

## Chapter 254: [My Genes Evolve](#) [Infinitely](#)

### DISOBEDIENT HAND

Not long after, the Heavenly Underworld Sage, Ye Mu and others walked out of the space gate.

Obviously, the alienation phenomenon of Night Vale has been dealt with.

However, because there are still a lot of influences that need to be dealt with in the follow-up, the trial of the royal family was forced to stop, and Lu Yuan and several people also left.

Because he didn't confirm whether the trial will continue in the future, even if he continued, he didn't know when it would start. After Lu Yuan returned to Ye Ye's bedroom, he said goodbye to her.

Nether City is the site of cat people after all, and it is not suitable for Lu Yuan to stay here.

In addition, he also needs to cultivate himself, and he needs to go to the Devil Dragon Mountain Range to obtain resources.

Leaving Nether City, Lu Yuan teleported to Baiyun City. Just entering the teleportation hall of Baiyun City, Lu Yuan saw many genetic warriors hurriedly leaving from the teleportation hall.

These genetic warriors come from different races, and they seem to be in a hurry.

Lu Yuan glanced at it, but didn't care too much.

At this moment, Lu Yuan heard a faint voice.

"Have you heard? A source of alienation suddenly appeared around the Kaman's Stormwind City, and the beasts in that area were all infected by alienation."

"It's not just the city of Stormwind. Even the elves, night charms, and green demons have alienation near the cities. I don't know what happened, the place of origin is the first time that alienation has occurred, right?"

"It's not very clear, but it doesn't seem to be right."

Lu Yuan was shocked when he heard this.

So it's not just the alienation phenomenon in the valley of the night?

Listening to the meaning of the dialogue, it seems that there are many areas where alienation has occurred this time.

Human cities don't know if there is any alienation phenomenon?

Lu Yuan thought of this and quickly contacted Si Tingxue.

The white light flashed in the communication crystal. After a while, Si Tingxue's pretty face appeared in the communication crystal.

"What's wrong?"

Si Tingxue has some doubts.

Lu Yuan asked, "Is there an alienation phenomenon in Red Maple City?"

"Alienation?"

Si Tingxue was taken aback, and there was a dazed look on her cold pretty face: "I'm practicing, and I haven't received any news, let me find out."

Lu Yuan nodded: "Yes."

Then Si Tingxue cut off the communication, probably to find out the situation.

And Lu Yuan contacted Amy again.

Amy appeared on the communication crystal, blinked his big eyes, and said:

"Large liar, there seems to be alienation in many areas now? My grandfather seems to be a little worried."

Lu Yuan nodded solemnly when he heard the words, "Well, there are indeed many areas where alienation has occurred. How about you?"

Amy shook her head: "Mom has sent the Celestial Army to patrol the surrounding area, so far no trace of alienation has been found."

Lu Yuan breathed a sigh of relief: "That's good."

After hanging up the communication crystal, Lu Yuan found that he was a little worried too much.

The basement of Origin is the base camp of genetic warriors. With so many races here, even if there is an alienation incident, there will be no real accidents.

Thinking of this, Lu Yuan's heart also relaxed a lot.

He returned to Red Maple City through Baiyun City's teleportation array.

After exiting the teleportation hall, Lu Yuan saw that the guards patrolling around had increased a lot, but it was just that there were more guards patrolling, and that shouldn't be a big deal.

Soon, Si Tingxue also contacted Lu Yuan and made sure that no alienation was found around.

Lu Yuan was also completely relieved.

After , Lu Yuan returned to the martial arts training hall as if going home, and started his own practice.

.....

The imperial capital of the Red Maple Empire, in Li Qinghe's small villa.

There was a flash of white light in the room, and Lu Yuan's body emerged, coming out of the place of origin.

He stretched slightly, showing a slight smile.

With the improvement of his cultivation, Lu Yuan's stay in the place of origin has once again increased.

This time, he stayed in the Land of Origin for 65 days before he came out. Except for the day when he helped Ye Ye to practice, Lu Yuan did not practice. At other times, Lu Yuan was cultivating well.

almost absorbed the appearance of 1.5 million seventh-order spirit crystals.

In addition to the remaining tempering degree, the tempering degree of Star Wandering reached about 60%.

Although it will get slower and slower in the future, there are two more times, it should be able to complete the tempering.

When the time comes, Lu Yuan can consider going to the Ice Vein Star, closing the gap in the space of the blood-boned kobold.

Generally speaking, everything is going well.

Lu Yuan's mood is naturally quite good.

Then, Lu Yuan thought of something, took out his phone, and opened Battle.net.

Seeing the news on Battle.net, Lu Yuan's face became serious.

Sure enough, the first edition is alienated news.

"For the first time in history, the source of alienation appears in the place of origin. What does this indicate? »

Lu Yuan clicked and looked, and found that the news did not mention the upper strata of Origin. Either the situation in the upper strata of Origin was inconvenient to be known by most genetic warriors, or the author's strength was not as strong as the king of war, I'm afraid he was not. Too much knowledge of the upper strata of Origin.

However, the first appearance of alienation in the place of origin has made many people a little worried, as can be seen from the comments in the news.

Fortunately, there is no alienation phenomenon in a few human cities, but it's not bad.

The only races that appeared in the Alienation Space Crack this time were cats, night charms, elves and Kamans.

However, there were strong players, and these spatial cracks were quickly quelled.

Lu Yuan checked several news about alienation, and found that nothing major had happened, so he shut down Battle.net.

Leaving the room, Lu Yuan went to the living room and saw Li Qinghe sitting on the sofa, wearing a cool home skirt, his snow-white feet dangling on the sofa, and turning his mobile phone in his hand.

From the light curtain, Lu Yuan can see that she is also watching the news on Battle.net.

Lu Yuan walked over and sat down beside Li Qinghe.

Li Qinghe glanced at Lu Yuan and automatically placed his calf on Lu Yuan's leg.

Her eyebrows wrinkled slightly, and she whispered softly: "I didn't expect that the source of alienation appeared in the lower level."

Lu Yuan squeezed Li Qinghe's calf, Li Qinghe's body became stiff, and then relaxed, without pulling it back.

Lu Yuan smiled and said, "Sister Qinghe, are there many sources of this kind in the upper echelons?"

"Well...it's not too little, right. What's wrong? Do you want to go to the upper level? Brother fate, you can team up with us, sister, I will take you to fly."

Li Qinghe smiled and said.

"I'll go after a while. By the way, when you were in Origin, I went to pick up an emergency mission and got another Soul Devourer."

"What?! Another Soul Devourer?"

The smile on Li Qinghe's face froze.

Her brow furrowed, then she thought of something and said:

"When I first left the place of origin, I received an anonymous text message on my phone saying that someone wanted to do something to the underground containment room of the Night Watchman."

Of course I know, it was from me... Lu Yuan spit out in his heart, then frowned, and said:

"If someone really does something on the underground containment room, then it will affect the entire imperial capital, right?"

Li Qinghe nodded solemnly and said: "The message said that the last time we had an abnormality in the underground containment room A39 was caused by this reason. Now you have found the second Soul Eater, it seems that there are many dark sides in our imperial capital. Threatening. I plan to inform the old man to make some preparations."

"This is good too, so as to avoid accidents when you get it."

Lu Yuan breathed a sigh of relief. He didn't know when the cloaked man would do it or how to do it. It would be best to prepare in advance.

"Oh, by the way, Tong's family doesn't know why, all important personnel have disappeared, and they don't know where they went."

Lu Yuan was taken aback, slightly surprised: "It disappeared? How did it disappear?"

Didn't the Red Maple Empire send someone to monitor them before?

Lu Yuan was a little surprised.

"I don't know, I heard what your tutor said before."

Li Qinghe stretched out on the sofa, then held Lu Yuan's hand, watching Lu Yuan quietly:

"Brother Yuan, where are you going to put your hands?"

Lu Yuan saw that his hands had reached the position of Li Qinghe's thigh.

He gave a dry cough, and said solemnly: "It has its own ideas, it's none of my business!"

Li Qinghe nodded silently, and said with a smile: "Such a disobedient hand, cut it off."

Lu Yuan's mouth twitched: "...Why don't you just spare it this time?"

"Humph!"

Li Qinghe glared at Lu Yuan, then let go of his hand.

Lu Yuan didn't dare to go further up.

Then he thought of Si Tingfeng, and he didn't know what it would feel if the senior Tingfeng knew that his fiancée suddenly disappeared?

Hmm... don't ask this question anymore.

.....

more than half a month later.

There was a flash of white light in the room, and Lu Yuan's body appeared again, his face with obvious joy.

was cultivating in the land of origin twice again, and he finally tempered the starry sky roaming to completion.

The Emperor-level Space Gene of the Consummation Level once again greatly improved Lu Yuan's use of the power of space.

He is now confident that he can smooth out a part of the chaotic space line and restore the torn space rift.

Of course, this must be a relatively small space gap.

For example, the one of Ice Vein Star.

Lu Yuan planned to take advantage of this time to go to the Ice Vein Star to smooth out the gap in space.

During this period, with the disappearance of Tong's family, the senior officials of the Red Maple Empire became more vigilant and believed even more in the anonymous letter sent by Lu Yuan.

Because of this, the underground containment room of the night watchman headquarters is still very stable.

No one did anything to the underground storage room.

However, the alienation phenomenon in other areas of the Red Maple Empire has increased slightly.

Fortunately, there is no such serious alienation phenomenon as before in Yali City. Generally speaking, it is still under control.

Lu Yuan left the room and went to the living room.

Li Qinghe is not there, she is practicing in the place of origin.

Lu Yuan didn't have to make excuses to leave the villa.

He disappeared in place, and appeared in the wilderness the next moment.

In the distance, there is a huge steel fortress.

Lu Yuan looked at the steel fortress in the distance, and could see the chaotic space line in his sight. In the center of the chaotic space line, there was a space gap.

The space fissure of the ice vein star.

Lu Yuan did not go directly.

The significance of being able to calm the space rift is too great, and Lu Yuan does not intend to show it in front of others.

He intends to sneak into the Ice Vein Star himself, and then go to the base on the side of the kobold, and close the space rift over there.

As long as the gap in the space on the opposite side is closed, it is estimated that it will not be long before the humans will find something wrong, and they will definitely take action at that time.

The time is now in the evening, and Lu Yuan intends to wait again.

After a long time, the sky was completely dark, and only the steel fortress in the distance was brightly lit.

There was a roar of fierce beasts in the wilderness, but no beast dared to approach the steel fortress.

In the darkness, Lu Yuan turned into a shadow and approached the steel fortress.

It's almost time.

has the shadow kingdom gene, Lu Yuan can easily blend into the shadows, coupled with the assistance of the power of space, without disturbing anyone

in the steel fortress, Lu Yuan passed through the space fissure and came to the base of the ice vein star.

is the same as when Luyuan came last time, the environment of Ice Vein Star is still extremely cold.

There is still snow and ice raging outside the base.

It was also dark at the moment of Bingmaixing. Lu Yuan didn't disturb anyone and disappeared in place.

At the far end of the base, Lu Yuan's body appeared, and the storm swept towards Lu Yuan, but Lu Yuan's body did not sway at all.

His mental power spread, he flew aimlessly in the blizzard, and began to search for the base of the kobold.

After a while, Lu Yuan stopped suddenly, the corners of his mouth raised, and a smile appeared.

He felt the breath of a kobold, and the base was there.

Lu Yuan turned his head and flew in the direction of breath.

Soon, he saw the huge kobold castle in the dark night.

The castle is blood red, made of metal, looks hideous, and has a lot of interlaced decorations.

Inside the castle, there is a space crack about the size of a human base.

Lu Yuan squinted his eyes, his body melted into the darkness, and slowly flew towards the kobold castle~[www.mtlnovel.com](http://www.mtlnovel.com)~Like the human base, there is a circle of light covering the outside of the kobold castle, but because of the space cracks. , The surrounding space was abnormal, and Lu Yuan was given a chance. He used the space movement to easily pass through the light mask and came to a shadow not far from the space crevice.

On the square where the space rift is located, a pair of kobold warriors are patrolling. Lu Yuan feels it. Among them, there are two warlords, and the others are of warlord level.

The strength of these kobolds is too weak for the current Lu Yuan, and it is difficult to detect the existence of Lu Yuan.

In fact, as long as Lu Yuan had the intention to hide, in such an abnormally spaced area, it would be difficult to detect the existence of Lu Yuan, even a powerhouse of the Battle Emperor level.

let's start.

Lu Yuan took a deep breath, and then began to sort out the chaotic spatial lines around the rift in the space.

At the beginning, there was no change in the space rift.

But as the land margin continued to sort out the spatial lines, the spatial fissures began to slowly close.

On the square, a kobold warlord wearing a scarlet armor glanced at the space rift, frowned slightly, a trace of doubt flashed in his eyes, and he looked at his companion nearby:

"Black Prison, do you see that the space gap is getting smaller?"

A kobold warrior with black fur on the side of was taken aback, carefully watching the space fissure and feeling the surrounding situation.

Then his pupils contracted: "Really getting smaller?! What's the matter?"
