

The Mightiest Little Peasant Chapter 1516

Time flew by, and in the blink of an eye, several months had passed.

Tang Hao stayed in the valley, cultivating and farming.

Another batch of herbs in the cave abode had ripened. Tang Hao was not in a hurry to harvest them. He planned to plant them for a while longer so that the herbs could grow a little older.

At that time, he could refine a pill and break through in one go.

On the other hand, the outside world was quite calm. There were no waves, and no one had heard of anyone searching for him. Now that he had established his strength, those ancient clans and celestial sects would not dare to do so.

The days were boring, but Tang Hao was already used to it.

A month later, Tang Hao saw that the herbs in the herb garden were about the same age. He collected them and refined them into pills. He consumed them and broke through to the late-stage in one go.

Tang Hao was already very satisfied with the progress of going from the early stage to the late stage in a little more than a year.

If he didn't have that magical treasure bottle, it would have taken him several years to reach this realm.

"At this realm, it won't be easy to advance any further!"

Tang Hao estimated that with the current scale of the herb garden, it would take him at least a year to reach the perfect stage. After all, the more he grew, the more spiritual Qi he would need.

The amount of spiritual Qi required to go from the late stage to the completion stage was quite terrifying.

"It seems that I have to go out for a walk!" "I'll have to think about turning into a mortal," Tang Hao mumbled.

After becoming a perfected immortal, it was time to break through to the immortal tribulation realm. Once he broke through, he would become a half-immortal, a Saint, and a mighty figure who truly stood at the peak.

If he couldn't, he would die and everything would be in vain.

This stage was very difficult and extremely dangerous. Since ancient times, countless cultivators had fallen at this stage.

There were many people in the great circle of the immortal realm on planet Dong Lin, but there were only a few Saints. This proved how difficult this test was.

Even in ancient times, not many could make it through.

This trial was divided into two steps. The first step was to transform into a mortal!

After becoming an immortal, he would then become a mortal, from an immortal to a mortal, and return to being ordinary.

This was not only a change in his state of mind, but also a change in his physical body. Everything returned to normal, and he became an ordinary person.

This was more like a kind of Nirvana!

In the mortal realm, one could return to the original state and understand the great Dao. Only then would one have the chance to reincarnate, enter the immortal realm, and welcome the immortal tribulation.

This was the most difficult step. Countless people had spent their entire lives trying to become a mortal, but they had never succeeded.

Tang Hao had no idea how to transcend into a mortal. He had only heard about it from others. It was too mysterious and difficult to explain. He could only understand it after experiencing it himself.

He only knew that this was a very difficult and extremely dangerous task. This was because when one transformed into a mortal, they would completely become a mortal without any divine powers.

At this moment, he was probably at his weakest.

He had once heard that someone was found by his enemies when he was trying to become a mortal and was easily killed.

Thus, he had to choose the right place to transcend into a mortal.

"I can't be in Donglin, and I can't be in this star region either. I have to leave this place and find a safe place without many powerful cultivators. It's best if it's a small star."

Some powerful forces might directly control a star so that their Lord of heaven could become a mortal, but Tang Hao did not have such a force. The best choice was to find a safe, small star.

He thought for a bit and decided to leave this place and go to another star system to find a safe place for him to become a mortal.

"Where should I go?"

Tang Hao raised his head and looked at the sky.

"Let's go for a walk first!" He muttered to himself after a long time.

“I’ve already planted my avatars. It’ll take some time for them to infiltrate the major forces. I’ll leave some avatars along the way so that they can inform me of anything that happens here!”

After packing his things, Tang Hao soared into the sky and went to Star City, the same one he came from.

Planet Dong Ling was too huge, so there were two star cities.

Everyone was gathered here, and it was extremely lively.

Tang Hao walked along the path, feeling a little emotional.

When he came, he was still at the two-slash realm, but when he left, he was already at the late-stage immortal transformation realm.

He went straight to the star Hall.

“This starry sky is very vast and boundless. Legend has it that there are millions of stars and countless star fields. However, there are actually not many heavenly realms. As far as I know, there are only five.”

“North, South, East, West, and center are the five great astral realms. The great astral realm, Donglin, that we’re currently in, is the eastern astral realm. The other four are Beichen, Nanli, Xihai, and the center.”

An old man in the star Hall introduced the two to Tang Hao.

“In these five great heavenly worlds, there are branches of my star Hall! Wherever there is a cultivation star, there will be my star Hall!”

“Where is your headquarters?” Tang Hao asked curiously.

“The central astral, of course!” The old man laughed, “you don’t even know this?”

Tang Hao shook his head. He didn’t know much about the starry sky. After coming to Donglin, he didn’t pay much attention to it.

After asking around, Tang Hao bought the star map.

“The North Star realm! It seems to be the latest. Let’s go there and take a look first!”

Tang Hao quickly made a decision.

Currently, he was only at the advanced nascent soul realm. There was still a long way to go before he could reach the transcendent mortal realm.

He left the star Hall and immediately set off. He didn’t even need a planetary ship. He directly soared into the sky and rushed into the vast starry sky, using his physical body to cross over.

In the realm of Dao severing, one's physical body wasn't strong enough and needed the protection of a planetary ship. But once one became an immortal, there was no need for that. One could directly cross over.

Tang Hao's physical body was still so strong, so he was even more fearless. He charged forward. He didn't even need to Dodge a meteorite. He just crushed it.

"F * ck! It's so fierce!"

"An expert!"

On the way, they often came across some passing planetary ships, and a few exclamations came from them, which left the Dao-severing perfected Lords dumbfounded.

They had often encountered heaven monarchs who could travel across the starry sky with their physical bodies, but they had rarely seen such a ferocious heaven monarch.

Some of the bandits who had been camping in space didn't dare to come up. They ran away immediately, their faces pale with fear.

Such a heavenly Lord was obviously a fierce person and should not be provoked.

Tang Hao's journey was smooth. He followed the star chart's directions and flew straight to the North Star astral.

Dong Lin and Bei Chen were about ten galaxies apart. With Tang Hao's current speed, it would take him more than a month to fly. Whenever he saw a star, he would land from time to time to calculate the distance and place another clone.

The distance between the heavenly worlds was too far. He couldn't rely on his senses to communicate with his split souls, so he needed these split souls to send the news layer by layer.

Just like that, it took him a month and a half to pass through the many star fields and reach the North Star realm.

After that, Tang Hao continued forward. It took him half a month to reach planet Beichen.

The structure of the Beichen great astral world was similar to that of Donglin. They both had a Center, which was this planet Beichen.
