.

‘There is less than a day left. If we meet them, we should avoid them, lest they get upset and clean us out.’

The others nodded.

.....

In the entire central floating city, all geniuses gradually learned the news.

Regarding the Lu Yuan trio’s sweeping of Bai Lin, Patton and a group of Lord-level geniuses out of the El Mechanical Ruins, everyone was shocked and jealous.

For a while, no matter who it was, he thought that if he met Lu Yuan and his party, he would avoid it, so as not to get a conflict.

At this moment, the three of Lu Yuan were distributing the items dropped by Patton and Bai Lin, as well as a group of lord-level and chief-level geniuses.

Barton and Bai Lin, as king-level geniuses, reap the most.

Most of them are Tier 1 items, but in the core area, many Tier 2 items have also been harvested.

In all, each of them has a wealth of about one billion second-order spirit crystals.

Together, two people can barely compare with the wealth of a 10,000-meter-high building.

It is conceivable why everyone wants to enter the central floating city madly.

The resources here are the most abundant areas of the entire El Mechanical Relics.

Even if it is the two kings of Bailin and Barton, the gains in the steel city below are hard to compare with a 10,000-meter-high building, which is enough to show how rich the resources of the central floating city are.

As for the others, all lords and leaders combined are less than a king's harvest.

For the three of Lu Yuan who have now explored nearly ten 10,000-meter-high buildings, it can only be said that they are barely good.

What made Lu Yuan happy was that after everyone died, there were AI core fragments falling, and there were almost more than 300 pieces in total.

Even Lu Yuan had never obtained so many AI core fragments.

For Amy and Yeye, the El Core Fragment was useless, but for Lu Yuan, it was of great use.

All the core fragments of El were taken by Lu Yuan.

He absorbed all the core fragments of AI one by one.

As the more core fragments of El were absorbed, Lu Yuan discovered that his relationship with El Mechanical Ruins became closer.

After absorbing nearly a hundred core fragments of El, the Evolution Cube in Luyuan suddenly shook.

boom! !

There was a roar in Lu Yuan's brain.

The invisible thread that dissipated before appeared again.

Unlike in the tall building last time, Lu Yuan was outside this time. He discovered that the direction corresponding to the invisible thread turned out to be the central mechanical throne, and he seemed to want to connect with the mechanical throne.

Lu Yuan was a little surprised.

He was a little curious as to what would happen if the invisible silk thread and the mechanical throne were connected together, and began to continue to absorb these core fragments of El.

When Lu Yuan absorbed nearly three hundred pieces of El's core fragments, the invisible thread finally connected with the Mechanical Throne.

boom! ! !

The entire central floating city shook slightly.

All the people in the floating city were taken aback, their eyes widened, and their faces were horrified.

'what?!'

'What happened? The central floating city will shake?'

'earthquake?!'

'...'

Amy and Ye Ye, who were collecting various trophies, both had a meal, and looked up around them in shock.

‘What happened? Why does the central floating city seem to shake?’

Amy was a little shocked.

Ye Ye’s eyes were also shocked.

She had never heard of the fact that the central floating city would shake.

Lu Yuan was also shocked.

However, his shock was different from that of Amy and Ye Ye.

Lu Yuan found that he had a deeper connection with the mechanical ruins of El, and even he seemed to be connected to the core of the mechanical ruins of El.

This feeling is a bit similar to the feeling that Lu Yuan had before and the spirit creatures recognize the master.

This is what shocked Lu Yuan the most.

Are you kidding me? !

The mechanical ruins of El are the same as the spirit creatures, can they recognize the lord? !

If he recognizes the Lord, is he the owner of El Mechanical Ruins?

Can you master the entire mechanical ruins? !

Although Lu Yuan didn’t know if he could completely grasp the entire ruins.

But now, Lu Yuan felt that even if he left the El Mechanical Ruins after the trial was over, he could come back here at any time by relying on his connection with the Iron Throne.

This alone shocked Lu Yuan.

You know, the resources in the mechanical ruins of El are so rich, if he can come back in the future, then the resources of the entire mechanical ruins are his alone!

Although the highest-level items of the El Mechanical Ruins are only the third level, that is, the warlord level.

But this is the entire world of El mechanical ruins!

Just a 10,000-meter-high building has two to three billion second-order spirit crystals. What about the high-rise buildings in the central area?

Where is the mechanical throne in the middle?

So many resources are enough to make Lu Yuan's wealth comparable to the King of War, or even the rank of King of War.

The surprise was so big that Lu Yuan was a little confused.

It turns out that the core fragment of AI is such a function? Absorb the core and master the entire mechanical remains.

If this is the case, it is all due to Lu Yuan's Evolution Cube that can absorb El's core fragments.

Lu Yuan didn't believe that none of so many people had studied the core fragment of El.

I'm afraid there are many people studying this thing, and as a result, no one can absorb multiple core fragments of AI.

However, Luyuan can be absorbed by the Evolution Cube.

What the ** is this Evolution Cube? !

Lu Yuan took a deep breath, pressed his doubts in his heart, and calmed down his excitement.

For the time being, this matter must not be spread out.

This wealth is too great. If you say that you can enter and exit the El Mechanical Ruins at will, I am afraid that even the Emperor and even the Emperor will look at him.

Lu Yuan didn't think much anymore, as nothing happened.

After the invisible thread was connected with the mechanical throne, the vibration of the central floating city disappeared.

Amy and Ye Ye looked around with surprise in their eyes.

After confirming that the central floating city was no longer vibrating, Amy asked with some doubts:

‘What happened just now?’

Ye Ye shook his head.

Lu Yuan also smiled: ‘Maybe there is something unusual, let's continue to explore other tall buildings.’

Hearing what Lu Yuan said, Amy and Yeye blinked and nodded.

In less than a day after that, Lu Yuan and the three were on the Black Bear One, exploring the entire periphery of the Central Floating City.

Flying around the outer area of Floating City in a circle, even if the Black Bear One speeds up, it will take several hours.

However, with their strength, the mechanical guard in front of the 10,000-meter-high building was not an opponent at all, and they quickly explored all the 10,000-meter-high buildings.

After exploring the 10,000-meter-high building, the three of Lu Yuan carefully explored a section of the road towards the central area.

It was discovered that even the mechanical guards on patrol were Tier 3 bosses.

Just patrolling guards is troublesome to deal with with their current strength, let alone guards in front of tall buildings.

In desperation, the three of them could only retreat, seeking the second best option, and began to explore the surrounding 8,000-meter-high buildings, 5,000-meter-high buildings and 3,000-meter-high buildings.

What puzzled Lu Yuan was that it was true that they flew over on the Black Bear One, and all the genetic warriors would flee for the first time, and would not dare to meet them.

Then Lu Yuan thought for a while, it should have been the news of the killing of Bai Lin and Button.

After all, they were not killing all the strong men of the two kings alliance at the time, and some of the lords obviously did not come over.

I'm afraid they discovered that Patton and Bai Lin have left the ruins, so they guessed it?

Lu Yuan was not surprised, but felt that this was cleaner.

.....

At the same time, Hoarfrost Star, tens of thousands of light-years away from Daqi Star.

This is a white planet covered by frost in most areas. There is wind and snow roaring all year round on the planet, and the temperature is extremely low.

There is a hall of ice crystals on an ice peak of several kilometers on Baishuangxing.

In a room in the main hall, white light flashed, and Bai Lin's body emerged.

There was a trace of cold killing intent on his face, and his face was extremely ugly.

'what!!!'

The cold Bai Lin roared, the power of hoarfrost surged, the furniture in the entire room was destroyed by the terrifying force, and thick ice crystals were attached to the room.

Hearing the movement, the door of the room was opened, and two beautiful girls in snow-white dresses walked in.

After seeing Bai Lin, the two girls opened their eyes wide, and their eyes were full of shock.

‘Master?’

The two looked at each other, a little confused.

Shouldn’t the young master be in the place of origin now?

It shouldn’t be the time to come out yet, right?

The two did not speak out, but their eyes were full of consternation.

Bai Lin took a deep breath, calming down the anger in his heart.

He turned his head and glanced at the two girls, then nodded faintly: ‘I’m fine.’

At this moment, an ice mist suddenly appeared in the room, and the white mist condensed, turning into a very handsome white-haired man.

He glanced across the room full of broken furniture, frowned slightly, and looked at Bai Lin:

‘At this time, you should be at the El Mechanical Ruins.’

He looked at Bai Lin, his brow furrowed deeper:

‘Your cultivation base shouldn’t be the first order either.’

Bai Lin’s face changed, he gritted his teeth slightly, and squeezed out a few words with difficulty:

‘...I was killed.’

The handsome man was full of strong chills, and two white-haired girls not far away shivered and hurriedly crawled to the ground.

The handsome man looked at Bai Lin deeply:

‘Who killed it?’

Bai Lin thought of the sky full of thunder, and the corners of his mouth twitched abruptly.

His face was ugly: 'The Princess of the Heavenly Ming Empire...There are also two humans.'

'Yemu's daughter? I have heard of her. She inherited the Shadowwalker genes of the Night Hades. She is a rare arrogant in the Baiyun Star Territory, but...'

The handsome man looked at Bai Lin and said lightly:

'However, you are also in the genes of a natural king, and you are not as good as a talented arrogant of the same level, which disappoints me too much.'

Bai Lin's face became stiff, and he gritted his teeth abruptly: 'I didn't lose to Princess Ming! It's just that they can enter the Central Floating City ahead of time. I was slow for a few hours!'

The handsome man paused, looking at Bai Lin's eyes with a trace of doubt:

'Enter the Central Floating City in advance?'

'Yes! Princess Tianming cooperated with the two human lords. Among them, the human lords have obtained special treasures that can control mechanical life, and they have also obtained flying vehicles! Adding the two, they even entered the center ahead of time. Floating City! I wouldn't lose if I didn't slow them down for a few hours!'

Listening to Bai Lin's explanation, the handsome man narrowed his eyes slightly, his eyes flickering with a hint of light:

'A special treasure that controls mechanical life? What level of mechanical life can be controlled?'

Bai Lin thought for a while and said:

'Should be able to control the second-tier intermediate mechanical lord, more advanced will not work.'

The handsome man shook his head slightly:

‘It’s a pity, if you are more advanced, you can do a lot in the face of the machine race.’

With his strength, Tier 2 level creatures can destroy countless people with a single thought.

Even if there is such a special treasure, it is of no use to him.

Then he spoke lightly:

‘Fortune is also part of strength. If you lose, you lose. If you don’t dare to admit it, how can you win it back in the future? Failure is not terrible. The terrible thing is that you don’t even have the courage to admit defeat.’

Bai Lin paused and lowered his head deeply:

‘...I know, I will win it back.’

The handsome man nodded lightly: ‘Yeah.’

His body turned into a cloud of white mist, slowly dissipating.

.....

In the other direction from Daqi Xing, there is a green magic star hundreds of thousands of light-years away.

There are weird green lakes in the green magic star, and green weird gas is floating in the sky.

The land was barren and cracked.

In a wild palace, with a flash of white light, Patton’s body emerged, appearing in a room full of skulls of various giant beasts.

His face was savage, and his eyes were full of tyrannical light.

In the next moment, a ** flame burned on his body.

boom!!!

King class transcendent gene.

After the Gorefiend Green Demon left, the pressure on Patton disappeared. He coughed up a few mouthfuls of blood, crawled out of the pit silently, climbed to the golden light group, and grasped the golden light group~www.mtlnovel.com ~ The ** face is as hideous as a ghost.

.....

At the same time, the last day in the Ayre Machinery Ruins finally came to an end.

There are flashes of white light in the entire AI machinery ruins.

At this moment, everyone in the El Mechanical Ruins, no matter what the cultivation level, whether the original light gate has been completely restored, under the white light, all their light gates are completely repaired.

At the next moment, a strong suction came to kick them out of the ruins and also out of the place of origin.

The three Lu Yuan, who were coming out of an 8,000-meter-high building, also felt this kind of suction.

The expressions of the three of them changed slightly, and Amy was still a little bit unfinished:

‘Is it time for the ruins? So fast.’

Ye Ye also nodded: ‘Yeah.’

Lu Yuan smiled: ‘It seems that all of us are going out.’

Amy thought about something and looked at Lu Yuan: ‘There are still some resources that have not been allocated, so let’s wait until the next time I enter the Land of Origin to allocate it.’

Ye Ye faintly spoke:

‘Next time we enter the Land of Origin, we will go to Baiyun City for a gathering.’

Lu Yuan nodded: 'Also.'

There are indeed some things that have not been allocated, and it is too late now.

Especially the most precious civilization heritage crystal.

This can make Ye Ye and Amy fight.

They explored 22 10,000-meter-high buildings and 15 8,000-meter-high buildings, and harvested a total of nine inheritance crystals.

This knowledge is an extremely precious asset.

The three made an appointment to go to Baiyun City to gather next time, and then distribute the precious items. Then the three no longer resisted the suction force brought by the light gate, and left the Aier machinery ruins one after another.

When he left, Lu Yuan glanced at the Mechanical Throne. In his eyes, there was an invisible light connecting him and the Mechanical Throne.
