

## Chapter 2: My Genes Evolve Infinitely

### THE SELF-CONFIDENCE OF THE FASCINATING YOUTH

Lu Yuan's heart was beating, this blue cube was too strong.

Infinite evolution!

As long as he is given time, he can grow to a level that shocks everyone.

The human race is the strongest?

The universe is the strongest?

seems to have hope?

Just, what exactly is this cube? How could it appear when he awakened?

Just as Lu Yuan was thinking, his left wrist suddenly stabbed.

He opened his eyes and found that the awakening crystal was emitting a white brilliance, and on his left wrist, there was a golden thread wandering around, finally forming a golden ring.

Gene war pattern.

This is the sign of every awakened person.

This is also the 'key' to the place of origin.

The emergence of the genetic war pattern also shows that Lu Yuan has really awakened as a genetic warrior.

'Genetic war pattern?! Lu Yuan, you are awakened!'

Teacher's surprised voice came.

The classmates below were also in an uproar, full of shock.

‘Lu Yuan unexpectedly awakened!’

‘He usually doesn’t make a sound, but he didn’t expect to be able to wake up?’

‘Huh...what about awakening? The genetic warrior is so dangerous, maybe there will be an accident.’

Many students looked at Lu Yuan with envy and jealousy, and some girls looked at Lu Yuan with a strange light.

To be fair, Lu Yuan looks handsome, but he is usually gloomy and withdrawn, and coupled with the alienation incident, no one dares to approach him.

And now after awakening, Lu Yuan’s attractiveness has suddenly increased a few levels, making some young girls eager to move.

As the high-end combat power of the human race, the genetic warrior has a very high status.

Lu Yuan also heard the student’s discussion below, but he didn’t take it seriously.

In fact, few people want you to live better than him.

He is past the age of quarrels, just do his own thing.

After Lu Yuan awakened, the teacher’s originally rigid face showed a smile for the first time.

He looked at Lu Yuan and said gently:

‘Student Lu Yuan, congratulations, you will be a genetic warrior in the future. There are still two months before the college entrance examination. Work hard to get into the top ranked genetic warrior academy. This is also good for your future... That’s right. , You have just awakened, you can go to the Gene

Warrior Association to register. After registration, you will receive a subsidy of 5,000 yuan each month.'

Lu Yuan was pleasantly surprised when he heard this.

5000 yuan? !

Even if raised by the empire, his monthly alimony is only 800 yuan, which is only enough for the minimum living expenses.

Of course, tuition and tuition fees are exempted.

Generally, a student who has just graduated from an ordinary university only has about 3,000 a month.

Lu Yuan doesn't need to do anything, he can get 5000 white-collar workers. He has the illusion that he is at the pinnacle of his life.

, after all, is money from a prostitute, who doesn't like it?

But Lu Yuan quickly recovered.

He is destined to be the man who will be the backbone of the human race! How can you be satisfied with this little thing?

Unless you give him 10,000 a month!

Lu Yuan nodded and smiled: 'I see, thank you teacher for reminding me.'

Lu Yuan was not surprised by the change in the teacher's attitude.

I heard that the awakened are counted in the teacher's teaching indicators, and there are also expensive rewards.

Teacher looked at the classmates below and smiled:

'Let us congratulate Lu Yuan for his successful awakening.'

The students below, whether they like it or not, clapped with the teacher one by one.

Teacher smiled and nodded, looking at Lu Yuan:

‘Okay, you can go down.’

Lu Yuan returned to his position under everyone’s gaze.

‘The awakening ceremony continues. Next, Wang Ming.’

The ceremony continued, but Lu Yuan did not pay attention.

He was checking his genetic war pattern at the moment, and he could feel the genetic war pattern like a switch.

He can control this switch through his own consciousness.

He has a hunch, after turning on this switch, he should be able to enter the legendary land of origin.

It’s just that Lu Yuan doesn’t know much about the place of origin now.

Before going in, he had to make preparations first.

I will take the college entrance examination in two months.

The genetic warrior exam is definitely different from the general exam.

Compared to his peers who awakened at the age of 16, he already had two years less time to grow up.

It is not easy to catch up with them within two months and get admitted to a good school.

Fortunately, there is an evolutionary cube that can continuously evolve genes. He thinks there should be hope.

Lu Yuan, who had gone through a college career in his previous life, naturally knew that a good university is a better step for life, and it will make your way in the future smoother.

Anyway, he has to do his best to be admitted to the best genetic warrior academy.

After going back, learn about the news of the place of origin first, and then work hard.

By the way, the name 'Evolution Cube' was just picked by Lu Yuan himself.

He thinks it sounds very nice and appropriate.

.....

After Lu Yuan awakened, the next students were even more looking forward to it. Maybe they could awaken?

However, the truth is cruel.

Until the last student finished the test, there were 41 students in a class, and only Lu Yuan awakened and became a genetic warrior.

After the awakening ceremony, the teacher put away the crystal ball, looked at the dull and disappointed people, and said:

'It is normal to not be awakened. Since you can't become a genetic warrior, then take care of yourself, study hard, and go to a good university. This is responsible for your own life and future.'

The teacher's words were not heard by others. Lu Yuan didn't know, but he had the same sense of sight as a 100-day vow of the college entrance examination in his previous life.

Unfortunately, there are not many students who can truly understand this in their previous lives.

Regarding the future, all young green youths have a fascinating self-confidence and feel that they are the protagonists of the times. As long as they enter the society, they must be the CEO, marry Bai Fumei, and embark on the rhythm of the peak of life.

Then he became a sincere and sincere hitman, enjoying the blessings.

Yes, Lu Yuan is one of them.

For a while, Lu Yuan missed the self-confident self who was fascinated at the time.

Where did the fascinating self-confidence at the time come from ?

Unlike him now, it is more realistic.

Well, it's me!

The teacher left after speaking. The students in the classroom just got together in twos or threes, patted the table and wailed and complained.

‘I didn’t even awaken! I thought I would definitely be awakened this time!’

‘Hey...I can only study hard in the future and become an ordinary person?’

‘It seems that I can only go back and inherit the family business. Fortunately, my family has a small company, so I will at least worry about food and clothing in the future.’

‘...animals!’

‘...’

When many students communicate, they always look in Lu Yuan’s direction from time to time.

After all, Lu Yuan is the only awakened person in the class.

A good-looking female student stood up, came to Lu Yuan's table, and said with a smile:

'Student Lu Yuan, we seem to be on the way, UU reading [www.uukanshu.com](http://www.uukanshu.com), do you want to go home together?'

Lu Yuan glanced at her, shook his head, and said lightly: 'No, I'm used to being alone.'

The female student smiled stiffly, and nodded with a dry smile: 'Oh.'

She turned around and left.

The other girls who were eager to see this also put out the idea of coming over to say hello.

Lu Yuan was also relieved.

Although his personality is different from his predecessor, he is not particularly withdrawn.

But he still has nothing to talk about with his classmates who are destined not to go together in the future.

Both parties have not communicated during the three years of high school, and there is no need to communicate in the future.

The turmoil in the class caused by Lu Yuan's awakening soon subsided.

After awakening, Lu Yuan still wanted to continue studying.

Even if you are a genetic warrior, you still have to take the cultural class. The genetic warrior is not illiterate. What's more, you can learn more about thinking and logic skills when you go to school.

After school in the afternoon, Lu Yuan left school and walked to the Genetic Warrior Association.

He checked the map before. The Gene Warrior Association is far away from the school. It takes more than an hour to walk.

As for why not take a car ?

Besides being poor, what else could be the reason ?

Although Lu Yuan had seen the appearance of the city in his memory before, he still felt unreal when he walked on the street and looked around.

There are tall buildings, neon flashing, floating locomotives floating in the sky, huge light curtains are playing advertisements, and beautiful female stars in the light curtains are singing and dancing, smiling brightly.

There are a lot of pedestrians on the street, some people are still equipped with robot hands and feet, and even the existence of robots can be seen.

At this moment, Lu Yuan was shocked, as if he had come to the future.
