

# Chapter 64: My Genes Evolve Ininitely

## GUHAI OASIS, HOUSEWORK

Guhai Oasis has a radius of hundreds of kilometers. The central area is a huge lake. This lake is called Guhai.

This is how the title of Guhai Oasis came from.

The interior of the Oasis is full of huge trees that are more than ten meters high to hundreds of meters high, and there are many bushes on the ground.

Inside there are ancient sea giant wolves, ancient sea pythons, sand crocodiles, ancient sea spines and other fierce beasts.

There are a lot of , and there are quite a lot of types.

The strength of these fierce beasts is more than 50% of the tempering degree. The genetic warriors who come here can be said to be a very powerful group in Sandstone City.

Around the Guhai Oasis, there are naturally genetic warriors who form a bazaar on their own to trade various materials.

After all, it takes a long time to return to Sandstone City from Guhai Oasis, and it is very troublesome to go back and forth.

Businessmen with business acumen will naturally not let go of such an opportunity.

As soon as Luyuan approached the Guhai Oasis, I saw small tree sheds built not far away.

The tree shed forms a bazaar, which is slightly larger than the entrance to the sandstone underground palace.

Lu Yuan walked over and heard the same shouts as they were at the market at the entrance of the Sandstone Underground Palace.

There are genetic warriors who have teamed up to the ancient sea oasis, and there are also strong men who buy materials and sell genetic weapons.

There are almost thousands of genetic warriors coming and going.

Luyuan didn't stay too much in the market, and entered the oasis.

The sun is blazing, the overall temperature is extremely high, and the air is sultry.

But after entering the oasis, Luyuan could clearly feel the air cooler.

And some tall giant trees have lush canopies that can withstand the sun, and there are shady areas in the oasis.

There are no roads in the entire oasis, and you can only make your own way along the bushes and weeds.

Lu Yuan held the epee and split the thorny bushes, and then went deep for a certain distance.

There was a sharp piercing sound.

He turned slightly to the side and saw a spike almost half a meter long across the edge of the land.

Lu Yuan turned his head and saw that in the distance was a white carapace covered in white carapace. It looked ferocious and slender like a snake. There were peculiar bugs with barbets on the forehead.

ancient sea spiny insects.

This is a fierce beast that is extremely fast and emits spikes.

appeared in groups in the ancient sea oasis, each time it appeared in waves, and it was considered one of the most common fierce beasts.

The moment he saw the ancient sea spiny worm, Lu Yuan saw the brushing sound of the bushes nearby.

There were dozens of white ancient sea spiny insects.

The spikes on their foreheads looked like long arrows, and they shot towards the landing edge, densely packed with no room to escape.

Lu Yuan looked at the sky full of spikes, his pupils couldn't help but shrank slightly.

As soon as I entered the Guhai Oasis, I encountered such a rain of arrows.

is indeed one of the most dangerous areas in Sandstone City.

Only genetic warriors with sufficient strength can survive here.

It's not so dangerous in the sandstone underground palace.

He sighed in his heart and raised the epee in his hand to block his head.

A single spike landed on his lurking desert armor and black iron body.

Ding Ding Ding! !

A crisp voice sounded, and Lu Yuan only felt a slight touch.

Until the spike hits the ground, Lu Yuan is unscathed.

He rushed out with an epee in his hand, and soon came to an ancient sea thorn worm.

The heavy sword swept across the head of the ancient sea spiny worm.

嗤!

The ancient sea spiny worm was chopped in two, his head fell to the ground, his body twisted and twitched continuously.

Seeing this, other ancient sea spines suddenly screamed.

spouted spikes continuously on the landing edge.

The sky is full of spikes almost covering the sky.

Lu Yuan was expressionless, holding the spikes, and directly rushed to the ancient sea thorn insects, one by one, killing them one by one.

With Lu Yuan, killed more than 20 ancient sea thorn worms.

The other ancient sea spines were scared and screamed and ran away.

Lu Yuan killed some of the ancient sea spiny insects that had escaped. Lu Yuan stopped until the rest were gone.

He started to pack the spoils.

An ancient sea thorn worm drops 6 spiritual crystals, he killed 30 of them, and obtained 180 spiritual crystals.

Plus the ancient sea spiny insect material, the spikes on its forehead can collect almost 5 to 7 each.

There are about 200 more.

Here, it adds up to about 200 Lingjing.

obtained nearly 400 spiritual crystals in just one wave.

‘It’s too easy to earn spirit crystals here.’

Lu Yuan couldn’t help but sighed and continued to deepen into the oasis.

Not long after Lu Yuan left, three elf warriors walked out from behind the bush not far away.

looked at the corpse on the ground, they glanced at each other.

‘The human defense just now is really strong. The attack of the thorn swarm is like a tickling to him.’

‘Such a powerful strength, if you have been here before, you should have some reputation? Is he a newcomer?’

‘I don’t know where he got here before? Yellow Sand Canyon? Or Blade Gobi? Why did he come here suddenly?’

‘Who knows? Tell my brothers and sisters not to provoke him. I won’t get into trouble.’

‘Um.’

The three elven warriors are swift and move quickly on the tree, deepening in the other direction.

.....

In the next few days, Luyuan kept hunting in the Guhai Oasis.

The spiritual crystals harvested every day are much more than before in the sandstone underground palace, and almost five thousand spiritual crystals can be earned.

This is because Lu Yuan didn't spend all his time specifically on hunting and killing fierce beasts.

After all, he has enough spirit crystals now, and there may even be leftovers.

He put most of his energy on the practice of Hei Gangjin.

The third afternoon when I came to Guhai Oasis.

Lu Yuan made a small achievement in Hei Gang Jin, and he first re-trained to a certain extent.

can burst out 30% of the power.

Don't look at it as only 30%, this can already be compared with a slightly weaker ordinary combat technique.

This is equivalent to that Lu Yuan has one more ordinary combat technique of the assault system compared to other genetic warriors, and his strength can be said to be greatly improved.

The third night.

Lu Yuan continued to practice Hei Gangjin, Guangmen recovered again, and he left the place of origin.

returned to the real world.

And this time, Lu Yuan stayed in the land of origin for seven days.

is one more day than last time.

After leaving the place of origin, Lu Yuan went to Xue Wang to sell materials.

Looking at the materials piled up on the ground, Xue Wang's eyes widened.

'I'll be good~ the spikes of the thornworm? The wolf skin and fangs of the ancient sea wolf, the python skin of the ancient sea jungle python?! Lu Yuan, are you in the ancient sea oasis now??'

Lu Yuan smiled: 'What's wrong? Is there any problem?'

‘What’s the problem? The problem is big, okay?! Your improvement is too fast, right? It hasn’t been a month since your awakening, you can be mixed in Guhai Oasis, and you are still so good! You guys are really not What kind of heir to a big family?’

‘I’m just an ordinary person.’

‘Then you are too ridiculous. By the way, last time I saw a post saying that there were remnants of the Sandstone Underground Palace in Sandstone City, and I saw your name on it. Is that you?’

Lu Yuan nodded, and said with a smile: ‘Well, the last ruins were a little bit of a gain.’

Xue Wang suddenly smiled: ‘So what kind of Moonstone Linglu is there? I will buy it too.’

‘It’s used up, otherwise, how could I improve so fast.’

Xue Wang looked disappointed: ‘Yes. It’s a pity, that thing seems to be used as an additive for refining genetic medicine. The effect is good. If it is sold, the price should not be low.’

Lu Yuan doesn’t matter~[www.mtlnovel.com](http://www.mtlnovel.com)~ Anyway, he is not short of spirit crystals.

‘Are you done? How much?’

‘What are you urging? You don’t want to chat with me more? We are so familiar, why are we all friends?’

‘I’m busy.’

‘Bow! Bastard! Indifferent man! This time the materials are good, a total of 2,317,326 yuan. I didn’t give you a point, Shaoha!’

Lu Yuan smiled after receiving the transfer information.

‘Okay, I’ll see you next time.’

‘cut!’

Xue Wang raised his \*\* to the landing edge.

Lu Yuan looked indifferent and left the Crazy Wolf Material Shop.

As soon as he left the material store, Lu Yuan saw a black hovering car stopped on the street.

He took a look, there was a ferocious dog's head pattern on the door of the suspension vehicle, which looked a bit familiar.

The car door opened, and three men in black suits and black sunglasses walked out.

They glanced at Lu Yuan, passed by indifferently, and entered the crazy wolf material shop.

Lu Yuan glanced at the direction of the material store, wondering if he should go in and take a look.

Xue Wang is someone who has a long-term cooperative relationship with him anyway, should he care about his partners or should he care?

However, before Lu Yuan could go back, he heard a roar from the crazy wolf material shop.

Then, a man in black clothes flew out upside down.

Then, two other men in black clothes hurriedly walked out, dragged the seriously injured companion, got in the car, and turned and left.

Lu Yuan looked confused.

He glanced at the direction of the crazy wolf material shop and shook his head.

From the last conversation, Xue Wang seems to be their young master?

Since it's a family affair, don't take part in it.
