

## The Mightiest Little Peasant Chapter 2333

“Senior, junior has many questions in his heart. I wonder if I can ask senior for advice?”

Tang Hao said after some consideration.

“Oh? What doubts do you have? Is it a problem with cultivation?” Shangyang Zhenren said.

Tang Hao shook his head. “It’s about the ancient times. What exactly happened back then? why did they have to move out of Earth? what’s the origin of the so-called Dragon count divine clan? And is there any other world outside of Pangu world?”

Tang Hao asked all the questions in his mind.

These questions had troubled him for a long time.

“You sure have a lot of questions!” Shangyang Zhenren smiled.

He paused to sort out his thoughts and said, “It’s a long story about the ancient times ... In the ancient times, the divine Dao, the immortal Dao, the demon Dao, and the Buddhist Dao were all extremely prosperous. After many years of struggle, they all coexisted in peace.”

“By the way, there are also the gods of the Western world. At that time, there were many conflicts between the East and the West, but both sides were very restrained. There were no large-scale conflicts, and it was generally peaceful.”

“Such a peaceful situation comes from the balance of power between all parties. There are Saint-level figures on all sides, so there is no fighting. But later, this balanced situation was broken, and the one who broke this situation was the Dragon count clan.”

“Dragon counts were originally a race that wasn’t very eye-catching. Because they had huge bodies and immense strength, they were enslaved by the immortals. They were like slaves in the immortal world.”

“However, no one expected that one day, the bloodline of this unremarkable race would evolve due to some unknown fate. Their bloodline improved by leaps and bounds, surpassing all the gods of that time.”

“They also have a terrifying divine ability, and that is to devour. They devour all energy that can be devoured. With this divine ability, they rose rapidly and devoured all treasures, living beings, and energy. They can devour everything. The more they devour, the stronger they become.”

“Among them, people who could rival the strongest of all places gradually appeared and became their leaders. Under the leadership of these people, the Dragon count clan devoured everywhere and continued to grow.”

“At that time, there was still a chance to suppress them. As long as the leaders of all parties joined forces and did their best to kill them, they could still suppress them. However, they did not do so. At that time, all the parties had their own plans and ulterior motives.”

“It was exactly because of this that the Dragon count clan was given the opportunity to grow stronger. They devoured everything, even true immortals and gods fell into their hands. They became stronger and stronger, and their clans grew more and more. The situation was completely out of control.”

“The Dragon count clan called themselves the New Gods and wanted to kill all the ancient gods. All the immortals, Buddhas, and demons were their targets. Even the Western clan was killed by them.”

“The Western divine world was destroyed overnight. The various master gods and angels were all massacred. Most of them were swallowed alive ...”

“It was also the destruction of the Western divine world that facilitated the Alliance of various forces in the eastern world. The gods, Buddhas, Immortals, and demons used all their strength to fight the final battle against the Dragon count clan. That battle caused the heavens and earth to collapse. The entire heaven and earth shattered, and many saints fell. The heaven wept blood.”

“We have lost this battle, but the Dragon count clan has also suffered great losses. In order to preserve their strength, they retreated.”

“After this battle, the ancient heaven and earth had completely collapsed and could not be restored. Therefore, a group of powerful beings at that time used divine arts to mix the fragments of heaven and earth together, refining them into stars and turning them into an endless starry sky.”

“The ancestral land is one of them. The mortals who survived were all placed there.”

“There’s another piece called Qiyuan. Under the leadership of Emperor Pan, Emperor Yan, and the other mighty figures, all the inheritances were moved here to recuperate and recover their vitality.”

“However, not long after, the Dragon count clan made a comeback and attacked Qiyuan.”

“This battle was even more brutal. In the end, many Almightyies burned their life force to force the Dragon count clan back. Countless Almightyies died in that battle ...”

“Before these Almightyies’ lives were completely burned out, they created an unbreakable barrier that separated this heaven and earth from the Dragon Count’s world. That’s why I haven’t seen the Dragon count clan all these years.”

“Not long after this battle, all the great inheritances were moved out of the broken Qiyuan and entered the starry sky, and even created this Pangu continent.”

“I’m sure you know what happened after that. ”

Tang Hao was a little dazed when he heard that.

Although this senior’s words were a little dull, the content was magnificent. He could imagine how tragic and tragic those few battles were.

In a daze, he recalled the scene he had seen in Kunwu when he had dreamed back to the ancient times. The master of Kunwu had burned himself to severely injure Dragon count. The tragedy of that scene was still deeply imprinted in his mind.

“So it’s like this!”

After being stunned for a while, he finally came back to his senses. He muttered and let out a long breath.

After listening to this senior’s introduction, everything connected!
