

Chapter 40: My Genes Evolve Infinitely

MASSACRE, THE POWER OF THE GUARDIAN SYSTEM

The anger of the three cat hunters is of no avail.

As the effect of the potion on them gradually disappeared, the number of sand ants kept increasing, and they didn't even feel angry.

It was all their efforts to resist the siege of the sand ants.

However, it was useless. In the end, the three cat hunters were swallowed by the sand ants, and their blood stained the ground.

After the death of the three cat hunters, the surrounding space was distorted, and a lot of things fell out.

Lu Yuan looked at the things on the ground, his eyes widened.

Not to mention a bunch of spirit crystals and materials, there are actually two white light clusters.

Lu Yuan's eyes lit up.

Is this genetic armament or an extraordinary gene? !

posted this time!

This cat swordsman is really bad!

actually lied to him that there was no gain? !

Obviously the harvest is so great!

Lu Yuan jumped out of the ant nest from the top of the deep pit, swiping a long sword in his hand, and instantly killed two sand ants, knocking out the other sand ants, and clearing a clearing.

On the ground, the corpses of three cat hunters lay flat, gradually turning into white light and dissipating.

The genetic warrior who died in the land of origin will eventually return to the real world to resurrect.

Lu Yuan didn't care about the disappearance of their bodies, he quickly picked up the two light ** on the ground.

He glanced, and inside the light group were two sets of leather armor, which were genetically armed.

Although the value is not as good as that of Extraordinary Gene, it can also be sold for tens of thousands of dollars.

is pretty good for Lu Yuan.

As soon as Lu Yuan picked up the two light balls, the surrounding sand ants screamed and rushed over again.

just killed three invaders, but another one came.

The sand ants attacked Lu Yuan frantically, but Lu Yuan's expression did not fluctuate.

He is wearing armor and still maintains a body of black iron at all times, and he has strong defensive capabilities.

Although the effect of the defensive potion has now ended, ordinary sand ants still cannot break his defense.

A sand ant clamped Lu Yuan's thigh with its giant jaws. As a result, it made a clicking sound. Lu Yuan could only feel a slight tingling.

'Go away!'

Lu Yuan let out a low cry and kicked the sand ant who wanted to break his thigh.

While cleaning the sand ants, he picked up the spirit crystals and materials on the ground one by one.

is not only the spirit crystals and materials dropped by the death of the previous three cat hunters, but also the spirit crystals dropped by the sand ants they killed before.

However, the corpses of those sand ants were dragged back to the nest by their companions, and there was no way to collect materials.

Moreover, the most precious material of sand ants is a peculiar rib in their body, which needs to be cut open to collect, and it cannot be collected in this environment.

Luyuan naturally gave up the idea of collecting sand ant tendons.

Not long after, Lu Yuan picked up all the spirit crystals and materials that had fallen before.

The sand ants have been attacking the landing edge.

Lu Yuan looked at the densely packed sand ants rushing out of the two passages, and his original idea of retreating directly disappeared.

There are so many sand ants, even if they don't collect their materials, only the spirit crystals they drop can make a fortune.

If it is someone else, facing so many sand ants, there may be a fatal threat.

But Lu Yuan is different. He always maintains a body of black iron, and these worker ants can't break his defense.

And his spiritual power can also be replenished continuously, it will not be exhausted.

This gave Lu Yuan the capital to fight here.

Unless it is a worker with a high degree of tempering, or an elite soldier.

But more than a hundred of these sand ants have died, and no more powerful worker and soldier ants have appeared, indicating that this sand ant nest may not be too big.

Even if there are elite soldiers, the number is probably not too large.

It is not too late for him to leave when he encounters powerful worker ants or soldier ants that he cannot cope with.

After all, this pit is not high, it's easy for him to go up.

It is not easy to find so many fierce beasts in other places, and it is difficult to break through his defense.

With this thought, Lu Yuan took a deep breath and looked at the worker ants who were constantly besieging him.

Let it go!

He clenched the big sword in both hands and began to harvest the lives of the worker ants besieging him.

Five, ten, twenty, one hundred...

Lu Yuan felt tired, so he used the spirit crystal to absorb spiritual power, always keeping the black iron body running at full capacity.

He no longer remembers how many sand ants he killed.

His body is already covered with transparent mucus left by the death of sand ants.

At the same time, he also consciously exercised his body and sword skills.

Her body and sword skills are also improving steadily.

嗤!

The black sword light flashed by, and Lu Yuan killed a sand ant with a single sword.

A white ball of light emerged from the corpse of the sand ant.

Lu Yuan was already a little numb and shocked.

Have something?

He quickly picked up the light group and glanced at it. They were a pair of daggers that looked like giant sand ant crocodiles.

A white genetically armed dagger.

Lu Yuan showed a slight smile.

The probability of ordinary beasts wanting to obtain genetic weapons is extremely low, but he did not expect his luck to be so good.

Of course, this is also related to his killing a large number of sand ants.

Quantity will cause qualitative change.

‘Squeak!’

Lu Yuan collected the genetic weapons and was about to continue hunting.

There was a sharp chirp suddenly, and chaotic footsteps came from the passage in front of Lu Yuan.

Lu Yuan’s expression changed, without even thinking about it, he stepped directly on the head of a sand ant and jumped up.

As a genetic warrior, Lu Yuan’s abilities in all aspects are extremely powerful, and so is his ricochet ability.

He jumped up to a height of nearly four meters, and then he held the long sword in his right hand and grasped the raised rock at the edge of the pit with his left hand.

With his arms hard, the whole person rose again, and in less than a second, he turned out from a pit about five meters high.

After turning out of the pit, Lu Yuan ran directly towards the depths of the passage.

After ran several tens of meters, Lu Yuan turned his head and saw that there were two huge sand ants with a length of about 1.78 meters in the deep pit, and huge yellow sand ants rushed out.

Behind them, there are densely packed sand ants. Those sand ants are generally about one meter two in height, and they look much stronger than the ones they encountered before.

is the strong one in the ant nest.

Lu Yuan's heart stunned, and he hurriedly continued to escape.

Behind him came the sound of chirping and footsteps.

Lu Yuan ran a distance and saw a few forks in the road.

He casually found a fork in the road and continued to escape. He ignored the little stone men, black scorpions and other fierce beasts that ran along the way, and let them attack.

ran all the way for almost half an hour. Lu Yuan couldn't hear the sound coming from behind, so he stopped in a passage where there were no beasts.

He leaned against the wall, gasping for breath.

After a while, breathing calmly, Lu Yuan glanced at the mucus on his body and frowned.

He found a corner, took his genetic weapon back, took off his clothes, and washed it with water and shower gel before he felt comfortable.

changed his clothes, Lu Yuan put on the armor again.

Because of fighting with three hunters and an ant colony before, Lu Yuan's armor has a lot of cracks at this moment.

The repair of genetic weapons requires a specialized craftsman to repair. Lu Yuan doesn't understand crafts, so naturally he can't repair it.

can only dress like this.

Fortunately, his beetle claw sword is of elite quality, and its hardness is much stronger than armor, and it looks pretty good.

Lu Yuan found a place to sit down and began to count the gains this time.

First of all, there are three sets of genetic weapons.

Two sets are leather armor, and one is a dagger.

Although they are all ordinary grades, these three sets of genetic weapons can sell for more than 100,000!

There is still material.

Sand ant materials, Lu Yuan had no chance to collect before, but the three hunters dropped quite a bit.

The heart of the little stone man, the poisonous scorpion tail needle, the silk of the underground spider, the tendons of the sand ant...

There are many types of , and there are more than two hundred in total.

These things add up to tens of thousands of dollars.

These are just foreplay. UU reading www.uukahnsu.cOM

The real highlight is the spirit crystals piled up like a hill!

The previous three hunters dropped more than 1,000 spirit crystals. Later, they killed nearly a hundred sand ants, and they also dropped more than two

hundred. The total number here is almost 1,500. There are so many spirit crystals.

And all the others were obtained by land edge killing sand ants.

There are more than 1,500 spiritual crystals obtained by Lu Yuan.

In other words, Lu Yuan killed more than 500 sand ants before!

You know, the three cat hunters together before killed nearly a hundred and were swallowed by the ant colony.

And Lu Yuan was just a person, but killed them five times as many sand ants!

Lu Yuan was numb before killing, so he instinctively avoided the attack, swung his sword, absorbed the spiritual power in the spirit crystal, and maintained the movement of the black iron body.

He didn't expect that he would kill so many sand ants.

Looking at the mountain of spirit crystals, Lu Yuan couldn't help showing an excited smile:

'In this way, the Guardian gene still has an advantage! If this time my combat skills are not biased towards the defensive type of black iron body, but biased towards the offensive type of combat skills, then I can't ignore the sand ants' attacks. , Will definitely be injured in the end, and then be swallowed by the ant colony.'

Maybe when facing the fast genetic warrior, the guardian gene seems a bit cumbersome.

But when facing the fierce beasts, the power of the guardian gene is reflected.

Especially to cooperate with him to absorb the infinite spiritual power of the spirit crystal.

is almost cheating.

In this underground palace full of fierce beasts, this advantage is too great.

In contrast, the speed is a little clumsy and it is not that important.
