

Chapter 284: My Genes Evolve Infinitely

PATCH SKY CITY

Red Maple City, Training Hall.

Lu Yuan sat cross-legged in a room with a thousand times the gravity, and his surrounding spiritual power slowly converged. He opened his eyes and exhaled slightly.

Taking a look at the war pattern space, Lu Yuan found that the Heavenly King Fruit was finally exhausted.

The original more than 700 Emperor-level Heavenly King Fruits that were left had spiritual power equivalent to more than 700,000-level 8th-level Spirit Crystals. For Lu Yuan, a Saint-level transcendent gene, if you want to refine it to perfection Also, millions of eighth-order spirit crystals are needed.

Just over 700,000, even an extraordinary gene can hardly be tempered to perfection.

Lu Yuan's body of stars has only been tempered to 50% of the tempering degree so far, which still adds the tempering degree left over from before.

Lu Yuan got up and stretched, his whole body creaked.

‘It's time to go to the upper levels of Origin.’

Lu Yuan smiled slightly, left the gravity room, and then out of the martial arts hall, heading to Baiyun City.

The upper level of the Origin Land needs to be entered from the portal of the core city of the continent where the Origin Land itself is located.

In Baiyunzhou, it is natural to enter through the portal of Baiyun City.

Passing through the teleportation hall of Red Maple City, Lu Yuan soon arrived at Baiyun City.

As soon as he entered Baiyun City, Lu Yuan saw many genetic warriors turning their heads to look at him, with expressions of awe and surprise on their faces.

For the genetic warrior, being able to be on the various lists of Baiyun City is considered to be quite a well-known powerhouse.

At any rate, Lu Yuan was also the number one on the Tianjiao list and the number one on the Kings list, so naturally he has a lot of fame.

Lu Yuan had long been accustomed to this. He took a step forward, his body blended into the space, and the next moment he appeared in front of a gray- white building in the west side.

Compared with the surrounding buildings, this gray building is not very conspicuous in terms of height or floor space. It is only about 20 meters high and almost two hundred square meters in size.

However, all genetic warriors passing by this building will turn their heads to look at this area from time to time, with awe in their eyes.

Because qualified to enter this building, only the powerhouse above the Battle King level.

Inside is the portal on the upper level of Origin.

Even if the warlord can enter the upper strata of the origin, because death in the upper strata of the origin is real death, rather than leaving the origin, the number of people who will actually enter is not too much.

Lu Yuan was also worried that his strength was not enough before, so after digesting all the previous gains, he now thought about going to the upper strata of Origin.

To be honest, if it weren't for the fact that there were a lot of alienated beasts in the upper layers of the land of origin, and it was suitable for Lu Yuan to transform the Evolution Cube, he could definitely cultivate here. Although the resources may be less, he could evolve treasures. The lower-level cultivation will always make breakthroughs.

Lu Yuan thought of various things in his heart, but did not stop, and walked towards the gray-white building.

There were two white constructs guarding the gate of the gray-white building. The two constructs looked towards Lu Yuan and felt that after Lu Yuan's cultivation reached the standard, they were not blocked, allowing Lu Yuan to enter it.

After entering the gray-white building, Lu Yuan saw a huge hall. The hall was very empty, with only two space doors floating in the air and revolving.

One of them flashed with gray-green light, and the other was white light.

On the sides of the two space doors, each has a sign.

Lu Yuan took a look and found that the gray-green ray of space door was the entrance to the upper level of Origin, and the white ray of space door was the exit.

Lu Yuan found that there were only four people in the hall.

His gaze swept away, and he found that three of the four people were war emperors, two elves and a Kaman, and one was war emperor and a cat.

Judging from their appearance, they seemed to have just exited, and now they are planning to leave.

The four of them also saw Lu Yuan. They obviously knew Lu Yuan, and they were all taken aback. Then they nodded slightly to Lu Yuan.

Lu Yuan nodded in response, and then stepped into the gray-green space door.

The space twists and turns, and if a genetic warrior without a space gene steps through the space door, it may feel dizzy, but for Lu Yuan, who has a holy space gene, it just seems to walk through a door easily.

After crossing the space gate, Lu Yuan appeared in another hall.

This hall is similar to the hall of Baiyun City, and it is also very empty. It also has two space doors. Lu Yuan glanced at it. The space door that came in behind him flashed with gray-green light. It was the entrance, and it was on the left of Lu Yuan. There is also a space door flashing white light on the side, which is an exit.

In the hall, only Lu Yuan was alone, and it seemed very quiet.

Lu Yuan stepped out and walked out of the hall. Then Lu Yuan found that this was a room with a corridor outside. Lu Yuan glanced at both sides of the corridor and found that there were several rooms similar to the ones Lu Yuan had just come out.

Above the door frames of these rooms, there was a house number plate. Lu Yuan glanced at it. They read: Qingyuan, Yuanfeng, Yinjiang and so on.

Lu Yuan turned his head and glanced at the house number behind him, and found that it was the word Baiyun.

Seeing this, Lu Yuan raised his eyebrows slightly. Is this because he came from the Baiyun Star Region?

There are also space doors in this other room. Are there other star fields in the space door?

Lu Yuan also understands that the number of genetic warriors who can come to the place of origin is extremely small. The total number of people in Baiyun City is probably not too much. People from

different star regions come together. Will everyone appear in this city together?

Suddenly, Lu Yuan realized that some people had indeed come out in other rooms one after another. Some had human snake tails, some had three heads, and others looked like a cloud of mist.

These were races that Lu Yuan hadn't seen in Baiyun City.

Lu Yuan followed these people along the corridor, and soon came to a huge hall with a radius of nearly a thousand meters.

The hall was bustling and there were a large number of people talking, which seemed very lively.

Lu Yuan glanced over, and found that he hadn't seen a few familiar races, and he was speechless.

He avoided the crowd and walked out of the hall alone. There were also two constructs guarding the hall door. The strength of these two constructs looked much stronger than the two in Baiyun City before.

Outside, there are cities with all kinds of tall buildings. On the streets and in the air, there are various flying mounts. Mechanical artifacts or genetic warriors themselves are flying fast, coming and going.

What surprised Lu Yuan most was that the sky here did not want to have blue sky and white clouds like the place where it originated.

In the sky, there are space cracks from time to time, green flames are suddenly burning from time to time, and strange gray fog is spreading.

The whole sky is extremely gloomy and there is no sunlight, but it is not impossible to see the outside world.

Lu Yuan frowned slightly, feeling that the environment in the upper strata of Origin Land didn't seem to be too good.

When he was thinking like this, he heard a shout:

‘Brother Yuan!’

Lu Yuan turned his head and looked in the direction of the sound.

At the door, Lu Yuan saw Li Qinghe, Si Tingyu and Shuangyue were all there. Li Qinghe wore dark black leather armor, and his attractive figure appeared to the full. At the side, Si Tingyu was wearing a heavy golden-red battle armor. Shuangyue wears emerald green robes.

Lu Yuan smiled and walked towards the three of them.

Before coming here, Lu Yuan had notified Li Qinghe in advance that he planned to go to the upper strata of Origin.

Because the information in the upper strata of Origin Land is basically circulating among the powerhouses above the Warlord level, there is not much information even on the Battle.net.

Lu Yuan’s knowledge of the upper strata of the origin is extremely limited, so he naturally intends to find someone to take it with him, so that he can understand the situation of the upper strata of the origin first.

Lu Yuan walked to Li Qinghe and the three of them, smiling and saying:

‘Sister Qinghe, mentor, sister Shuangyue.’

The expression on Li Qinghe’s face was quite happy, and he patted Lu Yuan’s shoulder with a full smile, and said:

‘I told you to come to the upper level of Origin, and my sister will take you to fly, but you only came up so late. Next, let you know how powerful my sister is.’

Si Tingyu seemed to think of Lu Yuan’s previous sudden attack in the room, her pretty face flushed slightly, she just nodded to Lu Yuan with a smile, and then looked away a little embarrassedly.

Shuangyue seemed to notice this, raised her eyebrows, revealing a look of doubt, she smiled and said:

‘A Yuan, I heard that you are already the emperor of war? It’s amazing. We just broke through, you just caught up with us so soon.’

Lu Yuan smiled embarrassedly: ‘Luck is better. I got a lot of rewards when I made the list before.’

‘It’s not luck to be the first in the double list of Tianjiao and Kings.’

Shuangyue smiled and said.

Li Qinghe on the side smiled and embraced Lu Yuan’s shoulders:

‘My destined brother is extremely talented. Of course, he is so strong because of his strong talent and hard work.’

Then she looked at Lu Yuan, smiled and said:

‘By the way, brother Yuan, this is the first time you have come to the upper strata of Origin. We will take you around, and let me introduce you to the situation here.’

Naturally, Lu Yuan couldn’t ask for it. He nodded, ‘Yeah.’

Afterwards, several people boarded a green warship with intricate patterns that Shuangyue took out. The warship rose into the air and left the entrance to the upper layer of Origin.

Looking at the huge city outside, Li Qinghe introduced with a smile:

‘We are here to Patch Sky City, and it is also one of the largest self-contained cities in the upper strata of Origin. This is not the largest for our Baiyun Star Field, but one of the largest cities in the entire universe. There are a large number of human races from various regions of the universe. Those who will come here, in addition to patching the sky city, the powerful people of the mechanical race, the

spirit race, and the orc race also have a huge city, of course, there is still some distance from the patching city.'

Hearing this, Lu Yuan was a little astonished: 'This is the Sky Patching City?'

When Lu Yuan heard the news of Patching Heaven City from the old elven man, he originally thought he would be there, but he was actually here?

Moreover, it turned out to be the largest city in the human race.

'No wonder when I first came here before, I saw so many rooms, all of which are portals to the various star regions of the human race?'

Si Tingyu nodded slightly: 'Well, all the stars in the Territory of Human Race will appear here if there is a strong person who wants to come to the upper level.'

'Apart from Patch Sky City and those big cities of other races, are there other cities?'

Lu Yuan asked curiously.

'Of course there is, centered on Patching the Sky City, there are powerful war gods and war sages who have obtained special treasures for building cities, they can also build cities, but because the danger of the beasts in the upper layer of Origin Land is much greater than that in the lower layer, these The city can be said to be small compared to the Sky Patching City, it can only be regarded as a camp for supply and cultivation, and if there is a tide of alienated beasts, even the God of War may not be able to defend his city.'

Li Qinghe said.

Lu Yuan's eyes widened slightly: 'There are beast tides here too?'

'The alienated fierce beasts here have many nests of their own, and some alienated fierce beasts even control a part of the upper level of

the Origin Land, which is difficult to clear and extremely troublesome.’

Shuangyue added with some seriousness.

Li Qinghe and Si Tingyu nodded slightly.

‘Some of the upper levels of Origin Land are alienated fierce beasts, and some are normal fierce beasts. If they are killed by the alienated fierce beasts, they will not be resurrected in the real world and will truly die. So we must pay attention to safety here.’

Li Qinghe said solemnly.

Si Tingyu sighed slightly and said:

‘Compared with when we first came in, there are more and more alienated beasts.’

Shuangyue’s face was also slightly condensed, and she said:

‘I heard from my ancestors that long ago, the number of alienated beasts in the upper layers of Origin Land was very small, and there have been more and more. Now the speed of alienated beasts has become faster.’

When Lu Yuan heard this, he suddenly remembered the space rift in the real world and the things that the Heavenly Underworld Saint had said that there was not much time.

Maybe it has something to do with this too ?

While Lu Yuan was thinking, Li Qinghe spoke again:

‘If you kill an ordinary beast, you can get a variety of dropped treasures as before in the basement of Origin. If you kill an alienated beast, no treasure will be dropped, but the genetic war pattern will record the attack. The feat of killing alienated beasts.’

‘Feat?’

Lu Yuan was taken aback for a moment, and repeated the sentence with some doubts.

Li Qinghe nodded: 'Yes, meritorious service, there is a meritorious service hall in Patch Sky City, where meritorious deeds can be exchanged for various things, among which there are many precious treasures.'

Hearing the treasure, Lu Yuan immediately became energetic:

'What's there?'

Seeing Lu Yuan's expectation, Li Qinghe and the three couldn't help but smile~www.mtlnovel.com~ Shuangyue smiled and said, 'How much is A Yuan like when we first came?'

Li Qinghe smiled and said, 'Who doesn't want those treasures?'

She looked at Lu Yuan and said: 'These include the city's heart that can build a city, the holy level, and even the special transcendent genes of the ** level, gene weapons, the spiritual skills of the holy level or even the gods, and even the spiritual fruit cultivation.

Treasures like these can be exchanged in the Hall of Merit. Someone has calculated that the gains obtained from hunting alienated beasts are twice or more than those obtained from hunting ordinary beasts. People who are confident enough in their own strengths. The strong, many will specifically look for the alienation area, or even the source of the alienation.'

When Lu Yuan heard this, he also showed an expression of expectation.

According to what he said, he must find the source of alienation and so on.

After all, hunting alienated beasts can get merits, merits can be exchanged for various treasures, and Lu Yuan himself hunting alienated beasts can also gain unknown aura, allowing Evolution Cube to transform.

This can be said to be a double harvest.

Lu Yuan squinted his eyes, and had a certain plan for how to obtain resources next.
