

Chapter 180: My Genes Evolve Infinitely

FROST GIANT SUMMONING STONE, A KING-LEVEL WONDER

Hot recommendation:

‘Ah...I already have a sister.’

Lu Yuan said with a dry cough.

‘Huh?’ Tracy asked, ‘Who is it?’

‘Li Qinghe. I wonder if Deputy Chief Tracy recognizes him?’

‘plum.....’

Tracy’s face became stiff, and then he said with a dry cough:

‘Let’s speed up, and pay attention to safety.’

‘OK!’

Lu Yuan nodded.

The two accelerated their speed and ran towards Camp 306.

.....

Camp 306 is located to the southwest of Camp 257. It is an adjacent defensive camp and is also located on the top of a mountain.

At this moment, a large number of fierce beasts rushed to the top of the mountain, and the powerful second-order boss-level and even third-order fierce beasts jumped high and landed on the city wall tens of meters high.

Fight with a group of guard soldiers.

Among them, some fierce beasts even rushed to the inside of the city wall, chasing after the weaker logistics personnel, killing and destroying them on a large scale.

‘Roar!!’

A powerful steel armored dragon with a height of more than five meters and thick armor soared into the sky, and fell heavily on the city wall, cracks appeared in the city wall under its feet.

It roared and swept across with its thick and thick tail. Several nearby guards were swept by the tail, and its body was blown out as if it were tattered.

Blood was spilling in the air, accompanied by the sound of broken bones.

The third-tier leader.

When the guards nearby saw this scene, their pupils contracted violently, and they were a little shocked.

At this moment, an ice blue ice gun that was more than four meters long slashed from a distance and shot at the steel armored Linlong.

There was a thick ice mist around the ice gun, and the cold was overflowing. Before the steel armored Linlong could react, it fell heavily on its side.

boom! !

The ice spear shredded the heavy Linlong armor of the steel armored dragon, and almost half a meter of ice spear pierced its body, then burst open and turned into fragments.

The powerful impact caused the steel armored Linlong to retreat on the city wall and let out a painful roar.

Its eyes were red, and several tentacles on its body danced wildly, and a strange green light shot in the direction where the ice spear appeared.

There, Si Tingxue, wearing a blue robe and long icy blue hair, stood quietly, her pretty face was cold, and then she danced, forming a shield of ice crystals in front of her.

All the green light fell on the shield, making a roar, but the shield did not shatter.

Si Tingxue's staff swung again, and the ice spear condensed in the air again, and shot at the steel armored Linlong. The speed of the ice spear was extremely fast. The steel armored Linlong itself was a heavy beast and couldn't avoid it.

The ice gun finally fell heavily on the wound where the steel armored Linlong was torn by the last ice gun, penetrated its body, burst open in its body, and almost exploded half of the steel armored Linlong's body.

The body of the armored Linlong fell to the ground, and the nearby guards were relieved.

Seeing this, a group leader who was running over to solve the armored Linlong saw this, ran to Si Tingxue, and bowed slightly:

'His Royal Highness the Ninth Princess, thank you for your shot.'

Si Tingxue frowned slightly, and said coldly: 'The beast tide has not passed yet. Now is the time to thank me? Don't hurry up to defend!'

A cold sweat appeared on the forehead of this group leader, and he nodded quickly: 'Yes!'

Si Tingxue looked at the fierce beast that kept rushing to the bottom of the city wall, her icy blue eyes carried an icy breath.

Her whole body was surging crazily, and the robes on her body began to dance.

White ice mist appeared around Si Tingxue, spreading towards the group of fierce beasts.

The fierce beast that was touched by the ice mist gradually showed a touch of hoarfrost, and the speed gradually slowed down, and in the end it even froze in place.

Although the speed of some powerful fierce beasts slowed down, they did not freeze. Si Tingxue's eyes turned slightly, and ice spears condensed and killed these fierce beasts.

When other people saw this scene, they all showed a touch of horror.

Under Tier 3 low-level Si Tingxue's unreserved full force, he suppressed all the fierce beasts with a radius of several hundred meters, and his strength was extremely powerful.

However, Si Tingxue alone is obviously not enough.

Various defense lines were constantly being broken through, and the fierce beasts gradually engaged the guards in close combat, and the mortality rate began to increase significantly.

The roar of fierce beasts and the roar of the guards were everywhere.

The commander of the defensive camp No. 306 is also a war king, but at this moment he is besieged by two king-level beasts. Even with his strength, he is not afraid of two king-level beasts, but he can't spare his support. .

Seeing the comrades below each die one by one, this sturdy legion commander with a battle axe in his eyes flushed, roaring and constantly attacking the two king-level fierce beasts.

Not only him, but the two deputy army commanders are also being held back by a group of Tier 4 fierce beasts at this moment, unable to deal with the fierce beasts, they can only watch the fierce beasts continue to rush into the city wall and fight close to the guards. , A large number of guards died under the claws of the beast.

The talented camp students assigned to this camp are all Tier 3, and their strength is not weak.

Facing such a tide of beasts, after the initial panic, they gradually got used to it and showed their strength, but barely supported a part of the area.

However, there are only ten students in the genius camp, which is too small to support the overall situation.

Even if Si Tingxue was extremely powerful, he could barely manage an area of a few hundred meters in radius.

Moreover, under Si Tingxue's full burst, her spiritual power was consumed extremely quickly.

In a short period of time, Si Tingxue's spiritual power consumed about half.

She frowned slightly, and while continuing to attack, she took out the super-grade third-order spiritual power potion and drank it.

The spiritual power quickly recovered, and she was able to continue to maintain her own strength.

Not only that, Si Tingxue swept his eyes around, and even took out a lot of attack charms, psionic singles and the like, and swept away a large number of fierce beasts.

Let the nearby guards get a chance to breathe.

When a large number of fierce beasts saw Si Tingxue killing so many fierce beasts, they roared frantically and attacked Si Tingxue.

Si Tingxue's pupils shrank, and the pressure increased greatly.

She pressed her red lips slightly and continued to attack.

At the same time she took out a rune stone shining with ice blue light.

Frost Giant Summoning Stone: A king-level strange thing, after use, you can summon a king-level frost giant to fight for you for 30 minutes.

Si Tingxue's eyes flashed.

This Frost Giant Summoning Stone can summon a king-level Frost Giant. Everyone knows how precious it is.

Even if she is the Ninth Princess of the Empire, there is only one such hole card.

It was originally used to save life, but now that the beast tide has reached this point, she can't hold it alone.

Si Tingxue glanced at the sky, where the legion commander was fighting with two king-level alienated fierce beasts.

If you can help the legion commander to kill the king-level alienated fierce beast, and join the battlefield with the strength of the legion commander, you should be able to defend it!

Although Si Tingxue felt a little bit painful, she didn't hesitate anymore, her spiritual power penetrated into the summoning stone, and the dazzling blue light gleamed.

The dazzling light almost covered the entire defensive camp, and a king-level powerful breath suddenly appeared.

All the fierce beasts and the guards felt their breath.

Many fierce beasts on the march looked in the direction of the breath and roared.

But the guards didn't have time to watch, they could only continue to kill or resist the fierce beasts in front of them.

The icy blue light dissipated, and a giant more than ten meters high and condensed by frost appeared in front of Si Tingxue.

It floated in the air, knelt down on one knee to Si Tingxue, and a thick voice sounded:

'I have followed the call, my master.'

Si Ting Xue Qiao's face was cold, and she ordered:

'Go and kill those two king-level alienated fierce beasts!'

The Frost Giant did not hesitate: 'As you wish, my master!'

He roared and flew into the air.

When the guards around Si Tingxue saw this scene, their pupils contracted, surprised and delighted.

Worthy of being the nine princesses of the empire!

Awesome!

With one more king-level combat power, their strength has improved a lot!

In the air, 306th Corps Commander Ye Zhenghao brandished his battle axe and fought with a huge monster lizard and a blue rat.

His face was fierce and anxious, he wanted to go down and kill the fierce beast, but he was helpless.

At this moment, he felt a king-level aura coming from below, and his face changed, thinking it was another king-level fierce beast.

He could withstand the two king-level fierce beasts, and if one were to come, even if he himself became extremely dangerous, let alone help the camp below.

Ye Zhenghao glanced down. After seeing the Frost Giant who was kneeling in front of Si Tingxue, Ye Zhenghao's eyes flashed and he showed a pleasant smile.

'It turned out to be the Ninth Princess! She still has such a trump card?! Exactly!'

In the next moment, Ye Zhenghao saw the Frost Giant roaring into the sky and rushing towards them.

With a helper, Ye Zhenghao laughed, his battle axe slashed towards the demon monitor lizard with a strong ** axe light:

'The evil animal suffers death!!'

The battle in the air suddenly became more intense.

.....

Because Camp 306 is connected to Camp 257, it is only less than a hundred kilometers away.

Lu Yuan's speed may not be fast enough, but Tracy, as a Tier 4 warlord, ran together with Lu Yuan, and the speed was very fast. The two ran towards Camp 306 at a speed close to the speed of sound.

In just a few minutes, the two were already within five kilometers of Camp 306.

In this area, the number of fierce beasts has increased.

The tide of beasts continues to besiege Camp 306.

The two ran up to a mountain and looked at the beast tide roaring forward not far away, Lu Yuan and Tracy couldn't help but frown slightly.

Tracy opened the mouth and said: 'Camp 257 is closer to the front line than us. Their camp has helped us block a lot of beasts.'

Lu Yuan nodded, his face solemn: 'How do we get there?'

With the strength of the two of them, it is a bit naive to want to run wild in the tide of beasts. If they attack from behind, if the beast kills a carbine, they have to be driven away.

Tracy flirted with her red hair, smiled and said:

'Of course it is to find an area with a small number of fierce beasts, kill them into the city wall, and then look for them to defend the city. Go, let's go to the northern city wall.'

Compared with the southern city wall facing the endless mountain range, the northern city wall facing the endless mountain range is obviously the wall with the least number of beasts.

Lu Yuan nodded, and the two rushed towards the northern city wall.

At this moment, the two had a meal at the same time, looking at the mountain not far away, the dazzling icy blue light flashed, and a powerful king-level aura emerged.

Both of them stared wide-eyed, a little startled.

Tracy frowned slightly: 'The breath of the king? It suddenly appeared? What is it?'

Lu Yuan also shook his head.

At this moment, they saw a huge frost giant soaring into the sky, rushing towards the king-class battlefield in the sky, helping a human strong man to deal with two alienated fierce beasts.

Seeing this scene, both of them are happy.

‘It’s from our side! It looks like it should be a summoned object. Which big figure is in the camp? Can you even summon a king-level combat power?’

There was a look of shock in Tracy’s eyes.

Lu Yuan looked at the icy-blue giant, his eyes flashed, and he thought of someone.

His face is a little weird, isn’t it so coincidental?

Is the ice woman Si Tingxue here?

At this moment, Tracy opened his mouth and said:

‘Take advantage of this, the attention of many fierce beasts has been attracted by that king-level combat power, let’s go to the northern city wall!’

The two nodded, and at their speed, they came to the direction of the city wall on the back in just a few seconds.

Seeing less ferocious beasts than the other direction, both of them were surprised.

‘Sure enough, there are fewer fierce beasts in this direction, let’s go over!’

Tracy’s pretty face became serious, and there was flames circulating all over his body: ‘I’m in the front~www.mtnovel.com~You are in the back.’

Lu Yuan nodded, then the space was distorted, and the machine lord came out one by one.

Seeing Lu Yuan’s mechanical lord, Tracy was taken aback, and looked at Lu Yuan in a little astonishment.

Lu Yuan grinned and said, ‘It happens to be flanked by two sides. If it’s just these animal tides, we should have hope of eradicating them.’

Tracy nodded, showing a serious look:

‘Okay! Then listen to you! I’m on it!’

Two huge fire wolves appeared in front of Tracy, and the fire wolves roared towards the tide of fierce beasts.

But Tracy went into flames all over, and fireballs several meters large condensed and shot at the tide of fierce beasts.

Boom! !

The fireball fell into the group of fierce beasts with a deafening roar, and deep pits with a radius of more than 20 meters appeared on the ground.

The destructive power of Tier 4 War Venerable is still worthy of recognition.

Especially this fire element combat technique, the power is already relatively large.

As Tracy attacked, Lu Yuan's eyes flashed, and all the mechanical lords also fired psionic cannons at the fierce beast.

The roar kept sounding, deafening.

The fierce beast, who was planning to rush towards the defensive camp with his companion, was suddenly beaten up a bit.

A large number of fierce beasts died, and the remaining fierce beasts came back to their senses, turned their heads and saw Lu Yuan and Tracy, and suddenly rushed towards them with an angry roar.

However, there are not too many fierce beasts in this area, and the number of fierce beasts counterattacking in the rear is even smaller.

Most of their strengths are Tier 3 elites or bosses, facing more than two hundred Tier 2 Consummation Lords, plus a Tier 4 Battle Sovereign, they retreat steadily.

Only a small number of Tier 3 leaders and lord level rushed through the gunfire baptism of the mechanical lord, and then was killed by Tracy using the fire wolf one by one.

They began to quickly approach the northern wall.
