

Chapter 70: My Genes Evolve Infinitely

KILL THE BOSS-LEVEL BEASTS AND GAIN

‘Roar!!’

The pain caused the leader of the ancient sea giant crocodile to roar.

Lu Yuan was expressionless.

With the size of the leader of the ancient sea giant crocodile, this injury is at most painful for it.

Lu Yuan used both hands to pull the heavy sword.

Amidst the harsh rubbing sound, the wound on the abdomen of the ancient sea giant crocodile leader continued to expand, and the blood drenched the edge of the land.

The wound got bigger and bigger, and the leader of the ancient sea giant crocodile let out a painful roar.

It hurriedly rolled over the corpses of the ancient sea giant crocodiles, trying to repeat the old tricks and crush Lu Yuan to death.

However, Lu Yuan at this moment is not standing on the hardest back of the ancient sea giant crocodile as before.

At this moment, he is in a relatively soft abdomen. As long as his defensive ability is strong enough, he will not be crushed to death.

Lu Yuan gritted his teeth, clenched the epee, and did not evade.

The terrifying weight brought by the huge size of the giant ancient sea crocodile leader weighed on Lu Yuan’s body, and Lu Yuan felt a little pain in the bones all over his body.

He did not waver, and continued to cut the abdomen of the ancient sea giant crocodile leader.

even opened a huge wound close to one meter, and even saw the internal organs of the ancient sea giant crocodile leader.

The head of the ancient sea giant crocodile had red eyes, and when he saw that he couldn't force Lu Yuan out of him, he roared frantically.

The next moment, it rushed directly towards the deep water pool. In the spray, the leader of the ancient sea giant crocodile plunged into the water pool.

Lu Yuan felt that he was submerged by the pool water, and his face changed.

The ancient sea giant crocodile leader is not low in wisdom, knowing that he can't push the land edge away on the shore, so he can only run into the water, hoping to drown the land edge.

A look of hideousness appeared on Lu Yuan's face.

On the shore, his actions are more flexible, and he can also avoid the attacks of the ancient sea giant crocodile leaders.

But in the water, his speed is definitely not as fast as the leader of the ancient sea giant crocodile.

Now he has nowhere to go, and he has no chance to run.

The only way to survive is to witness and kill the ancient sea giant crocodile leader, otherwise it will only be him who will die.

Lu Yuan suffocated, with both hands hard, the heavy sword continued to tear the body of the ancient sea giant crocodile leader, tearing its internal organs.

The water pool was originally filled with the blood of a part of the dead ancient sea giant crocodile. At this moment, a large stream of blood melted into the pool water, dyeing the pool water red.

The severe pain caused the ancient sea giant crocodile leader to continuously roll in the water, hitting the rock wall of the pool.

Lu Yuan felt as if he was being thrown around constantly, but fortunately, his strength was so strong that he wouldn't be thrown away directly.

He can only continue to strengthen himself, without any other thoughts.

The ancient sea giant crocodile leader, as the leader of the fierce beast, has extremely strong vitality, and the struggle lasted for a long time.

I don't know how long it took before Lu Yuan noticed that the struggle of the ancient sea giant crocodile leader was diminishing.

Lu Yuan then had the opportunity to check the surrounding environment.

Lu Yuan found that he didn't know when he appeared in a passage, the passage was pitch black, and he couldn't see a long distance with his eyesight at the moment.

Lu Yuan didn't know whether this was the bottom of the pool.

The leader of the ancient sea giant crocodile kept struggling to swim, and not long after, Lu Yuan felt the leader of the ancient sea giant crocodile broke the water surface, and let out a weak and miserable roar.

The edge of the land can barely see the surface of the water even from the bottom of the water.

He could see that the ancient sea giant crocodile seemed to be constantly approaching a rock wall, and its body had gradually disappeared on the rock wall.

He knew that the leader of the ancient sea giant crocodile seemed to have gone ashore again.

When the rock face was about to touch his body, Lu Yuan thought about it and stirred the epee vigorously.

The ancient sea giant crocodile's body twitched and his body lost its vitality.

Lu Yuan saw that the leader of the ancient sea giant crocodile was no longer moving, and was about to continue to attack, to test if it was really dead.

Suddenly he felt a faint white light flashing from the leader of the ancient sea giant crocodile, and a hint of surprise flashed in his eyes.

is really dead!

Lu Yuan left the abdomen of the ancient sea giant crocodile and surfaced with the heavy sword.

After surfaced, Lu Yuan realized that he was not outside the pool at the moment, but in a dim cave.

The location where he is at the moment is also a water pool with a radius of more than 20 meters. One side of the water pool is a rock wall, and the other side is a clearing covered with rocks.

A smell of stench and decay filled the air.

The ancient sea giant crocodile leader is lying half of his body in the clearing, and the other half of his body is sinking in the water.

Lu Yuan cautiously stepped onto the rocky clearing, staring at the gleaming white light of the ancient sea giant crocodile leader, full of surprise in his heart.

I actually killed a boss alone!

As for the powerful boss of the fierce beast, Lu Yuan has been paying attention to the posts of Battle.net, and naturally he knows nothing about it.

That is a powerful beast that can be crushed even by hundreds of ordinary genetic warriors!

Even an elite genetic warrior, no more than a dozen people would never want to kill the boss fierce beast.

Every time the post about killing the boss, the monster, is a very popular post, Lu Yuan also saw a post yesterday.

Thirteen genetic warriors with elite genes recorded with a tempering degree of more than 90% brought more than two hundred ordinary genetic warriors to kill a ** python with a tempering degree of only 70%. More than half of the talents have been killed!

One can imagine the power of the boss fierce beast.

And the strength of the leader of the ancient sea giant crocodile clearly surpassed the ** giant that Lu Yuan saw at the time, but Lu Yuan managed to kill it alone!

If you say this, others will surely think Lu Yuan is crazy.

However, Lu Yuan could also understand the power of the boss Fierce Beast.

You know, he has used powerful potions twice in a row, and they are all-round potions.

This is more than that, he also has boss-level genetic weapons, as well as powerful physical skills, Heigangjin.

Even so, when the ancient sea giant crocodile leader's spiritual power was not exhausted, he still nearly survived and was driven to run around.

After the ancient sea giant crocodile leader's spiritual power is exhausted, he can only break through the weakness of the ancient sea giant crocodile leader by relying on his slightly better speed and the geographical advantage created by the ancient sea giant crocodile himself.

Just like that, it took a long time before the head of the ancient sea giant crocodile was sighted and killed.

Throughout the battle, he had absorbed nearly twenty times of spiritual power.

One can imagine how powerful the boss-level fierce beast is.

Thirteen elite fighters can kill a boss beast, which is already quite powerful.

I can only say that I am better.

Lu Yuan raised the corners of his mouth, showing a slight smile.

At this time, the things dropped by the leader of the ancient sea giant crocodile have surfaced.

There are three light groups, one cyan light group, one green light group and one white light group.

Seeing the cyan light cluster, Lu Yuan's eyes flashed with surprise.

Boss-level things!

He quickly picked up all three light balls.

After seeing the contents of the three light clusters clearly, Lu Yuan's eyes were a little bit more pleasantly surprised.

The cyan light group is a pitch-black bone staff.

is a boss-level genetic weapon.

How precious the boss-level genetic weapon is, Lu Yuan doesn't know, but it's definitely much more precious than the elite level.

It is a pity that the genetic weapon used by the elemental system.

What surprised Lu Yuan the most was that the green light group turned out to be an extraordinary gene!

After Lu Yuan took it in his hand, the information of this extraordinary gene passed into Lu Yuan's mind.

Extraordinary Gene: Water Arrow.

After is burned, it mainly increases the mental strength of the genetic warrior, and the addition can increase the strength and defense.

Lu Yuan felt that this additional promotion should be related to the gene being the leader of the ancient sea giant crocodile.

The ancient sea giant crocodile leader himself is not weak in strength and defense, the only weak point is speed.

Lu Yuan still remembers the powerful power of water arrows~www.mtlnovel.com~ fast speed, great power, and short cohesion time.

His heart is full of surprises. After the advanced level, he can burn the second gene. Water arrow seems to be a good choice?

He doesn't have the ability to attack from a distance now. After he has the water arrow, he has the ability to attack from a distance.

Coupled with his talent for absorbing spirit crystals, it is a water arrow turret that will never run out of spiritual power.

In addition, the boss-level genetic armament he obtained can slightly increase the power of water system combat skills.

It can be said that everything is ready, only advanced.

But Lu Yuan still hesitated in his heart.

The genetic warfare skills he envisioned should be of the speed type.

After all, his defense is considered a strong point now. After he has the black steel power, his strength is also considered a strong point. The only weak point is speed.

As long as the speed keeps up, at least in close combat, Lu Yuan is comprehensive and powerful, with almost no solution.

It's just that the water arrows are also very powerful. For a while, Lu Yuan was a little uncertain about what he should choose.

After thinking about it, Lu Yuan shook his head and put the things away.

What do you want to do so much now?

No advancement, and the extraordinary gene in speed has not been obtained.

Let's talk about it when you get advanced.

Lu Yuan looked at the white light group again. It was a set of leather armor. Lu Yuan had no interest and threw it into the war pattern space.

Then Lu Yuan looked in the direction of Lingjing. The white jade made Lu Yuan a little curious.

I haven't obtained this thing before.

He picked up the white jade and the information entered Lu Yuan's mind.

Lu Yuan's eyes widened, revealing a hint of surprise.

'So good luck?! You got the rough stone directly?'
