

Chapter 194: My Genes Evolve Infinitely

THE PLACE OF ORIGIN 'UPPER LEVEL'

Hot recommendation:

Three days later, Lu Yuan returned to the place of origin and went to practice in the martial arts gym again.

With Lu Yuan's current Tier 3 cultivation base, if you use the enhanced spiritual power gene liquid, it takes about 20 minutes to use a bottle, which means that it will absorb 100 Tier 5 spirit crystals in 20 minutes.

300 fifth-order spirit crystals in an hour.

In one day, Lu Yuan had the help of the gravity room in the martial arts training hall, and he could only practice for about twelve hours, which consumed almost three thousand six fifth-order spirit crystals a day.

With the improvement of Lu Yuan's cultivation, the time that he can stay in the place of origin has once again increased.

Forty days later, Lu Yuan left the place of origin.

In these forty days, Lu Yuan absorbed about 140,000 Tier 5 spirit crystals.

Because the white jade spirit body hadn't evolved yet, Lu Yuan began to refine it from the light of life.

The spiritual power of the 140,000 or so fifth-order spirit crystals has gone down, and the tempering degree has not even reached a quarter.

After being promoted to the king-level gene, it became more and more difficult to refine a gene to Consummation.

However, Lu Yuan now possesses too much spiritual power gene liquid. Lin Lin always adds up to about 63 million fifth-order spiritual crystals, enough for Lu Yuan to cultivate for a long time.

This is only one-tenth of the core area of the Central Floating City.

Lu Yuan now has no worries about the lack of training resources.

After leaving the place of origin, Lu Yuan continued to go to Si Tingyu to cultivate the steel body.

Perhaps it was irritated by Lu Yuan, Si Tingxue took Rebecca to practice and became a lot harder, and she even went to Lu Yuan to learn from it.

Of course, Lu Yuan would not refuse. Si Tingxue's strength was not weak, and it was good for him to learn from each other. He didn't use space teleportation to learn from them, mainly to improve the steel body's training.

Four days later, the light gate in the place of origin was repaired, and Lu Yuan entered the place of origin again and began to practice.

Next, Lu Yuan's life was very regular. Once Guangmen was repaired, he would go to the place of origin to cultivate, and when he returned to the real world, he would go to Si Tingyu to cultivate the steel body.

If you are tired of cultivating in the land of origin, go to tease Amy or have a chat with Ye Ye.

On weekends, if he were in the real world, Lu Yuan would return to Sister Qinghe's house to rest, and would be pulled out by Sister Qinghe from time to time and Si Tingyu had already gone shopping.

Of course, Lu Yuan's job was to carry bags.

Moreover, Sister Qinghe didn't even let him be put into the war pattern space, saying that there was no sense of ritual for shopping, which made Lu Yuan's mind full of question marks.

Fortunately, his power is large enough, even if his body is covered with various things, he will not be unable to hold him.

Li Qinghe and Si Tingyu often play together. Si Tingyu sometimes lives in Li Qinghe's house, but Lu Yuan still doesn't know who Li Qinghe's other best friend is.

After all, when she moved into Li Qinghe's house, she told Lu Yuan herself that she had two good girlfriends.

It had been more than three months, and Lu Yuan had only seen Si Tingyu alone.

However, Lu Yuan was curious and curious, and did not ask Li Qinghe.

After asking, he thought that Li Qinghe would most likely smirk and ask her if she had thoughts about her girlfriends.

Lu Yuan didn't want to cause trouble either.

As time passed, Lu Yuan's life was stable.

By the time he entered the Land of Origin for the fifth time, the time that he could stay in the Land of Origin had become forty-three days.

And after he consumed about 700,000 fifth-order spirit crystals, he finally tempered the light of life to completion.

This is the first king-level gene that Lu Yuan has refined to completion.

After that, Lu Yuan began to refine the second king-level gene and controlled it mechanically.

When I came out from the land of origin this time, November passed.

Si Tingfeng, McGonagall and Yang Ping also asked Lu Yuan why he did not participate in the simulation test.

Lu Yuan simply forgot. He was cultivating in the land of origin at the time. Where can he remember this kind of thing?

However, even so, Lu Yuan's ranking remains unchanged, still second.

After all, the third-placed Shi Xiu was a sixth-grade genius, and his cultivation was already a fourth-order war sage, and he had burned the king's genes.

At his point, it is a bit difficult to improve a little.

In one month, he still couldn't beat the fourth-order perfect kobold who had burned the king's gene.

Lu Yuan felt that he now had the hope of rushing to the first place. After all, after tempering a gene to Consummation, his current combat power had improved compared to before.

Although the improvement in physique is not too great, his perception ability has improved a lot compared to before.

But if you miss it, you miss it, and Lu Yuan doesn't care.

The first place in the combat power list rewards 10,000 credits, and the second place rewards 5,000 credits, a difference of only 5,000 credits.

Lu Yuan is not short of 5,000 credits now.

After all, during this period of time, he sold various items in the school's post bar, all of which were of high quality and low price. There were many people who bought them, especially the first-order spiritual power gene fluid, even the second-order fighters would buy them. For them, the speed of cultivation will also increase.

This is just needed.

In just one month, Lu Yuan's credits returned to more than one million, reaching 1034,000 credits.

Before Lu Yuan's credits were 39,3500, in this month, he sold all kinds of things and made almost 600,000 yuan.

It's a pity that some expensive things haven't been sold very much, such as transcendent genes, second-tier boss-level and even lord-level genetic weapons, and mechanical lord.

Otherwise, I'm afraid there will be more credits.

However, Lu Yuan was not in a hurry. After all, the first-order and second-order students in the genius camp were just a little bit like that, and they couldn't get too many credits in a single time.

After they have done the task, there should be credits in the account, and they will definitely come to buy them.

The main thing is a long stream of water.

At this rate, within a year, Lu Yuan could buy another powerful transcendent gene.

Lu Yuan expressed satisfaction with this.

Therefore, Lu Yuan continued to live a peaceful life.

The tempering requirements of mechanical control genes are higher than the light of life, and more spirit crystals need to be consumed.

Two months later, Lu Yuan entered the Land of Origin again eight times, absorbing almost 1.2 million Tier 5 spirit crystals, and his mechanical control reached 95%.

The last 5% required more spiritual power, and Lu Yuan guessed that it would take about two to three million fifth-order spiritual crystals to complete the tempering.

There are about 1.5 million fifth-order spirit crystals in total.

This is almost twice as much as the spirit crystals required by the light of life.

And the time has come to February 7th.

It's almost time for the New Year.

Of course, in the Red Maple Empire, unlike previous lives, their New Year is called the Harvest Day.

It is used to celebrate the work and life gains of the previous year, and to pray for better development in the coming year.

Not only does the Red Maple Empire have this custom, but the entire Daqixing mankind has this custom.

It is said that this custom was uploaded from another human planet.

In the entire Baiyun Star Territory, the human planet is not only Daqixing, but there are also other human planets in other star regions outside the Baiyun Star Territory.

There are even more powerful human planets than Daqixing, and the strongest may reach the saint of war, or even the ** of war.

After all, human beings are also extremely powerful in the entire Human Race Alliance.

On the harvest day, the genius camp is naturally closed.

After a full ten days, the sun is coming out from the west.

The students of the genius camp will naturally go home and reunite with their families.

Lu Yuan also left school and returned to Li Qinghe's home in Bailiu District.

Knocking on the door, Li Qinghe's villa door opened, and a white metal head appeared in front of Lu Yuan.

It's the intelligent robot in the villa, number one.

After seeing Lu Yuan, the first mechanical sound rang:

'Master, welcome home. The host is preparing lunch for you, and I hope you will enjoy your meal.'

Hearing this, the smile on Lu Yuan's face instantly froze, and his face became a little pale.

Li Qinghe's cooking skills, Lu Yuan, are simply incomprehensible. One word to describe it is probably to draw a blind box.

It looks like all the dishes are normal from the outside. If you eat it, if you are lucky, if these are normal, if you are not lucky, then you are out of luck.

Lu Yuan couldn't figure out how Li Qinghe did it. Some dishes taste good, but some dishes are more like dark dishes.

He quickly walked through the door, intending to prevent the tragedy from happening.

However, after seeing Li Qinghe busy in the kitchen, Lu Yuan was stunned.

Because besides Li Qinghe, there was actually someone inside.

Emerald green hair, pointed ears, slender figure, white skin.

Although Lu Yuan only saw a figure from behind, he was obviously an elf, right?

There is an elf in Li Qinghe's kitchen?

Two people are still chatting happily?

Lu Yuan was a little confused.

Feeling Lu Yuan coming in, Li Qinghe turned her head. After seeing Lu Yuan, she smiled and said:

'Brother Yuan, you're back! Sister introduces you personally. She is Frost Moon Jade! Another best friend of Sister's.'

Shuangyue·Jade turned to look at Lu Yuan, revealing a beautiful and elegant face.

She smiled slightly: 'Hello, Lu Yuan, I have heard Qinghe talk about you many times. Can I call you brother like Qinghe?'

Lu Yuan was a little confused.

He quickly greeted with a smile: 'Hello, of course, can I call you Sister Shuangyue?'

'certainly.'

Lu Yuan glanced blankly at Li Qinghe who was grinning.

This guy actually has an elf girlfriend?!

And even though Daqi didn't have a way to go to other planets, Lu Yuan didn't expect a spirit to come over suddenly.

Seeing Lu Yuan's doubts, Li Qinghe explained with a smile:

‘The Jade Tribe where Frost Moon is in is an alliance with our Red Maple Empire, so every time on Harvest Day, the Jade Tribe will come to celebrate with us. Generally, Frost Moon comes back every time, and we are in the land of origin. The upper level is also a teammate who can rely on life and death.’

Hearing this, Lu Yuan glanced at Shuangyue suddenly.

I see.

I heard several people from Si Tingfeng say before the ‘Upper Layer’ of the land of origin, that it seems to be a special area that can only be entered above the King of War.

After entering it, if you die, you will really die, and you won’t be resurrected again.

The specific situation, even they can’t say clearly.

After all, those who have been to the upper echelons are only those who are above the King of War level. Generally, they don’t say much. Even Si Tingfeng and others have only heard their family talk about it occasionally.

Lu Yuan also asked Li Qinghe, but Li Qinghe didn’t say much, only that he would know when he reached the battle king level.

Lu Yuan stopped asking more questions.

If it is a teammate there, it can be said to be a girlfriend.

Lu Yuan glanced at the dishes prepared in the kitchen. Most of them were dishes that Lu Yuan hadn’t seen before. There were vegetables and fruits, but no meat.

Lu Yuan had heard before that elves usually do not eat meat, but it turned out to be true?

Lu Yuan smiled and said, ‘Sister Shuangyue, are you cooking?’

Shuangyue smiled mildly on her face: ‘Yes, I did it.’

Having said that, she also glanced at Li Qinghe.

Li Qinghe's face turned dark, his hands clasped his chest a little uncomfortable, glanced at Lu Yuan, and then at Shuangyue:

'What do you two have to say about the food I cooked?'

The two looked at each other and shook their heads quickly.

Luyuan Road:

'No no. How dare to have any opinions?'

Shuangyue's face was full of gentle smiles.

After this out, Lu Yuan's relationship with Shuangyue·Jade has gotten closer.

Shuangyue and Li Qinghe continued to toss in the kitchen, while Lu Yuan lay down on the sofa.

The whole person was stuck in the sofa, and Lu Yuan sighed a little, this is life.

It's really tiring to practice every day.

But having power is better than no power, at least being able to control one's own destiny, isn't it?

The practice still has to practice.

Before long, the door of the room knocked on the number one to open the door.

Lu Yuan saw that it was Si Tingyu, followed by Si Tingxue and Rebecca.

Rebecca saw Lu Yuan on the sofa and waved happily:

'A Yuan! Let's play! Are you surprised? Are you surprised?'

Si Tingxue glanced at Lu Yuan, then raised her Xue-white neck and snorted softly.

Si Tingyu smiled, went to the kitchen, and chatted with Shuangyue and Li Qinghe in the kitchen.

Rebecca and Si Tingxue came to the sofa and sat down.

Lu Yuan smiled and said, 'Why do you think of coming over to play?'

Si Tingxue frowned slightly and said softly:

'Princes from all countries will come to the Red Maple Empire on Harvest Day.'

She didn't say anything more, but Lu Yuan understood.

After all, Si Tingxue is good-looking, talented, and has extraordinary potential. Although with her potential, she would not be used for political marriages by the Kings of the Red Maple Empire, but she would definitely be harassed by the princes of various countries.

After all, Si Tingxue's talent and potential still has the hope of becoming a war emperor in the future.

Such a princess will definitely be a great help if she marries home, not to mention that she is as beautiful as an immortal?

It must be an irresistible temptation for the prince who wants to fight for power.

As for Si Tingxue's temperament, Lu Yuan still knew a little bit, and he certainly wouldn't want such an occasion, so he escaped.

Lu Yuan looked at Si Tingxue with a gloating smile:

'I didn't expect ice cubes to be popular with you?'

Si Ting Xueqiao's face became cold, and the surrounding air became cold, staring at Lu Yuan:

'What do you call me?!'

Rebecca on the side also looked at Lu Yuan with a weird look.

Lu Yuan was taken aback, and then found out that he had given Si Tingxue a nickname in his heart.

He coughed awkwardly:

‘Ah, I mean listening to Xuexue you are quite popular, but this is also expected, I can understand! If you need help at that time, just say it!’

Lu Yuan looked at Si Tingxue with a comprehension on his face, and used his eyes to indicate that he was on her side.

Si Tingxue’s pretty face stiffened when she heard Lu Yuan’s words, she glared at Lu Yuan, and slightly turned her eyes away, revealing a tinge of ruddy on her ears.

Lu Yuan was a little baffled when he saw that he was stared again.

Obviously, I had already said that I was standing on her side, but this woman was still staring at me? !

Can it be done?

Rebecca at the side looked at Lu Yuan and then at Si Tingxue, with a very strange expression on her face.

She took off her shoes, revealing her little white feet, and she shrank into the sofa.

Seeing that the atmosphere was a little silent, Rebecca smiled and said:

‘How about let’s play the game? I will bring a few more fun virtual game helmets to play together?’

Lu Yuan and Si Tingxue looked at each other, then nodded.
