

Chapter 80: My Genes Evolve Infinitely

BREAKTHROUGH, EVOLUTION

‘at home.’

‘Okay Mr. Lu, the express will arrive in about an hour.’

Lu Yuan hung up and went home with a cheerful mood.

But looking at the cold street on the road, Lu Yuan remembered the news he had seen before, and his heart became heavy again.

.....

Back home, Lu Yuan knocked on Li Qinghe’s door.

Soon, Li Qinghe opened the door and walked out.

She is wearing a loose white nightdress, her delicate face is not covered with powder and black hair, she looks pretty good.

‘Brother fate, are you back ? What’s wrong with me in such a hurry ?’

Li Qinghe smiled and said.

Lu Yuan smiled, ‘I do want to discuss something with you. There have been several gas explosions in our area in the past two days. Do you know Sister Qinghe?’

Li Qinghe paused and nodded: ‘Well, I know. What’s wrong?’

‘Although the Archon said it was an accident, I think it might be the influence of the dark shadow before. Now this area is a bit dangerous. I think we’d better move out immediately. I’m actually okay. The main reason is that you will be in danger. . After all, Sister Qinghe, you are an ordinary person.’

Li Qinghe’s eyes flashed, looking at Lu Yuan’s serious face, she was silent, and then smiled and said:

‘Brother Yuan, do you have the money to move out now?’

Lu Yuan grinned, feeling a little proud: ‘Sister Qinghe, don’t underestimate me, I have more than 10 million savings now, enough for us to move.’

‘More than ten million?’

Li Qinghe’s eyes widened slightly, his voice raised a little, and he was very surprised.

is not just a performance, Li Qinghe’s heart is also extremely surprised.

Isn’t the fate brother just awakened for about a month? !

How did he save so much money in such a short time?

She couldn’t help but said, ‘Brother Yuan, how did you make so much money?’

Lu Yuan smiled: ‘Our genetic warriors hunted the beasts in the land of origin. The materials of the beasts can be sold for money, and the price is not cheap, so it is quite profitable. Sister Qinghe, you are not a genetic warrior, you may not know this. Point. And I’m a genius, my strength has improved rapidly, and the strength of the beasts I hunted is also very strong, so the materials obtained are more valuable.’

A look of worship appeared on Li Qinghe’s face:

‘Brother Yuan turned out to be a genius? It’s really amazing.’

Lu Yuan couldn’t help but smile when he heard the praise from people close to him.

‘So please don’t worry, Qinghe, the money for moving is completely fine, even if you are raising you, it will be fine.’

Li Qinghe looked at Lu Yuan with a smile on his face, and also narrowed his eyes, revealing a smile, a gentle flash in his eyes.

She thought about it, and said:

‘If that’s the case, then go find out where to rent, and then we will move out.’

Lu Yuan nodded, he thought for a while:

‘Wait a little bit today. I have a courier. I have to go to the place of origin at night... Let’s rent a house together during the day. Besides, it’s dangerous outside now. Sister Qinghe, don’t go out.’

‘Brother Yuan is right, then I will be at home, and we will go to see the house tomorrow.’

Li Qinghe said with a smile, but thought in her heart that anyway, Lu Yuan would go back to the place of origin at night, even if she went out, Lu Yuan would not know.

Li Qinghe yawned and said: ‘Sister, I’m still a little tired, I’ll sleep for a while.’

Lu Yuan nodded and let Li Qinghe go to sleep.

Looking at the room door Li Qinghe closed, Lu Yuan also put a stone down in his heart.

Li Qinghe didn’t go out, so he felt a little relieved.

But that dark shadow is out there, Lu Yuan feels that it is still unsafe.

will move out tomorrow.

Lu Yuan had already made a decision in his heart.

Lu Yuan went back to the room and started to check the listings, preparing for the move tomorrow, while also waiting for the courier.

Soon, the door was knocked, and Lu Yuan excitedly went to open the door.

There are still the two couriers before.

The brown-haired man smiled:

‘Mr. Lu, we met again so soon.’

Lu Yuan also smiled: ‘Yes, it’s really fast.’

‘This is your express.’

The brown-haired man took out the metal box from the Battle.net space, opened the box, and inside was a white light ball.

In the light group, there are a series of silk threads intertwined and constantly circulating.

is the extraordinary gene.

Lu Yuan picked up the light group, confirmed the natural response through the information, and confirmed the receipt.

Saying goodbye to the two couriers, Lu Yuan returned to the room.

He looked at the extraordinary gene in his hand, feeling a little excited.

It's a pity that he hasn't broken through yet, so he can only suppress the excitement in his heart and put this extraordinary gene into his war pattern space.

.....

At ten o'clock in the evening, the light gate in the white mist was repaired.

Luyuan entered the place of origin for the first time.

His body appeared outside the auction house.

Lu Yuan glanced at the auction house, thought about it, and went first to send the [Combat Skill: Water Arrow] to the auction.

The elite-level transcendent genes are even more valuable than the boss-level weapons, and the starting price is set at 98,000 Lingjing.

This is just the starting price!

The final transaction price, if nothing else, must be a hundred thousand crystals.

After sending the elite gene for a photo, Lu Yuan went to rent a C-level suite.

Entering the room, Lu Yuan sat cross-legged on the bed and took out the third rough stone.

He looked at the white jade in his hand, calmed down, and slowly exhaled.

'let's start.'

He closed his eyes and began to absorb the last piece of rough stone.

The Force merged into Lu Yuan's body, passed through the white mist, and began to hit the last heavy chain.

Boom!

Boom!

Boom!

With the impact, the white mist surged, and the gene chain was constantly shaking, and a tingling sensation came from Lu Yuan's body.

Not long after, a crisp sound rang, and a series of small cracks appeared on the black chain.

Lu Yuan did not stop the impact, and soon the cracks widened, and finally, the entire chain shattered.

As the last chain shattered, the white mist space around the gene chain surged violently and quickly dissipated.

Above the first gene chain, the second gene chain was completely exposed.

Compared with the first gene chain, the second gene chain looks very dim.

After all, this gene chain has not yet begun to temper.

Despite this, Lu Yuan has already broken through to the first order at this moment!

With the breakthrough, a wave of power automatically emerged from the depths of Lu Yuan's physical body, and his physical body and spirit seemed to have undergone subtle changes.

This is the sublimation of the essence of genes.

Every breakthrough of the genetic warrior is a sublimation, making his own genes more perfect and potential stronger.

If Lu Yuan could not break the gene lock, when the gene chain was tempered to 100%, his limit would have reached that position.

But breaking the genetic lock, he has a new limit.

Lu Yuan opened his eyes, a hint of surprise flashed in his eyes.

He clenched his fists, felt the new power surging in his body, and showed a smile.

broke through to the first order.

But there is still something to do next.

Lu Yuan took a deep breath and looked at the faint blue evolution cube spinning around the gene chain.

Let's start to evolve.

Lu Yuan's mind moved, wisps of blue light merged into the first gene chain~www.mtlnovel.com~Humph! ‘

Like the first evolution, in the first segment of the gene chain, the originally stable gene chain began to reorganize.

Lu Yuan's muscles, bones, organs, etc. seemed to be shredded and recast all over his body.

What followed was severe pain, this time the pain was more intense than the previous time when I evolved from the normal level to the elite level.

After all, this time, it has evolved the elite-level genes to the boss-level.

Lu Yuan couldn't help but snorted, his face turned pale, and his whole body was sweating cold.

As the evolution progressed, the dazzling light in the first gene chain began to dim again.

Elite-level genes have evolved to boss-level genes, and some of the recombinant genes naturally need to be refined.

Time passed, Lu Yuan endured unspeakable pain, the blue light began to slowly dissipate, and the pain also slowly dissipated.

As the pain disappeared, a very comfortable feeling spread from the depths of Lu Yuan's body.

That is the pleasure brought by biological instinct after genetic evolution and life sublimation.

Lu Yuan opened his eyes and exhaled slightly.

He felt the powerful force constantly pouring from the deepest part of his body, and the corners of his mouth raised, revealing an excited smile.

succeeded.

He clenched his fists.

has just evolved, and has not re-tempered the boss-level genes, his power has been nearly twice as high as before.

'S defensive ability has been improved by nearly three times compared to before. Not only that, but the agility of the body has also been greatly improved.

And the original combat skills have also changed.

Spiritual power surged in Lu Yuan's body, and faint red rays of light circulated on the surface of his body.

Combat Skill: The Light of Red Copper.
