

Chapter 75: My Genes Evolve Infinitely

TRADE

Flaming's speed is not as good as Lin Hong, but he still crossed hundreds of meters in a short time and approached the tall buildings.

As soon as he approached the tall building, Fleming saw Lin Hong standing aside, looking up at the flashing floor, his face was ugly.

Flaming breathed a sigh of relief and walked over.

'Ahong! How is it? Are you okay?'

Lin Hong turned his head and glanced at Fleming, then shook his head:

'I'm fine. As soon as I approached, it exploded and the black fog disappeared.'

Flaming frowned:

'Is there no dark shadow coming out?'

Lin Hong shook his head with an ugly expression.

Flaming frowned and said:

'I will go up and have a look.'

Lin Hong glanced at him:

'I'm with you.'

'Row!'

Flaming gave a low voice, and a white mask appeared on his body.

At the same time, the same white mask appeared on Lin Hong's body.

The two looked at each other, jumped up, jumped tens of meters high, and entered the tall building surging with flames.

Entering the tall building, the high temperature and heavy smoke made Flaming and Lin Hong frown, but the high temperature and flame were blocked by the white mask.

Flaming waved his hand, dispelling the dense smoke in front of him, and observed his surroundings.

The violent explosion blew many doors to pieces, and cracks appeared on the wall.

The ground is full of broken wood burning with flames, crackling in the flames.

‘If you don’t evacuate in time, the residents in this building will be in danger.’

Lin Hong said.

Flaming nodded, then said with an ugly face:

‘Is there no trace left? Why is the alien so slippery? I haven’t been able to catch him for more than a year. Every time we show up, we will leave as soon as possible.’

Lin Hong frowned too:

‘The problem is that the alienation phenomenon is getting more and more serious now. Even a few months ago, this alienation didn’t have such ability.’

Flaming heard this, and his heart sank, feeling extremely stressed.

As they talked, they entered a room where the door had been blown apart. The furniture inside had been completely ignited, and some of the furniture had been blown to pieces.

There is a scorched corpse still burning on the central bed.

Flaming and Lin Hong both frowned.

Flaming slowly said:

‘I am afraid there will be twenty or thirty people who died this time.’

‘If you can’t find that thing quickly, more and more people will die.’

At this moment, a violent wind blew through, and the flames shook violently.

Beside the two of them, Li Qinghe in black leather armor suddenly appeared.

She looked at the burnt corpse on the ground, frowning her eyebrows, and glanced at both Fleming and Lin Hong:

‘Where are the clues?’

The two looked at each other and shook their heads at the same time.

Li Qinghe frowned deeper.

She took a deep breath and said:

‘The host of the alien substance wants to control such a large area of alienation, and the body should be within a certain range. Go and search around, maybe there is something to be found. In addition, notify the police to come. Don’t let chaos here.’

‘Yes!’

Both of them nodded.

With the strength of the two of Fleming and Lin Hong, it is natural to hear the panic from upstairs and downstairs, and there are also lights lighting up around them.

Today, for the residents of this community, it is destined to be a sleepless night.

.....

In the forest, a dark sword light flashed by, a one-meter-six-shoulder-high, gray wolf with sword marks appeared on its body, and blood spurted out.

Its body wailed and fell to the ground.

Lu Yuan shook the blood from his sword, glanced at the ancient sea wolf corpse all over the floor, and exhaled slightly.

There are two elite level ancient sea giant wolves plus more than 20 ordinary ancient sea giant wolves.

If an ordinary genetic warrior does not have a squad, I am afraid that he will only be besieged, but for the current Lu Yuan, it is just a little troublesome.

At this moment, Lu Yuan has penetrated into the ancient sea oasis, and the strength of the fierce beast is getting stronger and stronger.

Looking at the size of a few ancient sea giant wolves, the tempering degree is probably over 80%.

It is a pity that Lu Yuan did not encounter a boss-level beast.

Lu Yuan packed the spirit crystals and materials on the ground, and looked around.

‘Keep going inside.’

He took a step and continued to move deeper.

Two days later, Lu Yuan came to the edge of Guhai Lake.

Standing on the edge of the lake, Lu Yuan looked at the endless huge lake with a hint of wonder in his eyes.

‘Unexpectedly, there is such a big lake in the oasis.’

Then he appeared a touch of annoyance.

In the past two days, as Lu Yuan continued to deepen, he encountered more than 20 elite level beasts.

It’s a pity that there isn’t a boss-level beast.

‘When do I have to find this?’

Lu Yuan looked at the wide lake, somewhat helpless.

‘The bosses are out there, and the numbers are scarce. Even if there are bosses and beasts, as long as they are found, they will definitely be hunted in groups...Huh? Wait!’

Lu Yuan suddenly thought of something and was taken aback.

Others hunted boss-level beasts to obtain rough stones. If you don’t use them and want to trade, do you have something to trade?

Lu Yuan glanced at the dark staff in the war pattern space.

The boss-level staff is no less precious than the original stone.

If you trade with a stick, maybe you can change to a rough stone?

Lu Yuan's eyes flickered, and after thinking about it, he felt hopeful.

When I leave the place of origin, I will post a post at the Battle.net post bar, or open an online store, maybe I can actually get it.

Thinking of this method, Lu Yuan's worries disappeared a lot.

As for now, let's keep looking for it to see if there is a boss-level fierce beast.

In the next few days, Lu Yuan continued to search for the boss monster in the core area of the Guhai Oasis.

During , he ran into a boss-level beast.

That is a big blue fish that is thirty to forty meters long.

It rushed out of the lake and stirred up huge waves.

Some fierce beasts who were drinking water by the lake ran away in a hurry.

It can be seen from the breath escaping from that big fish that it is definitely a very powerful boss-level beast.

The strength is even much stronger than that of the ancient sea giant crocodile leader Lu Yuan killed before.

Lu Yuan glanced at it and gave up the idea of hitting it to pay attention.

is not realistic at all.

Don't say it was in the lake, he couldn't show 10% of his combat power inside.

Even on land, a boss of this intensity cannot be dealt with by the land edge.

Unless, he evolves his dark iron body to boss level.

It's a pity that his physical strength is still not enough, he might explode and die if he forces evolution.

Soon, seven days passed, Lu Yuan killed a total of 36 elite beasts, obtained 5 elite-class weapons, and 31 ordinary weapons.

Not only that, Lu Yuan also acquired two extraordinary genes.

Combat Skill: Battle Cry.

Combat Skill: Poisonous Fog.

were dropped by the ancient sea wolf and the ancient sea giant python.

For Lu Yuan, neither of these two combat skills was what he wanted.

Not to mention ordinary quality combat skills, not as high as his water arrow combat skills, and the effect alone is not particularly powerful.

Lu Yuan plans to sell it at that time.

Extraordinary genes, even if they are of ordinary quality, they can be auctioned off.

Of course, it can also be sold on Battle.net Mall.

In addition to genetic weapons and extraordinary genes, there are naturally a lot of spirit crystals.

In addition, before coming in last time, because he absorbed the rough stone, he didn't go to Xue Wang to process the material. Even if his current war pattern space has become very large, it is still full.

Lu Yuan had to throw away some low-value materials.

As for the spirit crystals, Lu Yuan took everything else to the Evolution Cube except for 10,000 for emergency use.

Anyway, his current tempering degree has reached 100%, and there is no need to continue to absorb spirit crystals.

Seven days passed quickly, and Lu Yuan left the place of origin again.

As soon as he appeared in the room, Lu Yuan couldn't wait to sit down in front of the computer~www.mtlnovel.com~Turn on the computer, Lu Yuan entered the Gene Warrior Network.

He thought about it, clicked on the mall module, and registered a store by himself according to the guidance.

Owner: There is help.

Shop name: There is a small shop for helping people.

Because there is no transaction record, the store rank has only the lowest one star.

Lu Yuan didn't care either. He posted the boss-level staff: Ancient Sea Giant Crocodile Staff, and after thinking about it, he also put the information about combat skills: poison fog and combat skills: battle roar.

Not only that, Lu Yuan also got two sets of elite leather armor information and put them on.

The more precious the merchandise in the shop, the higher the amount of exposure it will get. Lu Yuan also wanted to speed up the exposure, so naturally he had to make something good and put it on.

Elite Leather Armor and Extraordinary Gene, Lu Yuan uses Red Maple Coins directly for settlement.

The price of each set of leather armor is 1.5 million red maple coins, while the price of the poisonous fog combat technique is 2.5 million, and the price of the battle cry combat technique is 3 million.

According to the spirit crystal, the price of almost elite weapons is about 10,000, and although the transcendent gene is an ordinary level, the price is a little higher than that of elite weapons. The price is more than 10,000 to 20,000.

If it is a very rare extraordinary gene, the price is even higher.

The price given by Lu Yuan is naturally the market price, even slightly lower than the average price.

While the ancient sea giant crocodile staff, the settlement method of the land edge is the rough stone transaction.

This is his main purpose.

Not only that, Lu Yuan even posted the first post of his life directly on the Battle.net post.

'Trading Post: Boss Trainee Warrior's Staff Trading Trainee Rough Stone'

Lu Yuan explained the information of the ancient sea giant crocodile staff in detail, and said that he only trades rough stones.
