

## Chapter 230: My Genes Evolve Infinitely

### WANDERING THROUGH THE STARS, THE GLORY OF THE SAINTS, THE KINGDOM OF SHADOWS

With two emperor-level genes at the base, it was much less difficult for Lu Yuan to evolve again at this moment.

Even if it is a powerful space-based combat technique, evolution will not be dangerous, and even the pain is much lighter than before.

Although the blood and bones of the body were still cracking continuously, the cracked skin healed at an extremely fast speed under the action of the life chant and the great sun spirit body.

Time passed, and the evolution soon ended. After the genetic evolution of the Space Gate, an extremely powerful force emerged again.

Just like the mechanical emperor, it is an all-round increase, but compared to the mechanical emperor's increase, it is nearly two-thirds stronger.

The three emperor-level genes were added together, and there was a terrible power surging in Lu Yuan's body at this moment.

Fortunately, this is a genetic level change. Lu Yuan can still control his power normally, but if he wants to use it carefully, he needs to practice well next.

Lu Yuan checked the information about the new gene.

Emperor Gene: Wandering the Starry Sky

Compared with the imperial space gate, space roaming is also a powerful space combat technique of teleportation type.

However, the efficiency of space roaming combat skills is much higher.

If Lu Yuan used the Gate of Space before, in his fully refined state of full strength, he could probably span a distance of more than 500,000 kilometers.

But now, Lu Yuan feels that if he makes full use of the starry sky to roam, he can even go directly to another planet.

Lu Yuan thought that he was already at the level of the King of War, and he could barely survive in a vacuum.

Would you like to find a chance to travel to other planets?

He thought about it and found it interesting, so he went out to have a look if he had the opportunity.

In addition to the more powerful space gate in the full state, the inheritance of the use of space power by genes has naturally deepened.

With a flick of Lu Yuan's hand, a spatial crack suddenly appeared, and his mind moved and the spatial crack disappeared.

Lu Yuan can now tear apart objects that were originally located in that piece of space by tearing apart space.

If they act secretly, maybe even the war emperor or even the war emperor might be caught.

The damage caused by the space tear is not like the other powers that Lu Yuan has mastered. The power is extremely terrible, even if the Emperor Zhan eats it, it will not be very comfortable.

Not only was the space torn apart, Lu Yuan found that he could learn Aimen's space confinement combat skills before.

With the use of his current imperial-level space system combat skills, it would probably be able to imprison the same-level warlord who had engraved the king's genes.

For the battle emperor-level powerhouses, I don't know if they can be imprisoned for a moment?

It's similar to the use of the gravitational field by the great sun spirit body, and it can be regarded as a small method.

In addition, Lu Yuan's instant movement was even faster, and his whole person seemed to be integrated into the space.

After evolving to an emperor gene, space is to the land edge as if water is the same to fish.

He teleported in space again, almost without the slightest delay.

In general, the Star Wandering combat skills are also extremely powerful, and Lu Yuan is still very satisfied.

After that, Lu Yuan rested again, and after regaining his spirit and physical strength, he began to evolve the Divine Light.

The familiar evolutionary process is quickly over.

The emperor gene sacred light evolved and became the emperor gene, the radiance of the sacred light.

Needless to say, the various attributes of all aspects are improved naturally. In terms of combat skills, the power of Shengyao's Radiance is more powerful, and unlike the divine light, which is a one-off.

The Glory of the Holy Glory is a combat skill that can be used continuously. After it is activated, it will not invade a hundred poisons, will not be under the impression of curses and negative states below the emperor level, and will also greatly enhance its own strength. Not only that, Facing the combat skills of the Dark Element, the restraint ability has become more powerful.

The use of the light power brought by the transcendent gene is also extremely powerful.

Lu Yuan can use the power of light to attack, defend, amplify, purify, etc. It is similar to the previous emperor-level genes, and probably has the power of lord-level combat skills.

Lu Yuan exhaled and stood up.

Up to now, Lu Yuan has finally elevated all his genes to the emperor level.

Needless to say, the power of the emperor-level gene, of course, the cost of spirit crystals is also a lot.

The least is the Great Sun Spirit Body, which has spent more than two million Tier 6 Spirit Crystals, and the most is the roaming starry sky, which has spent almost 6 million Tier VI Spirit Crystals.

Add up to about 20 million or so sixth-order spirit crystals.

Fortunately, Lu Yuanzhi went to the Evolution Cube to recharge a lot, and now there are a lot of them left in it, and it should be possible to evolve a few more Saint-level genes.

Of course it shouldn't work anymore now, just evolving to the emperor rank, Lu Yuan's whole body is torn apart, evolving to the holy rank, it is estimated that it will explode.

After the genetic evolution, Lu Yuan's next step was to burn new extraordinary genes.

He took out an orange ball of light with strange threads circulating in it.

The imperial transcendent gene, the Shadow Legion.

This is Lu Yuan's next goal.

With a movement of his mind, the orange cluster of light turned into streamer and merged into Lu Yuan's body.

The strange silk thread in the light cluster enters the blank gene chain and begins to compile a new gene chain.

Lu Yuan, who has five emperor-level genes, has not yet completed his tempering, but his physique and gene chain strength are enough for him to burn the emperor-level genes easily.

Only some slight soreness came, and soon, the extraordinary genes of the Shadow Legion were burned.

After the gene was recorded, Lu Yuan's consciousness appeared in the white mist, and behind Lu Yuan, there was a huge gene chain.

In front of Lu Yuan, white mist surged, and a \*\* cat with black mist surging all over appeared in front of Lu Yuan.

The big cat is completely dark, but its eyes are blood red, without wisdom, and full of tyrannical killing intent.

Lu Yuan's thoughts moved, genetic weapons appeared on his body, and his whole body was full of aura.

The big cats roared, and the black mist circulated all over, one by one, the same pitch-black big cats ran out of the black mist, densely packed, and rushed towards the edge of the land. There were hundreds of them.

Lu Yuan looked a little surprised.

Is this the power of the Shadow Legion ?

There are hundreds of clones, there are indeed a lot of them.

If Lu Yuan had burned it, there would be hundreds of clones in the top 30 of the Tianjiao list.

Adding up so many clones, even if Lu Yuan wanted to kill them all, he would have to spend a lot of effort.

Of course, this is relative to Lu Yuan's clone, the black cat clone is still very weak.

The glory of Sheng Yao flashed, and a dazzling golden light emerged from Lu Yuan's body, like a giant electric light bulb.

With the appearance of Shengyao's brilliance, the clones approaching Lu Yuan were irradiated with light, and even showed signs of collapse, and strands of black mist spilled out of the clone's body.

Lu Yuan raised his eyebrows, a little surprised at Sheng Yaozhi's ability to restrain the power of darkness.

But think about it, after all, it is an emperor gene, and it is an emperor gene.

Lu Yuan's own strength far surpassed the \*\* cat.

He didn't think much anymore, his body disappeared in place, and instantly appeared in front of the body.

Space movement.

The next moment, the epee in Lu Yuan's hand swung with a dazzling golden light, forming a golden sword net, covering the \*\* cat.

The powerful restraint effect of the Radiance of Saint Yao on the \*\* cat. The remaining will of this big cat was not even restored, and it dissipated directly in the screams, extremely domineering.

As the remaining will within the transcendent gene disappeared, Lu Yuan's will also returned to his body.

By this time, he had completely recorded the extraordinary genes of the Shadow Legion.

The Shadow Legion's main improvement is mental power and speed. In addition, it has increased a part of its strength, but it has the least increase in defense.

Lu Yuan could also understand this, after all, this combat technique looked like a combat technique biased towards the assassination system.

Lu Yuan didn't stop, and immediately began to evolve after burning.

The faint blue light flashed again.

After consuming millions of Tier 6 spirit crystals, the evolution was quickly completed.

Emperor gene: Kingdom of Shadows.

The amplification effect has been increased several times compared to the previous effect, and the effect of the other combat skills is much stronger than that of the Shadow Legion.

Shadow Nation combat skills can condense a dark-shrouded area, and the area is completely dark, and both vision and perception will be reduced to a certain extent. This is a bit like the ice mist of Si Tingxue before.

As the ruler of the field, the land margin will naturally not be affected.

At the same time, Lu Yuan can condense a clone anywhere in the dark realm.

The avatar's strength is almost one-third of Lu Yuan's own combat power, and the amount of condensed is still affected by Lu Yuan's own spiritual power and spiritual power.

The shadow clone in the dark realm can be said to be the most outstanding assassin, coming and going without a trace, it is almost hard to detect, if someone enters this shadow realm, maybe they don't know how to die.

Looking at the information about this combat technique, Lu Yuan was full of surprises.

Shadow Nation's combat skills are more powerful than he thought, and the only drawback is that the display area is too much for spiritual power.

Lu Yuan could imagine that even if a war emperor is strong, possessing this combat skill, it should be considered an extremely powerful existence at the war emperor level.

And Lu Yuan is now only the King of War, and possesses this combat skill, so it goes without saying.

With his infinite spiritual power, the shortcoming that consumes a lot of spiritual power is not a shortcoming at all.

Moreover, in the Kingdom of Shadows, others don't even know who he is, and he can do some things without revealing himself.

In general, Lu Yuan was extremely satisfied with the effects of Shadow Nation combat skills.

Up to now, Lu Yuan finally evolved all the previous genes and burned new genes.

Lu Yuan has a total of six emperor-level genes so far. With so many powerful emperor-level genes, it would be difficult for even the Emperor of War to fight him, right?

In fact, unless it is a natural and powerful creature, many war emperors may only have two or three emperor genes, and some rare chances are that they only burned the emperor genes at the stage of the war emperor, and they are even far inferior to that of Lu Yuan. .

If people knew that Lu Yuan had six emperor-level genes just as the King of War, I'm afraid it would be envious.

Of course, if Lu Yuan wanted to refine these genes to completion, it would take a lot of time and spirit crystals.

To refine the emperor-level genes, all the spirit crystals needed have to be up to a million seventh-order spirit crystals.

And he has a total of six, of which the first five should have been tempered to perfection before, and now they have a tempering degree ranging from 10 to 20 after the evolution, and the Shadow Kingdom needs to be tempered by itself. .

Lu Yuan conservatively estimated that the spirit crystals that needed to be consumed might have more than 10 million seventh-order spirit crystals.

And Lu Yuan's current cultivation resources are still the third-tier enhanced spiritual power gene fluid, which has not greatly improved the efficiency of Lu Yuan's tempering, and his cultivation speed has slowed down a lot.

Who knows how long he has to practice at the Battle King level?

The only good news is that Lu Yuan can go to the upper strata of Origin Land at that time, and the resources there should be more abundant than it is now.

At that time, he should get a lot of resources.

Of course, this will have to be said after Lu Yuan has used up the current enhanced spiritual power gene liquid.

Hmm... In addition, the advanced issue of Evolution Cube can also be put on the agenda.

After all, he has now reached the battle king level, and has six emperor level genes. It should be considered that he has a certain degree of combat power, and he can explore the areas he has sensed before.

In the real world, the hunting of alienation can also be carried out simultaneously. As long as you have time, you can consider going to the night watchman to do tasks or something.

Lu Yuan thought about the problem, and found that it was only two days before he left the place of origin.

Lu Yuan stopped practicing and took a good rest for two days.

Two days later, with a flash of white light, Lu Yuan appeared in the dormitory room.

The sun was shining outside the window.

The time has come to September, and the weather is still quite hot now.

Although it has no effect on the genetic warrior.

Lu Yuan went downstairs, Yang Ping and McGonagall were not there.

Maybe it's because Lu Yuan's speed of improvement is too scary~[www.mtlnovel.com](http://www.mtlnovel.com)~ Yang Ping and McGonagall even go back to the real world to practice hard in the training room, and they are not slack at all.

Of course, Lu Yuan was very pleased with this.

Ask Becky to make lunch. After Lu Yuan finished eating, he went to Si Tingyu's dormitory.

As soon as he entered the dormitory building, Lu Yuan saw Si Tingyu resting on the sofa, wearing loose home clothes, covering up his perfect figure.

However, in addition to Si Tingyu, Lu Yuan actually saw Li Qinghe there.

Lu Yuan was stunned and said with a smile:

‘Sister Qinghe, why are you here?’

Li Qinghe glanced at Lu Yuan slantingly and said:

‘What? Are you unhappy to see my sister I’m here with your beautiful tutor?’

Lu Yuan was full of black lines, coughed dryly, and said seriously: ‘How is it possible, shouldn’t I be happier?’

Li Qinghe’s eyes widened and his face was shocked, even Si Tingyu glared at Lu Yuan:

‘Nonsense.’

Guys, do you two understand me? !

Lu Yuan twitched the corners of his mouth and said with a dry smile:

‘Just kidding, why did Sister Qinghe suddenly think of coming over?’

Li Qinghe Salted Fish usually lay behind Si Tingyu, and said:

‘It’s not sudden, didn’t I just come back from the outside? Recently, the frequency of alienation in various cities has increased a lot compared to before. I am exhausted, so I come to find the heavy rain to relax.’

relax? How to relax?

Lu Yuan looked at Li Qinghe and Si Tingyu in dismay.

Then he thought of Li Qinghe’s other information.

‘The frequency of alienation has increased a lot? Why?’
