

The Mightiest Little Peasant Chapter 1186

After looting the entire ape Island, Tang Hao left, satisfied. Not only did the Scarlet Flood Dragon's cultivation level skyrocket, but its body also expanded several times after reaching the intermediate stage of the nascent soul realm. It looked even more ferocious and divine. "Not bad! Not bad!" Tang Hao was satisfied with the results. "Why don't ... I go to the sixth continent?" Tang Hao pondered. Although the realm of the red Wyrms had increased dramatically, it was still far from his current cultivation level. It couldn't be of much use. He had to increase it a little more. It would be great if he could reach Dao pursuing level. Moreover, he did not have any virtual gods left. He had lost all of them, so he had to get more. After making up his mind, he headed to the sixth continent. When he reached the sixth continent, he started to search everywhere. He devoured souls and pillaged to feed the flood Dragon. Soon, a legend of a terrifying demon appeared on the sixth continent. "Have you guys heard? there's a demon recently. He's extremely terrifying. Wherever he goes, it rains! It's said that it's a demon that was cultivated from an ancient beast!" "He also brought a flood Dragon with him. It's a Scarlet Fire spirit flood Dragon, and its strength is also quite terrifying!" "They are too brutal. Wherever they go, disaster follows. All the treasures have been robbed, not even a brick or a hair is left! Not even a blade of grass was left! Some people say that it's not an ancient beast, but a Locust demon!" "Locust demon? Hey! That's right, that guy's true form is definitely a Locust!" The sixth continent was in an uproar. The so-called devil was none other than Tang Hao. He had led the flood Dragons to roam the sixth continent, leaving his trail in every place where Yin Qi gathered. He cut off one soul after another, turning them into Buddhas and even dragons. The Scarlet Flood Dragon's cultivation level was also rising, from the middle stage to the great circle, and finally broke through to Dao seeking. In the beginning, there were still big demons who came to find trouble with him, but after he scared off a few, no one dared to come again. The old crane had also been here. It stared at him from afar for a while, then turned and left without a word. In half a month's time, Tang Hao toured the sixth continent and then left. He brought the red flood Dragon to the fifth continent and then went to the seventh continent along the way, killing many virtual gods. Some of the old monsters appeared, but they ran away when they saw that it was Tang Hao. They were also very helpless. Although this brat's cultivation was the same as theirs, he had a Supreme treasure in his hand. In addition to that pair of dragon eyes, his combat power was too strong. In terms of one-on-one combat, they were no match for him at all. Even if they joined forces, it would be very difficult to do anything to this kid. This brat's current strength might not be comparable to a sect master, but he was definitely at the top of the quasi-sect Masters. Among all the old monsters of the sixteen continents, only the top three could be his equal. After leaving the seventh continent, Tang Hao returned to his residence. He first returned to the Western ridge for a period of time. After he returned, he focused on cultivation and comprehended the reincarnation technique, the withering technique, the life controlling technique, and other techniques in order to deepen his understanding. At the same time, he was also studying the divine void Scripture. In this technique, there were only four levels of virtual God. The lowest level was golden-armored strongman, followed by ghost God, Buddha, Azure Dragon, and nothing more. The Cang Dragon's strength was at most at the late stage of Dao seeking. This might have been limited by the strength of the creator, which was why it stopped here. Tang Hao wanted to continue to derive this technique and create even stronger virtual gods. On the other side, the Daoist priest and the others were cultivating very quickly. More and more people were in the exceptional gold core realm and more and more people had condensed nascent Qi. For example, star pupil had condensed seven or eight flashes of nascent Qi. Even Taoist master Qian Ji had condensed three flashes of nascent Qi. There were even more with one flash of nascent Qi. Tang Hao planned to bring them here after they had condensed enough nascent Qi so that they could attempt to form their nascent souls together. As long as he reached the nascent Soul

Stage, with Kun Lun's current resources, it would be very easy for him to reach the late stage of the nascent Soul Stage, or even the peak stage. At that time, a large number of peak stage nascent Soul Stage experts would appear. At that time, they would be more powerful than any other force in the ninth continent. In fact, Tang Hao had always wanted to build a sect here, but the time had never been right. Now that he had so many enemies, it was even more inappropriate. In the blink of an eye, more than a month had passed. It had been more than three months since the trip to the monster oasis. On this day, uncle SAP came again. "Where are we going this time?" Tang Hao asked. "The 15th continent!" Sir system said, "don't be too happy yet. It's different this time. We're just going to dig for treasures and try our luck. If we're not careful, we might even be in danger." Tang Hao was surprised. Sir system explained, "on every continent, there are a few dangerous places. There are Forbidden Lands. On the fifteenth continent, there's also a place like this. It's very dangerous. It's famous in the entire Qi Yuan planet." "That place is called the ancient Dao Lake. It is known as one of the ten most dangerous lands in the primordial Qi!" "The ten most dangerous lands?" Tang Hao was shocked. "That's right. That place is very dangerous. For so many years, many old monsters have died there. However, the more dangerous the place is, the more opportunities there are." "The ancient Dao Lake has a 'Lake' in its name, but it's not a real Lake. The water inside has long since solidified into a nine-colored crystal. Many ancient treasures are sealed inside." "If you're lucky, you'll be able to dig up a lot of treasures. Look at this, I dug it up from over there." Sir system took out a small purple sword and showed it to Tang Hao. Tang Hao's expression changed as he thought of the five-colored mountains in the southern mountain range. Why did the nine-colored crystal look a bit like the five-colored essence crystal from the five-colored mountain? After expressing his doubts, Sir system nodded and said, "Five colored mountain, I know. I've been there many times before. The two are similar, but they're not on the same level." "I'll Take You There first. You'll know when we get there!" They went to pick up old Daoist Liu and the others. The group boarded the large ship and headed towards the fifteenth continent. A few days later, the ship arrived at the northern part of the 15th continent. "It's there!" Sir system pointed into the distance and said to Tang Hao. Tang Hao looked up and saw a mountain range at the end of his line of sight. It was enshrouded in a thick mist. The mist was strange. It was neither white nor gray, but nine-colored. "That fog ..." Tang Hao was surprised. Sir system's expression turned serious. "That's called the nine-colored crystal Mist. It's because of this that this place is so dangerous and deserted." This mist is highly toxic and also highly corrosive. Once you're touched by it, you'll be in trouble. Once you inhale it, you'll be finished!" "The fog is relatively light now, it's a good time to go in. There's only such an opportunity every few decades. Not only US, but the old monsters from other continents will also come." As he spoke, he steered the ship forward, approaching the mountain range.
