

The Mightiest Little Peasant Chapter 1365

“Which faction in Donglin is the most powerful?”

“That’s hard to say. The Dong Lin star field is too big. There are 3000 stars and there are hundreds of main stars. The celestial sects and ancient clans are like the nine Heavens. There are countless of them.”

“These immortal sects and ancient clans have all been around for thousands of years, even tens of thousands of years. They have deep foundations and terrifying strength!”

In a restaurant on one of the main planets of the Dong Lin star field, an old man was introducing wine to Tang Hao.

“Of course, the most powerful ones are definitely the forces on planet Dong Ling. Only the forces that can establish themselves there are the true top forces!”

“Planet Dong Ling isn’t an ordinary planet. It’s a Supreme Saint planet. It’s more than ten times the size of an ordinary main planet, and its territory is boundless.”

“On the sacred planet, the appearance of the primitive times is still preserved. Not only are there humans, but there are also many terrifying creatures, such as those primitive fierce beasts. Every one of them is an Overlord.”

“The spiritual Qi there is extremely rich, and spiritual essence is everywhere. It’s known as the land of immortals. It’s a dream-like place, and there are many ancient orthodoxies there. Countless people dream of going there!”

Tang Hao was surprised when he heard that.

On his way here, he had heard many rumors about planet Dong Ling. It was truly a dream-like place.

The old man said with some fascination.

Who wouldn’t want to go to that kind of Dreamland!

But then, he shook his head and sighed, "The Holy planet is good, but it's too dangerous. If you want to go, you'll have to think twice! Those prehistoric beasts were too terrifying. They just opened their mouths and swallowed tens of thousands of people."

"It's said that there are many prehistoric beasts that have survived since ancient times. Every one of them is a terrifying giant and has lived for countless years."

"Wow!" Tang Hao exclaimed. He was even more surprised.

The old man paused for a moment, took a few sips of wine, and then continued.

"There are many forces on the sacred planet, such as immortal sects and ancient countries. All of them are very powerful. If you want to go, it's not a bad idea to find an immortal sect and join it."

"With a force, it's easier to gain a foothold there! Otherwise, you won't be able to survive!"

"Oh! That's right, there are also three great forces, known as the three great pure lands, which are above all these forces!"

At this point, the old man's eyes brightened and his tone was raised by a few degrees.

"The three great pure lands?"

Tang Hao was surprised.

"That's right. The three great pure lands are the pride of our human race. Each of them is extremely ancient and has been passed down from the most ancient times. The three pure lands are the heaven-equal Academy, the war god mountain, and the primordial chaos dojo."

"These three forces have always been the benchmark of the human race. It is everyone's dream to join one of them. Unfortunately, they are very strict in accepting people. They only accept young geniuses. If I was a few hundred years younger, I might have a chance."

As he spoke, the old man sighed with emotion and was somewhat disappointed.

Tang Hao's heart skipped a beat when he heard that.

He had come to Dong Lin Starfield to find a backer. Since he was going to find one, he had to find the most powerful one. Otherwise, it would be no different from not finding one.

The three great pure lands sounded pretty good.

"Brother, how do we enter the three forces? When are they recruiting?"

Tang Hao asked.

The old man looked at Tang Hao and smiled. "What's wrong? Do you want to go?"

"I won't hide it from you, elder brother, I really do have such an idea!" Tang Hao said.

The old man shook his head and sighed, "difficult!" It was too difficult! There are too many people who want to join the three major forces. Heaven's favorites, monstrous geniuses, countless of them come every year, but only a few can join them. "

"However, if you really want to go, there's no harm in trying. Just take it as an experience. I'm not too sure when it will happen, but it happens every year. "

After asking around for a while more about planet Dong Ling, Tang Hao left.

He steered the sky Thunder ship and headed straight for planet Dong Ling.

The Dong Lin star field was vast and boundless. It was dozens of times larger than an ordinary star field. There were countless stars in it, and it was said that there were three thousand cultivation stars. As for the other desolate and dead stars, they were countless.

Although this starry sky was large, it was also quite lively. Along the way, bright lights could be seen from time to time, like meteorites, speeding through the starry sky.

Some were planetary ships, some were astrolabe, some were chariots, and there were even some that crossed with their physical bodies. They were all heavenly Lords who had become Immortals, and their immortal radiance illuminated the starry sky.

The other star systems weren't as lively as this. From this, it could be seen how prosperous the Dong Lin star system was.

This star field was also filled with danger. Not only were there all kinds of meteorites shuttling back and forth, but there were also various dangerous areas filled with all kinds of tribulation light and murderous aura.

Of course, there were also many space beasts and threats from other cultivators.

Along the way, Tang Hao was extremely careful. He relied on the sky lightning boat's speed to avoid many dangers.

Three days later, he was close to his destination.

At this point, the starry sky became more and more lively. Rays of light flew in from all directions and rushed forward.

In front of him, there was a star.

Tang Hao examined the star in front of him closely. He was shocked.

This planet was simply too big, so big that it was indescribable. In front of it, he couldn't even be considered a speck of dust.

"There really is such a huge star!"

Tang Hao mumbled. He was shocked.

Back on Earth, he had learned that there were many super stars in the universe that were indescribably large. However, when he saw them in person, he couldn't help but be shocked.

Previously, he had also thought that the Qiyuan star and the giant gate star were already very big. However, the star in front of him had still exceeded his imagination.

“This vast universe is really amazing!”

Tang Hao could not help but sigh.

After staying in the starry sky for a while, he drove the planetary ship again and flew toward this star.

After entering it, he found a star City and landed.

This Star City was very large, and there were people everywhere, making it very lively.

Many rays of light fell from the starry sky and converged into the Star City. There were also many rays of light that flew out from the star City and scattered in all directions.

This Star City was like a relay station. One had to stop here for a moment to enter and exit.

Tang Hao strolled around the city, and his horizons were broadened.

The sacred planet was indeed a sacred planet. It was indeed extraordinary.

“This is ... A precious medicine? Heavens!”

Tang Hao saw a sparkling and translucent herb in a pharmacy. It exuded a refreshing fragrance.

This wasn't an ordinary spirit medicine, but a treasured medicine. It was a medicine that had become a spirit, and contained extremely astonishing spiritual essence.

“As expected of a deity ground!”

Tang Hao was shocked. Only the spiritual Qi on the Donglin sacred planet could produce precious medicine.

“This is ... A wing of the Golden-winged ROC?”

Tang Hao saw a feather in a store that sold mystical materials. It was shining with a golden light and exuded a shocking pressure.
