

# Chapter 189: My Genes Evolve Infinitely

## RETURN TO EL MECHANICAL RUINS

Hot recommendation:

From the place of origin, the sky is still dark outside.

Lu Yuan lay on the bed, thinking about the next plan.

First, after breaking through to Tier 3, with his current mechanical control ability, going to El Mechanical Ruins should be able to sweep.

Go to the Central Floating City first to get the resources in the central area of the Floating City. At least Tier 3 training resources must be available.

Hmm... Spiritual power cultivation has spiritual power gene fluid, but you still need to use spiritual crystals to charge the Evolution Cube.

You have to get some things from the El Mechanical Ruins to auction and replace them with spirit crystals.

At least Tier 3 to Tier 4 resources are sufficient, and Tier 4 to Tier 5 resources may also be squeezed out.

If there is no problem with cultivation, then the next thing is the transformation of the Evolution Cube.

After the last metamorphosis, Lu Yuan also understood that there might be some unknown aura in the alienated things, which would be beneficial to the Evolution Cube.

If you want the Evolution Cube to continue to evolve, you need to find alienated beasts, or alien objects.

About this thing, the first thing that came to Lu Yuan's mind was the night watchman.

After all, all alienation phenomena are related to the night watchman.

Sister Qinghe happened to be the honorary elder of the night watchman, so you can ask her.

However, the functions of the Evolution Cube are definitely sufficient for the time being.

Alienation is inherently dangerous and can be delayed for a while.

Another important issue is the precious extraordinary genes.

Lu Yuan still has a Wind and Thunder Fury that he can use, but he also needs other extraordinary genes.

There are many precious and extraordinary genes in school, but they all need credits.

The matter of earning credits must also be brought up in the process.

Regarding this question, Tier 4 genes already exist, and credits can be earned before the Tier 5 warlord.

You can also drag it back.

For Lu Yuan, there is no need to worry about resources in a short period of time.

The only thing he needs to do is to digest the resources in the El Mechanical Ruins and raise his cultivation to the limit he can improve.

Then consider other issues.

After making plans, Lu Yuan closed his eyes and planned to sleep.

Early the next morning.

Lu Yuan left the dormitory and went to Si Tingyu's dormitory.

...

Si Tingyu dormitory, underground training room.

Si Tingyu was wearing a white exercise suit and sitting cross-legged in the center.

There is a strong spiritual surge all over her.

At this moment, Si Tingyu opened his eyes, and a stream of light flashed in her golden red eyes.

On the stairs, Lu Yuan walked down slowly.

‘Tutor, here I am.’

Si Tingyu was slightly stunned when he saw Lu Yuan, a look of astonishment appeared in his eyes, and a smile appeared:

‘Did you break through?’

Lu Yuan was taken aback, smiled and nodded: ‘Yeah.’

Si Tingyu also smiled with satisfaction: ‘Yes. Your talent is very good, and your cultivation speed is much faster than I thought. This is very good.’

‘The tutor is overwhelmed.’

Si Tingyu shook his head, looked at Lu Yuan, and then smiled and said:

‘Whether it is to yourself or to the empire, the stronger your talent, the better. In addition, there is one more thing that may be related to you at that time.’

Lu Yuan was taken aback, looking at Si Tingyu with some doubts:

‘Tutor, what’s the matter?’

Si Tingyu’s face became serious, and he said:

‘Lu Yuan, do you know the rift in space?’

Lu Yuan nodded: ‘Well, I heard that there will be spatial rifts randomly appearing in the entire universe, connecting two completely unrelated places together.’

Now the land edge, which has space transmission, naturally understands that this kind of space crack should be an abnormal situation in space.

However, logically speaking, the space in the universe should be very stable. How can there be so many space cracks?

At the very least, the curb knows that the space rift has appeared for a long time, millions or even tens of millions of years ago?

There seems to be no record.

If the universe is stable, there should not be so many random space rifts.

unless...

Lu Yuan's pupils shrank, cold sweat came out of his back.

Unless the space of the universe is not as stable as imagined?

So the whole universe exploded because the space was not stable enough, right?

When Lu Yuan thought of this, his scalp felt a little numb.

As if noticing Lu Yuan's abnormality, Si Tingyu looked at him with some doubts:

'What's wrong?'

Lu Yuan came back to his senses, smiled and said:

'It's okay. I thought of something.'

If it is as he thought, the universe is not too stable, he has nothing to do.

Moreover, he is not the only one who possesses the spatial gene.

There must be big guys who have spatial genes.

When the sky fell, there was still a tall man against it, and it was not his turn to take care of it.

He is just a poor, weak and helpless warrior.

Si Tingyu didn't ask Lu Yuan what he thought of.

She just spoke:

‘There are also several spatial fissures in our Red Maple Empire. Among them, there is a space fissure leading to a place called Ice Vein Star. There are a large number of ice vein crystal mines, and ice vein crystals are extremely versatile, whether it is Gene weapons, or the creation of technological items, may use ice crystals. However, besides our space rift, there are other space rifts on that ice ray star. There is a space rift leading to it. A kobold planet.’

Hearing this, Lu Yuan understood.

Kobolds and humans have a bad relationship, and they compete for resources no matter in the place of origin or in the real world.

Now I have discovered a planet called Ice Vein Star, depending on the situation, should the two races be in line again ?

Lu Yuan looked at Si Tingyu with some doubts, and smiled bitterly:

‘Instructor, what role can I play as a rookie in the battle between these two races ?’

Si Tingyu smiled slightly: “If it’s normal, of course it’s none of your business. But now there are other enemies on the Kobold side and our Red Maple Empire. Don’t talk about the Kobold side, as far as our empire is concerned, You have just returned from the defense line of the endless mountains, you should know how tight the defense forces there are.’

Lu Yuan nodded: ‘Yeah.’

‘Our empire has more than one front like the Endless Mountains Defense Line. In general, the strength of our empire is somewhat stretched. If you really want to fight the kobolds on the Ice Vein Star, you can of course, but if it is not a last resort, the empire The high-level still hopes to conserve troops and deal with other dangers, even more dangerous situations. Can you understand ?’

Lu Yuan nodded, a little surprised: ‘Understood. Although the resources on the Ice Vein Star are precious and will speed up the development of our empire, some areas

may affect the safety of the empire. Compared with development, the safety issue should be given priority? ‘

Si Tingyu smiled and nodded: ‘Well. It’s not just on our side, but also on the kobold side. There are now more than two million armies facing each other on Ice Vein Star. But so far, they haven’t really fought. Because we are all restraining. If this war is really started, regardless of winning or losing, the strength of both sides will be weakened to a certain extent, and then they may be taken advantage of. Therefore, the senior officials of the Red Maple Empire and the high-level kobolds are now passing through Diplomatic methods are used to discuss solutions. If they fail to agree, there may be war, but if they agree, they may use other methods to determine the ownership of the ice- vein crystal ore.’

Lu Yuan’s pupils shrank, what he understood:

‘Teacher, you mean, this other way might have something to do with me?’

Si Tingyu looked at Lu Yuan and his gaze flashed: ‘Lu Yuan, you react quickly. It is true. If you use other methods, it is likely to be a form of competition. At that time, you may have talented martial artists in various forms. In the competition, the ownership of the ice vein crystal ore is determined by the result of the competition.’

Lu Yuan fell silent.

There is such a thing unexpectedly.

This makes him a little bit stressed, after all, it is related to the development of the country.

When the secretary heard Yu saw Lu Yuan’s silence, he said:

‘Of course, this is just one of the possibilities. It is also possible to determine the ownership of the ice vein crystal mine by other means. Even if you need to participate at that time, the empire will not let you work in vain, no matter it is precious and extraordinary. Genes, genetic weapons, and treasures of heaven and earth will all have rewards. I assure you as the empire princess.’

Lu Yuan was taken aback, then smiled:

‘Tutor, it’s not that I don’t want to participate. If I really need me, I’m still willing, but I feel a little stressed.’

To be reasonable, the predecessor would have starved to death without the support of the empire after the family accident.

If he could be asked to make a move, he would naturally not refuse.

What’s more, is his mentor still the princess of the Empire ?

When the secretary heard Yu’s words, he smiled and said:

‘You don’t need to put too much pressure, it’s still not sure, it’s just my guess, you just need to practice hard. Come on, let’s continue the practice of steel body.’

Lu Yuan nodded: ‘Yeah.’

...

After Lu Yuan broke through to Tier 3, it took longer to repair the light gate.

After three days, Lu Yuan continued to enter the land of origin.

Lu Yuan appeared in his rented house.

Today, instead of going to the martial arts gym, he closed his eyes and communicated with the invisible thread in his mind.

The next moment, white light flashed across Lu Yuan’s body, and when the white light dissipated, he appeared in an endless steel city.

There are a large number of mechanical guards patrolling the streets of the steel city, and the mechanical aircraft in the sky are swimming in the sky like a school of fish.

El Mechanical Ruins.

The corners of Lu Yuan’s mouth lifted up, revealing a slight smile.

Coming back here is like going home.

Lu Yuan did not take out the Black Bear One.

His spiritual power surged, and the next moment he appeared on the roof of a tall building more than 20 kilometers away.

Space transmission.

It surpassed the speed of more than 20 kilometers in a short time, which was much faster than the Black Bear 1.

Luyuan uses space teleportation time and time again, and each teleportation covers more than 20 kilometers.

In a short time, he arrived not far from the central floating city.

The purpose of his visit to Aier Machinery Ruins this time is to go to the central floating city, and then to the central area of Tier 3.

On the one hand, it is to obtain training resources, and on the other hand, it is for Tier 3 genetic weapons.

Although his current genetic weapon is a Tier 2 lord level, it is already an unattainable genetic weapon for ordinary genetic warriors.

But for Lu Yuan himself, since it was Tier 3, wouldn't it be common sense to change into Tier 3 genetic weapons?

Hmm...it's best to be a Tier 3 king-level genetic weapon.

Then he evolves another wave to reach the king level.

He glanced at the huge central floating city in the sky, flashing several times in a row.

Before the aircraft corps outside the central floating city hadn't reacted, they came to the central floating city.

This speed is much faster than Black Bear One.

The only drawback is that the farther the teleportation distance is, the more spiritual power is consumed.

If it is teleported within a hundred meters, Lu Yuan's spiritual energy consumption may be only a little.

But sending more than 20 kilometers at a time almost squeezed Lu Yuan's spiritual power.

Fortunately, there are still many spirit crystals in Lu Yuan's war pattern space.

It was not difficult for Lu Yuan to replenish the spirit crystal while transmitting.

Anyway, there is only Lu Yuan here, he doesn't need to hide anything, just let himself go.

Entering the floating city, Lu Yuan looked at the densely packed high-rise buildings, and had no plans to wander around in the outer circle. He thought about it and planned to go to the 10,000-meter-high building in the outer circle first.

Lu Yuan was actually a little curious. After all, the El Mechanical Ruins had been opened many times before, and many people had entered the Central Floating City.

Even if you haven't entered the core area of the central floating city, the outer area should have been swept over and over again. UU reading [www.uukanshu.com](http://www.uukanshu.com)

Then why did Lu Yuan still have all kinds of treasures when they came in?

Was it automatically generated in the place of origin?

Someone added?

Lu Yuan wanted to see if the treasures of the 10,000-meter-high building had been added back.

Lu Yuan and several teleporters came to a square with a 10,000-meter-high building.

Lu Yuan raised his eyebrows when he saw that the square was empty, there were no mechanical guards, and no corpses.

He stepped forward, walked through the space, came to the door of the 10,000-meter-high building, and then pushed the door directly and walked in.

Then Lu Yuan searched the entire room of the 10,000-meter-high building and found that there was nothing inside.

This made Lu Yuan a little disappointed.

He originally thought that the treasures inside had been replenished.

It seems not yet.

Of course, it may be supplemented over time.

Otherwise, Lu Yuan couldn't understand why there were treasures in all the tall buildings every time El Mechanical Ruins opened.

There is also the possibility that Lu Yuan does not want to see.

That is, after the El Mechanical Ruins recognized the owner, the place of origin will not be supplemented.

Then he is about to cry.

Lu Yuan shook his head, no longer thinking about it.

His body disappeared in place, teleporting towards the central core area.

...

On the street, a team of Tier 3 mechanical guards is patrolling.

The space fluctuated, and Lu Yuan's body emerged.

When the Tier 3 mechanical guard saw Lu Yuan, his mechanical eyes suddenly turned red.

'Dip! Found the intruder, execute the cleanup procedure!'

They ran towards the landing edge.

Lu Yuan glanced at them, and suddenly the mechanical guard stopped, and then knelt to Lu Yuan on one knee.

‘Owner!’

Lu Yuan raised his eyebrows.

This mechanical control is really easy to use.
