

Chapter 30: My Genes Evolve Infinitely

DOOR OPENING IN THE EARLY MORNING

Lu Yuan and Zhuo Ming bid farewell to the four, and then continue to go deep into the underground palace.

Along the way, Lu Yuan became more careful, for fear that three cat hunters would emerge from where.

As he continued to explore in depth, he encountered more and more beasts, and harvested more and more spirit crystals and materials.

The harvested spirit crystals, except for some reserved for spiritual power supplements, all other spirit crystals are used to charge the evolution cube, preparing to evolve the body of black iron.

Lu Yuan thought about it and wanted to quickly improve his strength.

Refining the gene chain is one aspect, and another aspect is naturally the evolution of extraordinary genes.

After he evolves the body of black iron to the boss level, I am afraid that few of the genetic warriors in the trainee stage can match his combat power.

Those who can burn boss genes at the trainee level are probably the top geniuses, right ?

Lu Yuan was full of expectations when he thought of this.

.....

in a remote blind spot in the underground palace.

Xiye and the cat-man elemental warrior stopped with the seriously injured Jasmine.

Jasmine had fallen into a coma, and Xiye gently placed her on the ground.

The cat-man elemental warrior glanced at Jasmine's abdomen.

The hideous sword wound has stopped bleeding, leaving a curved scar.

'How about it?'

The cat-man elemental warrior spoke.

'I have drunk the healing potion, at least I am out of life danger.'

Xiye glanced at Jasmine who was unconscious, and frowned slightly.

'But she was hurt too badly. It may take a few days for ordinary quality healing potions to be completely cured.'

'Huh! I didn't expect to encounter a hard stubble. What a bad luck!'

Elemental warriors look ugly.

'That human being is indeed powerful. I think his strength is not weak, and his defense can resist Jasmine's arrows. I'm afraid it is stronger. But the speed seems to be quite ordinary, it should be the supernatural gene of the Guardian system.'

'If we are in an open area, we can play with him whatever we want. The underground palace has a big advantage over this guardian warrior.'

Xiye ignored the complaints of the cat-man elemental warriors, sat down on the ground, took out a piece of dried fish, and gnawed it.

'If you lose, you lose. After being a hunter for a long time, you will always become a prey one day. When Jasmine recovers from his injury, we will find new prey.'

The Elemental Warrior sat beside Xiye, glanced at the dried fish in his hand, and swallowed:

‘Auntie made it? Give me a piece.’

Xi Ye gave him a white look, took out a piece of dried fish and handed it to the Elemental Warrior.

The elemental warrior took a bite happily, then his face was cold and said:

‘Looking at the appearance of that human warrior, I am afraid that he will not leave the underground palace in a short time. Maybe there is still a chance to meet, and then revenge!’

Xiye also narrowed his eyes, with a trace of murderous in his eyes:

‘Um.’

.....

Somewhere in the Underground Palace, Lu Yuan cautiously walked over a corner.

A slender black shadow pierced from the shadow on one side.

The black shadow was so fast that Lu Yuan didn’t even have time to react, so he only had time to raise his hand to block it.

锵!

The black shadow pierced Lu Yuan’s arm, making a clanging sound.

Lu Yuan felt the strength that was not weak, and his body took a step back.

The ear-piercing and sharp chirping sounded, and Lu Yuan saw a black scorpion rushing down from the shadow of the wall.

The scorpion is black, similar to the color of the walls of the underground palace. It is almost completely invisible in the dark area without candlelight.

Its two pliers are nearly half a meter in size, and the scorpion tail flashes with cold light behind it.

The slender shadow before is obviously this scorpion tail.

Lu Yuan took a step back, avoiding the pliers that the scorpion was holding against his head.

The black scorpion didn't stop and missed a hit. After landing, he charged again towards the landing edge. The two pliers were big and their tails were very tall.

After approaching Luyuan, its tongs caught Luyuan's leg, and at the same time, the tail pierced again.

Lu Yuan moved his footsteps and escaped its pliers. At the same time, the long sword slashed, and the sharp blade cut across the scorpion's tail, cutting off its tail.

Ink black blood spurted from the wound, and the scorpion let out a scream, angrily attacked Lu Yuan again with his pliers.

Lu Yuan's footsteps were flexible, easily dodge the attack, and finally pierced the scorpion's head with a sword, killing it.

The dead scorpion dropped three spirit crystals, and Lu Yuan collected the scorpion's tail and pincers.

The venomous tail of the sandstone black scorpion: ordinary quality material, highly poisonous, and can be refined into genetic medicine.

Sandstone Black Scorpion's Giant Claws: Common quality materials that can be used to refine genetic weapons.

Lu Yuan saw this message, and he broke down in a cold sweat.

This is the black scorpion ?

When he was outside the underground palace before, Lu Yuan heard the screaming of vendors selling black scorpion venom antidote.

He is also concerned about Black Scorpion.

I didn't expect this black scorpion to be so insidious.

Its dark shell color is very close to the walls of the underground palace. If it is in the shadow area far away from the torch, who can see it clearly when it squats there?

This kind of sneak attack is really difficult for ordinary genetic fighters to prevent.

Fortunately, his defensive ability is strong enough, the black scorpion's poisonous needle failed to pierce his skin.

Otherwise, he feels that he might be cold after being poisoned.

Lu Yuan discovered that the fierce beasts in this underground palace were all Lao Yin critics.

Xiaoshiren is, so is this black scorpion.

It seems that before coming next time, he has to find out the specific habits of the fierce beasts in the sandstone underground palace.

Otherwise, who knows what insidious beasts will be encountered next?

After this black scorpion attack, Lu Yuan was once again happy for his wise martial arts.

Fortunately, I chose the extraordinary gene of the guardian system.

If he were replaced by an extraordinary gene of the assault system, then he might have been completely cold.

Although the guardian system is not as good as the strong attack system in attack, it is really the best in terms of survivability.

is very suitable for him as a lone ranger.

Lu Yuan also had confidence in his heart and began to explore again.

As it goes deeper, the number of black scorpions increases, and they can be encountered as often as Xiaoshiren.

Lu Yuan killed more and more fierce beasts, and so did the collection of spirit crystals.

He hunts in the underground palace, eats when he is hungry and thirsty, and when he is tired, he sets up a tent and sleeps in a hidden corner.

The concept of time in the underground palace is not as clear as outside, after all, the environment has hardly changed.

Lu Yuan collected six or seven hundred spirit crystals.

More than 500 of them were used by Luyuan to charge the Evolution Cube, and Luyuan slowly refined the gene chain and used nearly a hundred.

He has tempered his genetic chain to about 10%, and his strength has improved again.

The remaining spirit crystals, Lu Yuan reserved them as a spare spiritual power supplement.

I don't know how long it took, Lu Yuan discovered a serious problem.

That is, his supplies have almost been consumed, and the area of the war pattern space is almost a cube of more than three meters, and it is also filled with various materials at this moment.

Even if we continue to hunt fierce beasts, I am afraid that the materials will not fit.

Lu Yuan thought, planning to go out and sell the materials at the small export market.

The small bazaar for export is also collecting materials, of course, the transaction is used for Lingjing.

At this moment, the white mist surging again in the gene chain area of Lu Yuan, and the light gate emerged.

Lu Yuan was shocked.

Is it time to go out?

But it was just right.

Lu Yuan did not hesitate, but directly connected the light gate with his mind.

The next moment, his vision went black.

opened his eyes again in a daze, UU reading www.uukanshu.com Lu Yuan was already in his simple room.

Feeling the power rising in his lower body again, Lu Yuan sighed, showing an excited smile.

If this continues, it will not take long before his tempering degree can reach 100%. Then, he can consider breaking the genetic lock and start to advance, right?

At this rate, there will be another eleven or twice at most?

I'm afraid it doesn't take a month for that time, right?

Maybe he can raise his strength to the level of a first-order fighter before the college entrance examination.

should be admitted to a good genetic warrior academy.

I don't know why so many people have not been able to advance to the first rank after more than ten years.

Mingming seems to be very simple?

Lu Yuan has some doubts.

He stopped thinking about it and took out his phone to check the time.

It is four o'clock in the morning.

It was ten o'clock in the evening when I entered the Land of Origin, and it has been six hours now.

Two hours correspond to the time of day in the place of origin.

In other words, did he stay in there for three days?

is shorter than he thought.

He originally thought he could carry it inside for a week or so.

However, the time spent in it is determined by the place of origin.

There is nothing he can do.

While there is still some time, do some more practice?

Just as Lu Yuan was thinking, he suddenly heard the sound of a door opening outside.

Lu Yuan was taken aback, somewhat puzzled.

The tenant who rented with him, Sister Qinghe came back with him yesterday, and she is probably sleeping now.

The other two households work during the day, so they should be sleeping now.

Who would open the door and come in?
