

## The Mightiest Little Peasant Chapter 1894

On the warship, everyone's expression changed.

"Don't worry, it's not a big problem! They won't go as far as to directly attack us, they'll only cause us some trouble!" Said Zao huaizi as he waved his hand.

Tang Hao's expression relaxed slightly. He breathed a sigh of relief.

He was not surprised by this. Ever since the news of him being in the creation gate spread, the Yao clan and the creation gate had their eyes on him. He had long predicted that they would make a move sooner or later.

Now, it was finally here.

The Yao clan had no enmity with the creation gate. It was all because of him. Therefore, it was unlikely that they would attack the creation gate directly. Attacking the creation gate would only cause more trouble.

"They've joined forces with all the Chamber of Commerce in the beihuang region and cut off our supply of spiritual herbs and elixirs. Now, we can't even buy the cheapest spiritual herb in the beihuang region." Said Zao Huazi.

Hearing this, the elders' faces turned ugly.

This move could be said to be quite vicious.

Although the creation sect was not large, it still had tens of thousands of people. The number of pills they needed was huge. It was impossible for them to produce so many pills by themselves. A large portion of the spiritual medicine and pills had to be purchased from outside.

Furthermore, the sect had been expanding recently, and alchemy had been developing rapidly. The demand for spiritual medicine had increased by a hundred times, and they could only rely on external purchases to satisfy it.

Now that he had cut off the supply of spiritual medicine, it was equivalent to strangling his fate alchemy Dao.

"Without spirit medicine, how are the disciples going to practice? how are they going to improve their alchemy skills?"

"The sect's few mu of medicinal fields can't satisfy you at all!"

The elders were all frowning.

The opponent's move was truly brilliant, and they didn't seem to have any way to break it.

In the desolate north, his fortune sect was not a big power. Now, those who were involved in the encirclement were all prominent clans in the desolate north. The Yao clan was also the leader. Although they were not from the desolate north, they were a Big Shot in the pill world.

This force was too powerful, so powerful that they had no way to resist.

The beggar also frowned, worried.

It wasn't easy for the sect to have the momentum to rise up, but if they couldn't break out of this predicament, everything would be for naught.

"I've implicated you all!" Tang Hao said apologetically.

"Master Tang, what are you saying!"

"That's right. If it wasn't for you, Master Tang, the creation gate wouldn't have the changes it has now!"

All the elders hurriedly said.

"We've already expected this, so it's nothing!" "That's right." Zao Huazi laughed. "The most important thing right now is to discuss how we can get out of this predicament!"

"Since they won't let us buy it in the beihuang region, we'll go somewhere else. Pangu is so big, is there really no place to buy it?"

"Yeah! Even if they don't sell it anywhere else, we just need to change our appearance and identity. How can they recognize us?"

All the elders pondered for a moment and said at the same time.

Their suggestion was to avoid the desolate north and go to the other desolate lands to buy spiritual herbs and elixirs. As long as they hid their identities, the Chamber of Commerce would not know that they were from the gate of fortune.

Besides, Pangu was so big that it was impossible for the prohibition to reach every corner. There would always be some omissions.

"This ... Is a good idea!" The shop-hand nodded and said, "however, this is not a long-term plan. Our demand for spirit medicines and elixirs will only grow. If we buy them separately, they will not be able to meet our needs."

"That's true! If we buy too much, we will definitely attract the attention of the Yao clan!"

All the elders were frowning again.

"Don't worry," Tang Hao said. "There's still a way!"

"Oh? Master Tang, do you have any good ideas?"

Everyone looked at Tang Hao with curiosity.

Master Tang's face did not show any signs of worry. Instead, he looked relaxed and at ease, as if the current predicament was not a problem at all.

"Since they won't let us buy it, we'll just grow it ourselves!" Tang Hao said with a smile.

"This ... How is this possible?"

When everyone heard this, they were all stunned and felt that it was a little ridiculous.

How could the few acres of medicine fields in the creation sect be able to supply such a huge demand?

"If we don't have enough land, we'll open it up ourselves. We'll open up as many medicine fields as the creation mountain range is big. If we don't have enough manpower, we'll recruit more medicine boys to specialize in planting medicine."

Tang Hao said.

"It's not that easy to open up a medicinal field! It takes time, and there's a medicine that also needs a long period of time. There's no time at all!"

"Yeah! It's too time-consuming!"

The elders all shook their heads.

To turn the entire mountain range into medicine fields and grow their own medicine, completely self-sufficient, this was a bit whimsical in their eyes.

Such a huge project could not be completed in a day.

"Why is it too late!" Tang Hao smiled. "I'm the best at growing herbs. If you don't believe me, you can ask elder floating cloud. I think he's read the herb-growing records I wrote."

Fu Yunzi was startled at first. Then, he revealed an excited expression.

He suddenly remembered that not only was Master Tang's alchemy skills superb, but he was also very accomplished in the field of medicine planting. In the alchemy Encyclopedia, there was a special chapter on medicine planting, which mentioned many magical secret techniques.

As long as he used these secret techniques, Master Tang's plan would definitely be realized.

"Master Tang is right, this plan is feasible! I've never seen anyone better than Master Tang in the field of herb cultivation!" Fu Yunzi said excitedly.

"Actually, I've had this idea for a long time. However, I didn't think it was necessary at that time, so I didn't say it out loud. Now that the opponent has forced us to this point, we can only do it ourselves."

“We’re not just going to plant them, we’re going to plant special herbs. After satisfying ourselves, we’re going to sell them and turn our nature pill Dao into the largest spirit herb base in the entire Northern wilderness, or even the entire Pangu continent.”

Tang Hao said boldly.

There was a strong sense of confidence in his tone.

He was too good at growing herbs. Back in the first continent of Qiyuan, he had personally established the Shennong Valley organization and developed it into a Holy Land for herb farmers.

The conditions of the mountain range of fortune were good. Not only was the land fertile, but it was also full of immortal Qi, making it very suitable for planting herbs. With some slight modifications and arrays set up, it would become a top-notch fertile land.

He also had many secret techniques that could shorten the growth cycle of spirit herbs.

At first, Zao Huazi and the others were still a little suspicious, but after seeing Master Tang’s confidence, they began to believe him.

Master Tang had once created a miracle. In a short one and a half months, he had brought earth-shaking changes to the gate of fortune. So, it was not strange for another miracle to happen.

They were even more excited and filled with anticipation.

“Good! Then we’ll do as Grandmaster Tang says. Once we return to the sect, we’ll begin immediately. All the elders and disciples will listen to Grandmaster Tang’s orders.” Said Zao Huazi excitedly.

With that, he steered the ship and returned to the sect at the fastest speed possible.
