

Chapter 162: My Genes Evolve Infinitely

SOUTHERN LINE OF DEFENSE, LITTLE WHITE RABBIT

When he went downstairs, Lu Yuan found Si Tingfeng, McGonagall and Yang Ping were also there.

Seeing Lu Yuan, Si Tingfeng smiled and said:

‘A Yuan, eat quickly, we will gather in the square after breakfast.’

‘Senior, is everyone going for this special mission?’

Lu Yuan sat down, took a sip of porridge, and asked.

Si Tingfeng thought for a while: ‘Unless he has a special task, he will go.’

Yang Ping’s face is a bit ugly:

‘That’s the defense in the restricted zone. What’s the use of our freshmen in the past? I really don’t understand what the school thinks.’

McGonagall smirked and patted Yang Ping on the shoulder:

‘For the first-tier students, just do the logistics in the rear camp. Maybe you will accompany the research students and do something for them. After all, the research students need repairs in the camp. Machines, making genetic medicines, etc., must be very busy. Although you little rookies are weak or weak, you still have a lot of strength.’

Hearing this, Yang Ping’s expression suddenly became complicated.

If this is the case, although it is safe, it always feels like it is being looked down upon.

He was bored for a while, and then curiously said:

‘Then Brother Yuan is now Tier 2, should I join you in the mission by then? Brother Yuan is much better than Senior McGonagall.’

McGonagall twitched his mouth and glared at Yang Ping:

‘You bastard, I’m your senior at any rate, won’t you save me some face?’

Yang Ping rolled his eyes, but didn’t hear it.

Si Tingfeng smiled and said:

‘I’m not sure about the situation on the border right now. It should be determined based on the situation there. I heard that the camp will be allocated. However, you really don’t need to worry about the first level. It is behind the camp unless there is a fierce beast breaking the camp. It is absolutely safe.’

Lu Yuan smiled and said:

‘If I can, I hope I can go to the battlefield more. The credits for this special mission shouldn’t be low, right?’

Si Tingfeng and McGonagall glanced at Lu Yuan with weird faces.

‘Not low but not low... But Ayuan, with your talent, the school will definitely not let you take too much risk. And you are still in the growth stage, safety first, don’t be too reckless.’

Si Tingfeng persuaded.

‘Well, I see, thank you, senior, for your concern.’ Lu Yuan smiled and expressed his understanding.

Soon, the four of them had breakfast and left the dormitory.

There were a lot of students who came out of the dormitory like them. Everyone met each other, said hello to each other, chatted, and walked towards the school square.

Soon everyone gathered in the square.

There are only 930 students in the entire genius camp, because there are a small number of students who have special tasks themselves and are not in the school. There are about 800 students present, and it seems that the number of students is not large.

After all, even a high school has more people.

On the edge of the square, Lu Yuan also saw many teachers there.

The teachers of the genius camp are at least the Battle King level, and just standing there makes people feel that they cannot be ignored.

At this moment, several figures dashed across the sky and floated in front of everyone.

Headed by a gray-haired old man with a majestic face.

The gray-haired old man put his hands behind his back and looked at the students below with a cold face. A strong breath surged towards everyone.

Lu Yuan felt his chest feel a little stuffy.

The students who were still talking suddenly fell silent, and everyone looked at the gray-haired old man in the air.

Seeing everyone calm down, the gray-haired old man said lightly:

‘Yesterday’s mission message, I must have received it. The fierce beasts in the two restricted areas on the southeast border have always been a cancer of the empire. Every once in a while, the emperor-level beasts in the restricted area will launch a wave of beasts in an attempt to break through the border of the empire. , Devour the people of the empire! I hope all of you will not forget that the internal environment of the empire is stable because the border warriors keep the danger out for us! Recently, there has been another change in the restricted area. The border guards need support. You, as the genius of the empire, the empire The pillars of the future should bear corresponding responsibilities. Now, all the students and mentors present in the genius camp will go to the border together to support the guards!’

The gray-haired old man swept his eyes across the crowd, and then slowly said:

‘The border is extremely dangerous. You are all geniuses of the empire. Go to the border this time to focus on your own safety and make sure you come back alive. Let’s go.’

Hearing this, a huge black warplane descended from the sky and landed on the square.

There are five in total.

The total number of teachers and students in the genius camp is nearly a thousand, almost two hundred per aircraft.

Lu Yuan and Si Tingfeng followed the crowd on one of the fighter planes.

Finding a place to sit down, McGonagall’s expression was still a little excited:

‘The principal is right. We will have to take over from seniors and guard the border. This time it is a rehearsal.’

Yang Ping also opened his mouth and said:

‘If you want me to say, we should let the warlords of our empire go to the forbidden area and kill all the emperor-level fierce beasts! In this way, the entire forbidden area can be leveled!’

Si Tingfeng smiled bitterly and said: ‘How can it be so easy? There are many imperial beasts in the restricted area. If it were not for their own disputes, the threat to our Red Maple Empire would be even greater. And we There are still several space rifts in the empire that need to be guarded, and they have to compete with the races on the other side of the gap for resources. How can there be so many manpower? Sometimes you have to ask a war emperor who is not your own country to help.’

As the prince of the imperial family, Si Tingfeng had a far better understanding of the situation in the empire than Lu Yuan.

‘So there are so many dangers around us?’

Lu Yuan had been living in the slums of Xili City before. He was already very satisfied if he was alive. Where would he know about this?

Now hearing Si Tingfeng's words, Lu Yuan felt that the Red Maple Empire was not at ease.

Si Tingfeng nodded, his face solemn:

'Yes, that's the case. The empire hopes that the more geniuses, the better, and that there will be more powerhouses in the future. Maybe it will be possible to completely equalize the restricted areas of the two borders, and even break all the spaces between them. The race on the side was suppressed.'

He glanced at Lu Yuan and said with a smile:

'A Yuan, for your talent, many people have expectations of you, and many strong think that you will become a war emperor, and your high-level combat power will be a little easier at that time.'

Lu Yuan smiled: 'I will try my best.'

While talking, all teachers and students got on the fighter plane, the fighter plane rose into the air, turned into a stream of light, disappeared in place, and flew towards the border of the Red Maple Empire at several times the speed of sound.

...

In the center of the southern border of the Red Maple Empire, a huge city hovered around.

On one side of the city is the territory of the Red Maple Empire, and on the other side are endless mountains.

The mountains are spreading, covered with forest vegetation, and the roar of fierce beasts can be heard from time to time.

The whole city is made of black metal and has a radius of almost hundreds of kilometers, which is even comparable to the Baiyun City in the place of origin.

Over the city, many aircraft flew by, and genetic warriors also control flying beasts and aircraft.

Every moment, there are genetic warriors coming in and out of the city gate.

This is the central fortress city in the endless mountain restricted area on the southern border, the endless fortress.

The Endless Fortress is not only the headquarters of the Southern Guards, but also a bustling city of genetic warriors.

Most genetic warrior adventurers who want to go to the restricted area will stay here to collect information, exchange resources, and so on.

At this moment, five streams of light flashed across the air, and a huge black fighter appeared in the air not far from the endless fortress. The speed gradually slowed down and flew towards the endless fortress.

The black fighter did not stop at the ordinary airport, but flew directly towards the headquarters of the southern guard army barracks.

A team of adventurers riding a triangular jet black fighter in the air saw the huge fighter flying through the air not far away, and their eyes widened slightly.

A man with a beard couldn't help but exclaimed:

‘This is the Xiaolong fighter plane? There are five of them?! Which big power is it, such a local tyrant?! I heard that this fighter plane has a 500,000 Tier 5 spirit crystal.’

‘Huh? No, you think they seem to have gone to the barracks before. Is it an official power of the empire?’

A middle-aged man opened his mouth in surprise.

Everyone came back to their senses and watched the Xiaolong fighter jet across the sky and sank into the airport of the Southern Guards headquarters.

...

In the huge airport, five Xiaolong fighters stopped, the hatch opened, and all the teachers and students of the genius camp walked down.

On the square of the airport, several guards in black uniforms were already waiting for them.

Headed by a black-haired middle-aged man.

The man stood upright, like a long spear, his gaze was fierce, and Lu Yuan was swept away by his gaze, as if he was stung.

He greeted him with strides, saluting the gray-haired old man with a serious expression:

‘President Li, the restricted area has changed. The commander is busy with official duties, let me pick you up! In addition, the commander has arranged the positions of the genius camp. Tier 3 fighters will be placed in the middle area of the defense line, and Tier 4 fighters will be placed in the camp at the front of the defense line. Does President Li need to change the allocation? If you need to change it, I will contact the commander to change it!’

The gray-haired old man nodded slightly when he heard the words:

‘Just distribute it in Carol’s way.’

The middle-aged man nodded:

‘Understood! I don’t know if you need to rest. If you don’t need a rest, you can now set off to the defensive camp. The military transport ship is ready!’

The gray-haired old man flashed his eyes, looked at the middle-aged man, and nodded slightly:

‘Yes. The action is very fast. In that case, I’ll leave it to you to arrange it.’

The middle-aged man nodded, turned his head to look at the students in the genius camp, and said sharply:

‘All first-tier and research fighters are out!’

Hearing this, Yang Ping glanced at Lu Yuan and several people, and walked out dejectedly.

Among the four people in the dormitory, he is the only one.

Soon, all first-tier fighters and research fighters appeared, and there were more than two hundred people in total.

Lu Yuan saw that besides Yang Ping, he also found two other acquaintances, Lin Wei and Min'er.

They were testing together with Lu Yuan at the time.

At this moment, the two seemed to have seen Lu Yuan, and both nodded to Lu Yuan.

Lin Wei still had a bright smile on her face, her eyes flashing.

Lu Yuan smiled at the two and nodded in response.

Generally speaking, freshmen in the first grade are basically first-order.

Only a very small number of people reached the second order, of course, there is also a Si Tingxue, who was already the third order in the first grade.

After the first-tier and research talents came out, they were taken by the soldiers on a military transport ship that was almost 100 meters long.

Then the transport ship soared into the air and left the airport.

They were obviously taken to the defensive camp at the end of the entire border.

The words of the middle-aged man before did not prevent Lu Yuan and the others. They said it in front of them. The genetic warrior's hearing is not weak, so he naturally heard these words.

After that, the middle-aged man continued to speak:

'Second-tier and third-tier fighters go out!'

This time, the vast majority of people were out, and there were only more than sixty people who stayed in place, and these were all Tier 4 warlords.

Tier 4 War Venerable is generally a sixth-grade student, and even Si Tingfeng is still attacking War Venerable.

However, according to Si Tingfeng's words, it will probably only be a few days before he will become a Zhan Zun.

He has only just begun the fifth school year, and being able to become a Zhan Zun at this time is an extraordinary talent in itself.

Because of the large number of people, after everyone went out, they were taken on two military transport ships.

When the three of Lu Yuan boarded the same transport ship, McGonagall's eyes flickered and said nervously:

‘I wonder if the three of us will be assigned to the same defensive camp?’

Si Tingfeng smiled and said:

‘It is possible that you and A Yuan are in the same defensive camp. You are both Tier 2. I can't do it. I'm already at Tier 3, and the camp I'm assigned may be close to the outermost defensive area.’

Lu Yuan asked curiously:

‘Are there many defensive camps on this border line? Could there be a big difference in the areas allocated by so many of us?’

Si Tingfeng nodded: ‘Well, there are indeed many defensive camps. The southern border defense line is based on the endless fortress as its central core and radiates to both sides. The front line of the endless fortress is the last. It is 500 kilometers deep in front of the endless fortress. It belongs to the middle of the line of defense, and the outside is the outside of the line of defense. Generally, there is a defensive camp every 100 kilometers at the same depth. There are about a hundred defensive camps on a line of defense, and different defensive camps of different depths are staggered. According to me I understand that there are nearly 10,000 defensive camps in the middle of the entire defense line, and each defensive camp is guarded by tens of thousands of soldiers. If we really want to distribute, so many of us, each of us will be dissatisfied with the distribution of each camp. In the end, it should only be Will be assigned to just a few of these camps.’

Lu Yuan was a little surprised.

Good guy, there are so many defensive camps?

According to this, there are millions of genetic warriors in the southern border alone, right?

This is all to defend a restricted area.

Lu Yuan can understand how dangerous the restricted area is.

Can also understand how much pressure the Red Maple Empire is.

While talking, Lu Yuan's transport ship stopped. Lu Yuan looked out the window and found that they had arrived at one of the camps.

The camp fell on the top of a high mountain in the mountains, and the area must be much smaller than the endless fortress.

But the radius is several kilometers, and the whole body is also made of alloy, which looks like an immortal bunker.

'Tier 2 fighter, Nanling Qi, Grace... Go down.'

A total of ten second-order fighters were called down.

There are no Luyuan and McGonagall.

Just as Si Tingfeng said, UU Reading www.uukanshu.com has such a small number of people, they are not satisfied with their allocation to a camp, and obviously they will only enter a few of them.

The speed of the transport ship was very fast, and it didn't take long for it to enter several camps in a row.

Finally in a camp, Lu Yuan and McGonagall were called by their names at the same time.

Along with them are eight second-tier genetic warriors.

They were assigned to the same defensive camp.

After getting off the transport ship, their location is a square.

In the square, there are several soldiers wearing standard black genetic weapons with their hands on their backs, waiting for them.

The head was a middle-aged man with a scar on his forehead and a shaved head.

His eyes swept over the ten people in Lu Yuan, the corners of his mouth raised, and he grinned:

‘Hey~ Ten little white rabbits were assigned to us above. This is for us to be babysitters.’
