

# Chapter 92: My Genes Evolve Infinitely

## BAIYUNZHOU

After getting the bank card, Lu Yuan pasted the previous unbound bank card with his exclusive bank card.

With a thought, he transferred the balance of Lingjing that was not bound to the bank card to the dedicated bank card.

His exclusive bank card information has changed.

【Origin Bank Card (General)】

[Exclusive: Lu Yuan (Private Information)]

[Deposit: 243,000 Tier 0 Lingjing (Private Information)]

Lingjing is a trainee level, also known as level zero.

Lu Yuan accepted the exclusive bank card with satisfaction.

When Lu Yuan walked out of the bank, the sky was already dark.

Lu Yuan's belly is also a little hungry.

The auction was held for a day. From morning to night, it is normal for Lu Yuan to be hungry.

He didn't plan to do anything else today. He randomly found a shop opened by a human gene warrior. After eating something, he returned to the rented house to rest.

After washing, lying on the bed, Lu Yuan thought about what to do next.

The auction is over, and he can leave Sandstone City.

However, leaving Sandstone City and going to other cities, you will pass a lot of high-level fierce beast areas, and it is easy to encounter powerful fierce beasts, maybe even Tier 2 or even Tier 3 fierce beasts.

This is one of the most dangerous and difficult stages in the growth of genetic warriors.

He just got the bank card now, if he died on the road, even the bank card would fall.

He didn't want to drop all the more than 200,000 spiritual crystals this time.

Even if you want to leave, you have to wait until the next time you come in.

Lu Yuan even thought, since the gravity room of the martial arts training hall is so effective, it's better to use up the spirit crystals and wait until his strength reaches a certain level before setting off.

It's also safer.

Anyway, even if I rush to go to other places to practice, the effect is not as good as that of practicing in the gravity room.

Thinking of this, Lu Yuan made a decision.

Waiting to turn all the spirit crystals into strength, leaving Sandstone City.

.....

The following time, Lu Yuan went straight to the martial arts training ground when he got up early in the morning, and practiced in the gravity room for five hours.

As Lu Yuan's tempering degree increased, his consumption of spirit crystals also increased.

After spending about six thousand spirit crystals, he went out to rest for a while, eat something, and then continued to open the gravity room to practice for five hours.

More than 10,000 spiritual crystals were spent in one day.

Seven days later, Lu Yuan consumed about 80,000 spiritual crystals, and the white mist light gate was repaired, before Lu Yuan left the place of origin.

On this day, Lu Yuan's gene refining degree of 'Red Copper Light' has reached 70%.

The practice speed is very exaggerated.

This is because the higher the tempering degree, the slower and slower the improvement, and the greater the consumption.

Otherwise, he even reached a higher level.

In addition, Lu Yuan spent more time in the place of origin, reaching ten days.

After came out, Lu Yuan took a peaceful rest for a day, took Li Qinghe out for a meal, went to the mall again, and bought some clothes for himself and Li Qinghe.

once again brag with a group of classmates in the future God of War group.

Zhuo Ming couldn't hide this stuff at all. As soon as he came out of the place of origin, he started blowing Lu Yuan in the group and took them to the box of the auction.

Zhuo Ming: 'It's not that I said that Brother Yuan is really awesome. It has only been in the Land of Origin for more than a month, and his income has surpassed 200,000 Lingjing casually. This is more than the income of the captain of our adventure team in two years. Gao! Our captain shut down on the spot in the evening when we went back. There must be one of our big bosses in Daqixing's future, okay! Otherwise, I will wash my hair upside down!'

Wang Xiangxiang: '@陆缘, big brother, please support!!! Send you ten black silk photos!!!'

Winnie: 'Woohoo! Sister Xiangxiang, add me! Let's shoot together!'

Jasmine: 'Silently raise her little hand, take me with you, thank you.'

Gu Yu: 'Brother Yuan, can we keep our \*\* away from being too deadly? I think I'm pretty pretty too...'

Cao Yan: 'Lu Yuan is awesome! I feel a little bit moved by what you said.'

Lu Yuan: '.....'

He looked at the words of Wang Xiangxiang's three people, his fingers jumped, and he typed a line:

'Are the three of you filming together?! Private chat! Send it to me!'

But before pressing the send button, Lu Yuan's hand was quick and he deleted this line of words in an instant.

How could Lu Yuan be like that? !

I'm a man who has broken away from low-level tastes!

It must be impossible for me to type out the line just now, there must be some evil \*\* tempting me just now!

He re-sent the message seriously:

'In fact, that's it, this spirit crystal is used very quickly, and it will be gone after a short time.'

Zhuo Ming: 'Brother Yuan, I understand this! Buy a full set of elite weapons, plus such a boss weapon, and it will be gone immediately. I know what you mean!'

Lu Yuan couldn't help but twitched the corner of his mouth when he saw this.

He wants to say that he already has two boss-level weapons, and the consumption of this spirit crystal is entirely for cultivation.

After thinking about it, Lu Yuan still didn't say anything, but just continued to talk to them.

The next day, Lu Yuan returned to the place of origin.

This time, Lu Yuan's time in the place of origin became longer again, and he stayed for a full eleven days.

As his cultivation level increases, Lu Yuan consumes spirit crystals at a faster rate, and he needs to consume around 15,000 spirit crystals a day.

This is equivalent to consuming one and a half pieces of elite weapons every day.

It's totally unimaginable to change to another genetic warrior.

Cultivation consumes such a large amount, so it's still a fart to practice...there is not enough money for cultivation.

But precisely because of this, Lu Yuan's progress has been tremendous.

On the eleventh day, Lu Yuan's 230,000 spirit crystals consumed only more than two thousand points.

His 'Red Copper Light' gene, which needs to be refined because it has evolved to the boss level, has been refined to the level of 94% at this moment.

Although he hadn't been tempered to perfection, Lu Yuan's defensive ability had nearly doubled compared to before.

Strength and speed have also been slightly improved.

The most important thing is that I have been in the gravity room continuously for more than half a month.

Lu Yuan's Hei Gangjin finally reached the third level of cultivation.

Under full use, it is enough to double the power.

Under such circumstances, Lu Yuan's strength was not much worse than his defensive ability.

The only weak point in Lu Yuan right now is probably in terms of speed.

Even so, it surpassed the average elite fighter of the same rank.

After all, two boss-level genes plus a boss-level gene weapon are no joke.

When Lu Yuan once again withdrew from the place of origin, this was all the progress Lu Yuan had made.

Although it consumed more than two hundred thousand spirit crystals, the effect still made him extremely satisfied.

After leaving the Origin, Lu Yuan was ready to leave Sandstone City next time he entered.

For this, he learned about some posts on Battle.net.

Finally, the human race city closest to Sandstone City was selected, Tianluo City.

On the one hand, Tianluo City is located closest to Sandstone City, and on the other hand, on the way to Tianluo City, there are fewer high-level fierce beasts to pass through.

For the first-order Mengxin, this can reduce too much danger.

Lu Yuan remembered the map from Sandstone City to Tianluo City again.

Avoid getting lost when I don't know where to go.

By the way, Lu Yuan also prepared a few bottles of first-order potents and bought some special items.

spent more than nine million yuan in Lu Yuan.

The big head is a powerful potion.

too expensive.

The first-order potent healing potion actually costs 1.2 million bottles.

Speed potion costs 2 million bottles.

Power potions and defense potions are also 1.5 million bottles.

Lu Yuan thought it was wrong at first.

The price is simply outrageous.

Compared with the trainee level, it has turned ten times!

Converted into Lingjing, it costs about 8,000 to 10,000, which is almost the price of a trainee-level elite weapon~[www.mtlnovel.com](http://www.mtlnovel.com)~ Fortunately, he is still rich, and he bought a bottle of one as his trump card.

That's all, Lu Yuan has already spent 6.2 million.

plus something else, spend money like water.

Lu Yuan felt that the genetic pharmacist was too profitable.

It's a pity that he doesn't have a potion formula, and he can't refine it.

Otherwise, he wants to refine genetic medicine to sell.

After was ready, Lu Yuan once again entered the land of origin.

Lu Yuan appeared outside the martial arts hall.

He glanced at the martial arts training hall. During the more than half a month in the Origin Land, he spent most of his time here, and he had already felt a bit emotional with it.

Unfortunately, I still have to leave.

Lu Yuan turned around and left. After leaving the city, he looked at the yellow sand in the sky, and he distinguished the position below.

‘Sand Rock City is in the west... Tianluo City is in the northeast, right?’

Lu Yuan ran towards Tianluo City.

Through the map, Luyuan knows that the state where the four initial cities of Sandstone City and Stormwind City are located is Baiyunzhou. The most prosperous city here is naturally the Baiyun City that comes with the place of origin.

In addition, there are still many other cities in the entire Baiyun prefecture.

In addition to humans, elves, kobolds, and cats, many other races also entered the land of origin and fell in Baiyunzhou.

The entire Baiyun Continent is extremely huge. Even if many races have entered the Origin for so many years, there are still large areas that have not been explored.

In some areas, it is difficult for even the strongest warriors to penetrate, and if you enter, you will die.

But these dangerous areas are still too far away for Luyuan.

He still has to run away hard, so he ran to Tianluo City first.
