

Chapter 256: My Genes Evolve Infinitely

RESTORER

What the ** is a stalker? ?

Hunting... came to hunt down this old elven man ?

Nor is it right... Lu Yuan asked the old elf why he was looking for him before. The old elf seemed to be saying that he would know it later.

Wait...Is this horrible thing aimed at him ?

Lu Yuan's face suddenly became very strange.

Isn't it possible ?

He was obviously just a weak, poor, and helpless war king. Why would a war emperor-level alienated fierce beast come at him ?

How could his face be so great ?

is not suitable, right ?

While Lu Yuan was thinking, the huge alienated fierce beast roared, and his eyes swept across Lu Yuan and the elven man below, wisps of evil green light surging throughout his body.

The terrifying power spread. In the kobold base in the distance, the kobolds who had fallen into chaos felt the terrifying aura.

A group of desperate kobolds raised their heads and looked in the direction of the breath, with a look of uncertainty in their eyes.

‘what happened ?’

‘What a powerful and strange aura, is it the strong one who closed the space door ?’

Many kobolds were terrified. With such a powerful aura, it was completely arbitrary to destroy them. They had to think that the reason they were still alive might be that the strong man was playing cats and mice.

Why is there such a strong person looking at them? The kobolds don't understand what they did wrong.

Not only kobolds, but even in human camps in remote areas, a group of human powerhouses are now looking up in the direction where the breath is coming from.

The powerful aura far surpassing the average war emperor, the entire Ice Vein Star can perceive it, even the strong human beings far away.

At this moment, a group of human experts are a little surprised, with horrified expressions.

.....

Just when the alienated fierce beast was about to attack, the old elven chuckled and opened his right hand to the alienated fierce beast.

The next moment, the alienated fierce beast was frozen in the air like a specimen, and the green light surging around it also dissipated.

Then, the space where the alienated fierce beast was located shattered, and the alienated fierce beast was torn apart along with the space, quietly turning into blood foam, and its aura dissipated on the spot.

Lu Yuan was stunned.

A powerful alienated fierce beast that far exceeds the average war emperor, has it died like this? ?

died very calmly and quickly, almost completely unimaginable that this is an alienated beast of the Emperor rank.

This old elven man is probably stronger than the saint of heaven, right?

Lu Yuan looked at the amiable old elven man in shock.

At this moment, an extremely rich and refreshing breath merged into Lu Yuan's body and entered the Evolution Cube.

The Evolution Cube in Lu Yuan flashed a blue light.

Lu Yuan came back to his senses, with some surprise in his heart.

I didn't expect that there would be such a harvest. This time, the unknown aura was second only to the piece of meat that Lu Yuan had encountered in the Valley of Night.

absorbed the unknown breath this time, and the evolution cube distance changed one step further.

If this continues, I am afraid it will not take long before the Evolution Cube will begin to transform for the third time.

After the old elf casually killed the emperor-level alienated fierce beast, he turned his head to look at Lu Yuan, and said with a smile:

‘Now do you know why I came to you?’

Lu Yuan: ‘...I'm not very clear yet.’

The old elf smiled and said: ‘This alienated beast is called a rift stalker. Every time a space rift is repaired, a stalker will follow and hunt down the strong man who repairs the space rift. Before, you The space rift has been repaired, so the stalker is here.’

Lu Yuan was a little surprised: ‘Repairing the space rift will attract such rift stalkers?! Why?’

Lu Yuan suddenly remembered that when he was chatting with his tutor a long time ago, he mentioned that there are many spatial fissures in the entire universe.

And the space gap seems to be more and more.

At that time, he was a little puzzled, why are there so many spatial rifts suddenly appearing, now he did not expect that even repairing the spatial rifts would attract such a powerful alienated beast?

Lu Yuan didn't expect this at all.

Hearing Lu Yuan's question, the old elf smiled:

‘Hehe...how much do you know about alienation?’

Lu Yuan thought for a while, and shook his head: ‘The juniors know very little, only that alienation occurs in the entire universe. And I heard a friend say that alienation does not seem to be something in our universe and cannot be destroyed.’

The old man nodded with a smile upon hearing the words: ‘To be precise, alienation is the erosion from outside our universe. The rift in space is also the rift formed by the instability of space due to the erosion of the universe. It is the ‘wound’ of the universe. The more the ‘wound’ More, the weaker the universe, the erosion of alienation will gradually deepen, when the time, the entire universe will be completely alienated. And now some people want to heal the wounds of the universe, will naturally cause alienation counterattack. So every time the space gap is repaired, There will be stalkers looking for it.’

Lu Yuan widened his eyes slightly when he heard this, and understood: ‘It turns out that this is the case. If the rift in space is repaired, the space of the universe will gradually restore stability, and then the difficulty of alienation to erode the universe will increase?’

‘Hehe...it is true.’

Lu Yuan's mouth twitched, and he finally understood why such a powerful emperor-level alienated beast would suddenly appear here.

It turned out that the land edge repaired the space rift before, so it was an instinctive reaction of alienation. Want to get rid of him who can repair the space rift?

Good fellow, how did he know that repairing space rifts would have such an effect?

If he knows, he will never repair the space rift. At least, he will definitely not repair the space rift until he has the strength to deal with the chasing stalkers.

Thinking about it this way, Lu Yuan had planned to be stronger before and repaired the space rift between the two restricted areas on the border of the Red Maple Empire.

Those two space rifts are much bigger than this space rift.

If even this spatial fissure can attract an emperor-level alienated fierce beast, what level of alienated fierce beast will a larger space fissure attract?

Lu Yuan shuddered when he thought about it.

He pursed his somewhat dry lips, looked at the old elf, and asked:

‘...Are these rift hunters very strong?’

The smile on the face of the old elven man disappeared, and he glanced at Lu Yuan with a solemn expression, then chuckled:

‘Trust me, the rift stalker is much stronger than you think, and the weakest rift stalker is also an emperor.’

Lu Yuan: ‘.....’

The weakest is the Emperor?

I’m sorry, I don’t dare anymore.

Lu Yuan said that at least he would break through to the Emperor of War... No, even if he had just breached the Emperor of War, he would not dare to repair the rift in space.

The strength of the alienated fierce beast is generally much stronger than that of the genetic warrior of the same level. Even if he has just broken through to the Emperor of War, Lu Yuan does not think he can be the opponent of the emperor-level alienated fierce beast.

Lu Yuan then thought of something, and looked at the old elf curiously: 'Senior, then why did you suddenly appear here?'

The old elf smiled: 'Since there are 'wounds' in the universe, there are always people who can treat the wounds. People like me with extraordinary genes in the space system will help the universe repair the rifts in space. We are the repairers of the universe, and we are running around. Everywhere in the universe, space rifts are being repaired, hoping to prevent the universe from being eroded by alienation.'

Hearing this, Lu Yuan suddenly respected: 'So that's it, Senior is really a respectable person.'

The old elf shook his head: 'The universe is the mother of all our creatures. If the universe is completely eroded by alienation, all of us will die.'

Then he sighed: 'Unfortunately, just repairing the space gap can only cure the symptoms, not the root cause. As long as the source of alienation outside the universe is not eliminated, erosion will always exist... Moreover, genetic warriors with extraordinary genes in the space system are extremely rare after all. Yes, there are fewer naturally able to deal with stalkers, so even if we restorers try their best to repair the rift in the universe, it will only slow the rate of erosion of the universe, and it will not even keep up with the speed at which rifts appear in space.'

His face is heavy: 'We are running out of time.'

Lu Yuan felt a little heavy when he heard this.

Then he thought of himself, maybe he could quickly break through to the Emperor of War, he should be able to help.

As long as he reaches the battle emperor rank, he can easily deal with the alienated beasts of the emperor rank. Even if he faces the alienated beasts of the holy rank, as long as he let go of his hands and feet to fight, he may not be able to win.

But even so, he is just a person, the universe is so big, what can he do by himself?

Unless there are more space genetic warriors, or he can break through to the God of War.

Not right... There must be more than one or two Gods of War in the entire universe, and I haven't seen any improvement.

It is said that since there is a source of alienation outside the universe, why not eliminate that source of alienation?

Lu Yuan asked curiously: 'Senior, since there is a source of alienation outside the universe, can that source of alienation be eliminated?'

Hearing this, the old elves raised the corners of his mouth, revealing a faint smile, Lu Yuan felt the bitter taste from this smile.

'Young man, practice hard. When your strength is enough, you may be able to do this.'

Lu Yuan: '.....'

Lu Yuan always felt that the old elven man seemed to comfort him?

may also be comforting himself.

It seems that the situation is more serious than Lu Yuan thought.

Lu Yuan felt a headache.

He wondered if he could break through to the God of War and evolve all the transcendent genes to the ** level, would he be able to eliminate the source of alienation ?

Maybe it's not enough, maybe he has to evolve the transcendent gene to exceed the ** level ?

Lu Yuan felt extremely stressed for a while.

Then, he smiled and said, 'I will work hard.'

The old elf smiled, glanced at Lu Yuan, and said:

'Your Space Element is good, but it's a pity that your strength is too weak. When you break through to the Emperor, you can contact me in the Heavenly Patching City in the upper layer of Origin. If you are interested in becoming a restorer.'

Lu Yuan nodded seriously when he heard the words, 'I will contact you, Senior.'

The old elf smiled and nodded. He glanced at the direction of the human base in the distance, and said:

'Is that a space rift in your race planet ?'

Lu Yuan nodded. It was a bit complicated for a while. I don't know if the old elven man will repair the space fissure. It should be repaired. But in this way, the Red Maple Empire probably won't be able to collect ice vein crystal ore. .

The old elven man seemed to see Lu Yuan's worry, and smiled:

'Rest assured, even if it is to repair space rifts, we also have priority. Space rifts that can be connected to resource planets are generally not repaired in the first time. The first priority is to repair those useless space rifts. For any race, Being able to obtain resources and improve ourselves is also a good thing for us. After all, it can also better deal with alienation.'

Lu Yuan was stunned, then smiled and said, 'I understand, Senior.'

The old elf smiled and nodded, and said, 'Well, I should go, too. By the way, don't tell me what I said to you today.'

Lu Yuan was taken aback, then nodded slightly: 'I see.'

If the current problem is so serious, maybe the entire universe is about to usher in the end of the day and tell other people, then I am afraid that many people will completely lose control before the end is coming?

will only become more chaotic then.

The reason why this old man told him is probably because he has been able to repair the rift in space, so he intends to become a restorer in the future, right?

'By the way, senior, I don't know how to call you?'

Lu Yuan thought that he hadn't asked the old man's name, and said.

'Hehe, my name is Solomon Silvermoon. Young man, I hope to see you in Patch Sky City soon.'

After said, his body disappeared in place.

Lu Yuan still didn't feel how the old man disappeared.

He was taken aback, and then took a deep breath, remembering the name of Solomon Silvermoon, and intends to upgrade his cultivation as soon as possible ~www.mtlnovel.com~ until his strength reaches the emperor of war and quenches most of his extraordinary genes. After completing the practice, he began to repair other rifts in the space.

Thinking of this, Lu Yuan felt a sense of urgency and planned to go back to practice soon.

He is only at the Battle King level now. According to his current training speed, it will take about half a year to break through to the Battle King level. After reaching the Battle King level, he needs a lot of time to refine the newly evolved extraordinary genes.

The road is obstructive and long.

Lu Yuan sighed, his body disappeared and returned to the human base.

In the shadow of the human base, Lu Yuan saw many human warlords and warlord- class powerhouses floating in the air, looking in one direction with some uncertainty.

Lu Yuan took a look, and was stunned, and found that the direction they were looking at seemed to be the direction he came from.

Then he seemed to understand something.

Did they feel the movement caused by the alienated beast before ?

But that has passed.

Lu Yuan thought of the imperial-level alienated fierce beast that had shattered as the space shattered before, and the corners of his mouth twitched.

That old man is definitely a super boss.

Lu Yuan shook his head, no longer paying attention to the soldiers of the Ice Vein Star, his body disappeared in place, passed through the rift in space, and returned to Da Qi Xing.

After , Lu Yuan disappeared again and returned to the room in the Imperial Capital.

Thinking back to today's experience, Lu Yuan sighed and continued to practice.
