

Chapter 84: My Genes Evolve Infinitely

SO LACK OF SPIRIT CRYSTALS

Under eight times the gravity, Lu Yuan stood in place and closed his eyes.

After the rejuvenation gene was recorded, Lu Yuan's mental strength was much stronger than before, and he was naturally much more acute.

He can clearly feel the subtle changes in his body parts under the strong gravity.

Blood flow in the blood vessels, visceral peristalsis, muscle pulling.

This gave him a more intuitive and clear understanding of his body.

And what Hei Gangjin needs is the cognition of physical exertion.

Lu Yuan had already cultivated Hei Gangjin to the second level. Under such an environment, he believed that he could cultivate Hei Gangjin to the third or even the fourth level as quickly as possible.

Time passed, Lu Yuan tried to slowly walk up.

As soon as he walked around, Lu Yuan consumed energy faster, and even his spiritual power was quickly consumed.

Just over half an hour, Lu Yuan felt very tired.

He had to sit down cross-legged, took out the spiritual crystal, and began to absorb spiritual power.

Spiritual power merges into Lu Yuan's body, and his body is gradually relieved of fatigue under the nourishment of spiritual power.

There is another part of spiritual power integrated into the gene chain, refining the first gene.

The gene chain that hadn't been fully refined because of evolution before, gradually became dazzling again from below.

Time passed, when Lu Yuan absorbed more than 3,000 spirit crystals, his body and gene chain were finally saturated.

This shocked Lu Yuan.

You must know that before Lu Yuan absorbed spiritual power at most once, it would consume less than a thousand.

is now a full increase of about four times.

One of the reasons for the substantial increase in physical strength after Lu Yuan's breakthrough, and part of the reason was that under gravity, Lu Yuan's body became more hungry and thirsty, and it was easier to absorb spiritual power.

In other words, if you practice in the gravity room, you can absorb more spiritual power.

It's no wonder that when I read the post before, I said that the gravity room and simulation room are of great benefit to the genetic warrior.

This benefit is really too great.

The only disadvantage is that it needs to consume too many spirit crystals.

But this kind of extravagant training method is not originally prepared for ordinary genetic warriors. Only the children of those powerful families can spend so much, right?

After his body was saturated with absorption, Lu Yuan got up and began to practice again.

.....

Five hours later, the gravity of the gravity chamber slowly closed.

Lu Yuan, who was slowly punching the Junti boxing, stopped.

After staying in a high-gravity environment for a long time, and now returning to its original gravity, Lu Yuan felt that his body was about to float.

But he also knew it was just an illusion.

The only real improvement is that he has a certain idea of the third level of Heigangjin.

In addition, it consumed a lot of spirit crystals, and he re-tempered the red copper light gene to 20%.

He has improved in all aspects.

The price is to consume more than 5,000 spiritual crystals.

Lu Yuan felt a little panicked when he saw the spirit crystal he had consumed.

It consumes more than 5,000 spiritual crystals in five hours, how much does it consume in a day?

Although the spirit crystals Lu Yuan obtained on his way back to Sandstone City this time were not used to charge the Evolution Cube, even with these additions, his number of spirit crystals was only more than 20,000.

Is it consumed in almost twenty hours?

On average, an elite weapon was used in ten hours...

Lu Yuan felt a little scalp tingling.

He originally thought that his current spirit crystals were already abundant.

Looking at it this way, Lu Yuan realized that he still lacked spirit crystals.

‘When the spirit crystals are used up, let’s hunt down the beasts.’

Lu Yuan rubbed his forehead, a little distressed.

After , Lu Yuan did not continue to practice, but left the training hall.

It’s already night outside.

He plans to go back and rest first, and continue to practice tomorrow.

The street lights on the side of the street emit white light, and the plaques on the storefront also flicker. There are a lot more genetic warriors coming and going.

Not all genetic warriors will choose to camp in the wild.

If you get close, most genetic warriors will still return to Sandstone City. After all, it is safer here.

Lu Yuan wandered slowly, and just then, a voice rang from behind Lu Yuan.

‘Huh? Brother Yuan? You are here?’

Lu Yuan turned his head and found that several people in Green were standing behind, and the one who was talking was Zhuo Ming.

Seeing Lu Yuan, Green and the others all smiled and walked over quickly.

‘Lu Yuan, haven’t seen you for a few days, have you been in the sandstone underground palace recently?’

Lu Yuan nodded: ‘Well, I went somewhere else.’

Zhuo Ming was a little curious: ‘Where have you been, Brother Yuan?’

‘Ancient Sea Oasis.’

‘hiss...’

Green’s eyes are wide open.

‘Ancient Sea Oasis? That is one of the most dangerous areas in the entire Sandstone City, right? Brother Yuan, have you already been there?’

Zhuo Ming exclaimed in exaggeration.

Green smiled bitterly: ‘I went to Guhai Oasis before. The minimum tempering degree of the beasts there is 50%, and many of them are groups of beasts, which are very dangerous. That time we formed the team at that time. It was completely destroyed within half a day after entering. After that, I stayed in the sandstone underground palace and didn’t dare to go again... I didn’t expect Lu Yuan that you could already mix there. The speed of your progress is really amazing.’

Lu Yuan smiled: ‘Guhai Oasis does have a lot of beasts in groups. If it weren’t for my strong defense, I would be very dangerous. Even so, I almost died several times before.’

Lu Yuan was not lie. When Lu Yuan was hunted down by a large group of elite beasts, he still ran away because of his spiritual power.

‘Brother Yuan, has your temperament improved a lot?’

Lu Yuan smiled and said, ‘I have gained some gains in Guhai Oasis, and it has indeed improved a lot.’

Upon hearing this, whether it was Green or Zhuo Ming, they all looked envious.

Lu Yuan improved too fast.

‘Then why are you back today?’

‘I plan to come back and rest.’

Lu Yuan didn’t plan to say that he came back because of a breakthrough.

This speed is a bit too exaggerated.

‘Why are you back?’

Hearing Lu Yuan’s words, the people in Green were a little excited.

‘This time we had good luck. We hunted down an elite-level sand python and obtained a set of elite-level weapons. We didn’t need any of them, so we discussed it and planned to auction it. After all, the auction will be opened.’

Lu Yuan was a little excited when he saw a few people, and he also laughed: ‘The luck is indeed good, congratulations.’

For Lu Yuan, a set of elite-level genetic weapons may not be a big deal.

But for ordinary people, elite-level weapons are too rare.

A set is a must-have.

‘Hahaha! This time I can also divide more than a thousand spirit crystals! Maybe I can go further before the college entrance examination, and then get a better Warrior Academy.’

Zhuo Ming smiled when he spoke.

Green looked at Lu Yuan: ‘By the way, Lu Yuan, we plan to go to the entertainment city to celebrate, do you want to come with us?’

‘Entertainment city? Not so good, right?’

Lu Yuan hesitated.

He Lu Yuan is not the one who goes to such a place!

Others call him Pure Little Langjun.

‘Go to Brother Yuan! There are many beautiful women there.’

Zhuo Ming looked excited, and the others were also smiling.

‘You all said that, then go.’

Lu Yuan smiled.

Since Green and the others have asked him so, he is naturally very kind.

It’s definitely not that he wants to see if the young lady there looks good.

When he came to the entertainment city, Lu Yuan discovered that this is not just a bar where genetic warriors drink.

This is a huge entertainment area.

The streets are very prosperous, and a large number of genetic warriors are shopping here.

There are some snack bars on both sides of the street.

These snack bars sell a variety of late-night snacks, and the materials are naturally the fierce beasts of Sandstone City.

For example, grilled spider legs, grilled sand ant meat and so on.

Further inside are some entertainment buildings.

There are various virtual game shops, cat people, humans, elves and kobolds various entertainment activities.

Then there is a bar.

Lu Yuan and his party walked into the most prosperous sandstone bar, which was different from the kind of swanky bars that Lu Yuan had expected.

The bar here is a bistro, where everyone can have a drink with friends.

There is a good-looking elf singing on the stage.

The singing was melodious, and Lu Yuan saw the genetic war pattern on her wrist.

Zhuo Ming showed a smirk when Lu Yuan looked at the elf singer:

‘Does Brother Yuan think she is pretty?’

Lu Yuan turned his head, UU reading www.uukanshu.com saw Zhuo Ming’s slightly wretched smile, and the corners of his mouth twitched:

‘I’m just curious, she is a genetic warrior, how can she sing here?’

Green smiled and said:

‘What’s the matter? Many genetic warriors will do some part-time jobs when they return to the city to take a break. The singers here seem to earn hundreds of spiritual crystals every hour, but they earn more than us.’

Lu Yuan suddenly.

turned out to be a part-time job.

‘Brother Yuan, how about it? Are there many beauties? Look at the table at eight o’clock, the four cat people, aren’t they?’

When Zhuo Ming entered the bar, the whole person seemed to be flying by himself, his eyes became fierce, and he looked around without showing a trace.

The corners of Lu Yuan’s mouth twitched, and he vaguely saw the green light in Zhuo Ming’s eyes.

This must be an illusion, right?

Lu Yuan turned his head and looked over in silence. It was indeed pretty.

may be because the genetic warrior itself has more advanced genes.

The looks of most genetic warriors are on the high side.

But even so, Lu Yuan thinks the best thing is the last night Ye Ye met.

With Zhuo Ming’s help, Lu Yuan did see a lot of beautiful cat people, elves and human women.

But the popular link that Lu Yuan thought did not appear. At most, a few female genetic warriors looked at him more, and no one came to talk to him.

Several people drank some wine together, chatted for a while, and after relaxing, they left the bar.

For the next three days, Lu Yuan went to the gravity room to practice during the day, and returned to the house to rest at night.

At night three days later, Guangmen completely recovered, and Lu Yuan left the place of origin.
