

Chapter 55: My Genes Evolve Infinitely

SAND ROCK CITY

Sand Rock City, at the city gate.

A group of people on the edge of the land entered the city gate under the gaze of two khaki rock structures that are five meters high.

Looking at the khaki buildings in the city, Zhuo Ming exhaled and smiled:

‘I finally came back, and I was terrified along the way.’

The blond young man nodded and said:

‘Unexpectedly, there are so many people staring at the genetic warriors who have been tried out.’

‘That’s for sure, everyone knows that there are a lot of treasures in the ruins. The warriors who have passed the ruins trial have a lot of gains? Killing can get that harvest. There must be someone who is willing to take action, especially the hunter.’

The others nodded appreciatively.

‘Thanks to our large number of people and Mr. Liu’s presence, otherwise, we might not be good for the underground palace.’

Green smiled and said.

Liu Xi also smiled: ‘In the Shayan City area, I can still speak Liu Xi.’

He turned his head and looked at Lu Yuan: ‘Brother Lu Yuan, when I arrive in the city, I still need to go back to our Tianfu Consortium station to handle affairs, so I can’t accompany you. If you need anything, you can come to our station. The location of our station. It’s residential area A042. You can easily find it when you go to the residential area.’

Lu Yuan smiled and nodded: ‘Okay, I will.’

Liu Xi left with his team.

Looking at the back of Liu Xi leaving, Zhuo Ming tutted twice, with a look of envy:

‘A-level residential area...deserving of the Tianfu Consortium, it’s great to mix in Shayan City. What a tyrant.’

The others also nodded appreciatively.

Green smiled and said:

‘They are big consortia after all, different from us.’

Lu Yuan asked with some doubts: ‘Is there any level distinction in this residential area?’

Several people in Green were taken aback.

‘Brother Yuan, don’t you know? Haven’t you been to a residential area?’

Lu Yuan smiled: ‘I only stayed in Sandstone City for a few hours when I first came in, and never came back to Sandstone City again.’

‘hiss...’

Everyone including Green’s eyes widened.

‘Lu Yuan, you have been awakened to the present, and have been in the place of origin for more than a month? You never came back?! Have been living in the wild?!’

Green was a little shocked.

‘Is there any problem with this?’

Lu Yuan was taken aback, he always thought that everyone was like this.

Seems like it doesn’t?

Green smiled bitterly and shook his head: ‘I know why you can improve so fast. Talent is one aspect. Not everyone can have this terrible toughness. Most people stay in the dangerous wild for a period of time. I’m tired, I will come back to adjust it. It’s like you, I never came back.’

Zhuo Ming was also speechless:

‘Brother Yuan, after you are tired, don’t you need to rest? Don’t you need to sleep? This is still human?’

‘What is not a person? Who said I don’t rest? I also specially prepared a tent and sleeping bag.’

Everyone: ‘...’

The blond young man smiled bitterly: ‘Even if our team spends the night in the wild, we are divided into separate people to watch the night. Brother Yuan, you are alone, are you not afraid of danger?’

Lu Yuan smiled, ‘Maybe it’s because I have a big heart, and I have good luck. I have never encountered threats.’

Lu Yuan naturally wouldn’t say that even when he was sleeping, he left the body of black iron open.

Green shook his head: ‘It’s really incomparable. Okay, let’s not talk about it. Didn’t you ask the difference between our residential areas? Lu Yuan? The residential areas in the city are also divided into levels. The lowest-level D-level housing is shared with other people. One suite, one person has one room, C-level housing is a single or multi-person suite, B-level housing is a townhouse, and A-level housing is a small manor with a courtyard. The higher the level of housing, the more luxury, of course, the more expensive the price. Like our base areas are generally C-level suites, a day’s rent requires 30 lingjing, and A-level suites, I suspect that may require hundreds or even thousands of lingjing a day. Like this The base areas of the big forces are all long-term leased. How many spirit crystals do you say?’

Lu Yuan showed a daze when he listened to Green’s words.

No wonder Green and the others are so envious.

According to this calculation, the residence of the Tianfu Consortium can not spend hundreds of thousands of Lingjing rents a day?

This is almost comparable to nearly half of his current daily income!

‘It’s really rich.’

Lu Yuan couldn’t help but sighed.

‘right?’

Zhuoming nodded, then he glanced at Lu Yuan:

‘Brother Yuan, you also earn a lot of spiritual crystals every day, and you are also a big local tyrant. There are still a lot of spiritual crystals in this sandstone city. Without spiritual crystals, it is difficult to move.’

Zhuo Ming sighed and shook his head.

Don’t look at Zhuo Ming doing well in real time, but in the place of origin, he is simply a poor ghost.

Green smiled and said:

‘This sandstone city, residential areas, duels, bars and other places are big spenders.’

‘bar?’

Lu Yuan was taken aback: ‘Is there a bar here?’

‘Of course, genetic warriors are killing in the wild, and they have tightened their spirits. After returning, they naturally need to relax, drink and chat. Naturally, there are still bars.’

Zhuo Ming showed an ambiguous smile on his face: ‘Generally strong and handsome men are very popular in bars. After you go, Brother Yuan, there will definitely be many beautiful young ladies who will like you.’

Lu Yuan rolled his eyes and said righteously:

‘What do you think, Zhuo Ming? Lu Yuan, I am not that kind of person!’

Is there really a cat girl and a fairy girl going there too?

Lu Yuan felt that he had to find time to criticize.

‘By the way, what is that duel field?’

‘The duel field... is the place where the genetic warriors fight. You can’t fight in Sandstone City, otherwise you will be killed by the structure. The only place to fight is the duel field. Fighting in it is generally a gambling battle, in a duel space. Even if death

is not real death, it will not leave the place of origin. So many powerful fighters like to mix in it.'

'Is there any place like this?'

Lu Yuan raised his eyebrows, a little interested.

Although his strength is strong, most of his combat experience is fighting against beasts.

The battle experience with genetic warriors, Lu Yuan is actually not a lot.

If you have a chance, you can go and have a look.

'Lu Yuan, this time the ruins trial is a bit tired, we plan to go to the residential area to take a rest, do you want to come with us?'

Green asked with a smile.

Lu Yuan shook his head: 'I'm going to take a stroll on my own.'

'That's fine, you can contact us if you have anything... Oh, yes, you'd better buy a communication crystal so that you can contact people in Sandstone City. That thing is not expensive, and it is sold in many shops in Sandstone City. of.'

Lu Yuan just remembered that he really needed to buy one of these things.

He nodded: 'I see.'

Green and his party also bid farewell to Lu Yuan, leaving Lu Yuan alone.

Lu Yuan looked around, randomly found a direction and strolled around.

The last time I was in Sandstone City was when I first entered the Land of Origin.

At that time, he could only stay in it for 24 hours, time was tight, he did not waste time, and his understanding of Sandstone City was somewhat superficial.

Now that he has time, he can take a closer look here.

The street is very wide, fifty meters long, with five-meter-high giant rock structures patrolling on both sides.

There are many genetic warriors walking on the street.

There are shops on both sides of the street.

There are pharmacies, genetic weapons, groceries, and equipment repair shops.

The area of these shops is not small.

There are many genetic warriors coming in and out.

The clerk in is not a genetic warrior, but a rock construct.

But unlike the giant rock structure on patrol, the height of the clerk structure is about 1.8 meters.

Out of curiosity, Lu Yuan went to the shop and took a look.

I discovered that the medicines, materials, and genetic weapons here are a bit more expensive than the market price.

For example, a normal healing potion requires a bottle of 60 Lingjing.

And the outside price is 8,000 Red Maple Coins, even if the exchange price of Lingjing and Red Maple Coins is calculated at the lowest ratio of 150, 9,000 Red Maple Coins are needed.

This is a full difference of 1000, if you use the highest ratio of 200 to calculate, it is even worse.

The price/performance ratio is not high.

The same goes for other products.

However, even so, many people still come to buy it.

After all, no one knows whether the potion will be used up, and cannot be refilled outside, so they can only buy it here.

Lu Yuan bought a communication crystal at the grocery store for 200 Lingjing.

bought things such as light-emitting rods for lighting, which cost a total of 1,000 Lingjing.

For Lu Yuan's current deposits, it's just drizzling.

After , Lu Yuan remembered that his epee needed repairs.

During the trial, he fought the black stone man, and his epee was almost scrapped.

Lu Yuan came to the gene-armed shop.

The shop has a size of three to four hundred square meters. On the wall on the side there are a lot of genetic weapons, long swords, epees, large axes, warhammers, battle armors, and so on.

There are many genetic warriors looking at the merchandise right now.

After Lu Yuan came in, he found the construct behind the counter.

The construction body looked at the landing edge, and a hoarse mechanical sound sounded:

‘Human, welcome, do you want to buy equipment, repair equipment, or sell equipment ?’

‘I want to repair equipment.’

‘Please go to the back door to repair the equipment.’

The construct pointed to the door on one side.

Lu Yuan nodded and walked in.

The area of the room behind the door is larger. There are refining tables one after another. The flames are burning and the temperature is very high, making Lu Yuan feel a little breathless.

One by one the constructs holding the hammer are beating their genetic weapons, and the lights of various colors are flowing.

‘Human, do you need to repair equipment ?’

Standing in a structure not far from the door, looking at the landing edge, the sound is mechanically cold.

Lu Yuan nodded.

‘Please take out your equipment.’

Lu Yuan took out the beetle claw epee with the broken blade.

The khaki eyes of the construct flashed with light, and a series of white rays fell on the beetle claw epee, and then the machine opened the mouth and said:

‘This is an elite class weapon, with moderate damage, and it costs 500 spiritual crystals to repair it.’

Hearing the words of the construct, several genetic warriors who were repairing their equipment couldn’t help but look over.

looked at the landing edge one by one, his eyes flashed.

Elite class weapons are also very valuable in Sandstone City.

Lu Yuan’s mouth twitched: ‘So expensive?’

This repair cost can be used to buy an ordinary genetic weapon~www.mtlnovel.com~
The construct looks at Lu Yuan, but doesn’t speak.

Although these constructs are very intelligent, they have no bargaining function.

Lu Yuan tried to bargain with the clerk’s construct in the pharmacy before, but the construct stared at him and didn’t speak.

makes Lu Yuan, who has always wanted to keep prices down, look like a fool.

The same is true for this construct now.

Lu Yuan pulled the corner of his mouth and said:

‘All right.’

He took out 500 spirit crystals and handed them to the construct.

The construct took the spirit crystal, but he didn’t see any movement, and the spirit crystal disappeared.

‘The repair time is sixteen hours, please be patient.’

said, he took Lu Yuan’s epee and left.

Lu Yuan is not worried about the construct running away.

This is the construct that comes with Origin. They don't seem to be normal lives, and they all have their own mission.

And the mission of this construct is to repair equipment.

It takes sixteen hours to wait, and I can't get the equipment in a short time.

Lu Yuan intends to go around and talk about it first.

He came to the repair room and walked around the shop.

Most of the genetic weapons in this store are of ordinary quality.

But Lu Yuan also saw elite quality weapons.

For example, an elite staff that can increase mental power and increase the power of flame combat skills.

requires a full 10,000 spirit crystals.

If you put it outside, it would cost 1.5 million in full according to the red maple coins!

'It's really expensive, it will take me four days to get so many spirit crystals, right?'

Lu Yuan couldn't help but sigh.
