

Chapter 181: My Genes Evolve Infinitely

WHAT'S WRONG WITH THIS WOMAN?

Hot recommendation:

On the city wall, the guards who were fighting with the beast heard the movement, forced their opponents back, and looked over.

When they saw Lu Yuan and Tracy who were quickly killing the beast and approaching the city wall, everyone was taken aback, and then smiled with surprise.

‘This is... reinforcements?! Reinforcements are coming?’

‘A lot of mechanical lives! It’s so strong, it kills a few fierce beasts in one shot!’

‘The one in front, is the Battle Venerable?? There is actually a powerful Zhan Venerable coming over, great!’

‘Quick! We encircle them and we should be able to kill all the beasts here!’

‘Yes! Kill all these beasts!’

Two young guards on the city wall are guardian fighters and the elemental fighters. They are both students from the genius camp and are working together to kill the enemy.

After seeing Lu Yuan in the distance, both of them were taken aback and looked at each other.

‘It turned out to be Lu Yuan’s younger brother?! Why did he come here?’

‘Those mechanical lords, they seem to be the mechanical lords in the mechanical ruins of El, controlled by Lu Yuan’s younger brother? A lot!’

Seeing the more than two hundred mechanical lords next to Lu Yuan continuously fired spiritual power cannons, both of them stared with shocked eyes.

And Lu Yuan, who was in the group of fierce beasts, was controlling the machine lord to kill the fierce beasts that came, and he was a little surprised.

After arriving in this area, there were many more alienated beasts. After killing these alienated beasts, Lu Yuan once again absorbed a lot of unknown aura.

The Cube also shook again.

Tracy's strength is very strong, plus more than two hundred mechanical lords, the fierce beasts outside the northern city wall, there are almost no enemies in one.

They inserted into the group of fierce beasts like sharp knives and moved towards the city wall.

In just over ten minutes, the two arrived at the foot of the mountain, and then climbed towards the peak while killing the beast.

Like Camp 257, the dead beasts at the foot of the mountain piled up like a mountain, and the blood on the hillside stained the ground red, and the strong smell of blood spilled out.

Tracy charged in the front, a group of mechanical lords responded from the side, and also after breaking in the rear, the allocation was clear.

Soon, they went up the mountain and under the city wall.

After that, Tracy, Lu Yuan and the other mechanical lords soared into the air and jumped onto the city wall.

More than two hundred mechanical lords fell on the wall, causing the wall to shake.

The ten-meter-high steel body is not light.

As soon as they were on the city wall, Tracy and Lu Yuan glanced across the city wall and inside the city.

At this moment, many fierce beasts are on the wall, and a group of melee guards are fighting with the fierce beasts on the wall, protecting the remote guards.

The long-range guards continued to kill the fierce beasts below the city wall.

In addition, a part of the fierce beasts inside the city wall also entered, and there were fighting sounds inside.

Tracy and Lu Yuan looked at each other, Lu Yuan said:

‘Deputy Chief Tracy, I will help kill the beasts on the wall first, and then resist the beasts outside the city. The beasts in the city will trouble you.’

Tracy smiled slightly, her spiritual power surged, and her long red hair fluttered in the wind:

‘Leave it to me.’

Her body turned into an afterimage and rushed towards the city.

And Lu Yuan’s thoughts moved, controlling the mechanical lord to spread on the wall.

A guard armed with an epee is fighting a Tier 3 Iron Gibbon.

As a defensive camp closer to the border line, the average strength of the guards in the 306 Guard Corps is much stronger than that of the 257 Corps.

There are even more Tier 3 guards than No. 257.

At this moment, the guards are Tier 3.

The two sides fought back and forth, and the guards’ epee and iron jibbon fists collided with each other, making a sound of gold and iron.

The Iron Gibbon roared.

At this moment, a psionic cannon with powerful spiritual fluctuations landed on the head of the Iron Gibbon.

boom! !

The head of the Iron Gibbon was directly penetrated, and the huge body over five meters high shook and fell slowly to the ground.

The guards were taken aback for a moment, and a little dumbfounded, they looked towards the direction where the psionic cannon came from.

I saw the mechanical lord slowly running past him with heavy steps, and a series of psionic cannons shot at the beast.

As long as it is not a fierce beast above the third-tier leader level, it will basically be killed in one shot.

This was not just a mechanical lord, dozens of mechanical lords ran past him, and killed the beast when they encountered it. In a short time, all the beasts on the entire wall were almost eliminated.

There are only some fierce beasts above the leader level of Tier 3, fighting against the mechanical lord.

This guard found that not only him, but the other guards who had no opponents were also dumbfounded.

These fierce beasts were cleaned up too quickly, and they didn't know what they were going to do for a while.

Soon, a Tier 3 leader-level fierce beast was slain under the siege of several high-level guards at the mechanical lord and regimental commander level.

At this moment, the high-level guards have also been liberated one after another.

With the help of nearly ten mechanical lords, a middle-aged man killed a Tier 3 leader-level Earthfire Python, then took a deep look at the huge mechanical lords, then swept his eyes around and roared:

'All those who are free, don't be stunned! Those who should be guarded by the remote fighters are guarded by the remote fighters! Others will go to the city and other areas to help their comrades!!'

Upon hearing this, the guards who had lost their opponents came back to their senses.

Many of the long-range fighters originally guarded by the guards were not dead at this moment, and they naturally guarded their comrades.

The guards whose comrades had died took a look at the bodies of their comrades with red eyes, and then ran towards the other city walls with a roar.

Lu Yuan controlled the machine lord, and at this moment, several guards came to him with gratitude in his eyes.

‘This little brother, which camp are you from?’

A middle-aged man asked.

Lu Yuan smiled and said, ‘I’m from Camp 257...Well, Lu Yuan, commander of the Mechanical Corps.’

Originally, Lu Yuan wanted to say that he was a vanguard, but it seemed that Luo Xiu had opened a mechanical legion, and he reported his legion name.

‘Mechanical Corps?’

All of them were taken aback, and looked at each other blankly.

The configuration of the defensive camp is basically the same, and their No. 306 camp has no mechanical army.

What the ** is the No. 257 mechanical legion?

Seeing a few people seem to be a little confused, Lu Yuan explained:

‘These mechanical lords are all my fighters, so the head of the Roxiu Corps specially set up a mechanical legion for me.’

Upon hearing this, all of them shrank their pupils and glanced at more than two hundred mechanical lords, with a look of surprise in their eyes.

‘These mechanical lords are all yours alone?’

The middle-aged man asked in shock.

Originally, he thought that this was the assassin of which defensive camp, but he didn’t expect it to be Lu Yuan alone.

Lu Yuan nodded: ‘Yeah.’

He smiled and said: 'Legion Commander Luo Xiu received a signal for help from the 306 defensive camp, so he ordered me and Deputy Commander Tracy to come to support. My more than 200 mechanical lords will help you kill the beasts. '

There was a surprise in the eyes of everyone.

'That's the case! Thank you, Chief Lu Yuanjun!'

Although Lu Yuan looked very young, it made them a little confused, but now they are reinforcements, and they don't ask much.

At this moment, the mechanical lord has been distributed throughout the northern city wall. After cleaning the fierce beasts on the wall, the mechanical lord still aimed the psionic cannon at the beast group outside the wall.

The roar of the psionic cannon continued to sound, and the power of terror burst out.

After the firepower of these mechanical lords joined, the group of fierce beasts that had already been under the city was almost beaten back in a short time.

After leaving a large number of corpses, the group of fierce beasts was repelled to the foot of the mountain.

The pressure on the northern city wall suddenly became much smaller.

All the guards of the northern city wall were a little bit unbelievable. I didn't expect that the menacing beasts would be repelled so easily.

The original fierce beasts have already entered the city!

The middle-aged man who was the top guard of the army was a little shocked.

'What a powerful firepower!'

The firepower of more than two hundred second-order Consummation level mechanical lords is stronger than the combined firepower of all the long-range fighters on the northern wall.

After suppressing the wave of fierce beasts, Lu Yuan smiled at the somewhat stunned middle-aged man:

‘The defense line of the northern city wall will not pose much threat for the time being. I will leave 20 mechanical lords to help you suppress the tide of fierce beasts, and then I will go to other places to support.’

Upon hearing this, the middle-aged man and several senior guards nearby were in awe, and paid a military salute to Lu Yuan:

‘Thank you, commander of the army!’

Lu Yuan returned a military salute: ‘It should be.’

His heart is also quite beautiful, after all, he has absorbed a lot of unknown breath.

Lu Yuan felt that it was not far from the evolution of the Evolution Cube.

make persistent efforts.

He led a large number of mechanical lords and ran towards the other city walls.

.....

Southern city wall.

After summoning the Frost Giant, Si Tingxue continued to resist the wave of fierce beasts.

Under the city wall where she was, almost all the beasts were frozen into ice sculptures, and then destroyed into powder.

The entire city wall, only her area, has not yet come down to the city.

Many fierce beasts have been on the walls in other areas.

Si Tingxue not only needs to deal with the fierce beasts under the city wall, but also needs to help others kill the fierce beasts on the nearby city wall. Even she feels a little tired at the moment.

The tide of beasts lasted for a day and a night. Except at the beginning, she had a rest for a while, and then it was almost a night without a rest.

Although using various medicines to maintain the state, she still feels exhausted mentally.

At this moment, Si Tingxue heard a roar from the other side, her eyebrows frowned slightly, and she looked in the direction of the northern defense line.

Could there be more fierce beasts over there again ?

Si Tingxue's face was ugly, and he glanced at the direction of the sky, and now only Ye Zhenghao could break the game.

With the addition of the Frost Giant, Ye Zhenghao had the upper hand in just a few minutes.

The devil's poisonous monitor lizard's body is already full of scars, and it will not take long before it will be killed by Ye Zhenghao.

There was one blue mouse left, and there was no way to dig out any storms.

In this case, her use of the Frost Giant Summoning Stone is also worthwhile.

At this moment, suddenly a huge machine lord ran over from both sides of the city wall and came to the southern city wall.

The Mechanical Lord killed all the fierce beasts on the wall along the way, and soon, the originally chaotic wall was restored to a certain degree.

When Si Tingxue saw this scene, her eyes widened slightly, and a hint of consternation appeared on her cold little face.

‘This is.....‘

At this moment, Si Tingxue saw a person who should never be here, and the astonishment on his face was even greater.

‘Lu Yuan ?‘

Lu Yuan came to the southern city wall.

After all, compared to the other three city walls, the southern city wall faces the endless mountain range, and the number of beasts encountered must be the most, the pressure is also the greatest, and the people who need help most.

Of course, there is another reason that the number of fierce beasts is the largest, and the number of alienated fierce beasts is naturally the largest, and the unknown aura is naturally the most.

As a result, Lu Yuan left twenty mechanical lords on both the east and west walls, and brought other mechanical lords over.

As soon as he arrived at the southern city wall, Lu Yuan realized that this side was colder than other places. He immediately saw the outstanding Si Tingxue beside the city wall.

Lu Yuan discovered that Si Tingxue seemed to have seen him too, and his expression even changed slightly.

Lu Yuan smiled in his heart. He had known Si Tingxue for a month, and it was the first time he saw Si Tingxue's expression change.

Hmm... the eyes widened are a bit bigger than before.

Lu Yuan led the Mechanical Lord and walked over as he killed the fierce beast on the wall.

Soon, Lu Yuan came to Si Tingxue's side.

He smiled and said:

‘Si Tingxue, what a coincidence.’

Si Tingxue glanced at the large number of mechanical lords who were attacking the fierce beasts, her eyes flashed slightly:

‘You brought these from the remains of El's machinery?’

Lu Yuan smiled:

‘As expected of Si Tingxue, Bingxue is really smart.’

Si Tingxue nodded slightly: 'Well, I know.'

Lu Yuan: '...'

The corners of his mouth twitched. Why didn't he find this guy so narcissistic before?

He glanced at the ice sculptures and frost powder under Si Tingxue
~www.mtlnovel.com~ and within a few hundred meters, there was not a single beast. All the beasts that entered this area were frozen into ice sculptures without running a few steps. It shattered and couldn't help his pupils shrinking slightly.

Although Si Tingxue seems to be a bit narcissistic, she does have the capital of narcissism.

Lu Yuan ordered the mechanical lord to disperse, and after killing all the beasts on the wall, he began to attack the beasts outside the wall.

After nearly two hundred mechanical lords joined, the fierce beast that had been constantly rushing up the city wall was gradually suppressed back.

Si Tingxue also saw this scene.

Her eyes flickered slightly, and she asked a little curiously:

'Why are you in camp 306?'

Lu Yuan smiled and said: 'I am now the head of the Mechanical Legion in Camp No. 257. I have been ordered by the commander of the No. 257 Legion to come to support you. I am considered a reinforcement.'

Si Tingxue opened her mouth and looked at Lu Yuan with a hint of surprise in her eyes.

'The head of the mechanical legion?'

Lu Yuan grinned: 'These mechanical lords are all my soldiers. Look at this firepower, what happened to me forming a mechanical army by myself?'

Si Tingxue fell silent, unable to refute.

This person in front of him is a student of his sister, and now he has his own army.

Obviously he doesn't have a legion.

Thinking of this, Si Tingxue's aura became even more icy, one after another, ice guns shot at the ferocious beasts in the distance, the powerful force killed the ferocious beasts in large swaths, and even the ice mist spread farther.

Lu Yuan looked at Si Tingxue who suddenly went crazy.

What's wrong with this woman?

What happened suddenly?

Isn't this afraid of spiritual energy consumption?

After all, Si Tingxue was not him, he could absorb spirit crystals so quickly.
