

Chapter 83: My Genes Evolve Infinitely

THE POWERFUL COMBAT POWER OF LUYUAN

‘The strength is not weak.’

Lu Yuan glanced at the corpse on the ground and evaluated himself.

The defensive ability of the ancient sea giant crocodile leader, he had personally experienced it before.

I didn’t expect to kill it directly with a single blow. This was the effect of Lu Yuan not using Hei Gangjin.

If Heigangjin is used, his power will only be stronger.

As the leader of the ancient sea giant crocodile died, white light appeared again, covering the surroundings.

When the white light dissipated, Lu Yuan found himself back in the small silver-white simulation room.

He found that his current position was exactly the same as before.

Lu Yuan was a little surprised.

He had obviously moved dozens of meters before, how did he do it?

The level of technology in this simulation room is really high.

Then Lu Yuan thought that even Daqixing’s current floating car, robotic arms and the like were all technologies obtained from the place of origin, and he was relieved.

The light curtain appeared in front of Lu Yuan again.

Lu Yuan began to make opponents again.

‘Um... this time, let’s try the 100% tempered ancient sea giant crocodile leader.’

After was established, the simulation space appeared again.

Lu Yuan still ate a wave of water arrows from the ancient sea giant crocodile leader.

is still unharmed, but it feels a little bit painful compared to before.

After , Lu Yuan used the same method to kill the ancient sea giant crocodile leader, but this time, Lu Yuan failed to kill the ancient sea giant crocodile leader with a single blow, only severely wounded.

attacked twice again, and the leader of the ancient sea giant crocodile died.

The opponent died, Lu Yuan returned to the small room of the simulation room again, and started the third formulation.

This time, Lu Yuan chose a fierce beast that favors speed.

It was a giant wolf covered with black lin armor, a single horn on its forehead, and a shoulder height of more than two meters.

Black Scale Horned Wolf.

The first time Lu Yuan saw this fierce beast, he thought of the black-scale horned wolf he had encountered in the sandstone underground palace.

The black-scale horned wolf was only an elite level at the time, so Lu Yuan and Green couldn’t breathe.

Unexpectedly, in such a short time, Lu Yuan could face the black-scale horned wolf at the boss level.

Lu Yuan’s ascension speed can be said to be extremely fast.

The most powerful thing about the black-scaled horned wolf is its speed and sharp claws.

After seeing Lu Yuan, it howled and turned into a black shadow, and rushed towards Lu Yuan.

Lu Yuan raised his eyebrows, moved his feet and moved his body sideways, avoiding the attack of the black-scale horned wolf.

The tempering degree of the black-scale horned wolf leader has reached 100%, and Lu Yuan's speed is about the same.

You need to know that Lu Yuan doesn't have an extraordinary gene in recording speed.

The reason why his speed is so fast is mainly because his two boss-level transcendent genes will increase a little speed, plus he also has the speed of Moonstone, and his cultivation base is higher than the black scale horned wolf.

That's why it's so fast.

After avoiding several attacks from the black scale horned wolf, Lu Yuan swept across and kicked the black scale horned wolf in the abdomen.

The black-scale horned wolf's body flew upside down and died on the spot.

Lu Yuan used Heigangjin to double his strength.

Although the defense of the black scale horned wolf is not as good as the ancient sea giant crocodile, it is not bad, and it is still kicked to death by Lu Yuan.

The black scale horned wolf leader died, the simulation restarted again, and Lu Yuan started the fourth simulation.

His opponent became first-order.

The tempering degree reaches 40%, and it is the first-order elite beast of the speed system, the black mane demon wolf.

The black mane demon wolf has explosive speed combat skills. The demon wolf runs. If you don't use combat skills, Lu Yuan's speed is faster than it, but if you use combat skills, Lu Yuan's speed is slightly slower than it. NS.

Lu Yuan also had a certain understanding of his own speed at the moment.

If it is an elite beast with speed expertise, it is about 30% temperament.

Lu Yuan hasn't started to refine his genes yet, and the two genes burned are not of the speed system. Such a speed is quite good.

And speed is the weakest item in the land margin.

Lu Yuan tested other aspects.

Lu Yuan's defensive ability after fully displaying the red bronze light is enough to resist the first-tier elite fierce beasts with a tempering degree of 60%.

Even if it is a hard attack, it is only a minor injury.

And his power is almost the same as that of a Tier 1 elite fierce beast with a tempering degree of 45%.

can be said to be very strong.

After , Lu Yuan tried another rejuvenation effect.

After he was completely defenseless and was injured by the beast, Lu Yuan took a rejuvenation. In just a few breaths, a deep bloodstain on his arm disappeared completely.

This potent potion is even better.

Lu Yuan kept fighting with different opponents, and he became more and more aware of his own strength.

.....

Boom!!

Inside the simulation space, a roar sounded.

Lu Yuan was holding an epee and collided with a three-meter-high, dark red giant bear.

This is a first-tier boss with a tempering degree of 10%, a fierce bear.

The violent bear is biased towards strength and defense, and is not particularly strong in speed.

Lu Yuan fought with it, evenly matched, and it had been going on for several minutes.

It was another collision. Lu Yuan jumped five meters by the force of the counter-shock and fell to the ground, looking at the violent bear in the distance.

Vigorously violent bear fell on all fours and roared angrily at Lu Yuan.

Lu Yuan narrowed his eyes and was about to continue his attack.

At this moment, the body of the violent bear stopped, and a white light emerged, covering everything around it. When the white light disappeared, Lu Yuan returned to the simulated small room.

Lu Yuan, who was immersed in the battle, was taken aback for a moment. What happened? The battle hasn't ended yet, why did the simulation exit?

Just when Lu Yuan was stunned, a mechanical sound rang in the room:

‘Your simulation room usage time has ended. If you want to continue using it, please pay in time.’

The mechanical sound ended, and the door of the simulation room opened automatically, as if rushing out of Luyuan.

Lu Yuan: ‘.....’

His face turned dark, and when he remembered, he rented it for an hour. He has been fighting for several times, and counting the time, it really has been almost an hour.

Lu Yuan couldn't help but slapped his lips, still feeling a little bit unfinished.

It just ended when I got excited, too soon, right?

But Lu Yuan thought about it, so he didn't plan to rent a simulation room anymore.

He knows about his own strength now, and the combat strength is similar to that of the first-order boss with 10% tempering degree, the speed may be a little weaker, and the defense is a bit stronger.

Then there is no need to continue using the simulation room.

Lu Yuan walked out of the simulation room and returned to the door on the first floor to find the previous construct.

'I want to rent a gravity room.'

'The gravity room needs 80 Lingjing for an hour. How many hours do you want to rent?'

Lu Yuan thought for a while: 'Lease for 5 hours first.'

Lu Yuan paid Lingjing and got a black card.

He went upstairs again.

The gravity room is on the fourth floor. Lu Yuan found his room and walked in.

Different from the previous simulation room~www.mtlnovel.com~The area of the gravity room is much larger, almost 100 square meters.

The floor and walls of the room are made of white alloy, and there are many training equipment inside.

Next to the door was a black instrument, and Lu Yuan glanced at it.

There are two rows of numbers on it.

The upper row is a countdown of the room usage time.

And below is the gravity number, which is now displaying '1'.

A standard gravity is about the same as that of Daqixing.

Luyuan operates the instrument and adds gravity to two standard gravity.

Suddenly, Lu Yuan felt his body heavier a lot.

Not only that, he felt a little uncomfortable in his internal organs, his heartbeat became heavy, and blood flow became slow.

'The effect of this gravity room...'

Lu Yuan was a little stunned, but he didn't expect this effect to be so obvious.

Lu Yuan's physical strength is no longer low, the increase in defense is not only external, his internal organs are also very tough.

He was a little uncomfortable at the beginning, but he soon got used to it.

Twice is not enough.

Lu Yuan continued to increase.

three times, four times, five times...

When Lu Yuan kept increasing the gravity to eight times, his face became flushed, breathing was a little difficult, and the internal organs in his body felt like being torn apart, and it was a little painful. He felt very heavy on every part of his body.

This effect is also great.

Lu Yuan grinned.

If Lu Yuan was asked to lift something eight times his body weight, he would have no pressure at all.

But eight times the force of gravity squeezed from every corner of his body, making him feel a little bit unable to hold it.
