

The Mightiest Little Peasant Chapter 2400

“The flesh and blood of an eight tribulation primeval bloodline can cultivate at least two to three hundred thousand blood cultivators. I have nearly six of them, so I can cultivate at least one thousand two hundred thousand blood cultivators.”

Tang Hao estimated.

He had calculated the amount based on ordinary immortal blood. If it was high-grade immortal blood like his chaos immortal blood, the amount might be less.

“The blood of those cultivators in the ancestor’s land is not ordinary. Even if there are a thousand of them, this flesh and blood is enough to raise all of them to the thousand blood level. The extra ones can also be cultivated into a few late-stage seven tribulations.”

Tang Hao was already quite satisfied with his gains.

The venerable sovereigns also had their own gains, and it could be said that everyone was happy.

“Eh? Isn’t that old man Taixu and the others?”

While they were searching for their next target, everyone on the ship heard a loud explosion not far away. They looked over and saw the great void sect master and the others.

“Isn’t that the kid from the Liu Clan?”

When they looked again, everyone was stunned.

Previously, they were still curious about where the great void sect master and his group had gone. They did not expect that they were actually chasing after the kid from the Liu Clan.

Tang Hao’s expression turned strange.

Logically speaking, the great void sect master and the others should be after him. Why did they go after Liu heihu? What did Liu heihu do to piss off these old farts?

“You bastard, Tang kid!”

From afar, Liu heihu also noticed the divine boat. He was so angry that he cursed.

“Brother Liu, why are you scolding me?”

Tang Hao felt wronged.

“?!”

Liu heihu cursed again. He was about to explode.

F * ck! This B * stard actually had an innocent and wronged expression on his face. He was clearly the one who was wronged!

He really wanted to shout, "I'm not this bastard's partner. I have a deep hatred for him and we can't live under the same sky." But he knew that it was useless to shout now. Those old monsters didn't care about this anymore. They were only interested in the celestial artifact on him.

"Just you wait, Tang kid!"

Liu heihu roared and ran away.

He didn't dare to use his immortal weapon against the pursuers behind him. Six old monsters were already enough, and he didn't want to attract more.

The great void sect master and the others also slowed down. They didn't want to force the kid to reveal his immortal artifact, which would attract the attention of the spirit treasure sect master and the others.

They chased each other and passed by the divine boat.

"There's something strange!"

"Could it be that the brat of the Liu family has obtained some kind of amazing opportunity?"

On the ship, the venerable sovereigns watched them leave and discussed in low voices.

The eyes of Jin Lin, Xu Yuan, and the other old monsters lit up.

"Forget it, I'd better not get involved!"

They hesitated for a moment and decided not to go with him. After all, there were six venerable sovereigns there. Even if the boy had some treasure, it would not be easy to snatch it. Besides, the boy of the Liu family was not simple. The six venerable sovereigns had been chasing him for so long without any success. It would be useless for them to go there.

"I see brother Liu is still alive and kicking. He should be fine!"

Tang Hao said to the elder behind him.

The elder of the Liu Clan laughed bitterly.

He was well aware of The Grudge between heihu and this man. Even if divine Lord Tang was willing to help, heihu would not accept it.

"I think black Tiger will be fine too."

He said with a nod.

He had some confidence in the black Tiger's strength. Moreover, that senior had also come and was now on the eighth floor. If the black Tiger really couldn't hold on, that senior would also help.

"Hurry up and find the next one!"

"Yes, hurry up and find a few more drops of star dew!"

Soon, Thearch golden scales and the others began to urge him. Time was limited, so they had to make the best use of it and collect as many treasures as possible before the trial ended.

In particular, only two drops of star dew had been produced so far, and they had been taken by Xu Yuan and Ling Bao. The other venerable sovereigns were envious.

With the star dew, they would have the chance to break through the second aperture and improve their cultivation.

Tang Hao quickly maneuvered the divine boat to look for his next target. He wanted more flesh and blood to cultivate more disciples.

In the next few days, they killed a lot of primitive bloodlines. After failing to find a ferocious beast with one aperture, they set their sights on those with two apertures or even three apertures. Although these ferocious beasts were not easy to deal with and they could not kill them, most of them had treasure chests in their nests.

Their target was these treasure chests.

He first sent out a few venerable sovereigns to draw the beasts away. Then, it was time for Tang Hao to sneak into the nest and steal the treasure chest with ye Cha.

The success rate was not high and it was extremely dangerous. Out of ten attempts, they only succeeded three times. In the three treasure chests, they obtained two drops of star dew, which made the venerable sovereigns extremely happy.

That day, they did the same thing. They lured the beasts away while Tang Hao sneaked into the cave and stole the treasure chest.

Just as he was crawling out of the nest, he suddenly heard a loud boom coming from the nine Heavens above.

A strange phenomenon suddenly appeared between heaven and earth.
