

## The Mightiest Little Peasant Chapter 1514

After waiting in the hall for a while, the elders returned.

“Senior, look, this is the formula!”

Gu yuezi handed over a scroll and a ring. “There are more than 150 sets of materials in here!”

Tang Hao took the scroll and opened it. He raised an eyebrow when he saw what it was.

Upon seeing this, Gu yuezi became a little nervous.

Although this recipe was precious, it was of little value because it was simply impossible to do it according to the method recorded on it. That was why so many ingredients had been accumulated.

“Senior, is there a problem?”

He asked in a low voice.

“No problem!”

Tang Hao smiled.

After looking at the recipe, he finally understood why the heavenly craftsmen faction was so forthright.

This stainless soil was indeed a divine item, but it was too difficult to refine. It needed to be repeatedly tempered with Dao fires of different attributes until all the impurities were removed and it was pure and stainless. Only then could it be considered a success.

The requirements for the flame and cultivation level were too high.

However, while this might be impossible for the heavenly craftsmen faction, it was not impossible for him. He had the genuine fire and his cultivation level was also at the mid-stage of immortal transformation, so he still had a chance to refine it.

Hearing this answer, Gu yuezi was stunned.

With this senior’s cultivation realm, it was impossible for him not to see the problem with the formula. Why did he agree so readily? could it be that ... This senior was confident in refining it?

When he thought of this, his mind suddenly trembled and he was somewhat overwhelmed with shock.

The heavenly craftsmen faction had a long history. This recipe had been there since the founding of the sect, but only the founder of the sect could make it. After the founder, no one else could.

Tang Hao opened the ring and inspected it. He nodded in satisfaction.

“Senior, do you ... Need anything else? our heavenly craftsmen faction has many good things ...” Gu yuezi said.

“No need!”

Tang Hao smiled, then got up and left the hall.

“Farewell, senior!”

The group of elders in the hall went out to welcome and send off this senior.

“This senior ... Is really a good person!”

“Two tribulation weapons, I’m rich!”

Then, they laughed in joy.

“Al! Sect leader, why do you think senior wants this formula? it’s not like he can refine it. ” One of the elders asked in bewilderment.

“That’s right!”

The other elders chimed in.

They all felt that this senior was a little stupid. He had smashed two calamity grade weapons in exchange for an impossible recipe and some materials. He was simply a fool with too much money.

Gu yuezi rolled his eyes and chided, “What do you guys know? do you really think senior is stupid?”

Gu yuezi looked into the distance and his expression turned solemn. He said in a deep voice, “Do you know who that senior is?”

“Who is it?”

“Who else do you think will be able to become an immortal and possess many tribulation weapons?” Gu yuezi asked.

The group of elders were stunned. Then, as if they had thought of something, they revealed a look of horror.

“Don’t tell me ... It’s him?”

An elder exclaimed in disbelief.

“Who else could it be besides him?” Gu yuezi nodded.

All the elders took in a breath of cold air, showing a look of respect and fear.

Revered flame!

This name was like thunder reverberating in his ears.

In the battle of the treasure Mountain, he had condensed the primordial fire and killed many heavenly Lords. He had become the most powerful figure in the entire Dong Lin Galaxy.

They had heard too much about this person during this period of time, but they had never thought that they would one day be able to see his true appearance.

“It’s good to sell it. With this person’s ability, he might really be able to refine it. At least this formula won’t be wasted.” Gu yuezi sighed.

Then, he turned around and said to the elders, “Remember, you can’t tell anyone about this. Otherwise, our heavenly craftsmen faction will be in deep trouble!”

“Yes! Sect master!”

All the elders immediately became serious and responded in unison.

----

After leaving the heavenly craftsmen faction, Tang Hao landed in a nearby Valley. He found a cave and sat down.

“Stainless soil!”

He took out the recipe and looked at it again.

This stainless soil was an extremely magical thing.

Legend had it that living beings like humans were made from earth. The people of the later generations all wanted to imitate this legend and learn from the creator to create living beings from earth.

After countless attempts by mighty figures, this immaculate soil was finally born. It was known as the divine object closest to the soil of creation. A physical body made from this soil could be compared to a real physical body.

Of course, it was only close to it. It was not exactly the same.

However, it was said that the flesh refined from this soil was so lifelike that ordinary people wouldn’t be able to tell it apart. It was a top material for refining puppets and avatars.

Tang Hao had obtained the recipe to create his clone.

He had many split souls, but these split souls were only soul bodies after all. They didn’t have a host body. He wanted to give these split souls a physical body so that they could become split bodies and be more useful.

Now, he only had one clone, which was the clone formed by the heaven and earth origin embryo.

An origin core was a natural wonder, so the stainless soil naturally could not be compared to it. However, an origin core was something that could only be encountered but not sought, so it was not so easy to obtain.

He could only take a step back and use this stainless soil.

Tang Hao took out the ingredients and laid them out one by one after reading the recipe.

This recipe was very complicated. There were all kinds of rare soil, gold and iron, and all kinds of spiritual liquids. He needed to mix all of them together and temper them continuously until they were completely fused and all the impurities were removed. Only then could he succeed.

He muttered to himself for a long time and went through the formula again. Then, he took out the Golden cauldron and threw in a set of materials.

He began to refine it, but very quickly, with a bang, there was a muffled sound inside. The furnace had exploded.

Refining this thing was like refining pills, there were many things to pay attention to.

Fortunately, he had enough materials. Tang Hao tried again and again. After four or five times, he was familiar with the process. The first portion of the stainless soil was successfully made.

He kept the soil and continued to refine.

In the beginning, he only managed to make seven or eight out of ten portions. Slowly, the success rate increased. After half a month, he used up all the materials and finally made more than 120 portions.

Now that the materials were refined, the next step was to mold the person.

“F \* ck! How do I do this?”

Tang Hao hesitated.

More handsome? Or more powerful?

These were all problems.

“Forget it, I’ll let them decide for themselves!”

Tang Hao then released a group of split souls and let them decide for themselves.

“I only have one request. Handsome, extremely handsome, handsome to the point of breaking the sky!”

“Men! Of course, it has to be more powerful and cool!”

They chattered and expressed all kinds of different opinions.

Tang Hao listened to their suggestions and made all kinds of shapes. There were beautiful men, strong men, and all kinds of styles.

“Fellow Daoist, make that thing bigger!”

“It has to be this big! It’s not enough, I want it to be bigger!”

They all made a small request at the same time.

“F \* ck! Bigger? It’s a Mace, it’ll scare people to death!”

“No! It can’t be any bigger!”

Tang Hao was speechless, but he still did as he was told. It was just a clone, so it did not matter how big it was.

Soon, one hundred and twenty-eight bodies were born.

“Now that the body is complete, that’s the soul. Next, I have to perfect the God void Scripture. The old dragon level is not enough!”

Next, Tang Hao began to perfect the God void Scripture.
