

Chapter 77: My Genes Evolve Infinitely

TRANSACTION COMPLETE

I finally met someone with a rough stone!

Lu Yuan changed from one-handed typing to two-handed typing excitedly.

He clicked on the portrait of Mingyue Gongzhong and started a private chat.

‘I have a shop, where you can trade, and you can call a helper shop, you can place an order on it! There is a guarantee from the Genetic Warrior Association, so there is no need to worry about breach of contract by both parties. What do you think?’

Lu Yuan walked while waiting for Mingyue Gongzhong to reply.

After waiting for more than ten minutes, Lu Yuan thought that he regretted it. Gong Zhong Mingyue sent a message.

‘Yes, I will place an order.’

Lu Yuan suddenly showed an excited smile, and the third rough stone arrived.

It didn’t take long for Lu Yuan’s online store to have order information.

Lu Yuan clicked to see that it was the order for the staff.

Next, as long as Mingyue Gongzhong sends the original stone, after Lu Yuan confirms it, he can send the staff.

Regarding bartering transactions, the Genetic Warrior Association has its own process.

Generally, one party sends the item that needs to be traded to the other party, and after the other party receives the item, the transaction item is sent back. The two parties confirm it even if the transaction is completed.

Of course, during this process, the Genetic Warrior Association will have someone to check the authenticity of the items.

After the item is in the hands of the trader, as long as the transaction is confirmed, the Gene Warrior Association will not take over any more.

After the order was confirmed, Lu Yuan was in a good mood and returned to his residence happily.

As soon as he got home, Lu Yuan's cell phone rang.

He glanced at the phone and answered the call.

'Hello.'

'Hello, we are the recipients of the Warriors Association, are you at home now?'

Lu Yuan remembered that he had an appointment at four o'clock.

he smiled and said:

'Here I am.'

'Okay, we have about half an hour to arrive.'

'good.'

Lu Yuan hung up the phone, only to realize that it was half past three.

He returned to his room and found that his last combat skill in the online shop: Battle Cry was also sold.

Until now, all the items that Lu Yuan had put on the shelves before have been sold out.

only took a few hours.

This is also normal, after all, the price on the shelves of Luyuan is a bit lower than that of ordinary online stores.

There are naturally more people buying.

After all, the quality is cheap and cost-effective. Who doesn't like it?

The rough stone transaction has been completed, and Luyuan will naturally not continue to list items.

This online shop, just leave it there.

He clicked on the Zhanwang post bar area and started to check various posts.

He is about to break through to the first order, it is time to prepare for the next step.

Time passed, and soon it was four o'clock, and the door was knocked.

Lu Yuan walked out of his room and opened the door.

Outside the door are two middle-aged men in black uniforms.

After seeing Lu Yuan's young face, both men were taken aback.

One of the men with short brown hair spoke:

'Hello, are you Mr. Lu Yuanlu?'

Lu Yuan smiled and nodded: 'I am Lu Yuan.'

'Hello, Mr. Lu, I'll pick it up.'

Lu Yuan took out the previously sold items.

Two extraordinary genes, three elite weapons.

After seeing these things, both men looked at Lu Yuan more.

The man with short brown hair took the things over, and after checking them one by one, he smiled:

'The items are checked correctly, and packing will be prepared on our side. Is the courier fee paid by your side?'

Lu Yuan smiled and nodded: 'Yes.'

'Let me see the delivery address, please wait... a total of 50,000 red maple coins.'

Lu Yuan sent a courier for the first time, and was a little surprised to hear that the express fee was 50,000 yuan.

This is a bit expensive.

But Lu Yuan is not incomprehensible.

The wilderness in the wild is full of fierce beasts. Ordinary people can't get out of the city at all. Those who can move between cities are genetic warriors or elites in society.

Like the logistics of the Genetic Warriors Association, the delivery staff are all genetic fighters. If you want the genetic fighters to deliver the goods, the logistics cost is naturally not low.

These tens of thousands of express fees are actually normal.

After Lu Yuan paid the courier fee, the brown-haired man smiled and said:

'Then we will leave first, and these couriers will arrive tomorrow.'

Lu Yuan nodded: 'Okay, trouble you guys.'

Lu Yuan closed the door, and the two receivers looked at each other.

The black-haired receiver on the side of has a strange expression on his face.

'A genetic warrior who can take out so many elite-level items would live in such a place. It's really unexpected.'

The brown-haired man smiled and said, 'Who knows what people think? However, Lu Yuan is so young and has so many elite items, and I don't know if he obtained it himself.'

The black-haired man nodded: 'Well, if he obtained it himself, that would be terrible. I looked at it and found that this leather armor was dropped by the ancient sea wolf in Sandstone City, with a tempering degree of over 80%. That's it. However, the ancient sea giant wolves with a tempering degree of more than 80% will drop. Such a young person can kill such a powerful beast, and the future may be immeasurable.'

The brown-haired man nodded in agreement.

He glanced at the closed door of the room:

'It's none of our business, let's go, there are still several stores to accept.'

The two talked and left.

.....

After sending everything out, Lu Yuan returned to the room.

He remembered what Xue Wang said to him before.

The current slum area does seem to be a bit turbulent.

Lu Yuan thought about it and sent a message to Li Qinghe.

‘Sister Qinghe, are you at home?’

In the past two days, Li Qinghe didn’t bring breakfast to Lu Yuan. Lu Yuan said that it was already noon when he came out of the place of origin, so he didn’t need to bring breakfast.

Lu Yuan didn’t know whether Li Qinghe had gone home now.

After Lu Yuan waited for a while, Li Qinghe did not reply.

He raised his eyebrows, went to the opposite room, and knocked on the door.

‘Sister Qinghe? Are you at home?’

Lu Yuan waited for a while, but still did not respond.

‘not here?’

Lu Yuan thought for a while, wait for Li Qinghe to reply to the news.

After returning to the room, Lu Yuan did not absorb the remaining piece of rough stone.

It’s getting late. After absorbing this rough stone, I’m afraid I will get the night. Lu Yuan didn’t want to practice at night, and was a little worried that the dark shadow would appear again inexplicably.

He sat on the bed and continued to feel Hei Gangjin.

During this period of time, Lu Yuan has been fighting powerful elite-level beasts, and Hei Gangjin’s proficiency has also been continuously improved.

Now that he has mastered the skills of the body’s core power group and the large power group at the same time, he has begun to explore the skills of the whole body power group at the same time.

Now he can steadily double his strength, and his combat power has improved to a certain extent compared to before.

If he can raise his black steel power to triple, and his power doubled, then with his own strength, he might be able to hunt down some of the bosses.

If it can be increased to three times, it is equivalent to one more boss-level combat skill, and it will greatly improve Lu Yuan's strength.

Coupled with various genetic medicines, Lu Yuan felt that he could hunt down most of the bosses.

The elite fighters hunted down the boss beasts alone, which is incredible.

It's just that it's quite difficult for him to find the boss alone. In addition, Hei Gangjin is now at this level, and the difficulty of wanting to continue to improve is much greater than before.

To break through to Sanchong, Lu Yuan himself didn't need to spend a few days.

He naturally thinks that the sooner he gets the rough, the better.

Now it is best to be able to obtain the third rough stone through trading~www.mtlnovel.com~.

Cultivating Heigangjin, time came to night without knowing it.

Luyuan entered the place of origin.

His body appeared on the edge of Guhai Lake.

Lu Yuan looked around, thought about it, and began to move towards the edge of the Guhai Oasis.

He intends to go back to Shayan City.

He doesn't need spirit crystals much now, and the boss fierce beasts don't need to hunt.

Only need to absorb the rough stone, he can break through.

If you absorb rough stones, it is more convenient in Sand Rock City than in the real world.

From the Guhai Lake to the edge of the Guhai Oasis, the distance is about one hundred kilometers, and there are many fierce beasts.

Even with the strength of Lu Yuan, it took more than three days to reach the edge of the ancient sea oasis.

After , Lu Yuan spent more than two days before returning to Shayan City from the Guhai Oasis.

After passing the inspection of the two structures at the gate of the city, Lu Yuan entered the city. Looking at the genetic warriors on the street, Lu Yuan couldn't help but smile.

In the wild, he is always tense. In the city, Lu Yuan can finally relax.

He came to the residential area and rented a C-level single suite.

After returning to the suite, Lu Yuan directly took out the rough stone and began to absorb it.

The Force merged into Lu Yuan's body, impacting the gene lock.

Before the original force was exhausted, Lu Yuan's second black chain was shattered and turned into puffs of black smoke and dissipated.

The white mist at the top of the gene chain once again spilled partly, and Lu Yuan gradually saw the gene chain above it.

Lu Yuan looked at the last black chain and smiled.

is still a little closer.
