

## The Mightiest Little Peasant Chapter 1594

In the blink of an eye, a month had passed.

The waves that swept across planet Dong Ling finally calmed down.

The world had also gradually adapted to the new situation.

The heaven-equal Department was full of vitality.

All the elders and disciples were in a different state of mind. They had been suppressed by the two pure lands before, but now that they had gotten their revenge, they felt refreshed.

Elder Wang Yun was very busy because not long later, the sect would open its gates and recruit new people.

Now that the other two great pure lands were gone, and only the heaven-equal Department was left, the number of people coming to register would definitely be several times more than in previous years, which would make him very busy.

The sect head and Daoist Qingzhu went out a few times to visit the other Saints on planet Dong Ling and to find out more about war god mountain and the Hunyuan dojo.

However, he did not manage to obtain any useful information.

After all, this starry sky was too big. Just the Dong Lin star field alone had thousands of cultivation stars, not to mention those Wild Stars and dead stars. There were simply too many to count, so it was not easy to find someone.

As for Tang Hao, he spent most of his time in the cave dwelling studying alchemy. Occasionally, he would go out and visit his master and the others.

He also sent out all of his avatars and souls to various parts of the Dong Ling star system.

These remnants were a hidden danger that had to be guarded against.

During this period, these clones also sent him a lot of medicinal herbs, many of which were materials for the creation divine pill.

“This, I have it!”

“This ... I have it too!”

tang hao picked up the recipe and looked at the ingredients on it. he ticked off the ingredients that he already had.

after looking at it, he realized that he had already collected nearly two-thirds of it.

“It’s not easy!”

Tang Hao sighed.

This pill recipe contained nearly a hundred ingredients. They were either extremely rare or nearly extinct. There were also many divine items that were difficult to find in the world. It was extremely difficult for ordinary people to find even one of the medicinal ingredients.

It was not easy for Tang Hao to collect two-thirds of them.

Moreover, he had a divine item like the celestial water. As long as he could find a little bit, even if it was just a withered root or a leaf, he could still raise it and cultivate another leaf.

“There are still 30 more ...”

Tang Hao counted the names. When he saw the names, he furrowed his brows and felt his head throb.

“Mysterious heaven grass, Golden Dragon Cup, purple gold taisui ...”

Which one of these things wasn’t rare in the world? most of them had been extinct for many years, so where could he find them?

Also, there was one more thing that was even more excessive, the fruit of fortune.

This was also the most important material in this pill recipe. It couldn’t be done without it.

However, this thing had not appeared for at least a few thousand years.

“A!”

Tang Hao heaved a long sigh when he saw the recipe.

“It seems that I have to go out and take a look. I have to go to all the major Astrals, especially the central star area. It is said that it is more prosperous than the four sides of the astral. Maybe I will find something.”

Tang Hao mumbled.

He stood up, walked out of the cave, and walked around. He was quite pleased to see the lively scene of the heaven-equal courtyard.

He visited his Masters and then went to see the headmaster.

“You’re leaving?”

The headmaster was a little surprised.

After a long while, he said, "that's good. If you stay here, you won't be able to gather all the pill recipes. You're still young. Go out and take a look. Who knows, you might find some opportunities and improve your cultivation."

"As for the war god mountain and the primordial chaos Daoist sect, you don't have to worry about them. Brother Qingzhu will always be here. Also, I've spoken to some other fellow Daoists, and they're all willing to help our heavenly Academy. Once the old war god and the others appear, they'll help us."

Tang Hao was surprised when he heard that.

Before this, these people were all neutral and didn't help either side.

"Hey! They are all smart people. Now that old man Wargod and the others are no longer able to make it, of course they are willing to help us. Also, it is more or less because of you!" The headmaster laughed. "You're now the number one in Donglin!"

Tang Hao chuckled. He had never cared about the title of number one in Dong Lin.

"Since that's the case, I can rest assured!"

After chatting for a while longer, Tang Hao left.

After flying out of planet Dong Ling, he hesitated for a moment. "Which way should I go first? By the way, why don't we go to Beichen first? there are many acquaintances there!"

"I wonder if the old Daoist Xu Kong and the sect master of the Holy Slayer sect have returned. I can't let them off so easily. Why don't I pay them a visit and get some treasures along the way?"

Tang Hao's eyes glowed.

The Dao of void and the killing sacred sect were both pure Land-level forces. They would definitely have many good treasures.

It wasn't his style to not take the treasure.

"Very good! It's decided then!"

Tang Hao was in a good mood. He hummed a song and ran toward Beichen.

Along the way, he went to every star field, whether it was a cultivation planet or a desolate planet, he flipped over all of them and dug three feet deep.

His luck was pretty good, and he found another material.

Just like that, he searched and hurried along. After nearly two months, he finally arrived at planet Beichen.

"Beichen, I'm here again!"

Tang Hao smiled as he looked at the huge planet in front of him.

This farewell had been close to 13 or 14 years.

He descended to Star City and went to a restaurant to have a seat.

So many years had passed, and there were still many people who remembered him. After sitting in the restaurant for a while, someone had already mentioned him.

“That stone ancestor really became a Sage?”

“I ... I heard that it was like this, but I’m not too sure! It’s only been a few years, how could he have successfully transcended into a mortal? I think he’s most likely a fake. ”

“I think so too! If it’s true, then it’s too shocking!”

As they spoke, they would shake their heads from time to time.

This stone ancestor was a figure from more than ten years ago. At that time, he was all-powerful in Beichen. No one knew how famous he was. However, in the ten years that followed, he disappeared without a trace.

Everyone said that he had gone to become a mortal.

At that time, countless forces had heard the news and went to look for this person, but they seemed to have found nothing.

Gradually, this person faded out of people’s memories.

However, just a year or two ago, another piece of news came in. It was said that this person had successfully transcended into a mortal and had become a Sage.

This news caused a sensation.

However, not many people could confirm whether this news was true. Most people did not believe it. After all, stone ancestor was too young.

Tang Hao sat there for a while and left.

“The mountain Gate of the Dao of void seems to be here! Let’s go meet that old Daoist Xu Kong first and see if we can get any treasures out of him!”

Tang Hao headed toward the Dao of void first.

After a few hours, he arrived at his destination. The mountain Gate of the Dao of void was already in sight.
