

The Mightiest Little Peasant Chapter 2522

“You ... You must be mistaken!”

The old man’s hand that was holding the token was trembling.

He kept swallowing his saliva and his eyes widened as he stared at the long string of numbers on the token in his hand.

This amount ... How was it possible!

There must be a mistake somewhere!

He had been on duty in the Holy sanctum for five to six hundred years, but he had never seen such an astonishing number!

Moreover, this was a newbie’s token!

“There’s no mistake!”

Supreme Xuan Hong smiled bitterly.

The old man was stunned when he heard that.

Since the Supreme venerable had said it himself, there was no problem with the amount. However, how could he, a new venerable sovereign, earn 100000 merit points in four months? This was too unbelievable!

He raised his head and looked at the young man in front of him blankly.

“Cough! Go and get the booklet! Let him see!”

Supreme Xuan Hong coughed lightly and reminded.

Only then did the old man come to his senses. He hurriedly turned around, took out a golden booklet, and presented it to her.

“How many aperture opening pills do you have in your Treasury?”

Tang Hao asked as he took the booklet.

“There are still twelve more in the warehouse.” The old man said.

Supreme Xuan Hong’s heart thumped when he heard this, and he had a bad premonition.

Sure enough, the next moment, the kid waved his hand and shouted heroically, “Bring them all over!”

“Cough! Elder Tang, you’ve already opened six apertures, right? three pills are enough, why would you need twelve?” Supreme Xuan Hong hurriedly said.

“Hey! Aperture opening pills were divine pills, of course, the more the better! If I can’t use them all, I can give them to others!”

Tang Hao said.

He only needed three, but he still had a lot of people to feed. First, he needed to feed a clone of the origin core, then he needed to feed the mo hun brothers and the old crocodile.

Although the child-maker didn’t come up to Pangu, he still needed to go back in the future, and he also needed the aperture opening pill.

Not to mention, when sis Xiangyi and the others advanced, they would need even more.

Only twelve, that’s too little!

“But ...”

Supreme Xuan Hong was a little anxious.

The supply of aperture opening pills had always been a little tight in the sacred Hall because it was too difficult to refine. It wasn’t just the problem of the materials, but also the difficulty of refining it. In the entire sacred Hall, there were only a few alchemists who could refine this pill.

Furthermore, it would take a long time to refine one.

Therefore, the stock of aperture opening pills had been hovering around a dozen.

If they were all exchanged at once, the supply would collapse. At least, there would be no venerable sovereigns who could exchange for aperture opening pills for a few months.

“What, is there a rule that says you can’t change it?”

Tang Hao said.

Supreme Xuan Hong was speechless.

Indeed, there was no such rule in the Holy sanctum.

When the exchange rules were first designed, no one had thought that such a monster would appear in the future.

“Then that’s it! Bring them all over! Five hundred for one, so twelve of them would be six thousand contribution points. That’s too cheap!” Tang Hao mumbled after some calculations.

In an instant, the faces of Supreme Xuan Hong and the people behind him twitched.

F * ck!

500 a pill is still cheap!

For the sake of 500 merit points, they would have to work themselves to death and work hard for five to six years to earn that amount. But this person, on the other hand, did not even care about 6000 merit points.

“Animal!”

“Beast!”

They gritted their teeth and were beyond jealous.

The old man glanced at Supreme Xuan Hong. Seeing that he didn't stop him, he turned around and went into the hall at the back. After a while, he took out a golden treasure box.

The moment the box was opened, round aperture opening pills floated up, supported by spiritual light.

Gulu!

The sound of people swallowing their saliva rang out in unison from the crowd.

The gazes became extremely heated.

This was the aperture opening pill, a rare divine pill!

A single one was enough to make a great emperor break his head, but now there were twelve.

“I'll accept it!”

Tang Hao smiled delightedly. He flicked his sleeve and put the twelve pills away, along with the box.

Supreme Xuan Hong's eyelids twitched.

This kid was too unkind, not leaving a single one!

He cursed in his heart.

“Let me see what other treasures are there in the hall!” Tang Hao put the pill away, then opened the Golden Book and read it carefully.

At the hall of mission, he had seen some treasures that could be exchanged, but they were more rough. This booklet was the most complete.

“A tribulation weapon? It's boring, there's not even a single celestial artifact ...”

Tang Hao casually glanced at the weapons in front of him and flipped them over.

Supreme Xuan Hong's face twitched again as he listened.

"Spiritual medicine ... Not bad, you guys even have the creation divine fruit and the sage fruit. As expected of the Saint Palace!" Tang Hao flipped to the spiritual herbs section and scanned through them line by line. His eyes lit up.

As expected of the divine temple, there were indeed many treasures. There were many spirit herbs that even his herb garden did not have.

The creation fruit and Saint fruit that he had carefully cultivated were all on it. It was obvious that there was a fruit tree in the divine temple.

"This Dark Moon Flower and this heavenly luck grass ..."

Tang Hao listed out all the plants that he did not have in the booklet. There were three hundred types.

Although these things were rare, the exchange price was not high. Many of them could be exchanged for several stalks with one merit point.

"Why did he exchange so many plants?"

Supreme Xuan Hong felt a little strange.

Normally, only alchemists would exchange for so many plants and vegetation. Could it be that this kid was also skilled in alchemy?

No! This was impossible!

It was already unbelievable that this kid could study craftsmanship to this extent at such a young age. How could he still have the energy to study alchemy? his alchemy was probably only at an Ordinary Level!

Supreme Xuan Hong muttered to himself.

Normal xiuzhe all knew dan techniques, it was just a matter of skill. It was not strange that this kid liked plants.

"A total of 950 points!"

The old man calculated and said.

"It's not even a thousand! It's too cheap!" Tang Hao mumbled to himself. He was overjoyed.

It wasn't even 1000, and he had exchanged for so many rare herbs and perfected his own spirit herb storage. It was really worth it!

“This prodigal!”

A wave of scolding came from the crowd at the side.

In their opinion, using precious merit points to exchange for some useless plants was simply a waste!

“Star Crystal core ...”

After turning over the plants, they would find the mystical materials.

Tang Hao’s eyes glowed when he saw it.

The crystal core of a star was a precious crystal that was born from the core of a star.

This crystal was extremely hard. Moreover, it was naturally spiritual. Some top-notch nine tribulation weapons used this material. It was said that some high-quality Star Crystal cores were even used to refine fairy weapons.

The core of the Kunlun star he was in had the same material, but only a small piece.

Moreover, ordinary stars, such as dead stars without spirit Qi or stars with very thin spirit Qi, could not produce such crystals. Only high-level stars with a certain level of spirit Qi could produce such a small piece.

The higher the level of the star, the higher the probability of it being born, and the larger the size.

This crystal was the core of a star. If it was taken away, the star would die.

Therefore, this item was extremely precious.
