

The Mightiest Little Peasant Chapter 1884

In the main hall, a group of alchemists sat upright and still.

Their eyes were all focused on the figure sitting cross-legged in the middle of the hall.

They all widened their eyes and watched with rapt attention, afraid to miss a single action.

Unlike other alchemists, Master Tang's movements were very simple. There wasn't a single trace of fancy technique, but he was very fast.

"His pill technique ... Seems simple, but it's not simple at all. This is a realm that can only be achieved when a pill technique has been tempered to the extreme and returned to its original state!"

"He's really at the point of perfection!"

The more everyone watched, the more amazed they were.

Before this, they still had some doubts in their hearts, but at this moment, this trace of doubt was completely gone.

At this moment, there was only admiration and respect in their hearts.

In the center of the hall, Tang Hao was focused on controlling the pill cauldron in front of him.

The refining process went very smoothly. Although he had deliberately slowed down to demonstrate to the alchemists, the time he took to refine the divine pill was two or three times shorter than when he had refined it before.

This was all thanks to the improvement of his cultivation. Back then, he was only at the 1st tribulation. Now, he was at the 5th tribulation, so it was easier for him to refine it.

After the refinement was completed, it was the most important step, the fusion.

There were hundreds of materials, and every one of them had very strong medicinal properties. It was extremely difficult to successfully fuse them.

No matter how careful Tang Hao was, he still made a mistake. The fusion failed halfway.

Bang!

With a soft sound, the furnace exploded.

Tang Hao's mouth twitched. He was a little annoyed.

The hall was in an uproar, boiling with excitement.

No one laughed at him. They were all amazed.

It was already amazing that the fusion failed halfway.

Following that, they closed their eyes and began to ponder. They recalled every move that Master Tang had made. Some of them frowned and thought hard, revealing a puzzled expression, as if they had encountered a difficult problem. Some of them seemed to have realized something and were overjoyed.

After a short rest, Tang Hao continued with his work.

This time, he still slowed down his movements a little, allowing these alchemists to observe.

The refining process went smoothly, but at the end of the fusion, when he was just missing a few materials, the furnace exploded again.

Tang Hao rested for a while, then opened the furnace again.

With the previous two attempts, this time was exceptionally smooth. He successfully fused all the materials and entered the pill forging step.

At this point, it basically meant that the pill had been completed.

“Success! It’s done!”

The crowd only reacted after Tang Hao had finished calcining the metal. They exclaimed in surprise.

They found it hard to believe. This was only the third time, and it had actually succeeded. It was really out of their expectations.

Then, they were overjoyed.

Fu Yunzi, in particular, stood up from the ground. He was so excited that his entire body was trembling.

Once this divine elixir was formed, the gate of fortune would have another divine body!

“I need to inform the sect master of this good news!”

He quickly sent out a voice transmission talisman and flew to the main peak.

“Done? Hahaha! That’s great!”

After receiving the news, Zao Huazi slammed the table and stood up, laughing in joy.

He immediately set out and rushed to the pill Palace, ready to witness the moment the pill was formed.

“What? The pill is done?”

“The third time? This is unbelievable!”

Soon, the other elders received the news and rushed over from the peaks, waiting in the hall.

As time passed, they became more and more excited.

Finally, the pill cauldron shook and a ray of light shot up into the sky, penetrating the top of the pill Hall and straight into the sky.

Immediately after, Thunder rumbled, and the sky changed dramatically.

This was the pill tribulation.

“It’s the pill tribulation!”

Everyone cried out in alarm and became somewhat nervous. They were afraid that the pill couldn’t withstand the pill tribulation and would be shattered. If that happened, all their efforts would be in vain.

However, their worries were unnecessary. Facing the Tribulation lightning, the light from the cauldron rushed up to the sky and met it.

No matter how fierce the lightning tribulation was, it was still alive and kicking. It didn’t look like it was going through a tribulation, but more like it was playing around.

This left everyone dumbfounded. They had never seen such a powerful pill that could face pill tribulation with such ease.

BOOM! BOOM!

After 49 strikes, the lightning of tribulation finally dispersed.

Then, with the mountain as the center, all the spiritual Qi and immortal Qi in the entire mountain range gushed toward the divine elixir.

This strange phenomenon lasted for a full 15 minutes.

When the phenomenon disappeared, the divine elixir fell down. When everyone looked at it, it was a cloud of seven-colored mist, as dazzling as the nine heavenly stars.

It gathered and dispersed at times. At times, it condensed into a crystal-clear medicinal pill, and at other times, it dispersed and turned back into mist.

“It’s done!”

“That’s great!”

Everyone cheered.

“Master Tang, you’ve worked hard!” Zao Huazi and the others quickly came forward to greet him. They also used the honorific of master.

After resting for a while, Tang Hao continued and finished the remaining two sets of ingredients.

However, he failed twice.

” 51% is already very impressive!”

Regarding this result, Zao Huaizi and the others were already very satisfied. Originally, they didn't have much hope, and it was already a pleasant surprise to be able to get one.

After exchanging some pleasantries, Zao Huaizi and the others took the divine pills and left in joy.

They were going to pick a good disciple, preferably one of those odd-job workers, so that they could use the pill and create another divine body.

Gao Dayong had already taken the pill and successfully obtained a divine body. He had also absorbed the true dragon Bone. Now that the gate of fortune had a top genius, they would have another one if they used the pill.

These geniuses were the future hope for the gate of fortune to rise.

“Master Tang!”

After Zao Huaizi and the others left, a group of alchemists rushed forward and asked for advice.

After observing Master Tang's alchemy just now, they had a lot of doubts in their hearts.

Tang Hao was not stingy with his answers.

“I see!”

After receiving the answer, the group of alchemists seemed to have been enlightened and had looks of sudden enlightenment.

Soon, their questions were no longer limited to the nature divine pill. They brought out all the problems they had accumulated in the past and asked Tang Hao for advice.

Tang Hao answered part of the questions, but there were too many questions, so he could only decline.

“Everyone, don't worry. In a few days, I'll write down my knowledge of alchemy and various techniques. I'll compile them into a book for you to see.”

Tang Hao thought about it for a moment and came up with the idea of compiling teaching materials.

He couldn't answer everyone's questions by himself. The best way was to write down his experience and insights and let these people study it themselves.

In this way, he could also raise the level of these people and strengthen the creation alchemy Dao.

Although the Fortune alchemy Dao still had some Foundation, it was not as good as before. It was far inferior to the medicine God mountain and the Yao clan. There was only one alchemy Saint in the entire alchemy Dao.

If he wanted to restore the creation orthodoxy, this level of skill was far from enough.
