

The Mightiest Little Peasant Chapter 2193

After leaving the Thunder clan, Tang Hao went around the wilderness and found many divine relics.

In his gods Palace, there were more than ten new god statues.

This rotation took another month.

It had been a full eight months since the great Yan immortal Palace was born.

In these eight months, the outside world was quite peaceful.

The waves caused by the great Yan immortal Palace's appearance had long subsided.

"Time to go back!"

Tang Hao returned to the gate of fortune after walking around.

The immortal abode had been Reforged, and he suddenly had a lot more free time. Every day, he would accompany sister Xiangyi and the others, take care of the herb garden, cultivate the divine fruits of creation, and divine herbs. Every time the divine fruits ripened, he would pick them and refine them into pills.

He did some calculations. Ever since he started to refine the creation divine pill, he had refined almost 400 pills. In other words, the creation sect already had nearly 400 geniuses with the creation divine body.

He was already very close to his target of 500.

"Let's work harder and complete our goal as soon as possible. Then, I can focus on cultivating the Sage's fruit!"

Tang Hao distributed more celestial water to the divine Tree of creatures to speed up the cultivation.

He would also ask Yun qingzi about the situation of those divine bodies from time to time.

"The sect is not short of resources now. All of them have improved very quickly. In a few months, they can go from a small Jindan to a 5th tribulation. Now, most of the divine bodies are at this cultivation."

"From the fifth to the sixth calamity, it's a bit difficult. Even for a divine body, it's not easy to pass through. This calamity requires enlightenment and it depends on one's comprehension ability. In the first batch of divine bodies, a few have already broken through to the sixth calamity, but most of them are stuck here and are still in the process of enlightenment."

"Although most of them are at the 5th tribulation, their combat power is not ordinary. They all have the divine body of creation and treasures like the bones of saints and gods. In addition, they have a body of

7th tribulation armor and 8th tribulation weapons. Their combat power is comparable to an ordinary 6th tribulation.”

Yun qingzi was very satisfied with this batch of divine bodies.

More than 400 divine bodies!

Even when the gate of fortune was at its peak, it did not have so many divine bodies!

In the ancient times, the gate of fortune had at most a hundred divine bodies, and they were enough to intimidate Pangu. If all of them were to grow, how powerful would the gate of fortune become?

Perhaps, it would be even more glorious than the ancient times!

Every time he thought of this, Yun qingzi would be extremely excited.

More than ten years ago, the gate of fortune was still extremely weak and didn't even have a single divine body. But now, they had 400. This was simply a miracle!

“Not bad!”

Tang Hao was very satisfied.

The aptitude of these divine bodies did not disappoint him. Most of them were at the fifth tribulation and were stuck above the Dao tribulation. As long as he could refine the great Yan golden pill, it would pave the way for them to advance smoothly.

At that time, the gate of fortune would have an additional 400 to 500 sixth tribulation experts!

This number was extremely terrifying!

One must know that an ordinary clan would only have a few dozen 6th tribulation lightning tribulation Warriors. For example, the Jiang clan and the Shi clan might have more of them, but they wouldn't have that many.

The gate of fortune already had over 200 6th tribulation experts, which was already shocking enough. If there were another 400 to 500, it would be even more amazing.

Even the thirty-three heavens could not compare to 600 to 700 sixth tribulation powerhouses.

What was even more terrifying was that four to five hundred of them had creation divine bodies. Even the 33 heavens would be shocked and even afraid.

In his spare time, Tang Hao would organize the ancient books and encyclopedic books on arrays and crafts with the other split souls.

Every one or two days, Tang Hao would open his heaven's eye to spy on the whereabouts of old demon blood Yin and the others.

However, he had not gained anything, so he ignored it and continued to cultivate in peace.

Over at the Ling clan's side, there would be people delivering materials from time to time. They were all the materials for the great Yan golden pill that the Ling clan had gathered from all over the world.

Every time he received the materials, Tang Hao would save them up.

The materials required for the Golden Dayan pill were too many. It took Tang Hao two months to collect all the materials and produce more than twenty sets of materials.

Tang Hao immediately started the furnace.

Compared to the creation divine pill, the great Yan golden pill was much more difficult to refine. But with Tang Hao's current level, it was not a problem. After wasting a few furnaces in the beginning, he mastered the technique and successfully refined one.

With the first pill, the rest was simple. Basically, nine out of ten batches would be completed.

Out of the 20 sets of materials, he had refined 17 pills in total.

He gave a few of them to sis Xiangyi and the others. Most of them were still stuck at the Dao tribulation. With these pills, they could smoothly pass the sixth tribulation. With some divine medicine, they could improve their cultivation to the peak of the sixth tribulation.

Next, it was blood coagulation.

Tang Hao had been prepared for this.

He had taken a lot of blood from young master Taixu, including the blood of the ancient sky Fox and the ancient Golden Lion. He could give them to them.

"As for the remaining pills, give three to the Ling clan and the rest to the batch of divine bodies."

Tang Hao called Yun qingzi over and distributed the pills.

Yun qingzi took the pill and left excitedly.

After the Ling clan received the pill, Ling Zhanxu brought Lord Ling along and made a trip down personally to bring more materials.

The Ling clan had always placed great importance on the great Yan golden pill. They had used the power of all the Chambers of Commerce to gather the materials. They originally thought that the first batch of materials would definitely be wasted and used for practice.

However, he did not expect that the creation sect would directly give him three great Yan golden pills.

These three Grand Yan golden pills had shaken their entire Ling clan!

The elders of the Ling clan were in disbelief.

They had only sent over twenty sets of materials. Even if it was not divine Lord Tang's first time, it was impossible for him to make three pills!

After all, this was a divine pill!

Moreover, the gate of fortune had given them three pills, which meant that they could not have only refined three pills. They had to have refined at least six pills. Otherwise, the gate of fortune would not have been willing to give them up.

Over twenty sets of materials had been refined into six pills!

The success rate was unbelievably high!

After the initial shock, they went crazy!

They all understood that this was a once-in-a-thousand-years opportunity for their Ling clan and they had to grasp it.

They mobilized all the power in their race and began to collect the materials at all costs.

Soon, the materials were sent in a steady stream.

Tang Hao kept opening the furnace, and one after another, the Golden pill of Dayan was born in his furnace.

The Ling clan will take 30% and the creation sect will take the remaining 70%.

These pills were sent to the ancestral land and to the divine bodies.

News of godly bodies breaking through kept coming. In order to keep it a secret, these godly bodies were brought to all parts of the world to undergo tribulation.

In just a few months, the number of divine bodies that had broken through had reached 200.

At this time, the number of sixth tribulation cultivators in the gate of fortune had reached more than 500. Half of them were divine bodies. After investing a lot of resources, the abilities of these divine bodies broke through again. Most of them had advanced to the middle and late stages of the sixth tribulation. For example, Gao Dayong and the others had long perfected their cultivation.

In these few short months, the power of the gate of fortune had soared. Their 6th tribulation strength had increased by several times.

During this period, there were also many elders who were originally perfected six tribulations who obtained a few Grand Yan golden pills and comprehended more great DAOs. They began to enter seclusion to attempt the blood solidification realm.

In addition to Daoist yinfeng and the others who had already gone into seclusion, the number of people who were in seclusion to break through to the blood solidification realm had reached more than ten.

Once these people succeed in condensing blood, the sect will have more than a dozen seven tribulation experts.
