

Chapter 257: My Genes Evolve Infinitely

POOR CHILD

Nothing unexpected happened in the next few days.

The Ice Vein Star was closed because of the space rift on the Kobold side. Humans found the problem and started hunting down the Kobolds who stayed on the Ice Vein Star. Of course, this was all heard by Lu Yuan from others, even if it was. No one said this in the news.

A few days later, Lu Yuan entered the place of origin again and continued to practice.

After learning about alienation through the old elven man, Lu Yuan's heart was under pressure.

Don't talk about saving the universe and being a savior. If alienation really erodes the universe completely, then there will probably be alienation phenomena everywhere, alienating fierce beasts, and no one can be alone.

That is the real doomsday.

Lu Yuan naturally hopes that his strength will increase quickly, and before that end, he will have the ability to protect himself and his friends from alienation.

After tempering the starry sky roaming to Consummation, Lu Yuan plans to follow the order in the next refinement.

At that time, the priority to refine the starry sky roaming was also because it could close the gap in space. Now there is no other plan, and there is no transcendent gene that I want to prioritize.

He began to temper the Dahi Spirit Body.

Great Sun spirit body needs to consume much less spiritual power than the starry sky roaming. It only needs more than two million seventh-order spiritual crystals to complete the consummation.

And Lu Yuan had tempered a part of the tempering degree before, about two million seventh-order spirit crystals were enough.

With Lu Yuan's current tempering speed, it can absorb 24,000 seventh-order spiritual crystals a day, and it can absorb 1.5 million seventh-order spiritual crystals in more than 60 days.

It was only the second time to refine in the Land of Origin, and Lu Yuan completely completed the refinement of the Great Sun Spirit Body, and the actual time consumed was even more than half a month.

After the Da Ri spirit body was tempered, the improvement brought by full operation was several times higher than before, and Lu Yuan's strength was greatly improved.

In fact, for any genetic warrior, the transcendental gene is a great improvement from the beginning to the completion of the tempering.

After the Da Ri spirit body was tempered, Lu Yuan began to temper his life chants.

Compared with the Great Sun Spirit Body, Life Aria needs to consume more spirit crystals, almost 3 million seventh-order spirit crystals.

However, Lu Yuan still only spent the time to enter the Land of Origin twice, adding up to about 120 days of origin time, and completely tempered the life chant.

The actual time it took was less than a month.

The time it took to complete the two emperor-level transcendental genes of the Great Sun Spirit Body and Life Aria was only more than a month, and it was not even as long as the time it took to temper the transcendent gene of Starry Aria before.

For more than a month, whether it is the real world or the place of origin, it has been quite calm.

The place of origin After the alienation phenomenon first appeared, many people were a little worried, but no other alienation phenomenon occurred afterwards, and gradually everyone put the previous alienation phenomenon aside.

In the real world, Lu Yuan has been worried that the cloaked man would act on the night watchman's underground containment room, but there has been no movement.

On the contrary, Lu Yuan took advantage of this time to complete an urgent task.

But the mission this time is not Soul Devourer. It is an alienated fierce beast. It has reached the battle king level and entered the city to devour humans.

This alienated fierce beast has a not-so-weak spatial ability and first-class escape ability. It may be troublesome for others to deal with, but for Lu Yuan, who has a more powerful space element, it is very easy.

In front of him, the alienated fierce beast couldn't even run away, and was directly killed by Lu Yuan, very easily.

.....

The place of origin, Red Maple City, the gravity room of the martial arts gym.

Lu Yuan opened his eyes, a ray of gray iron light flashed in his eyes, and the fluctuating spiritual power began to calm down.

Lu Yuan is tempering the supernatural gene of the mechanical emperor.

Today's practice time has reached its limit, Lu Yuan exhaled slightly, stood up, stretched out.

'It's almost time.'

He intends to challenge the king's list and get the benefits of the king's list.

After all, for a genetic warrior of the genius level, the benefits of rushing to the rankings are quite rich.

In addition, the top ten on the King's List can also be exempted from auction intermediary fees.

During this period, Lu Yuan would go to the Demon Dragon Mountain Range every day, and he had gained a lot of things. Evolution is a good thing.

Especially the fifth-tier genetic weapons, even the imperial-level ones have evolved hundreds of pieces.

The market has been digested for a long time, and if they are all sold, there will be almost tens of millions of seventh-order spirit crystals.

And Lu Yuan's own genetic weapons, weapons have evolved to Saint-level, and the others are also emperor-level.

It's not that Lu Yuan didn't want to evolve all the genetic weapons to the holy level. The burden of the fifth-order holy artifact blessing is very heavy, even Lu Yuan can't afford all the holy artifacts.

Waiting for him to refine all the extraordinary genes to completion, he should be able to bless about three holy artifacts.

As for more, it would be unrealistic.

Even so, Lu Yuan was still very satisfied. A sacred artifact plus a few imperial-class weapons brought about three times the improvement of Lu Yuan's attributes in all aspects.

This is just an increase in attributes, and the increase in combat power is even greater.

That's the case. Although Lu Yuan has only tempered the three extraordinary genes now, he still thinks that few people at the king level should be his opponents.

Lu Yuan took out the communication crystal and contacted Si Tingxue.

White light flashed, and after a while, Si Tingxue's pretty face appeared on the communication crystal.

Lu Yuan smiled and said, 'Tingxue, are you going to challenge the list?'

After hearing what Xue Xue said, he nodded gently: 'Well, I will go when I finish my cultivation.'

During this time, Si Tingxue and Rebecca are also rushing to the list. Of course, the list they rushed to is Tianjiao.

The two are natural lords and natural leaders, and the qualification challenge must have passed.

But wanting to be on the list is extremely difficult.

Even Si Tingxue, the natural lord, is still close to being on the list.

Lu Yuan smiled and said, 'Then we will go together later.'

The last time Lu Yuan went to Baiyun City with Ye Ye to make the list, but Ye Ye has just broken through to the King of War for more than a month, and the tempering speed is not so fast, so naturally he will not make the list now.

It happens that Si Tingxue and Rebecca are going to make the list, so let's go with them.

Si Tingxue was stunned, his eyes widened slightly, a little surprised and said:

‘Are you going to see us make the list?’

Rebecca squeezed over to , an awkward expression appeared on Qiao's face:

‘Huh? Ayuan, are you going to watch the ring battle between the two of us? No, it's so embarrassing, I lose every time.’

Lu Yuan: ‘.....’

Seeing that the two had misunderstood, Lu Yuan was a little embarrassed. He laughed dryly and said:

‘Well... I really want to see your Tianjiao challenge, of course... I have something to stop by.’

Si Tingxue asked softly: ‘What's the matter? Can we help you?’

Lu Yuan smiled dryly: ‘I happen to be planning to make the list too.’

The atmosphere fell silent for a moment.

Si Tingxue and Rebecca's expressions froze, and then Si Tingxue's cold voice added a touch of shock:

‘You...you want to make the list? Make the king list?’

Lu Yuan smiled and nodded: ‘Yeah.’

Rebecca exclaimed: ‘Really? Ayuan, it's not long before your breakthrough. Are you sure you want to make the list? The people on the list should be very strong.’

Lu Yuan smiled: ‘You don't know my strength.’

During this period of time, Si Tingxue and Rebecca still occasionally discussed with Lu Yuan.

Lu Yuan would naturally not refuse if the practice of the day ended.

In addition, Lu Yuan had dealt with alienation phenomena in the real world before, and they knew about the affairs of imperial aliens.

The two of them are naturally very clear about Lu Yuan's strength.

Hearing what Lu Yuan said, the two fell silent.

Then Si Tingxue nodded slightly: 'Well, are you coming over now? We are in the Red Maple Mansion.'

Lu Yuan smiled and nodded: 'Okay.'

Then, Lu Yuan left the training hall, Lu Yuan's body disappeared in the same place, at the entrance of the Red Maple Mansion in the center of Red Maple City.

Outside the gate of Red Maple Mansion, the two guarding genetic warriors saw Lu Yuan and suddenly smiled:

'Elder Lu.'

During this period, Lu Yuan often came to Red Maple Mansion, and they naturally knew Lu Yuan.

Lu Yuan smiled and nodded, entered the Red Maple Mansion, and walked towards Si Tingxue's small courtyard.

At this moment, Lu Yuan saw Si Tingfeng approaching him, his face was a bit decadent, and his mental state was completely different from when he had just graduated, and when he invited them to dinner.

Lu Yuan raised his eyebrows slightly and walked over:

'Listen to the wind senior.'

Si Tingfeng seemed to be outside the wandering object. Hearing the sound, he looked up and his expression was a little dazed.

After seeing Lu Yuan, he was stunned, then smiled:

‘A Yuan? It’s you, why did you think of coming to Red Maple Mansion?’

Lu Yuan smiled and said, ‘I’m here to find Tingxue.’

Si listened to the wind and heard the words, he thought of something, and said with a smile: ‘It turns out that it is, I seem to have heard of it. You often come to Tingxue recently. Not bad, it seems that your relationship is much better than before.’

Lu Yuan smiled: ‘Senior, how about you? I also heard about Tong Menghan. How are you doing?’

The report was even made by him...

Of course, Lu Yuan has no regrets at all. If Tong Menghan were really allowed to hide, maybe the man in the cloak would have already started to work on the underground containment room.

Which is still so calm as it is now?

The smile on his face froze after hearing the wind.

He shook his head bitterly: ‘I didn’t expect that she was such a person. I thought I didn’t owe her anything, and satisfied her with almost everything. I didn’t expect that she would betray me.’

Lu Yuan glanced at Si Tingfeng sympathetically, patted Si Tingfeng on the shoulder, and smiled:

‘After leaving the place of origin, have a drink together. Senior McGonagall and Yang Ping are both talking about you.’

During this period, Lu Yuan would also return to the genius camp from time to time to practice at Si Tingyu. Naturally, McGonagall and Yang Ping will still be seen.

Si listened to the wind for a moment, and then nodded with a wry smile: ‘After a while, I am being punished for leaking information about the Red Maple guards, and I’m afraid I can’t leave.’

Lu Yuan smiled and nodded: ‘I can understand.’

Si listened to the wind with a smile, and then said: 'I have to go to practice, as long as I break through to the King of War, I will apply to investigate Tong Menghan's affairs.'

Lu Yuan glanced at Si Tingfeng, and realized that Si Tingfeng might have a bump in his heart.

Think about it, this kind of betrayal by a fiancée, I am afraid that few people can let it go.

He nodded and said with a smile: 'Listen to Feng-senpai, then go on.'

Si Tingfeng patted Lu Yuan on the shoulder, and then left.

Lu Yuan came to the door of Si Tingxue's small courtyard and knocked on the door. Not long after, a beautiful maid opened the door.

After seeing Lu Yuan, the delicate maid's eyes lit up and she hurriedly bowed and said:

'Young Master Lu Yuan, you are here. His Royal Highness the Ninth Princess and Miss Rebecca are in the gravity room. His Royal Highness has ordered the Ninth Princess to go there if you come.'

Lu Yuan smiled and nodded, entered the small courtyard, and then walked towards the gravity room on one side.

Lu Yuan couldn't help but sigh, the disciples of these big families are indeed in good conditions.

A training place like the Gravity Room, I am afraid that ordinary genetic warriors may not be able to take out extra spiritual crystals to practice.

But everyone from the big family can build one at home.

It's not just Si Tingxue, every night, Amy and the others have their own gravity room.

Although they said that they had invited Lu Yuan to practice together, Lu Yuan still refused because he did not eat soft rice.

Of course, the real reason was that if Lu Yuan practiced with them, it would not be convenient to evolve the spiritual power gene liquid.

And the speed of his absorption would scare others, and it would make people wonder if he couldn't break through after absorbing so many spirit crystals.

He can only practice alone.

Of course, there is no problem like learning.

Lu Yuan soon came to the door of the gravity room.

He pressed the black button on the bottom, and spoke to the walkie-talkie:

‘Listen to the snow~www.mtlnovel.com~Rebecca, I'm here.’

Soon, there was a buzzing sound in the gravity chamber, which was caused by the slow closing of gravity.

Then the door of the room opened, and Rebecca appeared in front of Lu Yuan with a sweaty face, her orange hair as if sunlight.

Her expression is still cheerful and joyous, and she smiles and pulls Lu Yuan's hand:

‘A Yuan, come in now.’

After pulling Lu Yuan into the gravity room, he closed the door of the gravity room, and Si Tingxue, who was standing by the door, started to increase gravity again.

Lu Yuan glanced over the two.

Both of them wore loose martial arts uniforms, but because they were covered in sweat, the martial arts uniforms were attached to their bodies, revealing the curves of the two.

Rebecca's figure seems to be getting more and more popular, is it still growing?

Lu Yuan was a little shocked, but then she seemed to be only 19 years old, and there is indeed room for growth.

Lu Yuan glanced at Si Tingxue next to him again, and silently sighed for Si Tingxue.

poor child.

Although we have been in this environment many times, there is still a look of embarrassment on Si Tingxue's cold face.

She noticed Lu Yuan's gaze, and gave him a cold look:

'What do you mean by the look in your eyes?'

'Ah... it's okay, it's okay.'

Lu Yuan said solemnly: 'I just think you look good at Tingxue, so I can't help but look at it more.'
