

Chapter 236: My Genes Evolve Infinitely

ANONYMOUS LETTER

As a warlord-level powerhouse, he wanted to figure out the red maple guard's patrol route and handover schedule, as well as the deployment plan of the night watchman's underground containment room.

Although Lu Yuan didn't know what their ultimate goal was, it was not a good thing to listen to their previous conversations.

If all the foreign objects in the underground containment chamber of the Night Watch were taken away, the harm would be too great.

It was simply a disaster that destroyed the empire.

The first thought in Lu Yuan's mind was to report the Prime Minister's family.

He is quite confident in his own strength, but it also depends on what opponent he is facing.

If it was a battle king-level opponent, then he might have killed himself easily.

However, he was facing a big boss at the war emperor level, and he had no confidence that he could kill it alone.

What's more, who knows if the other party is a single person, or may be organized and have accomplices?

Lu Yuan knew nothing about this.

The safest way is to notify the senior officials of the Red Maple Empire and let them handle it.

For example, telling Sister Qinghe, Tingxue and Rebecca, let them tell their father, that the three war emperors together should be able to solve the crisis.

But there are still problems.

That is how Lu Yuan should explain that he discovered this matter.

It is a very problematic thing that he suddenly rushed to the prime minister's mansion to spy and wait for him inexplicably.

Even if Lu Yuan said that he found that Tong Menghan had a problem, he went to the Prime Minister's Mansion to check it.

But how did he discover that Tong Menghan had a problem?

I can't say that he has an Evolution Cube in his body, can I feel that Tong Menghan has an aura of alienation?

Then he himself was afraid that he would have to be arrested first.

In addition, Lu Yuan had no evidence to prove that the Tong family had a connection with the mysterious person, and seemed to be detrimental to the Red Maple Empire.

The Tong family itself is a big family, with a powerful warlord, Tong Shu is still the prime minister.

Although Lu Yuan had excellent talents, he couldn't make people believe him by relying on his empty words.

Perhaps Sister Qinghe and the others would believe it, but some old men are also Emperors of War, how could they believe it because of Lu Yuan?

Lu Yuan's eyes flashed and he was lost in thought.

It would definitely be impossible to let him deal with the Emperor Zhan alone, it was too dangerous.

He wants to inform the warlords of the Red Maple Empire and let them deal with it.

However, the method of notification requires a little skill.

Hmm... it's best not to involve Lu Yuan himself, and to report it in a secret way.

In addition, that is to try to find some evidence to increase credibility, otherwise Lu Yuan would not dare to guarantee that an anonymous report would be trusted.

A report with evidence is better than a report without evidence.

Lu Yuan regretted not being able to find some evidence before.

But he thought about it again, even if he took something at that time, he couldn't get it back before.

Lu Yuan's eyes flickered, and he planned to take advantage of this now to visit the Prime Minister's Mansion to see the situation.

Lu Yuan took out a piece of white spar, which was a projection crystal obtained from the place of origin.

The function is similar to the video recorder, but it is more convenient than the video recorder, and it is not easy to find.

After taking out the projection crystal, Lu Yuan thought for a while, and went downstairs to take some knives and forks for eating.

These are all made of metal.

After returning to the room, Lu Yuan's eyes became cold, silver-gray light flashed on the knife and fork, the next moment, invisible fluctuations flashed, the knife and fork twisted and deformed, and finally turned into a mosquito-sized mechanical creation.

These are miniature monitors.

The mechanical manufacturing ability in the supernatural gene of the Mechanical Great, with Lu Yuan's current ability, can easily produce this kind of machinery that does not involve the soul, as if a miracle.

After that, Lu Yuan once again separated a shadow clone. This shadow clone took the projection crystal and brought hundreds of monitoring mosquitoes. He left the room and moved towards the Prime Minister's Mansion again.

The Prime Minister's Mansion is no different from before. Although it was invaded, Tong Shu didn't let people strengthen their guard.

After all, the mysterious person in the black cloak is involved, and there must be only a few people in the entire Prime Minister's Mansion who know about it, and it is normal for Tong Shu not to say anything.

As before, Lu Yuan came to the Central Villa with ease.

After entering the villa, Lu Yuan released the monitoring mosquitoes.

After the mosquitoes dispersed, Lu Yuan came to the location of the previous world stone according to his memory.

However, what made Lu Yuan a little astonished was that the world stone originally inlaid on the staff of the elemental warrior statue was missing.

Lu Yuan frowned slightly.

Was this directly transferred after his previous clone was exposed?

That mysterious person is so vigilant.

Only a few minutes have passed.

In this case, even if he wants to obtain evidence, I am afraid it will be somewhat difficult.

What Lu Yuan thought before was that if he wanted to report, he could report the location of this world stone, which would increase the credibility.

But now, even this world stone has disappeared, and this piece of evidence is gone.

It is more difficult to report successfully.

After all, even Lu Yuan himself didn't know where the mysterious man in the cloak went.

Lu Yuan was helpless, so he had to go to another location to find out if there was anything unusual.

After Lu Yuan searched all the villas, no other abnormalities were found, and Tong Shu and Tong Menghan both disappeared.

Lu Yuan frowned slightly, and it seemed that he could only try to report it without evidence.

Focus on the red maple guard and the night watchman.

After all, the purpose of that mysterious person is for the alien objects in the underground containment room, so it's always right to inform them and let them strengthen management.

Of course, the situation on Tong's side must also be mentioned.

If it can make people vigilant and thoroughly investigate Tong's family, then it may be something to gain, and it would be even better if the mysterious person can be found.

However, judging from the fact that this mysterious man moved the World Stone so quickly, Lu Yuan did not return much hope.

Hmm... maybe I can pay more attention to Tong Menghan and Tong Shu, as long as they are still there, they should meet with the mysterious person again sooner or later.

This is a clue.

Lu Yuan thought about the problem and ordered all the monitors to be hidden in every corner. After monitoring Tong's house well, he let Shadow Clone leave Tong's house.

In the room, Lu Yuan was sitting on the bed, frowning and thinking about who and how to write the report letter.

Hmm... The Red Maple Guard must have one, and Si Chengxin and Si Tingfeng both have one.

Si Chengxin is the person in charge of the Red Maple Guard, and Si Tingfeng is because Tong Menghan is his fiancée.

Regarding the anonymous letter to Si Tingfeng, I need to focus on what Tong Menghan said earlier that Si Tingfeng revealed the patrol route and handover time of the Red Maple Guard to Tong Menghan.

Based on his understanding of Si Tingfeng, although Si Tingfeng himself is free and easy, he has always held the attitude of believing it is better than not believing it.

Should be able to play a vigilant role.

To Si Chengxin's anonymous letter, Lu Yuan didn't say anything more, he just said everything he saw from Tong's family today, highlighting the alienation of Tong Menghan and Tong Shu.

Of course, Lu Yuan hid his identity.

It's just that as an enthusiastic crowd, he noticed the aura of alienation on the road, and then he followed all the way to Tong's house and discovered the world stone and mysterious people.

As for whether Si Chengxin would believe it or not, Lu Yuan had no idea, after all, he didn't understand Si Chengxin.

Of course, even if Si Chengxin didn't believe him, he would go to Si Tingfeng to confirm things about Tong Menghan. As long as Si Tingfeng was still normal, he would not hide such important things.

This should arouse Si Chengxin's vigilance.

As for the night watchman, Lu Yuan thought about it for a long time, but didn't think of a more suitable entry point.

After all, the mysterious man's actions towards the night watchman are only in the arranging stage.

Until a long time in the past, Lu Yuan suddenly thought of something.

That is, when he went to the underground containment room today, the number a39 changed.

Although Lu Yuan knew that the change of number a39 had nothing to do with the mysterious person, it would be a bit unreasonable if the pot was not placed on the mysterious person at this time.

Therefore, in his anonymous letter, Lu Yuan emphatically mentioned the attention that someone was hitting the alien object in the underground containment room of the Night

Watcher headquarters. During this period of time, the alien object would be affected by this.

As long as President Gu An sees this letter, he will not accidentally think of a39's change during the daytime today.

If this is the case, then President Gu An will definitely not relax his vigilance.

In addition, in the letter, Lu Yuan mentioned the relationship between the Tong family and the mysterious person, and the strength of the mysterious person is the emperor of war.

Whether they would believe it, Lu Yuan could only say that he hoped to believe it.

Based on the information Lu Yuan revealed in the letter, even if they didn't believe it all, they should be vigilant.

In this way, Lu Yuan was a little relieved.

After making plans, Lu Yuan used machinery to make a mobile phone that could send messages. Then he used space transmission and appeared in another corner of the Imperial Capital. After compiling the information of several letters, Lu Yuan sent it anonymously. Several important people were given.

After doing all this, Lu Yuan turned the phone back into a metal knife again. Lu Yuan took the knife back to the living room and put the knife in the kitchen.

In this way, no one can find out who sent the message.

If this can be found, it is not an all-knowing and almighty god?

After doing this, Lu Yuan breathed a sigh of relief.

Then all he needs to do is to keep the monitor staring at Tong Shu and Tong Menghan, and when the mysterious person reappears, he will be a hot-blooded crowd again and just report it.

He has done almost what he needs to do.

The rest is to practice well, if something unexpected happens, if the alien substance in the underground shelter is released, he can also help.

After doing everything, Lu Yuan sat cross-legged on the bed and began to practice.

.....

Si Tingfeng's Red Maple guards the dormitory.

Si Tingfeng, who had been busy all day, was lying on the bed with a bitter expression on his face.

Because the guy Ayuan entered the night watchman, he was miserable, and he didn't have time to rest for the next two months.

What kind of human suffering is this ?

Si Tingfeng became more and more angry as he thought about it, and planned to make a call to Lu Yuan.

When he took out the phone, he saw a huge envelope sign on the phone desktop, covering all other application icons.

Si Tingfeng was stunned: 'Mail ?'

Normal emails are not so arrogant at all, okay ? Such a big envelope logo jumped directly on the desktop ?

Si Tingfeng frowned and opened the envelope with some doubts.

Before opening the envelope again, a line jumped out:

'Please make sure there is no one else around you, the next information is very important.'

Si Tingfeng raised his eyebrows.

Because he lives alone in the dormitory, Tong Menghan is not there either.

But what letter is so mysterious ?

Or is someone playing a prank ?

Si Tingfeng raised his eyebrows, a little interested.

Si Tingfeng nodded, and then a letter popped out.

Si Tingfeng read the letter.

However, Si Tingfeng, who had a rather calm face, changed his face suddenly when he was reading the letter.

He suddenly sat up from the bed:

‘What?! Menghan has something to do with alienation?? Even trying to get the alien objects guarded by the night watch? What is this kidding?! Which ** is making such a joke?’

At this moment, Si Tingfeng saw the following message, his face became stiff, and he muttered to himself:

‘Get the patrol route and handover information of the Red Maple Guard from me...’

Si Tingfeng’s eyes flickered, and his brows gradually frowned as he recalled Tong Menghan’s previous performance.

He still couldn’t believe it, his face was extremely ugly:

‘How is this possible?! I don’t believe it! Who wrote this letter anyway?’

Si Tingfeng shut off the phone abruptly, and a look of uncertainty appeared on his face~www.mtlnovel.com~ At this moment, the phone vibrated suddenly, and Si Tingfeng woke up with some muddled thoughts. He glanced at the caller. Show that it is Si Chengxin.

Si Tingfeng answered the phone.

Si Chengxin’s solemn voice sounded:

‘Si Tingfeng! Did you reveal to Tong Menghan about the Red Maple Guard’s patrol route and handover information for the next period of time?!’

Si Tingfeng opened his mouth: ‘Sir, I...‘

‘Yes or no?’

Si Chengxin’s solemn and cold voice sounded.

Si Tingfeng pursed his mouth, then nodded and said, ‘Yes, sir.’

The atmosphere fell silent, Si Chengxin took a deep breath and slowly said:

‘Very well, you are fine. Regarding your punishment, I will talk about it later. Now, you come to me first.’

Si Tingfeng thought for a while, and said, ‘Sir, is it because someone said Menghan was trying to obtain an alien? Sir, would you believe in this kind of thing? Maybe someone is playing a prank.’

‘Is it a prank? I know it! I have checked with the best Zhiwang scientist in the empire. The sender seems to have much higher technology than us. We can’t locate the source of information at all! People with such technology, How is it possible to have such a prank with us? Maybe it was when I was passing by Daqixing, I found this thing, so I reminded us?... Wait, listen to what you said, you also received the letter?’

Only then did Si Chengxin react.

Si Tingfeng’s face was pale, and Si Chengxin’s words made the trace of his luck that existed before disappeared.

He felt so dry in his throat, he nodded, ‘Yeah.’
