

# Chapter 5: My Genes Evolve Infinitely

## LI QINGHE

Lu Yuan looked at the aura particles floating in his consciousness in a daze. After being silent, he carefully absorbed the aura particles according to the method of the aura guidance technique.

As a result of this absorption, all the aura particles seemed to be attracted by a magnet, and flew towards Lu Yuan, and merged into Lu Yuan's body.

In his consciousness, aura particles passed through the white mist and merged into the gene chain of the double helix.

The light emitted by the original double helix gene chain is relatively dim, and gradually, the light at the bottom begins to become more dazzling.

As the gene chain became dazzling, Lu Yuan began to feel his body became warmer, the position of his eyebrows rose a little, and his spirit seemed to be getting better and better.

This feeling surprised Lu Yuan.

According to the current performance, the spiritual energy tempers the gene chain, and the gene chain replenishes the body and spirit.

This seems to be no problem.

The problem is that the speed at which I absorb Reiki seems to be much faster than that introduced by the Reiki Guidance Art?

Introduced in the Reiki Guidance Technique, people with good talents usually need three to five days in this process, and those with ordinary talents may take ten and a half months.

He closed his eyes and succeeded, what kind of talent is this?

Is it also because of this evolutionary cube ?

Lu Yuan looked at the faint blue cubes that were spinning round and round, feeling happy.

deserves to be me!

At this moment, Lu Yuan's consciousness suddenly expanded, splitting into a small space.

This space was originally only the size of a fist, but as it continued to absorb aura, it grew bigger and bigger.

Finally, this space reached the size of about one cubic meter.

Although there is nothing in this small space, Lu Yuan can feel the connection between himself and this small space.

He instinctively perceives what this space is.

Isn't this the space opened up by absorbing the first ray of aura and the gene war pattern as mentioned in the previous post ?

But according to the statement in the post, it seems difficult to open up this space.

Lu Ze didn't expect him to open up so easily, and everything would be a matter of course.

is that this space is a little smaller.

When the space no longer grew, Lu Yuan opened his eyes.

He saw a ray of morning light entering the room from the window, and couldn't help but startled.

He turned on the phone and glanced at it.

6:34.

Is it morning? !

He obviously felt that only a few minutes had passed, but he didn't expect it to be so long.

The problem is that his energy is still very good, better than a good quality sleep.

Is this the effect of spiritual power ?

is a bit powerful.

Lu Yuan got up, washed, and left the room.

As soon as he opened the door, Lu Yuan saw a nice-looking woman in a tight red dress with delicate makeup and bright, beautiful eyes who opened the door and walked in.

After seeing Lu Yuan, the girl smiled:

‘Brother Lu Yuan, are you going to class?’

Lu Yuan nodded: ‘Well, Sister Qinghe, just got off work? It's a hard work.’

‘Hee hee, just right, I bought a few more buns here, can you take them to eat on the road?’

Li Qinghe smiled heartily and lifted the bun in his hand.

Lu Yuan felt warm in his heart and smiled:

‘Sister Qinghe really buys too much every day.’

Lu Yuan moved out of the orphanage a year ago and came here to live.

Li Qinghe lived here earlier than Lu Yuan. It was naturally very difficult for a weak single girl to live in a slum.

In order to live, almost everything has to be given.

However, for Lu Yuan, Li Qinghe is a good sister who cares about him.

In the memory of the original body, after knowing that Lu Yuan was an orphan and that his monthly living expenses were very low, Li Qinghe would buy a lot of breakfast every morning and bring him back to Lu Yuan after he returned.

also often told Lu Yuan some precautions about this area, telling him what to avoid and what not to provoke.

If it weren't for Li Qinghe, Lu Yuan wouldn't have been able to live until now.

In the heart of the original body, I am very grateful to Li Qinghe.

After she became an orphan, Lu Yuan felt one of the few warmths in her heart.

The original body has always wanted to help Li Qinghe, but unfortunately he can't support himself, let alone help others.

Lu Yuan suddenly thought that he was already a genetic warrior now. He would move out of here in a short time. Then he could help Li Qinghe to find a good job for her, and take her away from this chaotic area. area.

Seeing the smile on Lu Yuan's face, Li Qinghe was startled, a strange light flashed in his eyes, and he looked at Xia Lu Yuan.

Lu Yuan was a little puzzled: 'What's the matter?'

Li Qinghe smiled and said:

'It's just that brother Lu Yuan seems to be a little different. You wouldn't laugh like that yesterday.'

Lu Yuan suddenly realized that he had changed a little bit.

Li Qinghe lives in a slum again, and has seen all kinds of people. I am afraid that he is very sensitive in this regard.

he smiled and said:

‘In fact, something good happened.’

‘What good thing?’

‘I awakened as a genetic warrior yesterday. I feel that my life may be different, and I plan to change it.’

Hearing this, Li Qinghe was taken aback, and then smiled with surprise.

She stepped forward and patted Lu Yuan on the shoulder:

‘Congratulations, brother Lu Yuan! You will be a big shot from now on!’

‘I’m not sure right now, but I will definitely not stay in the slums in the future.’

‘Hmm, it’s nice to leave here.’

Li Qinghe nodded repeatedly.

Lu Yuan looked at Li Qinghe and smiled:

‘Sister Qinghe, I will find you a good job and take you away.’

Li Qinghe was taken aback, took out a pack of cigarettes from his chest, picked out one skillfully, lit it, and took a sip.

She held her right hand with her left hand, spit out the white mist, smiled at Lu Yuan and said:

‘Why? Don’t you dislike me?’

Lu Yuan said seriously:

‘Who treats me well, who treats me badly, I will keep in mind. Sister Qinghe is the only person here who treats me well.’

Lu Yuan inherited the memory of his predecessor. Although he had no idea about Li Qinghe, he also regarded Li Qinghe as an older sister who cared about and took care of him.

can help, he will naturally help.

Li Qinghe was silent, then smiled and rubbed Lu Yuan's hair:

‘Now that the horoscope hasn't been written yet, let's talk about it then. You take the buns and go to class. Don't be late. My sister doesn't understand the genetic warrior's affairs. You can take care of it yourself. Safety first.’

‘Then I will go first.’

Lu Yuan helplessly took care of the tousled hair, took two buns, and went out.

Li Qinghe looked at the closed door, fell silent, put out the cigarette in his hand, and took a bun in his mouth.

She walked to the door of Lu Yuan's room. After standing, she narrowed her big bright eyes and took a step forward. She walked through the door and came to Lu Yuan's room. The door behind her was still closed. .

Li Qinghe took a bite of the bun, looked around, then glanced at the old laptop and the three-step plan Lu Yuan prepared on the desk to enter the land of origin.

She walked over and took a look, then smiled:

‘The lonely little brother has really grown up.’

She shook her head, stepped through the door again, returned to the living room, and then went back to her room while gnawing on the buns.

.....

Lu Yuan didn't actually go to class. UU reading [www. uukanshu.com](http://www.uukanshu.com)

Although is withdrawn from the original body, he has a good brain, and his performance in cultural courses has always been among the best.

deserves to be my predecessor!

Lu Yuan didn't need to bother in cultural classes. He had already asked for leave from the class teacher, and planned to focus on the promotion of genetic warriors in the next time.

This point is naturally understood by the head teacher, and he agreed directly without saying a word.

Two months after , Lu Yuan could not go to class at any time.

He is going to the mall today.

Yes, he wants to prepare the necessities for this adventure into the land of origin.

The so-called so-called food in hand, don't panic in my heart, and money is the same.

Holding Kari's five thousand dollars in his hand, Lu Yuan seemed to have the whole world, and even his walking posture was a bit arrogant.

Wearing his best clothes, that is, school uniforms, Lu Yuan strode into the mall and started shopping.

The purchasing power of the Red Maple Coins here is a little bit stronger than that of Renminbi, which was loved by people in the past. In fact, it is not much worse.

Five thousand dollars is actually not too much.

Fortunately, Lu Yuan bought some common items.

Military compressed biscuits, full bread, and bottled water.

Insect repellent, deodorant, etc. for survival in the wild.

Originally, Lu Yuan planned to buy another sleeping bag and tent, but think about it, there will only be 24 hours in total, which can save money.

Sleep is reserved for the dead. If you are alive, come out and sleep again.

However, just these cost a total of about 1,000.

The money in Lu Yuan's hands is only the last 4,000.

With the money, Lu Yuan came to the alloy weapon shop in the mall.
