

Chapter 190: My Genes Evolve Infinitely

MOPPING UP, GREAT GAIN

Hot recommendation:

When Lu Yuan thought, an electric spark appeared on a team of Tier 3 mechanical guards and fell to the ground.

Clusters of light appeared on their bodies.

As all the boss-level mechanical guards, many of the things dropped were cyan boss-level items.

Lu Yuan glanced at it. He was armed with a Tier 3 boss-level gene and made of special metal materials.

These are not very useful for Lu Yuan. For Lu Yuan, the most useful is naturally the spiritual power gene liquid.

The third-order enhanced spiritual power gene liquid, one bottle is equivalent to the spiritual power of 10,000 third-order spiritual crystals, and it is easier to absorb than the spiritual crystals.

This is Lu Yuan's focus this time.

After Lu Yuan picked up the things, he turned his head and glanced at the 50,000-meter-high building not far away.

It is somewhat different from the periphery. The tall buildings in the core area are taller, with the tallest being 50,000 meters.

Lu Yuan walked over, and soon saw densely packed mechanical guards on the square in front of the tall buildings.

There are nearly a thousand of them. A large number of the boss-level mechanical guards are members of ordinary patrols, and the team leader is the leader-level.

In addition to the small captain, there are twelve lord-level captains, and at the door is a black and gold mechanical warrior.

This mechanical warrior is only about five meters high, holding an epee in both hands, and the breath exuding from his body is extremely powerful and terrifying.

Tier 3 mechanical king.

If it was a head-on fight, Lu Yuan had just broken through to Tier 3, and the king gene had not had time to temper, so he really wanted to fight, relying on his own space teleportation, it would take a while, it should be able to consume this guy to death.

For this guy is a mechanical life, there is no need to be so troublesome.

Lu Yuan's thoughts moved, and all the mechanical guards on the square froze in place. The next moment, the bodies of these mechanical guards flashed and fell to the ground.

Lu Yuan walked towards the door, and the Tier 3 Mechanical King also looked towards Lu Yuan at the moment, his eyes were red, but he did not attack.

Even a Tier 3 mechanical king needs to guard the gate and cannot actively attack Lu Yuan.

Lu Yuan smiled slightly at the red eyes of the Tier 3 Mechanical King.

At the next moment, he started to control the machine.

The red eyes of the Tier 3 Mechanical King flickered, and then returned to blue.

Lu Yuan successfully planted the seed of control in his spiritual body.

Lu Yuan smiled slightly.

Sure enough, even a third-order complete mechanical king can control it.

With his current strength, he can control at most three third-order perfect mechanical kings at the same time.

If there is no space gene, Lu Yuan may not even be the opponent of a third-order perfect mechanical king. If there are really three such mechanical king thugs, it would be a good thing for Lu Yuan.

Lu Yuan looked at the mechanical king and thought about it.

Killing him can get king-level genetic weapons and possibly king-level transcendent genes. Do not kill him multiple thugs.

Lu Yuan thought for a while, and decided not to kill first, to see if there were any good things in the tall buildings.

If he can find a king-level genetic weapon that suits him, he won't kill it.

If you can't find it, kill it.

Lu Yuan ordered the mechanical king to pick up all the light groups on the ground, and then he entered the 50,000-meter-high building by himself.

.....

Three days later, Lu Yuan reluctantly left the Aier Machinery Ruins.

It wasn't that Lu Yuan had already explored the core area of the entire El Mechanical Ruins.

In fact, Lu Yuan hasn't even explored one-tenth of it.

The problem is that his war pattern space is not enough.

You know, Lu Yuan's current war pattern space is hundreds of meters in size.

But there are too many treasures here, and he is basically full.

All kinds of Tier 3 and Tier 4 spells and psychic items, genetic weapons, extraordinary genes, etc. alone, there are a full 600,000 bottles of Tier 3 enhanced spiritual power gene liquid.

This is a fifth-order spirit crystal equivalent to 60 million.

In addition, Lu Yuan has left over 30 million fourth-order spiritual crystals of the spiritual power gene liquid before, and Lu Yuan now has more than 63 million fifth-order spiritual crystals.

In addition, he also controlled three third-order consummation mechanical kings, and found a hundred third-order consummation mechanical lords from a 50,000-meter high building, plus various treasures that existed before, too many. Therefore, Lu Yuan had no place to put other things.

He had no choice but to leave.

Leaving the Aier Machinery Relics, Lu Yuan first went to Baiyunzhou.

After arriving at the auction house in Baiyunzhou, Lu Yuan consigned some of the spells, psionic bombs, Tier 3 boss-level, leader-level and lord-level genetic weapons, and some relatively ordinary transcendent genes.

The base price of the overall consignment items is 130 million Tier 5 Spirit Crystals.

This is only part of Lu Yuan's post. He was afraid that the market would not accept too much of it at once.

It is conceivable how amazing the wealth Lu Yuan obtained from the core area of the El Mechanical Ruins.

Not to mention the fifth-order war king, even the sixth-order war king might not have him rich.

As for the other part, similar to the Tier 2 Consummation Lord level mechanical puppets used by Lu Yuan before, as well as things such as extraordinary genes, charms and psionic bombs, Lu Yuan intends to return to the real world to sell them in school.

Calculated according to the price of the lord-level weapon, the price of the second-order consummate mechanical lord is 30,000 credits, which is about the same as the price of a lord-level genetic weapon.

See if anyone will buy it.

Just selling all the Tier 2 Mechanical Lords would have more than six million credits, let alone other.

Of course, Lu Yuan didn't expect to sell them all.

There are only a few students in the genius camp, and the students of these students themselves need to use it, and it is not easy to squeeze out some credits from them.

At that time, I really can't sell it, and I will sell it to Amy at that time.

The Amy family is a big power after all, whether it is an obedient and powerful mechanical puppet, or a second-order and third-order spell, it is in demand.

After coming out of the auction house, Lu Yuan left Baiyunzhou and returned to Tianluo City to start practicing.

The spiritual power reserve of more than 60 million fifth-order spiritual crystals is enough for Lu Yuan to squander.

.....

After breaking through to Tier 3, the time he can stay in the place of origin has also become longer.

Thirty-five days after the origin time, Luyuan left the place of origin.

With a flash of white light, Lu Yuan appeared in the room.

It happened to be morning.

Leaving the dormitory, Lu Yuan found Si Tingfeng in the living room, McGonagall and Yang Ping were all around, eating breakfast around the table.

Seeing Lu Yuan come down, McGonagall said hello:

'A Yuan, why are you so late? I plan to go up and call you.'

Lu Yuan was taken aback, and he was a little puzzled: 'Why do you tell me? What's the matter today?'

Hearing this, the three of them looked a little weird.

Si Tingfeng smiled and said, 'Today is the last day of October, don't you go to the virtual room to test your combat power?'

Hearing this, Lu Yuan was taken aback: 'It's already the end of the month? So soon?'

After he returned from the endless mountain line of defense, he either cultivated in the place of origin every day, or he cultivated the steel body at Si Tingyu every day. He had a very fulfilling life every day, and he didn't care about the time.

I didn't expect time to pass so fast.

It's been two months since I enrolled in school. If you count the previous time, I have been awakened for more than five months, right?

Time flies so fast.

Lu Yuan couldn't help sighing.

Just as Lu Yuan sighed, Si Tingfeng's eyes widened, looking at Lu Yuan, a little surprised.

'A Yuan...you, have you broken through to Tier 3?!'

Hearing this, McGonagall and Yang Ping stopped eating, and the two suddenly turned their heads and looked at Lu Yuan with shocked expressions.

Lu Yuan was taken aback, remembering that in the past few days of his breakthrough, Lu Yuan and Si Tingfeng had staggered their schedules.

Even with Yang Ping and McGonagall, they just met in a hurry.

With their cultivation base, it is still a bit difficult to feel Lu Yuan's cultivation base.

So they only discovered now that Lu Yuan had broken through to the third rank.

Lu Yuan smiled and nodded: 'It's true.'

'Cough...cough cough!!'

Yang Ping was choked by the porridge in his mouth.

He widened his eyes and looked at Lu Yuan with horror:

‘Isn’t it? Brother Yuan?! We enrolled together. When we enrolled, everyone was clearly Tier 1. Why did you suddenly betrayed?! I was still Tier 1, but you were Tier 3?!?!’

Lu Yuan smiled and said, ‘I use the spiritual power gene fluid from El Mechanical Relic. Of course, my cultivation speed is faster. Oh, by the way, I am now at Tier 3, and there are some first-tier spiritual power genetic fluid. If you don’t need it, do you? I’ll give you a cheaper price and buy it with credits.’

‘I need to!!’

Yang Ping jumped over and hugged Lu Yuan’s thigh almost instantly:

‘Brother Yuan! I am God! I beg you to make it cheaper! I only have a small amount of credits!’

Lu Yuan was full of black lines and kicked Yang Ping back.

He thought for a while and said:

‘The spiritual power of the first-order spiritual power gene fluid is equivalent to 100 first-order spiritual crystals, but you also know that this thing is much easier to absorb than the spiritual crystals. Normally, selling a 300 first-order spiritual crystal should be no problem, right?’

Si Tingfeng nodded and smiled:

‘If you sell to a large family, you can sell 500 first-order spirit crystals. After all, for them, this level of spirit crystals really don’t have much money, and the speed of cultivation is the most important thing.’

Lu Yuan looked at the pitiful Yang Ping with a speechless expression:

‘I’ll sell you 150 Tier 1 Spirit Crystals, and sell them to you at the price of two bottles of 1 credit.’

Generally 100 credits can buy a general first-order boss-level weapon, which is almost equivalent to tens of thousands of first-order spirit crystals.

Lu Yuan’s price is normal, of course, he himself gave Yang Ping a bargain.

After all, the first-order spiritual power gene fluid had no effect on Lu Yuan, and Lu Yuan seemed to occupy space in the space of the war pattern.

Being able to sell it can be regarded as cleaning up the clutter.

‘In addition, the first-order optimization spiritual power gene liquid, two bottles of 10 credits, you should know the effect.’

‘I know I know! My last mission was rewarded with 5,000 credits, um... but I’m not much worse than I am about to break through. I spent 2,000 credits to buy a Tier 1 Optimizing Spiritual Power Gene Liquid! What do you think, Brother Yuan Sample?’

Lu Yuan glanced at Yang Ping and felt that Yang Ping was still quite clever.

The cost-effectiveness of buying optimized spiritual power gene fluid is indeed higher than buying general spiritual power gene fluid.

Although the spiritual power contained is the same, the cultivation speed is obviously faster than the former.

Lu Yuan smiled: ‘Okay. Two thousand credits, four hundred bottles of first-order optimization spiritual power gene liquid.’

Lu Yuan waved his hand, and a pile of first-order optimized spiritual power gene liquid appeared on the clearing ground.

Yang Ping’s eyes were shining, and he immediately rushed over, picking up everything.

‘Brother Yuan, you are so kind!’

Yang Ping was moved.

He also knew that he had taken a big advantage.

Lu Yuan smiled and said, ‘Cultivate hard, and next time you hold my thigh, I won’t sell you anything.’

‘Sorry Brother Yuan, I was wrong!’

Yang Ping was very quick.

Lu Yuan thought of something: ‘By the way, my second-order Consummation mechanical leader is sold, do you want one?’

Upon hearing this, Si Tingfeng and McGonagall were both taken aback and looked at Lu Yuan.

Si Tingfeng was a little surprised and said:

‘A Yuan, are you going to sell the second-order Consummation Mechanical Lord?’

Lu Yuan nodded: ‘Well, after all, my cultivation base has broken through to Tier 3, and the machine lord is not very useful.’

Of course, Lu Yuan still had a hundred third-order mechanical lords in his hand, and even three third-order kings.

It’s a pity that he didn’t find a suitable reason, and he couldn’t take it out.

In the future, it’s a big deal to use it alone without letting people see it.

Si Tingfeng’s eyes flashed, looking at Lu Yuan:

‘A Yuan, I don’t have that many credits. Do you accept the spirit crystal transaction or barter?’

Lu Yuan thought for a while, and shook his head apologetically:

‘I’m sorry to listen to Feng Senpai, I just want to change credits. After all, I don’t lack spirit crystals and the like now.’

A trace of disappointment flashed in Si Tingfeng’s eyes, and then he sighed:

‘Yes. It’s a pity that my credits are also useful. Otherwise, I’ll buy them.’

McGonagall asked curiously:

‘By the way~www.mtlnovel.com~A Yuan, how many credits does your mechanical lord sell?’

Lu Yuan smiled: 'One thirty thousand.'

Yang Ping, who had originally wanted to hear this, silently dropped his head.

The price of this mechanical lord is already ten times that of his deposit.

How can this be affordable ?

Yang Ping stopped thinking directly.

McGonagall also sighed and shook his head:

'Things are not expensive, but unfortunately I just broke through to Tier 3, and now I need to accumulate credits and exchange for extraordinary genes and genetic weapons.'

When Lu Yuan heard the words, his eyes lit up: 'Extraordinary genes ? Gene armed ? I have a little bit of this. What qualities do you want ?'

McGonagall: ' ? ? ? '

He was a little curious and said: 'Then show me ?'

Lu Yuan took out a piece of extraordinary genes and genetic weapons, and then McGonagall fell.

He gritted his teeth and bought a lord-level transcendent gene, silently.

This is an extraordinary gene for assassinating a mechanical lord, and it is also one of Lu Yuan's future burning genes.

Lu Yuan had several of these genes, a little bit scarce, and Lu Yuan kept a copy for himself.

For the assassination gene warrior, it is a very useful transcendent gene, which cost McGonagall a full 120,000 credits.

This emptied the credits McGonagall had accumulated before, which made him feel distressed and happy.

Lu Yuan was very satisfied, his credits increased again.

Moreover, as he took out the spiritual power gene liquid this time, there should be many people willing to pay for credits.

Afterwards, the four of Lu Yuan had breakfast, and left the dormitory, walked in the direction of the virtual room, and started the second combat power test.

Lu Yuan was also very curious. He didn't have time to fight after recording Space Teleport. He also wanted to know where his current strength was.
