

Chapter 245: My Genes Evolve Infinitely

INVESTIGATING THE MARKET, THE TRIAL OF THE CELESTIAL EMPEROR

Lu Yuan hesitated.

Just one space system emperor-level gene requires 20 million seventh-order spirit crystals, how can the others add up to about 30 million?

It may be more than that.

This consumption is really exaggerated.

Or, don't evolve, just practice?

Although this is a little slower, at least, the remaining resources are enough for Lu Yuan to refine the six genes of the King of War. After the breakthrough, he can evolve several Emperor-class genes to the Saint-class.

Is this uncomfortable?

However, Lu Yuan soon thought of the man in the black cloak before and the two soul eater.

Although I don't know when the man in the cloak will act, no matter what, it will definitely have a big impact.

Although his strength is not weak, he is still a bit close to facing the Emperor of War. He can save his life, but he can't just think about saving his life.

Sister Qinghe, their mentors are here, and a few of their friends are also here. Their family is the largest family in the Red Maple Empire. If it is really dangerous, they will definitely not give up the Red Maple Empire and run away easily.

What's more, if those alien objects are really released, I am afraid that the entire Red Maple Empire will not know how many people will die.

Those ordinary people who have not awakened are not genetic warriors, and genetic warriors have at least a little ability to protect themselves.

Ordinary people are simply unable to protect themselves in the face of these alienation and alienation phenomena.

If Lu Yuan can get stronger as soon as possible, if something happens, he can do his best.

The same was true for the two Soul Devouring Orbs. If a few more Soul Devouring Orbs appeared, then the situation might be even worse.

Whether it was for Sister Qinghe and the others, or he himself was a member of the Red Maple Empire, it was impossible for him to abandon the Red Maple Empire and escape.

It can be improved a little bit.

As for insufficient resources, they will be acquired through evolutionary abilities at that time.

After Lu Yuan thought, he made up his mind.

At the limit of his cultivation, Lu Yuan left the martial arts training hall.

Because Amy and Wang Lingling were in retreat, Lu Yuan didn't want to disturb them either.

He thought for a while, planning to go to Baiyun City to see which auction houses sell the best and the most expensive.

At that time, he will evolve that kind of item.

Just do it when he thinks, the space moves, Lu Yuan disappears in place and arrives in the teleportation hall.

After that, he passed through the teleportation hall and came to Baiyun City.

The auction house in Baiyun City is not far from the central square. It is a luxurious, huge golden building.

Lu Yuan used space movement to come to the auction house.

He saw several lists in the distance, his eyes flashed, and he thought that if he wanted to use the auction house to auction the evolved items, he had to make the top ten of the king list first, and the auction house's free agency fee was a benefit. Get it, otherwise the agency fee would be too unfriendly.

Fortunately, Lu Yuan didn't plan to auction right now, but he wasn't in a hurry. He still had a lot of resources.

For the auction house, Lu Yuan had been here for about two months before, and he couldn't be more familiar with it.

However, before Lu Yuan mostly stayed in the independent auction room that received the origins structure to send the treasures.

Lu Yuan is not particularly familiar with the auction halls where items are purchased and the auction rooms where private purchases are made.

Lu Yuan had auctioned a lot of items in the auction house before, and even the auction house in Baiyun City was a four-star VIP.

Only a handful of war emperors and some war saints will have such a high-level VIP card.

Unfortunately, this VIP card does not reduce the agency fee.

The only way to reduce intermediary fees is the various lists.

Lu Yuan can also understand this. After all, since Ye Ye's old man said before, there is not much time, for this, Origins wants people to cultivate hard, and it will definitely improve the benefits of the list.

However, although the agency fee is not reduced, there are still many other benefits.

For example, as long as you come over, you can have a completely safe and private auction room and an auction room without even having to line up.

In addition, before the concentrated large-scale auction, you will be invited by the Baiyun City Auction House to enter the large-scale auction and can bring five people.

You need to know that going to a large auction itself requires a threshold. The items sent for auction are extremely precious treasures. Being able to go to a large auction itself is also a kind of welfare.

Overall, it's still good.

Lu Yuan entered the auction house, walked past the large number of genetic warriors who were checking the instant auction in the auction hall, and came to the stairs.

He handed a black card to the construct in front of the stairs.

A faint blue light swept across the card in the Construct's eyes, and then respectfully bent over:

‘Welcome, distinguished guest, please go upstairs.’

Hearing this sound, many people in the hall looked over in surprise.

They saw Lu Yuan leaving behind and whispered and discussed with their companions.

‘Who was that before?’

‘I didn't notice. Since it is a VIP, the value of the items sent at the auction house is probably extremely high.’

‘Look at the attitude of the construct before, the average one-star and two-star VIPs don't receive such high treatment.’

‘Samsung or above?’

Everyone's eyes widened.

This is a cat man with a smile: ‘I know who he is.’

‘Who?’

Many people looked over curiously.

The cat man opened his mouth and said, ‘He walked past me before, and I took a look. It was the first human on the Tianjiao list, Lu Yuan.’

‘Lu Yuan? It turned out to be him, so it’s no wonder.’

Everyone was stunned.

A Kaman grinned: ‘The top spot on the Tianjiao list is free of agency fees. I don’t know how many people he helped sell treasures. It is reasonable to have a three-star VIP card.’

Everyone nodded.

‘But speaking of Lu Yuan... this human seems to have broken through to the King of War, so fast.’

‘Yeah, this is a genius, the cultivation speed is terrible.’

Everyone sighed, their eyes full of envy and some helplessness.

Their ordinary genetic warriors have to do their best to burn the extraordinary genes of the same level. Maybe the next layer of genetic lock is as strong as iron, and it can’t be broken at all.

And these geniuses casually burned extraordinary genes that exceeded their own cultivation base, and even breakthroughs were so simple.

Sometimes people are really annoying than people.

Everyone sighed and said no more.

While everyone at the auction house was discussing, Lu Yuan had already arrived in a private auction room on the fifth floor.

Unlike the room where the auction was sent, there is no construct to identify treasures and pricing in the auction room. There is only an empty room.

There is a soft sofa, a coffee table, and a variety of fruit drinks in the room, which can be said to be very comfortable.

Of course, only four-star VIPs have such a private auction room.

The average gene warrior wants to privately auction a room not only needs to pay, but the room is small and has nothing.

The difference is still huge.

Lu Yuan sat on the sofa, his mind moved, and a light curtain appeared in front of him, all of which were items for immediate auction.

Lu Yuan had sent a lot of photos before, so he knew it well.

The categories inside include genetic weapons, genetic medicines, one-off charms, precious herbs and spirit fruits that can be collected in the wild, and minerals that are generally developed from mineral veins controlled by major forces, as well as various beasts. There are also falling materials.

In addition, there are some special items such as mounts and fighters.

The various classifications are very detailed. Genetic weapons are divided into weapons, armors, coats of arms, rings, etc., and at the same time are divided into Tier 1 to Tier 9. There is no trainee fighter level. After all, trainee fighters cannot come. In addition to the use of cultivation base, Baiyun City's quality will also be divided, from ordinary, elite, boss, and emperor-level holy-level gods.

Of course, the division is a division, and whether anyone sends a photo is another matter.

Things like artifacts will generally be auctioned at large auctions, and will not be auctioned here immediately.

Of course, Lu Yuan's goal was definitely not the level of artifacts.

Regarding things from the outside world, the Evolution Cube can only evolve to the imperial level, and he can't evolve if the artifact is given to him, and there is no room for manipulation.

The goal he chose was the three stages of Tier 3 to Tier 5.

On the one hand, the reason is that there are the most genetic warriors at the warlord level, and there are also many geniuses. Naturally, there are more people who have the ability to pay, and the market is bigger.

On the other hand, Lu Yuan could only evolve to the Emperor level.

Although the quality limit of Tier 5 has reached the emperor level, the emperor level items will not worry about selling.

Even Lu Yuan planned to look at the situation. If conditions permit, Lu Yuan didn't even plan to evolve to the quality limit of that level at the third and fourth levels.

This kind of extreme quality treasure itself is rare and precious, there are too many at once, it is inevitable that it will not be paid attention to, and it also disrupts the market.

Lu Yuan wanted to make a little money safely and steadily.

Lu Yuan couldn't help sighing when he thought of this.

This is really a small profit.

If he has a city of his own, he can lie down and make a lot of money.

Just like Tianluocheng, there are a lot of spiritual crystals when collecting taxes every day.

Lu Yuan was extremely envious.

It is a pity that this kind of city requires great luck and gains the heart of the city before it can be established little by little.

Father Adams didn't get such a city all at once when he first started.

The same is true for other genetic warrior cities.

Lu Yuan shook his head, no longer fantasizing.

He started to check it carefully, and bought a sample from time to time to try it out.

The scope of Luyuan's selection is basically large categories of items such as genetic weapons and genetic medicine.

Even if he evolves to the imperial level, such a large category of items don't have to worry about attracting any attention.

A Tier 5 leader-level genetic weapon may also sell a few hundred Tier 5 spirit crystals, and if it is an imperial genetic weapon, it can sell for 5 to 10 million Tier 5 spirit crystals.

The cost is about 2.5 million yuan.

A genetic weapon can earn millions of Tier 5 spirit crystals, which is equivalent to tens of thousands of Tier 7 spirit crystals, which is pretty good.

It's a pity that the only people who have the ability to buy are those of the Battle King level Tianjiao, and there are probably only a few thousand people, but there are almost tens of millions, or even hundreds of millions of seventh-order spirit crystals.

For Luyuan, it is enough.

Hmm... In order not to be too exaggerated, the Emperor-level can also be less evolved, and some king-level genetic weapons, genetic medicine, etc., are enough.

Lu Yuan was relieved to see that this method worked.

In this way, his resources will not be particularly lacking.

The only trouble is that the money is still a bit slow.

It would be great if the Evolution Cube's ability to evolve external items could be upgraded to Emperor level, or even Saint level.

Then you can earn the spirit crystals of the war emperor and even the war saint, and the current consumption of Lu Yuan should be enough.

Unfortunately, the Evolution Cube still needs to continue to transform.

Thinking about it this way, after he had exhausted his resources, what he had to do first was to hit the king's list.

When you are in the top ten, you can take a sum of resources, and the other is to evolve a batch of things to auction.

The auction would definitely take time, and during that time, his spirit crystals were not enough.

It just so happens that you don't need to practice, go look for those areas that are connected to the Evolution Cube, and see what's in there.

After making the plan, Lu Yuan left the auction house contentedly.

It only took more than three hours.

Lu Yuan wanted to continue practicing, but he had to wait a while. He wondered if he should go back to sleep?

Um?

It's not right. He now has a starry sky roaming. He can use the starry sky roaming to go to suitable places to fight the fierce beasts. Maybe he can get good things?

Speaking of it, after AI's machinery remains, it seems that he hasn't been to the wild for a long time?

After all, if the resources are sufficient, he doesn't need to worry about these things, he just needs to practice hard.

In that case, let's go outside for a long time.

In other words, with his current strength, he could go hunting down the emperor-level fierce beasts.

I don't know where there is a herd of imperial beasts?

Just as Lu Yuan was thinking, he had a sudden pause and took out the communication crystal.

The white light flashed on the communication crystal, Lu Yuan connected, and Ye Ye's pretty face appeared on the communication crystal.

Lu Yuan smiled and said:

'Yeye? Have you just entered the land of origin?'

Before Lu Yuan sent Ye Ye a message, Ye Ye did not reply, until now he talked with Lu Yuan directly.

Ye Ye nodded slightly, and then his eyes flashed, looking at Lu Yuan, and softly speaking:

‘Today I am going to break through to the King of War. After breaking into the King of War, I have something I want someone to help~www.mtlnovel.com~ Will you help me?’

Lu Yuan was taken aback. It was the first time he saw Ye Ye want him to help. He smiled and said:

‘Of course, what are you talking about?’

Ye Ye’s expression was a little strange, her black cat’s ears trembled slightly, and her voice was even softer than before, and she said:

‘After our members of the Heavenly Underworld Imperial Clan break through to the King of War, they will conduct a trial. The better the performance of the trial, the more attention they will receive in the future. The Trial of the Heavenly Underworld Imperial Clan will test one’s own cultivation on the one hand. Because of talent, on the other hand, it also tests interpersonal relationships, so you can ask friends to help. I want you to help me.’

Ye Ye finished speaking in one breath and looked at Lu Yuan.

Lu Yuan was stunned, a little astonished: ‘Where is the trial? If it’s on Pluto, I can’t go there.’

A faint smile appeared on Ye Ye’s face: ‘In the place of origin, the place of each trial is in the place of origin, which was personally selected by our ancestors. But...’

Ye Ye glanced at Lu Yuan and said, ‘Every trial will be difficult. If you are not careful, you may die.’

Of course, death in the land of origin is not a real death, but it will be impossible to enter the land of origin for a long time. This loss is already considered to be great.

Ye Ye glanced at Lu Yuan, her eyes flashed, waiting for Lu Yuan’s answer.

Seeing Ye Ye a little embarrassed, Lu Yuan couldn’t help but smile:

‘Who do you think I am? Don’t you know my strength? Don’t worry, with me, you will surely pass the trial properly.’

Ye Ye heard the words, a slight smile appeared on his face.

She nodded vigorously: ‘Yeah.’
